SECTION 00100

ADVERTISEMENT FOR BIDS

TOWN OF ORLEANS, MASSACHUSETTS

MEETINGHOUSE POND AREA COLLECTION SYSTEM AND PUMPING STATION

CONTRACT NO. 2022-01 AND SRF NO. 7150

1. The Town of Orleans, MA acting through the Town of Orleans Town Administrator will receive sealed bids for Meetinghouse Pond Area Collection System and Pumping Station, Contract No. 2022-01 and SRF No. 7150. The scope of work includes constructing approximately 19,100 linear feet of 8-inch, 10-inch, 12-inch, and 18-inch PVC gravity sewer and appurtenances, approximately 8,300 linear feet of 8-inch PVC force main and appurtenances, approximately 20,300 linear feet of 1.5-inch, 2-inch and 3-inch low pressure sewer and appurtenances and 1 Submersible Pumping Station and all appurtenances to provide wastewater service to the Meetinghouse Pond Area of Orleans, MA.

2. The Work of the Project shall be completed within 880 calendar days following execution of the Contract Document using not more than 529 working days.

3. Sealed bids will be received at the Town Administrator's Office, Orleans Town Hall, 19 School Road, Orleans, Massachusetts, 02653 until 10:00 a.m. prevailing time, on April 19, 2023 at which time and place said bids will be publicly opened and read aloud. Any bid received after this date and time will be returned to the applicant unopened. No exceptions will be made. Faxed/emailed bids will not be accepted.

   Unforeseen Office Closure – if, at the time of the scheduled bid opening, Orleans Town Hall is closed due to uncontrolled events such as fire, snow, ice, wind, or building evacuation, the bid opening will be postponed until 9:00 a.m. on the next normal business day. Bids will be accepted until that date and time.

   Bids must be submitted in a sealed envelope indicating the applicant's name and address and clearly marked "Meetinghouse Pond Area Collection System and Pumping Station, Contract No. 2022-01 and SRF No. 7150".

4. Bidding Documents may be obtained electronically from AECOM Technical Services, Inc. (ENGINEER), Attention: Ms. Amy Hunter at amy.hunter@aecom.com. Bidding Documents will be provided via e-mail as portable document format (PDF) files. Neither the Town of Orleans, MA (OWNER) nor ENGINEER will be responsible for full or partial sets of the Bidding Documents, including Addenda, if any, obtained from sources other than the Issuing Office. Partial sets of Bidding Documents will not be provided by the OWNER nor ENGINEER. Contract Documents will be available for distribution on March 8, 2023.

   Bidders will be added to the "plan holders" or prospective bidders list upon request for the bidding documents for the project.

   The Instructions to Bidders, Form of General Bid, Agreement, Plans, Specifications, Performance and Payment Bond, and other Contract Documents may be examined between the hours of 9:00 am and 3:00 pm at Town of Orleans Department of Public Works and Natural Resources, 40 Giddiah Hill Road, Orleans, MA, 02653.

   Interpretations or clarifications to questions (submitted through the ENGINEER to the attention of Ms. Amy Hunter in writing – emailed, not handwritten), considered necessary by ENGINEER in response to such questions will be issued by Addenda via e-mail as portable document format (PDF) files and delivered to all parties recorded as having received the Bidding Documents. Questions received less than seven working days prior to the date for opening of Bids may not be answered..

5. A non-mandatory Pre-bid Conference will be held on March 29, 2023 at the Orleans Town Hall, 19 School Road, Orleans, Massachusetts, 02653 at 9:00 a.m. prevailing time. Bidders will have an opportunity to view the site of the work during the non-mandatory Pre-bid Conference.

6. Each bid must be accompanied by a five (5) Percent Bid Security in the form of a bid bond, cash, certified check, treasurer's or cashier's check payable to the Owner in the amount of five percent of the bid, in accordance with SECTION 00200 - INSTRUCTIONS TO BIDDERS. If, upon acceptance of a Bid, a Bidder fails to enter into a Contract with the Town of Orleans, MA, the bid security shall be forfeited to and become the property of the Town of Orleans, MA.

   Contract payment will be by the unit price method and the lump sum price method as indicated on the Bid Proposal. No Bidder may withdraw his/her Bid prior to June 30, 2023 or the date of award, whichever shall occur first.

   The successful Bidder must furnish a 100 percent Performance Bond and a 100 percent Payment Bond with a surety company satisfactory to the Town of Orleans, MA and conforming to SECTION 00610, PERFORMANCE BOND and SECTION 00615, PAYMENT BOND.

   All bids for this project are subject to applicable bidding laws of Massachusetts, including General Laws Chapter 30, Section 39M as amended. This project shall also comply with Sections 39F, 39K, 39N, and 39O of Chapter 30 of the General Laws of the Commonwealth of Massachusetts as last revised.

7. Minimum Wage Rates as determined by the Executive Office of Labor and Workforce Development under the provision of the Massachusetts General Laws, Chapter 149, Sections 26 to 27D, as amended, apply to this project. It is the responsibility of the contractor, before bid opening, to request if necessary, any additional information on Minimum Wage Rates for those trades people who may be employed for the proposed work under this contract. Federal Minimum Wage Rates as determined by the United States Department of Labor under the Davis-Bacon Act also apply to this project.

   The Prevailing Wage Rates for those trades people who may be employed for the proposed installation work under this contract is included in the RFP documents. Prevailing Wage Rates for this project were obtain and are included in Document 00830 under Attachment A.

   A weekly certified payroll submittal shall be required of the successful bidder in accordance with MGL C149, S27B. No payments will be made by the Town of Orleans, MA until all payroll information necessary for the Town to determine compliance with prevailing wage law requirements for the time period of the payment request have been submitted.

8. Bidders are not to include in their Bid Proposal sales and compensating use taxes on materials and supplies purchased for this project. All materials used are tax exempt.

9. This Contract to be awarded as the result of this Advertisement for Bids is funded in part through the Massachusetts Department of Environmental Protection, Bureau of Resource Protection, by loans from the Massachusetts Clean Water Trust. This Contract will be subject to the Department of Environmental Protection regulations contained in 310 CMR 44.00, "DEP Selection, Approval and Regulation of Water Pollution Abatement Projects Receiving Financial Assistance from the State Revolving Fund" in effect on the date of issuance of the assistance award (DEP Project Approval Certificate) by the Department.

10. Disadvantaged Business Enterprise (DBE) goals are applicable to the total dollars paid to the construction contract. The goals for this project are a minimum of 4.2 percent D/MBE participation and 4.5 percent D/WBE participation by certified DBEs. The two low bidders shall submit completed DBE forms (EEO-DEP-190C, EEO-DEP-191C and the DBE Certification of United States Citizenship form) by the close of business on the third business day after bid opening. Failure to comply with the requirements of this paragraph may be deemed to render a proposal non-responsive. No waiver of any provision of this section will be granted unless approved by the Department of Environmental Protection (MassDEP)."

11. The project does not require the Contractor to have a DCAM Certification or MassDOT Highway Division Certification.

12. The Project requires compliance with the Massachusetts Diesel Retrofit Program (MDRP) by use of engine emission controls that are EPA certified, or their equivalent, on the off-road (non-registered) diesel vehicles/equipment used at the job site. Bidders must submit a signed and dated Statement of Intent to Comply as part of their Bid Proposal Document. Failure to comply with these MassDEP requirements may be deemed to render a proposal nonresponsive. No waiver of any provision of these MassDEP requirements will be granted unless approved by the MassDEP.

13. The Contractor shall not discriminate about the personnel employed on this project on the basis of race, color, creed, national origin, gender, sexual preference, handicap or age.

14. The Owner reserves the right to award the Project subject to appropriation.
15. The Town of Orleans, MA reserves the right to accept and/or reject any and all bids and to waive any informalities to the extent allowed by law, and to make the award as deemed to be in the best interest of the Town.

Town of Orleans, MA

Orleans Town Administrator

1.01 RECEIPT AMD OPENING OF BIDS

A. Town of Orleans, MA herein called the OWNER, will receive sealed Bids for the Meetinghouse Pond Area Collection system and pumping station, Contract No. 2022-01 and SRF No. 7150.

B. Sealed bids will be received by the Owner at the Orleans Town Hall, 19 School Road, Orleans, Massachusetts, 02653 until 10:00 a.m. prevailing time, on April 19, 2023 at which time and place said bids will be publicly opened and read aloud. Any bid received after this date and time will be returned to the applicant unopened. Any bid received from a bidder who did not attend the mandatory pre-bid conference will be returned to the applicant unopened. No exceptions will be made. Faxed/emailed bids will not be accepted.

C. If the building at which bids are to be received is closed for any reason on the date and time that bids are due, receipt of bids by the Owner will be postponed until the next business day at the time originally stated for receipt of bids.

D. Any bid may be withdrawn prior to the above scheduled time for the opening of bids or authorized postponement thereof. Any bid received after the time and date specified will not be considered. By submission of a bid, the bidder agrees that this bid shall be good and may not be withdrawn for the number of days, after the opening of bids, as stipulated in the FORM OF GENERAL BID.

E. A non-mandatory Pre-Bid Conference will be held on March 29, 2023 at 9:00 am at the Town of Orleans, 19 School Road, Orleans, MA 02653. Attendance List and Presentation will be provided to plan holders via addendum.

1.02 LOCATION AND WORK TO BE DONE

A. The location, general characteristics, and principal details of the Work are indicated on a set of drawings titled "Meetinghouse Pond Area Collection System and Pumping Station".

B. Additional drawings showing details in accordance with which the Work is to be done may be furnished by addendum from time to time during the bidding period by the Engineer, and shall then become a part of the Contract Documents.

C. The Contractor shall furnish all superintendence, labor, services, materials, equipment, plant, machinery, apparatus, appliances, tools, supplies, bailing, shoring, removal, and all other things necessary to do all work required for the completion of each item of the Work and as herein specified.

D. The Work to be done and paid for under any item shall not be limited to the exact extent mentioned or described but shall include all incidental work necessary or customarily done for the completion of that item.

1.03 PREPARATION OF BID

A. Each bid must be submitted on the prescribed form in SECTION 00410- FORM OF GENERAL BID. All blank spaces for bid prices must be filled in, in ink or typewritten, in both words and figures.

B. Enclosed with the bid shall be the following:

1) Microsoft Excel Proposal Form (hard copy in Landscape Format and ".xlsm" format copy on Thumb Drive);

2) Bid Security (5%);

3) Completed and signed Bid Proposal and Project Reference List;

4) Insurance Requirements for Inclusion in All Specifications and Contracts;

5) Statement of State Tax Compliance;

6) Certificate of Non-Collusion;

7) Acknowledgement of Principal, if a Corporation;

8) Acknowledgement of Principal, if a Partnership;

9) Certification of OSHA 10-Hour Training.

10) Massachusetts Department of Environmental Protection's Diesel Retrofit Program Statement of Intent to Comply.

11) MassDEP Appendix B - Diesel Retrofit Program

12) MassDEP Appendix E - Construction Bid Specifications – Special Provisions for Disadvantaged Business Enterprises – Massachusetts Department of Environmental Protection Division of Municipal Services

C. Each bid must be submitted in a sealed envelope bearing on the outside the name of the bidder, its address, and endorsed with the name of the project as specified in Receipt and Opening of Bids, above.

D. If forwarded by mail, the sealed envelope containing the bid must be enclosed in another envelope addressed as specified in Receipt and Opening of Bids, above.

1.04 MODIFICATION OF BIDS

A. Any bidder may modify its bid by email at any time prior to the scheduled closing time for receipt of bids, provided such transmission is received by the OWNER prior to the closing time, and, provided further, the OWNER is satisfied that a written confirmation of the modification over the signature of the bidder was mailed prior to the closing time. Email bid modifications to mailto:mmiteva@town.orleans.ma.us.

B. The modification communication shall not reveal the bid price but shall provide the addition or subtraction or other modification so that the final prices or terms will not be known by the Owner until the sealed bid is opened. If written confirmation is not received within two days prior to the closing time, no consideration will be given to the email transmission.

1.05 OBLIGATION OF BIDDER

A. At the time of the opening of bids each bidder will be presumed to have inspected the site and to have read and to be thoroughly familiar with the Contract Documents (including all addenda). The failure or omission of any bidder to examine any form, instrument, or document shall in no way relieve any bidder from any obligation in respect of its bid.

1.06 INFORMATION NOT GUARANTEED

A. All information given in the Contract Documents relating to subsurface and other conditions, natural phenomena, existing pipes, and other structures is from the best sources at present available to the Owner. All such information is furnished only for the information and convenience of bidders and is not guaranteed.

B. It is agreed and understood that the OWNER does not warrant or guarantee that the subsurface or other conditions, natural phenomena, existing pipes, or other structures encountered during construction will be the same as those indicated in the Contract Documents.

C. It is further agreed and understood that no bidder or Contractor shall use or be entitled to use any of the information made available to it or obtained in any examination made by it in any manner as a basis of or grounds for any claim or demand against the Owner or the Engineer, arising from or by reason of any variance which may exist between the information made available and the actual subsurface or other conditions, natural phenomena, existing pipes or other structures actually encountered during the construction work, except as may otherwise be expressly provided for in the Contract Documents.

1.07 BID SECURITY

A. Each bid must be accompanied by a certified check, a bid bond, cash, a treasurer's or cashier's check, payable to the OWNER, in the amount stated in SECTION 00100 - ADVERTISEMENT FOR BIDS. Such deposits will be returned to all except the three lowest responsible and eligible bidders within five days, Saturdays, Sundays, and legal holidays excluded, after the opening of bids, and the remaining deposits will be returned promptly after the OWNER and the accepted bidder have executed the Contract, or if no notice of intent to award has been presented to any bidder within 30 days, Saturdays, Sundays and legal holidays excluded, after the date of the opening of bids, upon demand of the bidder at any time thereafter.

1.08 TIME FOR COMPLETION

A. The bidder must agree to commence work on or before a date to be specified in the written "Notice to Proceed" from the OWNER and to fully complete the project within the time limit stated in Section 00410 - FORM OF GENERAL BID.

1.09 ADDENDA AND INTERPRETATIONS

A. No interpretation of the meaning of the plans, specifications or other pre-bid documents will be made to any bidder orally, and if provided orally, shall not be relied upon by bidders unless confirmed in a written addendum. All information given to bidders other than by means of the plans, specifications, or by addenda, as described below, is given informally and shall not be used as the basis of a claim against the OWNER or the ENGINEER.

B. Every request for such interpretation should be in writing (typed, not handwritten) and addressed to AECOM, Attention: Ms. Amy Hunter, sent via email at amy.hunter@aecom.com and to be given consideration must be received at least seven working days prior to the date fixed for the opening of bids.

C. Addenda will be emailed to all prospective bidders to email addresses furnished by them for such purposes. Bidders picking up sets of bid documents will be given all addenda issued to date and will be required to sign for all documents, acknowledging receipt.

D. Failure of any bidder to receive any such addendum or interpretation shall not relieve such bidder from any obligation under its bid as submitted and each bidder must confirm for itself that it has received all addenda. All addenda so issued shall become part of the Contract Documents.

1.10 BID OPENING PROCEDURE

A. The following list of requirements shall be met by each filed bid.

B. Bids shall be filed at the place and before the time specified in Receipt and Opening of Bids, above.

C. The bid and all accompanying documents so required shall be signed by the Bidder or its authorized representative before submission.

D. All bidders shall include with their bids written acknowledgment of receipt of all addenda. Refer to acknowledgment form provided in SECTION 00410, FORM OF GENERAL BID.

E. The total dollar amount of each bid will be read, and the three apparent lowest bids will be selected for further consideration. These three apparent low bids will be read aloud for the benefit of the other bidders and the bid opening procedure will be closed. All those present at the bid opening may examine all bids after the bid opening and after the reading of the three apparent low bids.

1.11 COMPARISON OF BIDS

A. Bids will be compared on the basis of the quantities and unit and lump sum prices stated in the bid forms.

B. In the event that there is a discrepancy in SECTION 00410 - FORM OF GENERAL BID between the lump sum or unit prices written in words and figures, the prices written in words will govern.

C. The Owner agrees to examine and consider each SECTION 00410 - FORM OF GENERAL BID submitted in accordance with the terms and conditions set forth herein and as set forth in SECTION 00410, FORM OF GENERAL BID.

1.12 STATUTES REGULATING COMPETITIVE BIDDING

A. Any bid, which does not comply with the provisions of Massachusetts General Laws Chapter 30, Section 39M as amended, need not be accepted and the OWNER may reject every such bid.

1.13 RIGHT TO REJECT BID

A. The OWNER may consider informal any bid not prepared and submitted in accordance with the provisions hereof and may waive any informalities or reject any and all bids, should the OWNER deem it to be in the public interest to do so.

B. The OWNER may also reject bids which in its sole judgment are either incomplete, conditional, obscure or not responsive or which contain additions not called for, erasures not properly initialed, alterations, or similar irregularities, and may reject bids for any other reason permitted by law, or the OWNER may waive such omissions, conditions or irregularities.

1.14 ABILITY AND EXPERIENCE OF BIDDER

A. No award will be made to any bidder who cannot satisfy the OWNER that he has sufficient ability and experience in this class of work and sufficient capital and plant to enable him to prosecute and complete the work successfully within the time named. The OWNER's decision or judgment on these matters will be final, conclusive, and binding to the fullest extent permitted by law.

B. The OWNER may make such investigations as it deems necessary, and the bidder shall furnish to the OWNER, under oath if so required, all such information and data for this purpose as the OWNER may request.

1.15 CONDITIONS OF WORK

A. Each bidder must inform itself fully of the conditions relating to the construction of the project and the employment of labor thereon. Failure to do so will not relieve a successful bidder of its obligation to furnish all material and labor necessary to carry out the provisions of its contract. Insofar as possible the CONTRACTOR, in carrying out its work, must employ such methods or means as will not cause any interruption of or interference with the work of any other contractor.

1.16 SECURITY FOR FAITHFUL PERFORMANCE

A. Simultaneously with his delivery of the executed Contract, the CONTRACTOR shall furnish a surety bond or bonds as security for faithful performance of this Contract and for the payment of all persons performing labor and materials under this Contract as specified in SECTION - 00700, GENERAL CONDITIONS included herein, each in the amount of 100 percent of its bid. The surety on such bond or bonds shall be a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the OWNER. The bonds shall remain in force for one year after final acceptance of the work by the OWNER, unless the OWNER, in writing, releases the CONTRACTOR from the obligation sooner.

1.17 POWER OF ATTORNEY

A. Attorneys-in-fact who sign Contract bonds must file with each bond a certified and effectively dated copy of their power of attorney.

1.18 LAWS AND REGULATIONS

A. Applicable provisions of Massachusetts General Laws and Regulations and/or the United States Code and Code of Federal Regulations govern this Contract and any provision in violation of the foregoing shall be deemed null, void and of no effect. Where conflict between Code of Federal Regulations and State Laws and Regulations exist, the more stringent requirement shall apply

B. The bidder's attention is directed to the fact that all applicable State laws, municipal ordinances, and the rules and regulations of all authorities having jurisdiction over construction of the project shall apply to the Contract throughout, and they will be deemed to be included in the Contract the same as though herein written out in full.

C. Attention is directed to SECTION 00830 - STATE REGULATIONS and to other applicable sections of this specification. In the event of any conflict between provisions of law or regulation quoted or paraphrased in the Contract Documents, the actual provisions of law or regulation shall control.

D. Whenever it is written that an equipment manufacturer must have a specified period of experience with its product, equipment which does not meet the specified experience period can be considered, if the equipment supplier or manufacturer is willing to provide a Letter of Credit or cash deposit for the duration of the specified time period which will guarantee replacement of that equipment in the event of failure.

1.19 LIQUIDATED DAMAGES FOR FAILURE TO ENTER INTO CONTRACT

A. The successful bidder, upon its failure or refusal to execute and deliver the Contract, Bonds and Certificates of Insurance required within 10 days after receipt of notice of the acceptance of the bid, shall, except as otherwise provided by applicable law, forfeit to the OWNER, as liquidated damages for such failure or refusal, the security deposited with its bid, provided that the amount forfeited shall not exceed the difference between its bid price and the bid price of the next lowest responsible and eligible bidder.

B. In case of death, disability, bonafide clerical or mechanical error of a substantial nature, or other similar unforeseen circumstances affecting the bidder, its bid deposit will be returned.

1.20 INDETERMINATE ITEMS AND ESTIMATED QUANTITIES

A. The work to be done under this Contract has been divided into parts or items, if applicable, to enable each bidder to bid on different portions of the work in accordance with its estimate of their cost and so that the actual quantity of work executed under each item may be paid for at the price bid for that particular item, even though each bidder may have judged that such quantity may be greater or less than the estimated quantity stated in SECTION 00410 - FORM OF GENERAL BID.

1.21 CONTRACTOR RECORDS

A. The CONTRACTOR shall comply with the provisions of Massachusetts General Laws, Chapter 30, Section 39R, concerning CONTRACTOR records. This section has been reprinted in Section 00830, STATE REGULATIONS.

1.22 MINIMUM WAGE RATES – BIDDER'S RESPONSIBILITY

A. Minimum Wage Rates as determined by the Executive Office of Labor and Workforce Development under the provision of the Massachusetts General Laws, Chapter 149, Sections 26 to 27D, as amended, apply to this project. It is the responsibility of the contractor, before bid opening, to request if necessary, any additional information on Minimum Wage Rates for those trades people who may be employed for the proposed work under this contract. Federal Minimum Wage Rates as determined by the United States Department of Labor under the Davis-Bacon Act also apply to this project.

B. It is the responsibility of the Bidder, before bid opening, to request if necessary, any additional information on Minimum Wage Rates for those trades people who may be employed for the proposed work under this contract.

1.23 BIDDER CERTIFICATION – OSHA TRAINING

A. All employees who work on Massachusetts public works construction sites, on projects estimated to cost more than $10,000, must have no less than ten (10) hours of OSHA- approved safety and health training.

B. The Massachusetts Attorney General is authorized to restrain award of construction contracts to any contractor who is in violation of this requirement and to restrain the performance of these contracts by non-complying contractors.

C. Noncompliance with this law will disqualify contractors from bidding on public contracts.

1.24 SALES TAX EXEMPTION

A. Materials and equipment purchased for permanent installation in this project will be exempt from the Massachusetts Sales and Use Tax. The exemption certificate number will be furnished to the Contractor. Each bidder shall take exemption into account in calculating his/her bid for the work.

1.25 GUARANTEE

A. The Contractor guarantees that the Work and Services to be performed under the Contract, and all workmanship, materials and equipment performed, furnished, used or installed in the construction of the same shall be free from defects and flaws, and shall be performed and furnished in strict accordance with the Drawings, Specifications, and other contract documents, that the strength of all parts of all manufactured equipment shall be adequate and as specified and that the performance test requirements of the Contract shall be fulfilled. This guarantee shall be for a period of one year from and after the date of completion and acceptance of the Work as stated in the final estimate. If part of the Work is accepted in accordance with that subsection of this AGREEMENT titled "Partial Acceptance", the guarantee for that part of the Work shall be for a period of one year from the date fixed for such acceptance.

B. If at any time within the said period of guarantee any part of the Work requires repairing, correction or replacement, the Owner may notify the Contractor in writing to make the required repairs, correction or replacements. If the Contractor neglects to commence making such repairs, corrections or replacements to the satisfaction of the Owner within seven (7) days from the date of receipt of such notice, or having commenced fails to prosecute such Work with diligence, the Owner may employ other persons to make said repairs, correction or replacements, and charge the costs, including compensation for additional professional services, to the Contractor.

C. It is expressly understood, however, that these guarantee provisions shall not absolve the Contractor from any liability to the Owner arising out of a failure to substantially complete the work in accordance with the Drawings and Specifications.

1.26 BONDING AND INSURANCE

A. The Contractor must furnish Performance and Payment Bonds, each of which shall be in an amount not less than one hundred (100) percent of the contract price. Contractors should obtain such construction insurance (e.g., Fire and Extended Coverage, Workmen's Compensation, Public Liability and Property Damage, and "All Risk" Builder's Risk) as indicated in the Supplemental Conditions (Section 00800).

1.27 HEALTH AND SAFETY REGULATIONS

A. This project is subject to all the Health and Safety Regulations (CFR 29 Part 1926 and all subsequent amendments) as promulgated by the U.S. Department of Labor on June 24, 1974. Contractors are urged to become familiar with the requirements of these regulations, as well as the Occupational Safety and Health Administration's (OSHA) 29 CFR 1910.120.

1.28 BUY AMERICAN

A. This project is subject to the American Iron and Steel requirements of P.L. 113-76, the Consolidated Appropriations Act of 2014.

1.29 ACCESS TO THE PROJECT

A. The successful Bidder shall provide full and complete access to the project site or any portion thereof by any authorized agent of the Town of Orleans any time during normal working hours throughout the duration of the Contract.

1.30 TRAFFIC POLICE

A. Traffic control, when required by the Chief of Police or the Owner, will be paid for by the Owner. The Contractor is required to directly coordinate all Police details.

B. Any police overtime expenses incurred by the Town due to the Contractor working longer than the specified normal workday (ten consecutive hours, Sundays, or holidays) shall be the responsibility of the Contractor, the cost of which will be deducted from the monthly pay requisition. The Contractor will also be charged for any police expenses when police coverage is requested or scheduled in advance by the Contractor, but the Contractor does not work.

1.31 THIRD PARTY WORK

A. The Contractor is responsible for maintaining a safe and secure worksite at all times, and for expeditiously repairing any damage done to private property. If, in the opinion of the Owner, the Contractor is negligent in these duties the Owner shall have the right to employ a third party to remedy the problem.

B. Situations which develop and require the services of and payment to a third party will be handled in the following manner:

1) The Contractor will be given a reasonable period of time determined at the discretion of the Owner to remedy the situation without third party involvement. If the Contractor is unavailable, the Owner will authorize work by a third party on the Contractor’s behalf;

2) Third party work authorized on the Contractor's behalf by the Owner shall be paid for by the Contractor within a reasonable time period (generally two weeks). If payment is not made within a reasonable time period the Owner will make payment and deduct the cost from the next pay requisition; and

3) In the case of inadequately secured worksites necessitating extra or increase police details or other public safety personnel, the following procedure will be followed. The Contractor (if available) will be notified that the worksite needs to be secured in order to prevent the need for weekend/night police coverage. If the area is not immediately secured as determined by the Owner or Engineer, a police, fire, or highway department detail will be used and the Contractor will be charged for the cost. It is understood that in many instances worksites cannot realistically be secured to a point where police or other safety personnel are not needed. In these instances, the Owner will continue to pay for the coverages.

1.32 AWARDING AUTHORITY AND PROJECT ADMINISTRATOR

A. The Awarding Authority for this Project is the Town of Orleans, MA, acting through , Town Administrator, 19 School Road, Orleans, MA 02653.

B. The Project Administrator for this Project is the Town of Orleans acting through Thomas Daley, Director of Public Works & Natural Resources, 40 Giddiah Hill Road, Orleans, MA 02653.

1.33 SAFETY AND HEALTH REGULATIONS

A. This project is subject to the Safety and Health Regulations of the U.S. Department of Labor set forth in Title 29 CFR, Part 1926 and to all subsequent amendments, and to any applicable Massachusetts regulations. Contractors shall be familiar with the requirements of these regulations.

1.34 MANUFACTURER'S EXPERIENCE

A. Whenever it is written that an equipment manufacturer must have a specified period of experience with his product, equipment which does not meet the specified experience period can be considered if the equipment supplier or manufacturer is willing to provide an "Efficiency Guarantee Bond" or cash deposit for the duration of the specified time period which will guarantee replacement of that equipment in the event of failure.

1.35 DIESEL RETROFIT PROGRAM

A. This project is subject to the requirements of the Department of Environmental Protection's Diesel Retrofit Program. Bidders must submit a signed and dated Statement of Intent to Comply form as part of their bid proposal documents.

END OF DOCUMENT

SECTION 00310

BID BOND

Know all men by these presents, that we, the undersigned, _____

_____ as Principal, and _____

as Surety, are hereby held and firmly bound unto the Town of Orleans, MA, 19 School Road, Orleans, MA 02653 hereinafter called "Owner", in the penal sum of five (5) percent of the value of the Bid for the payment of which, well and truly to be made, we hereby jointly and severally bind ourselves, successors and assigns.

Signed, this _____ day of _____.

The Condition of the above obligation is such that whereas the Principal has submitted to the Town of Orleans, MA, 19 School Road, Orleans, MA 02653, hereinafter called "Owner", attached hereto and hereby made a part hereof to enter into a Contract in writing for Contract No. 2022-01, Meetinghouse Pond Area Collection System and Pumping Station.

Now, therefore,

(a) If said Bid shall be rejected, or

(b) If said Bid shall be accepted and the Principal shall execute and deliver a Contract in SECTION 00520, AGREEMENT attached hereto (properly completed in accordance with said Bid) and shall furnish a Bond for its faithful performance of said Contract, and for the payment of all persons performing labor or furnishing materials in connection therewith, and shall in all other respects perform the agreement created by the acceptance of said Bid, then this obligation, shall be void, otherwise the same shall remain in force and effect; it being expressly understood and agreed that the liability of the Surety for any and all claims hereunder shall, in no event, exceed the penal amount of this obligation as herein stated.

The Surety, for value received, hereby stipulates and agrees that the obligations of said Surety and its Bond shall be in no way impaired or affected by any extension of the time within which the Owner may accept such Bid and said Surety does hereby waive notice of any such extension.

In witness whereof, the Principal and the Surety have hereunto set their hands and seals, and such of them as are corporations have caused their corporate seals to be hereto affixed and these presents to be signed by their proper officers, the day and year first set forth above.

Principal	Surety
Principal Signature	Surety Signature

Important - Surety companies executing Bonds must appear on the Treasury Department's most current list (Circular 570 as amended) and be authorized to transact business in the State where the Project is located.

EJCDC
ENGINEERS JOINT CONTRACT DOCUMENTS COMMITTEE

PENAL SUM FORM

1. Bidder and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to pay to Owner upon default of Bidder the penal sum set forth on the face of this Bond. Payment of the penal sum is the extent of Bidder's and Surety's liability. Recovery of such penal sum under the terms of this Bond shall be Owner's sole and exclusive remedy upon default of Bidder.
2. Default of Bidder shall occur upon the failure of Bidder to deliver within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents.
3. This obligation shall be null and void if:
   3.1 Owner accepts Bidder's Bid and Bidder delivers within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents, or
   3.2 All Bids are rejected by Owner, or
   3.3 Owner fails to issue a Notice of Award to Bidder within the time specified in the Bidding Documents (or any extension thereof agreed to in writing by Bidder and, if applicable, consented to by Surety when required by Paragraph 5 hereof).
4. Payment under this Bond will be due and payable upon default of Bidder and within 30 calendar days after receipt by Bidder and Surety of written notice of default from Owner, which notice will be given with reasonable promptness, identifying this Bond and the Project and including a statement of the amount due.
5. Surety waives notice of any and all defenses based on or arising out of any time extension to issue Notice of Award agreed to in writing by Owner and Bidder, provided that the total time for issuing Notice of Award including extensions shall not in the aggregate exceed 120 days from the Bid due date without Surety's written consent.
6. No suit or action shall be commenced under this Bond prior to 30 calendar days after the notice of default required in Paragraph 4 above is received by Bidder and Surety and in no case later than one year after the Bid due date.
7. Any suit or action under this Bond shall be commenced only in a court of competent jurisdiction located in the state in which the Project is located.
8. Notices required hereunder shall be in writing and sent to Bidder and Surety at their respective addresses shown on the face of this Bond. Such notices may be sent by personal delivery, commercial courier, or by United States Registered or Certified Mail, return receipt requested, postage pre-paid, and shall be deemed to be effective upon receipt by the party concerned.
9. Surety shall cause to be attached to this Bond a current and effective Power of Attorney evidencing the authority of the officer, agent, or representative who executed this Bond on behalf of Surety to execute, seal, and deliver such Bond and bind the Surety thereby.
10. This Bond is intended to conform to all applicable statutory requirements. Any applicable requirement of any applicable statute that has been omitted from this Bond shall be deemed to be included herein as if set forth at length. If any provision of this Bond conflicts with any applicable statute, then the provision of said statute shall govern and the remainder of this Bond that is not in conflict therewith shall continue in full force and effect.
11. The term "Bid" as used herein includes a Bid, offer, or proposal as applicable.

SECTION 00410

FORM OF GENERAL BID

1. Proposal of _____ (hereinafter called "Bidder")*

   (_) a corporation, organized and existing under the laws of the State of _____

   (_) a partnership

   (_) a joint venture

   (_) a limited liability company

   (_) an individual doing business as _____

   *Check corporation, partnership, joint venture, LLC or individual as applicable.

2. To the Town of Orleans, MA (hereinafter called "Owner") regarding: Meetinghouse Pond Area Collection System and Pumping Station, Contract No. 2022-01 and SRF No. 7150.

   The Bidder, in compliance with your invitation for bids for Meetinghouse Pond Area Collection System and Pumping Station having examined the plans and specifications with related documents and the site of the proposed work and being familiar with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, hereby proposes to furnish all superintendence, labor, services, materials, equipment, plant, machinery, apparatus, appliances, tools, supplies, bailing, shoring, removal, and all other things necessary to construct the project in accordance with the contract documents, within the time set forth below, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required under the contract documents, of which this bid is a part.

   The Bidder hereby agrees that if selected as the Contractor it will commence work under this contract on or before a date to be fixed in the written "Notice to Proceed" given by the Owner to the Contractor and to fully complete the project within 880 calendar days, using not more than 529 working days.

   The Bidder further agrees to pay as liquidated damages the sum of $3,500 for each consecutive calendar day thereafter during which the work as not been fully completed beyond the contract completion date, as provided in the "Liquidated Damages" provisions of SECTION 00800 - SUPPLEMENTARY CONDITIONS.

3. Bidder acknowledges receipt of the following addenda:

No.	Dated
1	
2	
3	
4	
5	

4. Bidder agrees to perform all the work, including all incidental labor, materials and equipment necessary for the satisfactory completion of the work and in full compliance with the contents and intent of the Specifications and/or Drawings of the work.

5. Bid Proposal

   A. The BID PROPOSAL unit prices shall include all labor, materials, bailing, shoring, removal, overhead, profit, insurance, engineering costs, etc., to cover the finished work of the several kinds called for. The Bidder understands that all bids for this project are subject to the applicable bidding laws of the Commonwealth of Massachusetts, including General Laws Chapter 30, Section 39M, as amended.

   B. Bidder shall complete and submit the Proposal Form. The bidder is not allowed to submit a proposal that has been printed out and prices typewritten or written by hand. Failure to utilize the Microsoft Excel Proposal Form shall void the bid.

   C. Use of the Microsoft Excel Proposal Form

      1) Upon Opening the Microsoft Excel Proposal Form:

         a) A yellow bar will appear on the top of the screen labeled as "*Security Warning*"

         b) You must select the "*Enable Content*" button in order to properly access the file.

            1) This will enable macros in the excel file, as you must enable macros to properly view the file.

            2) If you do not enable macros, the excel document will be invalid.

         c) Manually enter the Bidder's Name in the blue box.

         d) Manually enter the Date in the blue box.

         e) Manually enter the unit cost in the blue boxes for each bid item. Allowances have already been prepopulated.

         f) The document will automatically update the cost estimates (Unit Price in Words; Extended Totals and Bid Total based on the user's unit cost input into the blue boxes for each bid item.

      2) In Order to Save the Proposal Form Document.

         a) The document must be saved as a file with macros enabled.

         b) Please save as the file type "Excel Macro-Enabled Workbook (*.xlsm)".

         c) If the file is saved incorrectly as a different file type, the document will be invalid.

      This process must be repeated for every time the document is opened and saved.

   D. Bidder shall print out in Landscape Format and submit the completed Microsoft Excel Proposal Form. In addition, Bidder shall submit the completed Microsoft Excel Proposal Form in ".xlsm" format on a Thumb Drive.

   E. In the event of a discrepancy between the price in words and the price in figures, the words shall govern. In the event of a discrepancy between the total of the items and the total stated, the total of the items shall govern.

   F. In the event of a discrepancy between the printed out completed Microsoft Excel Proposal Form and the completed Microsoft Excel Proposal Form in ".xlsm" format, the printed out completed Microsoft Excel Proposal Form shall govern.

   G. Interlineation, alteration or erasure may void the bid.

   H. Bid security is attached in the sum of five percent (5%) of the total bid in accordance with the conditions of SECTION 00200 - INSTRUCTIONS TO BIDDERS. The bid security may become the property of the Owner in the event the contract and bond are not executed within the time set forth above.

   I. The undersigned states that no officer, agent or employees of the Owner directly or indirectly has a financial interest in this Bid.

6. The time period for holding bids, where Federal approval is not required is 30 days, Saturdays, Sundays and legal holidays excluded, after the opening of bids and where Federal approval is required, the time period for holding bids is 30 days, Saturdays, Sundays and holidays excluded after Federal approval.

7. State Taxes - Pursuant to M.G.L.c.62C, s49A I certify under the penalties of perjury that I, to my best knowledge and belief, have filed all state tax returns and paid all State Taxes required under law.

8. Award

   A. The contract will be awarded to the lowest responsible and eligible bidder.

   B. Bidder understands that the Owner reserves the right to reject any or all bids and to waive any informalities in the bidding as deemed to be in the best interest of the Owner.

   C. The Owner reserves the right to reject any bid in the event that any bid item or items are obviously unbalanced or appear to the Owner to be so unbalanced as to affect or to be liable to affect adversely any interest of the Owner.

   D. The Owner reserves the right to reject any or all bids if it deems it to be in its best interest to do so. The Owner reserves the right to award the Contract based on sufficiency of appropriated funds to complete the work.

   E. In the event the lowest bids from responsive and responsible bidders are tied, the following methods of breaking the tie shall be employed unless otherwise provided for in these bid documents: The bidder's names shall be entered on a slip of paper and placed in a hat. The award shall then be made to the bidder whose slip is drawn from the hat. The drawing of the slip from the hat shall be performed in the presence of the tied bidders unless they waive their right to be present in writing.

9. Within 10 days of receipt of the written notice of acceptance of this bid, the Bidder will execute the formal agreement attached in SECTION - AGREEMENT and provide the requisite payment and performance bonds and certificates of insurance.

10. The selected Contractor shall furnish a performance bond and a payment bond each in an amount at least equal to one hundred percent (100%) of the contract prices in accordance with SECTION 00610 - PERFORMANCE BOND, SECTION 00615 - PAYMENT BOND, and as stipulated in paragraph 5.01 of SECTION 00700 - GENERAL CONDITIONS of these specifications.

11. The Owner reserves the right to withhold the fair market value for work not completed in addition to the retainage on work completed. Unbalanced bid items will specifically be subject to review and to this potential withholding from periodic payment applications.

12. The Undersigned, as Bidder, declares as follows:

   A. The only parties interested in this BID as Principals are named herein;

   B. The Bidder has carefully examined the site of the proposed Work and fully informed and satisfied himself as to the conditions there existing, the character and requirements of the proposed Work, the difficulties attendant upon its execution and the accuracy of all estimated quantities stated in this BID, and has carefully read and examined the Drawings, the annexed proposed AGREEMENT and the Specifications and other Contract Documents therein referred to and knows and understands the terms and provisions thereof;

   C. This BID is made without collusion with any other person, firm, or corporation;

   D. No officer, agent, or employee of the Owner is directly or indirectly interested in this BID; and

   E. Understands that information relative to subsurface and other conditions, natural phenomena, existing pipes and other structures (surface and/or subsurface) has been furnished only for his information and convenience without any warranty or guarantee, expressed or implied, that the subsurface and/or other conditions, natural phenomena, existing pipes and other structures (surface and/or subsurface) actually encountered will be the same as those shown on the Drawings or in any of the other Contract Documents and agrees that the Bidder shall not use or be entitled to use any such information made available to him through the Contract Documents or otherwise or obtained by him in his own examination of the site, as a basis of or ground for any claim against the Owner or the Engineer arising from or by reason of any variance which may exist between the aforesaid information made available to or acquired by him and the subsurface and/or other conditions, natural phenomena, existing pipes and other structures (surface and/or subsurface) actually encountered during the construction work, and has made due allowance therefore in this BID.

13. Equal Employment Opportunity/Affirmative Action Provisions - C.30 s39 (c)

A. The undersigned hereby certifies that he is able to furnish labor that can work in harmony with all other elements of labor employed or to be employed in the work.

B. The undersigned bidder hereby certifies he/she will comply with the specific affirmative action steps contained in the Equal Employment Opportunity/Affirmative Action (EEO/AA) provisions of this Contract, including compliance with the Disadvantaged Business Enterprise provisions as required under these contract provisions. The contractor receiving the award of the contract shall incorporate the EEO/AA provisions of this contract into all subcontracts and purchase orders so that such provisions will be binding upon each subcontractor or vendor.

14. Non-Debarment - C.30 s39 (a)

A. The undersigned certifies under penalties of perjury that this bid is in all respects bonafide, fair and made without collusion or fraud with any other person. As use in this paragraph the "person" shall mean any natural person, joint venture, partnership, corporation or other business or legal entity.

B. The undersigned further certifies under penalty of perjury that the said undersigned is not presently debarred from doing public construction work in the Commonwealth of Massachusetts under the provisions of Section Twenty-Nine F of Chapter Twenty-Nine, or any other applicable debarment provisions of any other Chapter of the General Laws or any rule or regulations promulgated thereunder; and is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency.

15. Suspension and Debarment

A. The EPA prohibits the use of suspended or debarred contractors and suppliers in SRF financed contracts. All SRF financed contracts and subcontracts must include the following language requiring compliance with 2 CFR 180 and 2 CFR 1532.

B. Bidders must fully comply with Subpart C of 2 CFR Part 180 and 2 CFR Part 1532, entitled responsibilities of Participants Regarding transactions (Doing Business with Other Persons). Contractors, subcontractors, or suppliers that appear on the Excluded Parties List System at www.usgovxml.com/dataservice.aspx?ds=EPLS are not eligible for award of any contracts funded by the Massachusetts State Revolving Fund.

16. Diesel Retrofit Program - The undersigned bidder hereby certifies he/she will comply with the Massachusetts Department of Environmental Protection's Diesel Retrofit Program Statement of Intent to Comply (see Appendix B).

17. The undersigned offers the following information as evidence of its qualifications to perform the work as bid upon according to all the requirements of the plans and specifications.

A. Have been in business under present name for _____years.

B. The Bidder shall state below what work of a similar character to that included in the proposed contract it has done within the last 1o years, and give references that will enable the Owner to judge its experience, skill and business standing (add supplementary page(s) if necessary).

C. The names and addresses of all persons interested in the bid (if made by a partnership or corporation) as Principals, are as follows (add supplementary page(s) if necessary):

Name	Address

18. Pursuant to M.G.L. CH. 62C, Sec 49A, the undersigned Bidder certifies under the penalties of perjury that it is in compliance with all laws of the Commonwealth relating to taxes, reporting of employees and contractors, and withholding and remitting child support.

19. The undersigned Bidder hereby certifies that (1) it is able to furnish labor that can work in harmony with all other elements of labor employed or to be employed in the work; and (2) that all employees to be employed at the worksite will have successfully completed a course in construction safety and health approved by the United States Occupational Safety and Health Administration that is at least 10 hours in duration at the time the employee begins work and who shall furnish documentation of successful completion of said course with the first certified payroll report for each employee.

20. The undersigned certifies under penalties of perjury that this bid is in all respects bona fide, fair and made without collusion or fraud with any other person. As used in this paragraph the word "person" shall mean any natural person, joint venture, partnership, corporation or other business or legal entity which sells materials, equipment or supplies used in or for, or engages in the performance of, the same or similar construction, reconstruction, installation, demolition, maintenance or repair work or any part thereof.

21. The undersigned further certifies under penalty of perjury that the said undersigned is not presently debarred from doing public construction work in the Commonwealth of Massachusetts under the provisions of Section Twenty-Nine F of Chapter Twenty-Nine, Section 25C (10) of Chapter 152 (workers' compensation) or any other applicable debarment provisions of any other Chapter of the General Laws or any rule or regulations promulgated thereunder.

APPENDIX B

APPENDIX B
DIESEL RETROFIT PROGRAM

The Department of Environmental Protection ("DEP") has developed the Diesel Retrofit Program in response to increasing public health concerns with the emissions from diesel engines and vehicles.

Diesel Construction Equipment Standard

All diesel powered non-road construction equipment and vehicles greater than 50 brake horsepower which will be used in the performance of the work under the Contract (hereinafter "Diesel Construction Equipment") must have the following pollution control device installed unless exempt as provided below:

1. Emission control technology verified by U.S. Environmental Protection Agency ("EPA") or the California Air Resources Board ("CARB") for use with non-road engines;
2. Emission control technology verified by EPA or CARB for use with on-road engines provided that such equipment is operated with diesel fuel that has no more than 15 parts per million sulfur content (i.e. Ultra Low Sulfur Diesel fuel); or
3. Emission control technology certified by the manufacturer that such technology meets or exceeds the emission reductions provided by on-road or off-road emission control technology verified by EPA or CARB, i.e. that a Diesel Oxidation Catalyst is achieving the following minimum emission reductions: particulate matter 20%; carbon monoxide 40%; volatile organic compounds 50%; or a Diesel Particulate Filter is achieving a minimum of 85% emission reductions for particulate matter.

Emission control devices, such as oxidation catalysts or particulate filters, shall be installed on the exhaust system side of the Diesel Construction Equipment. The Contractor shall be responsible to insure that the emissions control technology is operated, maintained, and serviced as recommended by the manufacturer.

For the latest up-to-date list of EPA verified-technologies, see:
https://www.epa.gov/verified-diesel-tech
For the latest up-to-date list of CARB verified technologies, see:
http://www.arb.ca.gov/diesel/verdev/vt/cvt.htm

Exemptions

The following Diesel Construction Equipment shall be exempt from the standard above. The Contractor shall include such Diesel Construction Equipment in the required recordkeeping:

1. Diesel Construction Equipment not owned by the Contractor and used in the performance of the work under this Contract for 30 calendar days (cumulative days but not necessarily consecutive) or less;
2. Unless otherwise exempt, additional Diesel Construction Equipment originally not anticipated to be used under the Contract or used as permanent replacement after the work under the Contract has commenced, for 15 calendars days from the date such Diesel Construction Equipment is brought on site;

DEP-DMS-B Page 1 of 6

pspkg 2018-07-11

APPENDIX B (cont.)
DIESEL RETROFIT PROGRAM

3. Diesel Construction Equipment with an engine that meets the EPA particulate matter (PM) Tier emission standards in effect at the start of the Contract for non-road diesel engines for the applicable engine power group (e.g., as of January 1, 2009, a piece of Diesel Construction Equipment with a Tier 3 engine is exempt from meeting the standard until the piece of Diesel Construction Equipment is available with a Tier 4 engine) provided that if such emissions standards are superseded during the Contract then such Diesel Construction Equipment must be retrofitted in accordance with the standards above prior to the end of the Contract;
4. A large crane (e.g. a sky crane or link belt crane which is responsible for critical lift operations) if such device would adversely affect the operation of the crane provided the Contractor submits to the municipality's project engineer written technical justification documenting the adverse impact on operation; and
5. Diesel Construction Equipment that the project engineer has determined is necessary to control a compelling emergency including but not limited to, the need for rescue vehicles or other equipment to prevent harm to human beings or additional equipment required to address a catastrophic emergency such as structure collapse or imminent collapse. After the compelling emergency is controlled, such non-compliant equipment must be removed from the Contract site and may not be used in further performance of the work under this Contract. Meeting Contract deadlines is not a compelling emergency.

Contractor Certification

Each bidder shall submit as part of its bid, the Statement of Intent to Comply. Within 10 days of being notified that it has been awarded a contract, the bidder and each of its Contractors and Subcontractors shall submit a Diesel Retrofit Program Contractor Certification. Each such Certification shall contain the following information for each piece of Diesel Construction Equipment:

1. Contractor or Subcontractor name;
2. Equipment type, make, model;
3. Vehicle Identification Number or VIN;
4. Engine model and year of manufacture;
5. Engine HP rating;
6. Emission Control Device (ECD) type (Diesel Oxidation Catalyst or Diesel Particulate Filter);
7. ECD make, model, and manufacturer;
8. ECD EPA or CARB Verification Number or manufacturer's certification that the DOC or DPF meets or exceeds emission reductions provided by similar emission control technology verified by EPA or CARB;
9. ECD installation date;
10. Type of fuel to be used; and
11. Whether the equipment is owned or rented.

Recordkeeping

Each Contractor and Subcontractor shall maintain detailed records of all Diesel Construction Equipment used under the Contract, including the dates and duration times the Diesel Construction Equipment is

APPENDIX B (cont.)
DIESEL RETROFIT PROGRAM

used at the Contract site. Records shall be available for inspection by DEP. Each Contractor and Subcontractor shall notify DEP within 48 hours of any new Diesel Construction Equipment brought onto the Contract site.

For Diesel Construction Equipment that has an emissions control device with a manufacturer's certification, the Contractor shall maintain records of all supporting emissions test data and test procedures. If upon review the emissions reductions are not supported by the test data and test procedures, then the emissions control device may need to be replaced with a compliant retrofit device.

Project Regulatory Agreement

The following language shall be included section 4 (Covenants of the Borrower) of the municipality's Project Regulatory Agreement if it receives funds from the State Revolving Fund:

> The Borrower shall require each Contractor and Subcontractor to submit the Diesel Retrofit Program Contractor Certification to DEP and the Borrower prior to commencing work on the Project. The Borrower shall not allow any Contractor or Subcontractor to commence work at the Project site prior to submitting such Certification.

APPENDIX B (cont.)
DIESEL RETROFIT PROGRAM

STATEMENT OF INTENT TO COMPLY

This form must be signed and submitted by the bidder as part of the bid.

Local Governmental Unit _____ **SRF Project No.** _____

Contract No. _____ **Contact Title** _____

Bidder _____

The undersigned, on behalf of the above-named Bidder, agrees that, if awarded the Contract:

1. **the Bidder shall comply with the Massachusetts Department of Environmental Protection's ("MassDEP") Diesel Retrofit Program by ensuring that all diesel powered non-road construction equipment and vehicles greater than 50 brake horsepower which will be used in the performance of the work under the Contract are equipped or retrofitted with a pollution control device in accordance with the Diesel Retrofit Program Standard;**
2. **the Bidder shall require all Subcontractors to comply with MassDEP's Diesel Retrofit Program by ensuring all diesel powered non-road construction equipment and vehicles greater than 50 brake horsepower which will be used in the performance of the work under the Contract are equipped or retrofitted with a pollution control device in accordance with the Diesel Retrofit Program Standard; and**

3. **The Bidder shall submit and shall require each Subcontractor to submit a Diesel Retrofit Program Contractor Certification (form attached) with a Diesel Retrofit List to MassDEP Municipal Services and the Bidder within 10 days of the bidder being notified that it has been awarded the Contract. The Bidder shall require each Subcontractor to update such Certification and List within 2 days of using additional Diesel Construction Equipment on the project under the Contract.**

APPENDIX B (cont.)
DIESEL RETROFIT PROGRAM CONTRACTOR CERTIFICATION

Each Contractor and its Subcontractor(s) must sign and email this form to the DEP DMS project engineer, within 10 days after the contractor is awarded.

Local Governmental Unit _____ **SRF Project No.** _____

Contract No. _____ **Contact Title** _____

Contractor _____

I, _____, an authorized signatory for _____, whose principal place of business is at _____ do hereby certify that any and all diesel powered non-road construction equipment and vehicles greater than 50 brake horsepower which will be used in the performance of the work under the Contract (hereinafter "Diesel Construction Equipment") have pollution control devices, such as oxidation catalysts or particulate filters, installed on the exhaust system side of the diesel combustion engine equipment in accordance with the Diesel Retrofit Program Standard.

I am submitting on behalf of _____ a list of all said Diesel Construction Equipment, labeled "Diesel Retrofit List," that will be used in connection with this Contract by _____. I hereby certify that the information on the attached Diesel Retrofit List is correct and accurate as of the date of signature. The List includes the following information for each piece of Diesel Construction Equipment:

1. Equipment type, make, model;
2. Vehicle Identification Number or VIN;
3. Engine model and year of manufacture;
4. Engine HP rating;
5. Emission Control Device ("ECD") type (Diesel Oxidation Catalyst or Diesel Particulate Filter);
6. ECD make, model, and manufacturer;
7. ECD EPA or CARB Verification Number or manufacturer's certification that the DOC or DPF meets or exceeds emission reductions provided by similar emission control technology verified by EPA or CARB;
8. ECD installation date;
9. Type of fuel to be used; and
10. Whether the equipment is owned or rented.

DEP-DMS-B Page 5 of 6

APPENDIX B (cont.)

DIESEL RETROFIT PROGRAM CONTRACTOR CERTIFICATION

_____shall notify DEP within 48 hours of any new Diesel Construction Equipment brought onto the Contract site. _____shall maintain detailed records of all Diesel Construction Equipment used at the Contract site, including the dates and duration times the Diesel Construction Equipment is used at the Contract site. _____ shall make such records available for inspection by DEP. _____shall ensure that the emissions control technology for each piece of Diesel Construction Equipment is operated, maintained, and serviced as recommended by the manufacturer. _____ shall retrofit prior to the end of the Contract any Diesel Construction Equipment no longer exempt from meeting the Diesel Construction Equipment Standard under exemption 3 (because it had an engine that met the EPA particulate matter (PM) Tier emission standards currently in effect at the start of the Contract for non-road diesel engines for the applicable engine power group and such emissions standards were superseded during the Contract).

I acknowledge that this certificate is being furnished as a requirement under this Contract and is subject to applicable State and federal laws, both criminal and civil. Signed under pains and penalty of perjury on this date _____.

APPENDIX E

APPENDIX E
CONSTRUCTION BID SPECIFICATIONS
SPECIAL PROVISIONS FOR DISADVANTAGED BUSINESS ENTERPRISES
MASSACHUSETTS DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF MUNICIPAL SERVICES

DISADVANTAGED BUSINESS ENTERPRISE PROGRAM BACKGROUND

In May 2008 a United States Environmental Protection Agency (EPA) rule became effective that changed the Minority Business Enterprise (MBE) and Women Business Enterprise (WBE) Program to a Disadvantaged Business Enterprise (DBE) Program.

For firms to qualify under the old MBE/WBE program they needed to be socially disadvantaged and had to be certified by the Supplier Diversity Office (SDO). Under the new DBE rule, the firms must be both **socially** and **economically** disadvantaged, **citizens of the United States**, and certified as a DBE. Women and certain minorities are presumed to be socially disadvantaged. The economic disadvantage is measured by the owner's initial and continuing personal net worth of less than $1,320,000.

Because the Clean Water Act requires the use of MBEs and WBEs, these firms will still be utilized in the State Revolving Fund (SRF) Loan Program, but they must also be certified as DBEs.

SDO will continue to be the certifying agency for the SRF program. SDO certifies firms under the federal Department of Transportation program, which is acceptable for use in the SRF program. An additional form has been added to the DBE package to verify that DBEs are owned or controlled by United States citizens.

BID SPECIFICATIONS

I. In this contract, the percentage of business activity to be performed by disadvantaged business enterprise(s) (DBE) shall not be less than the following percentages of the total contract price or the percentage submitted by the contractor in the Schedule of Participation, whichever is greater:

Disadvantaged MBE (D/MBE) 4.2% Disadvantaged WBE (D/WBE) 4.5%

EEO-DEP-E Page 1 of 16

pspkg 2018-07-11

II. DEFINITIONS

For the purpose of these provisions, the following terms are defined as follows:

A. Awarding Authority – Entity that awards a prime contract under a State Revolving Fund loan.

B. Bidder - Any individual, partnership, joint venture, corporation, or firm submitting a price, directly or through an authorized representative, for the purpose of performing construction or construction related activities under a Contract.

C. Certified DBE – A DBE certified by the United States Small Business Administration, under its 8(a) Business Development Program (13 CFR part 124, subpart A) or its Small Disadvantaged Business Program (13 CFR part 124, subpart B); The United States Department of Transportation (DOT), under its regulations for Participation by DBSs in DOT programs (49 CFR parts 23 and 26); or SDO in accordance with 40 CFR part 33; provided that the certification meets the U.S. citizenship requirement under 40 CFR §33.202 or §33.203.

D. Compliance Unit - A subdivision of MassDEP's Affirmative Action Office designated to ensure compliance under these provisions.

E. Contractor - Any business that contracts or subcontracts for construction, demolition, renovation, survey, or maintenance work in the various classifications customarily used in work and that is acting in this capacity under the subject contract.

F. Construction Related Services - Those services performed at the work site ancillary to, and/or in support of, the construction work, such as hauling, trucking, equipment operation, surveying or other technical services, etc. For the purposes hereof, supply and delivery of materials (e.g. pre-cast concrete elements) to the site by a supplier who has manufactured those goods, or substantially altered them before re-sales shall be considered as "construction related services

G. Construction Work - The activities at the work site, or labor and use of materials in the performance of constructing, reconstructing, erecting, demolishing, altering, installing, disassembling, excavating, etc, all or part of the work required by the Contract Documents.

H. Disadvantaged Business Enterprise (DBE) - An entity owned or controlled by a socially and economically disadvantaged individual as described by Public Law 102-389 (42 U.S.C. 4370d) or an entity owned and controlled by a socially and economically disadvantaged individual as described by Title X of the Clean Air Act Amendments of 1990 (42 U.S.C. 7601 note); a Small Business Enterprise (SBE); a Small Business in a Rural Area (SBRA); or a Labor Surplus Area Firm (LAF), a Historically Underutilized Business (HUB) Zone Small Business Concern, or a concern under a successor program.

I. Equipment Rental Firm - A firm that owns equipment and assumes actual and contractual responsibility for renting said equipment to perform a useful function of the work of the contract consistent with normal industry practice

J. Good Faith Efforts – The race and/or gender neutral measures described in 40 CFR 33, subpart C.

K. HUBZone - A historically underutilized business zone, which is an area located within one or more qualified census tracts, qualified metropolitan counties, or lands within the external boundaries of an Indian reservation.

L. HUBZone small business concern - A small business concern that appears on the List of Qualified HUBZone Small Business Concerns maintained by the Small Business Administration.

M. Joint Venture - An agreement between SDO certified DBE and a non-DBE or non-DBE controlled enterprise.

1. A pairing of companies will be considered a DBE joint venture if the SDO certified DBE which is part of the relationship has more than 51% of the profits that are derived from that project.

2. A joint venture between a certified DBE subcontractor and a non DBE subcontractor, in which the DBE for that proportion of the joint venture's contract equal to the DBE participation in the joint venture.

3. Whenever a general bid is filed by a joint venture with a certified DBE participant in the joint venture that does not exercise more than 51% control over management and profits, that joint venture shall be entitled to credit as a DBE for that portion of the joint venture's contract equal to the DBE participation in the joint venture. Minority As deemed by SDO.

N. Labor surplus area firm (LSAF) - A concern that together with its first-tier subcontractors will perform substantially in labor surplus areas (as identified by the Department of Labor in accordance with 20 CFR part 654). Performance is substantially in labor surplus areas if the costs incurred under the contract on account of manufacturing, production or performance of appropriate services in labor surplus areas exceed 50 percent of the contract price.

O. Letter of Intent – Certified document signed by the principal(s) of the DBE with respect to the work to be performed under contract.

P. Local Government Unit (LGU) – A city, town, or municipal district which applies for a loan under the Clean Water Trust Program.

Q. Material Supplier – A vendor certified by SDO as a DBE in sales to supply industry from an established place of business or source of supply, and that vendor.

1. Manufactures goods from raw materials, or substantially utilizes them in the work, or substantially alters them before resale, entitling the general contractor to DBE credit for 100% of the purchase order.

2. Provides and maintains a storage facility for materials utilized in the work, entitling the general contractor to DBE credit for 10% of the purchase order

R. Minority and Women Business Enterprise (M/WBE) – Any business concern certified by the SDO as a bona-fide M/WBE. A bona-fide M/WBE is a business whose minority group/women ownership interests are real, which have at least 51% ownership and control over management and operation.

S. Percent of Total Price – Is the percentage to be paid to the DBE, work they perform, as compared to the total bid price

T. Recipient - An agency, person or political subdivision which has been awarded or received financial assistance by the Trust or MassDEP.

U. Small business, small business concern or small business enterprise (SBE) - A concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding, and qualified as a small business under the criteria and size standards in 13 CFR part 121.

V. Small business in a rural area (SBRA) - A small business operating in an area identified as a rural county with a code 6-9 in the Rural-Urban continuum Classification Code developed by the United States Department of Agriculture in 1980.

W. SDO – The Supplier Diversity Office.

X. Subcontractor – A company, firm, joint venture, or individual who enters into an agreement with a contractor to provide services pursuant to an award of financial assistance.

Y. Total Contract Price – The total amount of compensation to be paid for all materials, work or services rendered in the performance of the contract

Z. Trust – The Massachusetts Clean Water Trust established by M.G.L. c.29.

III. REQUIREMENTS FOR CONTRACT AWARD

DBE packages must be submitted by the two lowest bidders on the project. Following bid opening, the LGU shall notify the two lowest bidders to submit DBE packages to the LGU or the LGUs consultant, as directed. By the close of business on the third business day after notification, the two lowest bidders, including a bidder who is a MBE, WBE or DBE, shall submit the following information:

A. A Schedule of Participation (Form EEO-DEP-190). The Schedule of Participation shall list those certified DBEs the bidder intends to use in fulfilling the contract obligations, the nature of the work to be performed by each certified DBE subcontractor and the total price they are to be paid.

1. A listing of bona-fide services such as a professional, technical, consultant or managerial services, assistance in the procurement of essential personnel, facilities, equipment, materials, or supplies required for performance of the contract, and reasonable fees or commissions charged.

2. A listing of haulers, truckers, or delivery services, not the contractors, including reasonable fees for delivery of said materials or supplies to be included on the project.

B. A Letter of Intent (Form EEO-DEP-191) for each DBE the bidder intends to use on the project. The Letter of Intent shall include, among other things, a reasonable description of the work the certified DBE is proposing to perform and the prices the certified DBE proposes to charge for the work. A Letter of Intent shall be jointly signed by the certified DBE and the General Contractor who proposes to use them in the performance of the Contract.

C. Each DBE must also sign and return the DBE Certification of United States Citizenship form to verify that the firm is owned or controlled by a United States citizen.

D. The SDO "DBE Certification" as prepared by each certified DBE.

E. A completed Request for Waiver form and backup documentation should the goals not be achieved (See IV below).

IV. REQUIREMENTS FOR MODIFICATION OR WAIVERS.

The bidder shall make every possible effort to meet the minimum requirements of certified DBE participation. If the percentage of DBE participation submitted by the bidder on its Schedule of Participation (EEO-DEP-190) does not meet the minimum requirements, the bid may be rejected by the Awarding Authority and found not to be eligible for award of the contract.

In the event that the bidder is unable to meet the minimum requirements of DBE participation, the bidder shall submit with his/her submittal required in Section III. Requirement of Contract Award a Request for Waiver form (EEO-DEP-490). The Awarding Authority shall review the waiver request to determine if the request should proceed. If approved by the Awarding Authority, the Awarding Authority shall submit the waiver request and supporting documentation, with a recommendation to MassDEP within five days of receipt of the Request for Waiver. MassDEP in conjunction with the project manager, Compliance Unit, will determine whether the waiver will be granted.

The waiver request shall include detailed information as specified below to establish that the bidder has made a good faith effort to comply with the minimum requirements of DBE participation specified in Part I. In addition, the bidder must show that such efforts were undertaken well in advance of the time set for opening of bids to allow adequate response. A waiver request shall include the following:

A. A detailed record of the effort made to contact and negotiate with the certified DBE, including, but not limited to:

   1. names, addresses and telephone numbers of all such companies contacted;

   2. copies of written notices(s) which were sent to certified DBE potential subcontractors, prior to bid opening;

   3. a detailed statement as to why each subcontractor contacted (i) was not willing to do the job or (ii) was not qualified to perform the work as solicited; and

   4. in the case(s) where a negotiated price could not be reached the bidder should detail what efforts were made to reach an agreement on a competitive price;

   5. copies of advertisements, dated not less than ten (10) days prior to bid opening, as appearing in general publications, trade-oriented publications, and applicable minority/ women-focused media detailing the opportunities for participation.

B. MassDEP may require the bidder to produce such additional information as it deems appropriate.

C. No later than fifteen (15) days after MassDEP receives all required information and documentation, it shall make a decision in writing, whether the waiver is granted and shall provide that determination to the bidder and Awarding Authority. If the waiver request is denied, the facts upon which a denial is based will be set forth in writing. If the waiver request is denied, the bid shall be rejected by the Awarding Authority, or the contract will be determined ineligible for SRF funding.

   If a Request for Waiver is denied by MassDEP and the bid is rejected by the Awarding Authority, the Awarding Authority may then move to the second bidder on the project. At the Awarding Authority's discretion, it may collect a DBE package from the third bidder on the project.

V. DISADVANTAGED BUSINESS ENTERPRISES PARTICIPATION

A. Reporting Requirements

1. The Contractor's utilization of certified DBEs will be documented based upon submittal of the LGU's monthly Payment Requisitions as reported on Form-2000. The Form-2000 form will show all certified DBEs performing work on the project regardless of any billing activity for that month. For auditing and accounting purposes, the Contractor periodically may be required to submit copies of canceled checks verifying that payments have been made to the certified DBE as listed on the schedule. The Contractor may also be required to submit current schedules on utilization of all DBEs to indicate when their services will commence and be billed for.

2. During the life of the Contract, the Contractor's fulfillment of the percentage requirements in Part I shall be determined with reference to the Contract price as follows:

   A. If the price in the Contract executed exceeds the base bid price (e.g., because an alternate was selected or because unit prices were used in awarding the Contract), the Contractor shall submit for approval by MassDEP a revised Schedule of Participation by certified DBEs satisfying the percentage requirements and such other information concerning additional DBE participation as may be requested by MassDEP.

   B. If the Contract price increases after execution due to change orders or other adjustments, MassDEP may require the Contractor to subcontract additional work or to purchase additional goods and services from certified DBEs up to the percentages stated in Part I.

VI. COMPLIANCE

A. If the Schedule or any of the Letters of Intent are materially incomplete or not submitted in a timely manner, the LGU may rescind its vote of award; treat the bid informal as to substance and reject the bid. If the bid is incomplete in any other respect than the Schedule the LGU with the approval of MassDEP may waive the informalities upon satisfactory completion of the required information by the Contractor and the certified DBE as applicable.

B. If the LGU finds that the percentage of certified DBE participation submitted by the contractor on its Schedule does not meet the percentage requirement in Part I, it shall rescind its vote of award and find such contractor not to be eligible for award of the contract.

C. The Contractor shall not perform with its own organization, or subcontract to any other primary or subcontractor any work designated for the named certified DBEs on the schedule submitted by the Contractor under Part III without the approval of MassDEP.

D. A Contractor's compliance with the percentage requirement in Part I shall continue to be determined by reference to the required percentage of the total contract price as stated in Section I even though the total of actual contract payments may be greater or less than the bid price.

E. If the Contractor for reasons beyond its control cannot comply with Part III in accordance with the Schedule submitted under Part III, Section B, the contractor must submit to MassDEP as soon as they are aware of the deficiency, the reason for its inability to comply. Proposed revisions to the Schedule stating how the contractor intends to meet its obligations under these conditions must be submitted within ten (10) working days of notification.

F. If the Contractor is becomes aware by any means that that DBE is no longer certified, the Contractor shall immediately notify MassDEP. The Contractor shall use good faith efforts to retain a substitute certified DBE.

G. If a certified DBE listed by the bidder in its Schedule of M/WBE contractors fails to obtain a performance or payment bond requested by the bidder, said failure shall not entitle the bidder to avoid the requirements of Part III (A). After a bidder has been awarded the contract, he shall not change the certified DBE listed in its Schedule at the time of the award or make any other such substitutions without the written approval of MassDEP.

VII. SANCTIONS

A. If the Contractor does not comply with the terms of these Special Provisions, the Awarding Authority may (1) suspend any payment for the work that should have been performed by a certified DBE pursuant to the schedule, or (2) require specific performance of the Contractor's obligation by requiring the Contractor to subcontract with a DBE for any contract or specialty item at the contract price established for that item in the proposal submitted by the Contractor.

B. To the extent that the Contractor has not complied with the terms of these Special Provisions, the Awarding Authority may retain in connection with Estimates and Payments an amount determined by multiplying the bid price of this contract by the percentage in Section I, less the amount paid to DBE's for work performed under the contract and any payments already suspended under VII A.

C. The Awarding Authority may suspend, terminate or cancel this contract, in whole or in part, or may call upon the Contractor's surety to perform all terms and conditions in the contract, unless the contractor is able to demonstrate his compliance with the terms

of these Special Provisions, and further deny to the Contractor, the right to participate in any future contracts awarded by the Awarding Authority for a period of up to three years.

D. In any proceeding involving the imposition of sanctions by the Awarding Authority, no sanctions shall be imposed if the Awarding Authority finds that the contractor has taken every possible measure to comply with these Special Provisions or that some other justifiable reason exists for waiving these Special Provisions in whole or in part.

E. The contract shall provide such information as is necessary in the judgment of the Awarding Authority to ascertain its compliance with the terms of these Special Provisions.

F. A contractor shall have the right to request suspension of any sanctions imposed under this section upon demonstrating that he is in compliance with these Special Provisions.

DBE CERTIFICATION OF UNITED STATES CITIZENSHIP

For the SRF program, under the EPA Disadvantage Business Enterprise (DBE) Rule, a DBE must be owned or controlled by a socially and economically disadvantaged person that is also a **citizen of the United States** (*See* 40 CFR 33.202). "Ownership" is defined at 13 CFR 124.105 and "control" is defined at 13 CFR 124.106.

DBEs are certified for the SRF program through the Supplier Diversity Office using the federal Department of Transportation (DOT) DBE rules. EPA allows the use of DBEs certified under the DOT rules as long as they are also United States citizens. To ensure compliance with the EPA rule, MassDEP must verify United States citizenship through the completion of the following form for each DBE used on the project.

REQUEST FOR WAIVER FOR SRF CONSTRUCTION

Upon exhausting all known sources and making every possible effort to meet the minimum requirements for DBE participation, the Bidder may seek relief either partially or entirely from these requirements by submitting a completed waiver package by the close of business on the third business day after notification by the LGU. Failure to comply with this process shall be cause to reject the bid thereby rendering the Bidder not eligible for award of the contract.

General Information

Project Title: _____ Project Location: _____

Bid Opening (time/date) _____

Bidder: _____

Mailing Address: _____

Contact Person: _____ Telephone No. ( ) _____ Ext. _____

Minimum Requirements

The bidder must demonstrate that good faith efforts were undertaken to comply with the percentage goals as specified. The firm seeking relief must show that such efforts were taken appropriately in advance of the time set for opening bid proposals to allow adequate time for response(s) by submitting the following:

A. A detailed record of the effort made to contact and negotiate with disadvantaged minority and/or woman owned businesses, including:

1. names, addresses, telephone numbers and contact dates of all such companies contacted;

2. copies of written notice(s) which were sent to DBE potential subcontractors prior to bid opening;

3. a detailed statement as to why each subcontractor contacted (i) was not willing to do the job or (ii) was not qualified to perform the work as solicited; and

4. in the case(s) where a negotiated price could not be reached the bidder should detail what efforts were made to reach an agreement on a competitive price.

5. copies of advertisements, dated not less than ten (10) days prior to bid opening, as appearing in general publications, trade-oriented publications, and applicable minority/women-focused media detailing the opportunities for participation;

EEO-DEP-490C Page 1 of 2

EEO-DEP-E Page 14 of 16

pspkg 2018-07-11

B. MassDEP may require the bidder to produce such additional information as it deems appropriate.

C. No later than fifteen (15) days after submission of all required information and documentation, MassDEP shall make a determination, in writing, whether the waiver request is granted and shall provide that determination to the bidder and Awarding Authority. If the waiver request is denied, the facts upon which a denial is based will be set forth in writing.

CERTIFICATION

The undersigned herewith certifies that the above information and appropriate attachments are true and accurate to the best of my knowledge and that I have been authorized to act on behalf of the bidder in this matter.

SECTION 00520

AGREEMENT

Made in triplicate this the _____ day of _____, 20___ between the Town of Orleans, MA

AND

hereafter the "Contractor".

WITNESSETH: That for and in consideration of the following mutual covenants contained herein the parties agree with each other as follows:

ARTICLE I: The Contractor agrees to sell and/or deliver to the Town of Orleans, MA materials and/or services in accordance with the following: MEETINGHOUSE POND AREA COLLECTION SYSTEM AND PUMPING STATION, Contract No. 2022-01 and SRF No. 7150:

Exhibit 1. Quote/bid dated

Exhibit 2. Certificate of Non-Collusion

Exhibit 3. Statement of State Tax Compliance

Exhibit 4. Acknowledgement of Principal

Exhibit 5. Certificate of Insurance

Exhibit 6. Certification of OSHA 10-Hour Training

ARTICLE II: The Town of Orleans, MA agrees to process the bills for payment to the Contractor upon the execution of the contract, satisfactory completion of the services as outlined in the specifications and approval by the appropriate Department Manager, Town Administrator and Town Accountant in the amount of _____-- and 00/100 ($___.00) Dollars.

ARTICLE III

1. The Contractor agrees that it will fully comply with Subpart C of 2 CFR Part 180 and 2 CFR Part 1532, entitled Responsibilities of Participants Regarding Transactions (Doing Business with Other Persons). The Contractor shall not award any subcontracts or purchase any materials from suppliers that appear on the Excluded Parties List System.

   The Contractor shall include this requirement in each subcontract and require it to be included in all subcontracts regardless of tier. The Contractor shall maintain reasonable records to demonstrate compliance with these requirements.

2. The fair share goals for disadvantaged business enterprise (DBE) participation for this contract are a minimum of 4.2 percent Disadvantaged Minority Business Enterprise (D/MBE) participation and 4.5 percent Disadvantaged Women Business Enterprise(D/WBE) participation, applicable to the total dollar amount paid for the construction contract. The Contractor shall take all affirmative steps necessary to achieve this goal, and shall provide reports documenting the portion of contract and subcontract dollars paid to DBEs, and its efforts to achieve the goals, with each invoice submitted or at such greater intervals as specified by the (municipality). The contractor shall require similar reports from its subcontractors.

3. Equal Employment Opportunity/Affirmative Action (EEO/AA) Requirements - During the performance of this contract, the contractor agrees as follows:

   A. The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

B. The contractor will, in all solicitations or advancements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

C. The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the labor union or workers' representative of the contractor's commitments under Section 202 of Executive Order No. 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

D. The contractor will comply with all provisions of Executive Order No. 11246 of Sept. 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

E. The contractor will furnish all information and reports required by Executive Order No. 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders. Comp., p. 684, EO 12086 of Oct. 5, 1978, 43 FR 46501, 3 CFR, 1978 Comp., p. 230

F. In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of such rules, regulations, or orders, this contract may be cancelled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order No. 11246 of Sept. 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order No. 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

G. The contractor will include the provisions of paragraphs (A) through (G) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order No. 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions including sanctions for noncompliance: Provided, however, that in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, the contractor may request the United States to enter into such litigation to protect the interests of the United States." [Sec. 202 amended by EO 11375 of Oct. 13, 1967, 32 FR 14303, 3 CFR, 1966- 1970”

4. The contractor shall not participate in or cooperate with an international boycott, as defined in Section 999 (b)(3) and (4) of the Internal Revenue code 1986, as amended, or engage in conduct declared to be unlawful by Section 2 of Chapter 151E of the Massachusetts General Laws.

5. The Bidder hereby agrees that if selected as the Contractor it will commence work under this contract on or before a date to be fixed in the written “Notice to Proceed” given by the Owner to the Contractor and to fully complete the project within 880 calendar days, using not more than 529 working days split into four phases.

6. The Bidder further agrees to pay as liquidated damages the sum of $3,500 for each consecutive calendar day thereafter during which the work as not been fully completed beyond the contract completion date, as provided in the “Liquidated Damages” provisions of SECTION 00800, SUPPLEMENTARY CONDITIONS.

7. As per MassDEP’s Policy Memorandum #10 – the agreed upon DIRECT LABOR MARKUP (percentage) for Change Orders on this project shall be ___ percent.

8. American Iron and Steel (AIS) Requirements - The Contractor acknowledges to and for the benefit of the Town of Orleans ("Purchaser") and the Commonwealth of Massachusetts (the "State") that it understands the goods and services under this Agreement are being funded with monies made available by the Clean Water State Revolving Fund and/or Drinking Water State Revolving Fund that have statutory requirements commonly known as "American Iron and Steel;" that requires all of the iron and steel products used in the project to be produced in the United States ("American Iron and Steel Requirement") including iron and steel products provided by the Contactor pursuant to this Agreement. The Contractor hereby represents and warrants to and for the benefit of the Purchaser and the State that (a) the Contractor has reviewed and understands the American Iron and Steel Requirement, (b) all of the iron and steel products used in the project will be and/or have been produced in the United States in a manner that complies with the American Iron and Steel Requirement, unless a waiver of the requirement is approved, and (c) the Contractor will provide any further verified information, certification or assurance of compliance with this paragraph, or information necessary to support a waiver of the American Iron and Steel Requirement, as may be requested by the Purchaser or the State. Notwithstanding any other provision of this Agreement, any failure to comply with this paragraph by the Contractor shall permit the Purchaser or State to recover as damages against the Contractor any loss, expense, or cost (including without limitation attorney's fees)incurred by the Purchaser or State resulting from any such failure (including without limitation any impairment or loss of funding, whether in whole or in part, from the State or any damages owed to the State by the Purchaser). While the Contractor has no direct contractual privity with the State, as a lender to the Purchaser for the funding of its project, the Purchaser and the Contractor agree that the State is a third-party beneficiary and neither this paragraph (nor any other provision of this Agreement necessary to give this paragraph force or effect) shall be amended or waived without the prior written consent of the State.

9. All contracts for clean and drinking water projects awarded as a result of a proposal or invitation for bids under MGL Chapter 30 section 39M shall include a price adjustment clause for fuel, both diesel and gasoline; liquid asphalt; and Portland cement contained in cast-in-place concrete. A base price for each material shall be set by the awarding authority or agency and shall be included in the bid documents at the time the project is advertised. The awarding authority or agency shall also identify in the bid documents the price index to be used for each material. The price adjustment clause shall provide for a contract adjustment to be made on a monthly basis when the monthly cost change exceeds plus or minus 5 percent.

10. All construction contracts are subject to the Davis Bacon wage rate requirements.

11. The Contractor agrees that it will fully comply with Subpart C of 2 CFR Part 180 and 2 CFR Part 1532, entitled Responsibilities of Participants Regarding Transactions (Doing Business with Other Persons). The Contractor shall not award any subcontracts or purchase any materials from suppliers that appear on the Excluded Parties List System. The Contractor shall include this requirement in each subcontract and require it to be included in all subcontracts regardless of tier. The Contractor shall maintain reasonable records to demonstrate compliance with these requirements.

IN WITNESS: Whereof the respective parties hereto have caused this instrument to be duly subscribed and sealed.

INSURANCE REQUIREMENTS FOR INCLUSION IN ALL SPECIFICATIONS AND CONTRACTS

OWNERS NAME: Town of Orleans, MA

PROJECT NAME: Meetinghouse Pond Area Collection System and Pumping Station, Contract No. 2022-01 and SRF No. 7150

Insurance. The Contractor shall carry and maintain in effect during the entire currency of the contract, at his own expense, the following kinds and minimum amounts of insurance in a company or companies approved by the Town of Orleans, MA. Such insurance shall cover claims and suits which arise out of or result from the Contractor's execution of the contract work whether such execution by the Contractor himself or by any Subcontractor.

1) X - Worker's Compensation as required by the Worker's Compensation Laws of the Commonwealth of Massachusetts and, in conjunction therewith, Employer's Liability with a minimum limit as required by statute.

2) X - "Broad Form" Comprehensive General Liability including, but not limited to, Bodily Injury, Personal Injury and Property Damage Liability, Full Contractual Liability and liability arising from Explosion, Collapse and Underground Damage and all other applicable insurance necessary to carry out the contractual obligation to proceed under the contract. Provide a minimum limit of liability of $5,000,000.00 utilizing: (a) a standalone certificate or (b) a minimum $2,000,000.00 General Liability Policy combined with Umbrella Policy.

3) X - Automobile Bodily Injury and Property Damage Liability for all owned, non-owned and hired automobiles operated in connection with the performance of the contract. Minimum limits of liability: Single limits of Property Damage and Bodily Injury $1,000,000.

4) X - Builder's Risk - Amount of the General Contractor's Contract

5) __ - Professional Liability/ Errors and Omissions – Not Required

Certificate of Insurance - Prior to beginning work under the contract, the Contractor shall furnish the Town of Orleans, MA a Certificate of Insurance naming the Town of Orleans, MA and AECOM Technical Services, Inc. as additional insured. Such Certificate also shall provide that the Town of Orleans, MA will be notified at least 30 days in advance of the cancellation or non-renewal of any insurance covered by the Certificate.

SECTION 00610

PERFORMANCE BOND

KNOW ALL MEN BY THESE PRESENTS: That we _____
(Name of Contractor)

a _____ hereinafter called "Principal" and
(Corporation, Partnership, Joint Venture, LLC or Individual)

_____ of _____, State of _____
(Surety) (City)

hereinafter called the "Surety" and licensed by the State Division of Insurance to do business under the laws of the Commonwealth of Massachusetts, are held and firmly bound to the Town of Orleans, MA, Orleans, Massachusetts, hereinafter called "Owner", in the penal sum of _____Dollars and _____Cents ($) in lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators and successors, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION is such that whereas the Principal has entered into a certain contract with the Owner (the "Construction Contract"), dated the _____ day of _____, 20____, for the construction described as follows:

MEETINGHOUSE POND AREA COLLECTION SYSTEM AND PUMPING STATION

Contract No. 2022-01 and SRF No. 7150

NOW, THEREFORE, if the Principal shall well, truly and faithfully perform its duties, all the undertakings, covenants, terms, conditions, and agreements of the Construction Contract during the original term thereof, and any extensions thereof which may be granted by the Owner, with or without notice to the Surety, and if he shall satisfy all claims and demands incurred under the Construction Contract, and shall fully indemnify and save harmless the Owner from all costs and damages which it may suffer by reason of failure to do so, and shall reimburse and repay the Owner all outlay and expense which the Owner may incur in making good any default, then this obligation shall be void; otherwise, this obligation shall remain in full force and effect.

PROVIDED, FURTHER, that the Surety's obligation under this Bond shall arise after (1) the Owner has declared the Principal in default of the Construction Contract or any provision thereof, or (2) has declared that the Principal has failed, or is otherwise unable or unwilling, to execute the work consistent with, and in conformance to, the Construction Contract (collectively referred to as a "Contractor Default"). The determination of a Contractor Default shall be made solely by the Owner. The Owner need not terminate the Construction Contract to declare a Contractor Default or to invoke its rights under this Bond, and Contractor hereby agrees not to assert any claims against Surety under any indemnity or similar agreements on the grounds that Surety has interfered with the Construction Contract by fulfilling its obligations hereunder in the absence of a termination of said contract.

When the Surety's obligation under this Bond arises, the Surety, at its sole expense and at the consent and election of the Owner, shall promptly take one of following steps: (1) arrange for the Principal to perform and complete the work of the Construction Contract; (2) arrange for a contractor other than the Principal to perform and complete the work of the Construction Contract;
(3) reimburse the Owner, in a manner and at such time as the Owner shall reasonably decide, for all costs and expenses incurred by the Owner in performing and completing the work of the Construction Contract. Surety will keep Owner reasonably informed of the progress, status and results of any investigation of any claim of the Owner.

If the Surety does not proceed as provided in this Bond with due diligence and all deliberate speed, the Surety shall be deemed to be in default of this Bond, and the Owner shall be entitled to enforce any remedy available to the Owner.

After the Surety's obligation under this Bond arises, the Surety is obligated, to the limit of the amounts of this Bond, for (1) the correction of defective work and completion of the Construction Contract; (2) additional design, professional services, and legal costs, including attorney's fees, resulting from the Contractor Default or from the default of the Surety under this Bond; (3) any additional work beyond the Construction Contract made necessary by the Contractor Default or default of the Surety under this Bond; (4) indemnification obligations of the Principal, if any, as provided in the Construction Contract; and (5) liquidated damages as provided in the Construction Contract, or if no such damages are specified, actual damages and consequential damages resulting from the Contractor Default or any default of the Surety under this Bond.

Any proceeding, legal or equitable, under this Bond shall be instituted in any court of competent jurisdiction in the Commonwealth of Massachusetts.

The Surety, for value received, hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the Construction Contract or to the work to be performed thereunder or the specifications accompanying the same shall in any way affect its obligation on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of the Construction Contract or to the work or to the specifications.

The Surety providing the Bond shall have a rating of A or better within Best's Key Rating Guide.

IN WITNESS WHEREOF, this instrument is executed in three (3) counterparts, each one of which shall be deemed an original, this _____ day of _____, 20____.

SECTION 00615

PAYMENT BOND

KNOW ALL MEN BY THESE PRESENTS: That we _____
(Name of Contractor)

a _____ hereinafter called "Principal" and
(Corporation, Partnership, Joint Venture, LLC or Individual)

_____ of _____, State of _____
(Surety) (City)

hereinafter called the "Surety" and licensed by the State Division of Insurance to do business under the laws of the Commonwealth of Massachusetts, are held and firmly bound to the Town of Orleans, MA, Orleans, Massachusetts, hereinafter called "Owner", in the penal sum of _____Dollars and _____Cents ($) in lawful money of the United States, for the payment of which sum well and truly to be made, we bind ourselves, our heirs, executors, administrators and successors, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION is such that whereas the Principal has entered into a certain contract with the Owner (the "Construction Contract"), dated the _____ day of _____, 20____, for the construction described as follows:

MEETINGHOUSE POND AREA COLLECTION SYSTEM AND PUMPING STATION

CONTRACT NO. 2022-01 AND SRF NO. 7150

NOW, THEREFORE, if the Principal shall promptly make payment to all persons, firms, subcontractors, and corporations furnishing materials for or performing labor in the prosecution of the work provided for in such contract, and any authorized extension or modification thereof, including all amounts due for materials, lubricants, oil, gasoline, repairs on machinery, equipment and tools, consumed or used in connection with the construction of such work, and all insurance premiums on said work, and for all labor, performed in such work whether by subcontractor or otherwise, then this obligation shall be void; otherwise to remain in full force and effect.

PROVIDED, FURTHER, that the said Surety, for value received hereby stipulates and agrees that no change, extension of time, alteration or addition to the terms of the contract or to the work to be performed thereunder or the specifications accompanying the same shall in any way affect its obligation on this bond, and it does hereby waive notice of any such change, extension of time, alteration or addition to the terms of this contract or to the work or to the specifications. The Surety Company providing the bond shall have a rating of A or better within the Best Key Rating Guide.

PROVIDED, FURTHER, that no final settlement between the Owner and the Contractor shall abridge the right of any beneficiary hereunder, whose claim may be unsatisfied.

IN WITNESS WHEREOF, this instrument is executed in _____ ( ) counterparts, each one of which shall be deemed an original, this the _____ day of _____, 20__.

GENERAL CONDITIONS

ARTICLE 1 - DEFINITIONS AND TERMINOLOGY

1.01 Defined Terms

A. Wherever used in the Contract Documents and printed with initial or all capital letters, the terms listed below will have the meanings indicated which are applicable to both the singular and plural thereof.

1. *Addenda*--Written or graphic instruments issued prior to the opening of Bids which clarify, correct, or change the Bidding Requirements or the Contract Documents.

2. *Agreement*--The written instrument which is evidence of the agreement between OWNER and CONTRACTOR covering the Work.

3. *Application for Payment*--The form acceptable to ENGINEER which is to be used by CON- TRACTOR during the course of the Work in requesting progress or final payments and which is to be accompanied by such supporting documentation as is required by the Contract Documents.

4. *Asbestos*--Any material that contains more than one percent asbestos and is friable or is releasing asbestos fibers into the air above current action levels established by the United States Occupational Safety and Health Administration.

5. *Bid*--The offer or proposal of a bidder submit- ted on the prescribed form setting forth the prices for the Work to be performed.

6. *Bidding Documents*--The Bidding Requirements and the proposed Contract Documents (including all Addenda issued prior to receipt of Bids).

7. *Bidding Requirements*--The Advertisement or Invitation to Bid, Instructions to Bidders, Bid security form, if any, and the Bid form with any supplements.

8. *Bonds*--Performance and payment bonds and other instruments of security.

9. *Change Order*--A document recommended by ENGINEER which is signed by CONTRACTOR and OWNER and authorizes an addition, deletion, or revision in the Work or an adjustment in the Contract Price or the Contract Times, issued on or after the Effective Date of the Agreement.

10. *Claim*--A demand or assertion by OWNER or CONTRACTOR seeking an adjustment of Contract Price or Contract Times, or both, or other relief with respect to the terms of the Contract. A demand for money or services by a third party is not a Claim.

11. *Contract*--The entire and integrated written agreement between the OWNER and CONTRACTOR concerning the Work. The Contract supersedes prior negotiations, representations, or agreements, whether written or oral.

*****12. *Contract Documents*--The Contract Documents establish the rights and obligations of the parties and include the Agreement, Addenda (which pertain to the Con- tract Documents), CONTRACTOR's Bid (including documentation accompanying the Bid and any post Bid documentation submitted prior to the Notice of Award) when attached as an exhibit to the Agreement, the Notice to Proceed, the Bonds, these General Conditions, the Supplementary Conditions, the Specifications and the Drawings as the same are more specifically identified in the Agreement, together with all Written Amendments, Change Orders, Work Change Directives, Field Orders, and ENGINEER's written interpretations and clarifications issued on or after the Effective Date of the Agreement. Approved Shop Drawings and the reports and drawings of subsurface and physical conditions are not Contract Documents. Only printed or hard copies of the items listed in this paragraph are Contract Documents. Files in electronic media format of text, data, graphics, and the like that may be furnished by OWNER to CONTRACTOR are not Contract Documents.

13. *Contract Price*--The moneys payable by OWNER to CONTRACTOR for completion of the Work in accordance with the Contract Documents as stated in the Agreement (subject to the provisions of paragraph 11.03 in the case of Unit Price Work).

14. *Contract Times*--The number of days or the dates stated in the Agreement to: (i) achieve Substantial Completion; and (ii) complete the Work so that it is ready for final payment as evidenced by ENGINEER's written recommendation of final payment.

15. *CONTRACTOR*--The individual or entity with whom OWNER has entered into the Agreement.

16. *Cost of the Work*--See paragraph 11.01.A for definition.

17. *Drawings*--That part of the Contract Documents prepared or approved by ENGINEER which graphically shows the scope, extent, and character of the Work to be performed by CONTRACTOR. Shop Drawings and other CONTRACTOR submittals are not Drawings as so defined.

18. *Effective Date of the Agreement*--The date indicated in the Agreement on which it becomes effective, but if no such date is indicated, it means the date on which the Agreement is signed and delivered by the last of the two parties to sign and deliver.

*****19. *ENGINEER*--The individual or entity named as such in the Agreement.

*****20. *ENGINEER's Consultant*--An individual or entity having a contract with ENGINEER to furnish services as ENGINEER's independent professional associate or consultant with respect to the Project and who is identified as such in the Supplementary Conditions.

21. *Field Order*--A written order issued by ENGINEER which requires minor changes in the Work but which does not involve a change in the Contract Price or the Contract Times.

22. General Requirements--Sections of Division 1 of the Specifications. The General Requirements pertain to all sections of the Specifications.

23. *Hazardous Environmental Condition*--The presence at the Site of Asbestos, PCBs, Petroleum, Hazardous Waste, or Radioactive Material in such quantities or circumstances that may present a substantial danger to persons or property exposed thereto in connection with the Work.

24. *Hazardous Waste*--The term Hazardous Waste shall have the meaning provided in Section 1004 of the Solid Waste Disposal Act (42 USC Section 6903) as amended from time to time.

25. *Laws and Regulations; Laws or Regulations*-- Any and all applicable laws, rules, regulations, ordinances, codes, and orders of any and all governmental bodies, agencies, authorities, and courts having jurisdiction.

26. *Liens*--Charges, security interests, or encumbrances upon Project funds, real property, or personal property.

27. *Milestone*--A principal event specified in the Contract Documents relating to an intermediate completion date or time prior to Substantial Completion of all the Work.

28. *Notice of Award*--The written notice by OWNER to the apparent successful bidder stating that upon timely compliance by the apparent successful bidder with the conditions precedent listed therein, OWNER will sign and deliver the Agreement.

29. *Notice to Proceed*--A written notice given by OWNER to CONTRACTOR fixing the date on which the Contract Times will commence to run and on which CONTRACTOR shall start to perform the Work under the Contract Documents.

**30. *OWNER*--The individual, entity, public body, or authority with whom CONTRACTOR has entered into the Agreement and for whom the Work is to be performed.

31. *Partial Utilization*--Use by OWNER of a substantially completed part of the Work for the purpose for which it is intended (or a related purpose) prior to Substantial Completion of all the Work.

32. *PCBs*--Polychlorinated *biphenyls.*

33. *Petroleum*--Petroleum, including crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute), such as oil, petroleum, fuel oil, oil sludge, oil refuse, gasoline, kerosene, and oil mixed with other non-Hazardous Waste and crude oils.

34. *Project*--The total construction of which the Work to be performed under the Contract Documents may be the whole, or a part as may be indicated elsewhere in the Contract Documents.

35. *Project Manual*--The bound documentary information prepared for bidding and constructing the Work. A listing of the contents of the Project Manual, which may be bound in one or more volumes, is contained in the table(s) of contents.

36. *Radioactive Material*--Source, special nuclear, or byproduct material as defined by the Atomic Energy Act of 1954 (42 USC Section 2011 et seq.) as amended from time to time.

37. *Resident Project Representative*--The authorized representative of ENGINEER who may be assigned to the Site or any part thereof.

38. *Samples*--Physical examples of materials, equipment, or workmanship that are representative of some portion of the Work and which establish the standards by which such portion of the Work will be judged.

39. *Shop Drawings*--All drawings, diagrams, illustrations, schedules, and other data or information which are specifically prepared or assembled by or for CONTRACTOR and submitted by CONTRACTOR to illustrate some portion of the Work.

40. *Site*--Lands or areas indicated in the Contract Documents as being furnished by OWNER upon which the Work is to be performed, including rights-of-way and easements for access thereto, and such other lands furnished by OWNER which are designated for the use of CONTRACTOR.

*41. *Specifications*~~--That part of the Contract Documents consisting of written technical descriptions of materials, equipment, systems, standards, and workmanship as applied to the Work and certain administrative details applicable thereto.~~

42. *Subcontractor*--An individual or entity having a direct contract with CONTRACTOR or with any other Subcontractor for the performance of a part of the Work at the Site.

**43. *Substantial Completion*--The time at which the Work (or a specified part thereof) has progressed to the point where, in the opinion of ENGINEER, the Work (or a specified part thereof) is sufficiently complete, in accordance with the Contract Documents, so that the Work (or a specified part thereof) can be utilized for the purposes for which it is intended. The terms "substantially complete" and "substantially completed" as applied to all or part of the Work refer to Substantial Completion thereof.

44. *Supplementary Conditions*--That part of the Contract Documents which amends or supplements these General Conditions.

45. *Supplier*--A manufacturer, fabricator, supplier, distributor, material-man, or vendor having a direct contract with CONTRACTOR or with any Subcontractor to furnish materials or equipment to be incorporated in the Work by CONTRACTOR or any Subcontractor.

46. *Underground Facilities*--All underground pipelines, conduits, ducts, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or attachments, and any encasements containing such facilities, including those that convey electricity, gases, steam, liquid petroleum products, telephone or other communications, cable television, water, wastewater, storm water, other liquids or chemicals, or traffic or other control systems.

47. *Unit Price Work*--Work to be paid for on the basis of unit prices.

48. *Work*--The entire completed construction or the various separately identifiable parts thereof required to be provided under the Contract Documents. Work includes and is the result of performing or providing all labor, services, and documentation necessary to produce such construction, and furnishing, installing, and incorporating all materials and equipment into such construction, all as required by the Contract Documents.

49. *Work Change Directive*--A written statement to CONTRACTOR issued on or after the Effective Date of the Agreement and signed by OWNER and recommended by ENGINEER ordering an addition, deletion, or revision in the Work, or responding to differing or unforeseen subsurface or physical conditions under which the Work is to be performed or to emergencies. A Work Change Directive will not change the Contract Price or the Contract Times but is evidence that the parties expect that the change ordered or documented by a Work Change Directive will be incorporated in a subsequently issued Change Order following negotiations by the parties as to its effect, if any, on the Contract Price or Contract Times.

50. *Written Amendment*--A written statement modifying the Contract Documents, signed by OWNER and CONTRACTOR on or after the Effective Date of the Agreement and normally dealing with the non-engineering or nontechnical rather than strictly construction-related aspects of the Contract Documents.

1.02 Terminology

A. Intent of Certain Terms or Adjectives

1. Whenever in the Contract Documents the terms "as allowed," "as approved," or terms of like effect or import are used, or the adjectives "reasonable," "suitable," "acceptable," "proper," "satisfactory," or adjectives of like effect or import are used to describe an action or determination of ENGINEER as to the Work, it is intended that such action or determination will be solely to evaluate, in general, the completed Work for compliance with the requirements of and information in the Contract Documents and conformance with the design concept of the completed Project as a functioning whole as shown or indicated in the Contract Documents (unless there is a specific statement indicating otherwise).

   The use of any such term or adjective shall not be effective to assign to ENGINEER any duty or authority to supervise or direct the performance of the Work or any duty or authority to undertake responsibility contrary to the provisions of paragraph 9.10 or any other provision of the Contract Documents.

B. Day

1. The word "day" shall constitute a calendar day of 24 hours measured from midnight to the next midnight.

C. Defective

1. The word "defective," when modifying the word "Work," refers to Work that is unsatisfactory, faulty, or deficient in that it does not conform to the Contract Documents or does not meet the requirements of any inspection, reference standard, test, or approval referred to in the Contract Documents, or has been damaged prior to ENGINEER's recommendation of final payment (unless responsibility for the protection thereof has been assumed by OWNER at Substantial Completion in accordance with paragraph 14.04 or 14.05).

D. Furnish, Install, Perform, Provide

1. The word "furnish," when used in connection with services, materials, or equipment, shall mean to supply and deliver said services, materials, or equipment to the Site (or some other specified location) ready for use or installation and in usable or operable condition.

2. The word "install," when used in connection with services, materials, or equipment, shall mean to put into use or place in final position said services, materials, or equipment complete and ready for intended use.

3. The words "perform" or "provide," when used in connection with services, materials, or equipment, shall mean to furnish and install said services, materials, or equipment complete and ready for intended use.

4. When "furnish," "install," "perform," or "provide" is not used in connection with services, materials, or equipment in a context clearly requiring an obligation of CONTRACTOR, "provide" is implied.

E. Unless stated otherwise in the Contract Documents, words or phrases which have a well-known technical or construction industry or trade meaning are used in the Contract Documents in accordance with such recognized meaning.

ARTICLE 2 - PRELIMINARY MATTERS

2.01 Delivery of Bonds

A. When CONTRACTOR delivers the executed Agreements to OWNER, CONTRACTOR shall also deliver to OWNER such Bonds as CONTRACTOR may be required to furnish.

2.02 Copies of Documents

A. OWNER shall furnish to CONTRACTOR up to ten copies of the Contract Documents. Additional copies will be furnished upon request at the cost of reproduction.

2.03 Commencement of Contract Times; Notice to Proceed *

A. The Contract Times will commence to run on the thirtieth day after the Effective Date of the Agreement or, if a Notice to Proceed is given, on the day indicated in the Notice to Proceed. A Notice to Proceed may be given at any time within 30 days after the Effective Date of the Agreement. In no event will the Contract Times commence to run later than the sixtieth day after the day of Bid opening or the thirtieth day after the Effective Date of the Agreement, whichever date is earlier.

2.04 Starting the Work

A. CONTRACTOR shall start to perform the Work on the date when the Contract Times commence to run. No Work shall be done at the Site prior to the date on which the Contract Times commence to run.

2.05 Before Starting Construction

A. *CONTRACTOR's Review of Contract Documents:* Before undertaking each part of the Work, CONTRACTOR shall carefully study and compare the Contract Documents and check and verify pertinent figures therein and all applicable field measurements. CONTRACTOR shall promptly report in writing to ENGINEER any conflict, error, ambiguity, or discrepancy which CONTRACTOR may discover and shall obtain a written interpretation or clarification from ENGINEER before proceeding with any Work affected thereby; however, CONTRACTOR shall not be liable to OWNER or ENGINEER for failure to report any conflict, error, ambiguity, or discrepancy in the Contract Documents unless CONTRACTOR knew or reasonably should have known thereof.

B. *Preliminary Schedules:* Within ten days after the Effective Date of the Agreement (unless otherwise specified in the General Requirements), CONTRACTOR shall submit to ENGINEER for its timely review:

1. a preliminary progress schedule indicating the times (numbers of days or dates) for starting and completing the various stages of the Work, including any Milestones specified in the Contract Documents;

2. a preliminary schedule of Shop Drawing and Sample submittals which will list each required submittal and the times for submitting, reviewing, and processing such submittal; and

3. a preliminary schedule of values for all of the Work which includes quantities and prices of items which when added together equal the Contract Price and subdivides the Work into component parts in sufficient detail to serve as the basis for progress payments during performance of the Work. Such prices will include an appropriate amount of overhead and profit applicable to each item of Work.

*****C. *Evidence of Insurance:* ~~Before any Work at the Site is started, CONTRACTOR and OWNER shall each deliver to the other, with copies to each additional insured identified in the Supplementary Conditions, certificates of insurance (and other evidence of insurance which either of them or any additional insured may reasonably request) which CONTRACTOR and OWNER respectively are required to purchase and maintain in accordance with Article 5.~~

2.06 Preconstruction Conference

A. Within 20 days after the Contract Times start to run, but before any Work at the Site is started, a conference attended by CONTRACTOR, ENGINEER, and others as appropriate will be held to establish a working understanding among the parties as to the Work and to discuss the schedules referred to in paragraph 2.05.B, procedures for handling Shop Drawings and other submittals, processing Applications for Payment, and maintaining required records.

2.07 Initial Acceptance of Schedules

A. Unless otherwise provided in the Contract Documents, at least ten days before submission of the first Application for Payment a conference attended by CON- TRACTOR, ENGINEER, and others as appropriate will be held to review for acceptability to ENGINEER as provided below the schedules submitted in accordance with paragraph 2.05.B. CONTRACTOR shall have an additional ten days to make corrections and adjustments and to complete and resubmit the schedules. No progress payment shall be made to CONTRACTOR until acceptable schedules are submitted to ENGINEER.

1. The progress schedule will be acceptable to ENGINEER if it provides an orderly progression of the Work to completion within any specified Mile- stones and the Contract Times. Such acceptance will not impose on ENGINEER responsibility for the progress schedule, for sequencing, scheduling, or progress of the Work nor interfere with or relieve CONTRACTOR from CONTRACTOR's full responsibility therefor.

2. CONTRACTOR's schedule of Shop Drawing and Sample submittals will be acceptable to ENGINEER if it provides a workable arrangement for reviewing and processing the required submittals.

3. CONTRACTOR's schedule of values will be acceptable to ENGINEER as to form and substance if it provides a reasonable allocation of the Contract Price to component parts of the Work.

ARTICLE 3 - CONTRACT DOCUMENTS: INTENT, AMENDING, REUSE

3.01 Intent

*****A. The Contract Documents are complementary; what is called for by one is as binding as if called for by all.

B. It is the intent of the Contract Documents to describe a functionally complete Project (or part thereof) to be constructed in accordance with the Contract Documents. Any labor, documentation, services, materials, or equipment that may reasonably be inferred from the Contract Documents or from prevailing custom or trade usage as being required to produce the intended result will be provided whether or not specifically called for at no additional cost to OWNER.

C. Clarifications and interpretations of the Contract Documents shall be issued by ENGINEER as provided in Article 9.

3.02 Reference Standards

A. Standards, Specifications, Codes, Laws, and Regulations

1. Reference to standards, specifications, manuals, or codes of any technical society, organization, or association, or to Laws or Regulations, whether such reference be specific or by implication, shall mean the standard, specification, manual, code, or Laws or Regulations in effect at the time of opening of Bids (or on the Effective Date of the Agreement if there were no Bids), except as may be otherwise specifically stated in the Contract Documents.

2. No provision of any such standard, specification, manual or code, or any instruction of a Supplier shall be effective to change the duties or responsibilities of OWNER, CONTRACTOR, or ENGINEER, or any of their subcontractors, consultants, agents, or employees from those set forth in the Contract Documents, nor shall any such provision or instruction be effective to assign to OWNER, ENGINEER, or any of ENGINEER's Consultants, agents, or employees any duty or authority to supervise or direct the performance of the Work or any duty or authority to undertake responsibility inconsistent with the provisions of the Contract Documents.

3.03 Reporting and Resolving Discrepancies

A. Reporting Discrepancies

1. If, during the performance of the Work, CONTRACTOR discovers any conflict, error, ambiguity, or discrepancy within the Contract Documents or between the Contract Documents and any provision of any Law or Regulation applicable to the performance of the Work or of any standard, specification, manual or code, or of any instruction of any Supplier, CONTRACTOR shall report it to ENGINEER in writing at once. CONTRACTOR shall not proceed with the Work affected thereby (except in an emergency as required by paragraph 6.16.A) until an amendment or supplement to the Contract Documents has been issued by one of the methods indicated in paragraph 3.04; provided, however, that CONTRACTOR shall not be liable to OWNER or ENGINEER for failure to report any such conflict, error, ambiguity, or discrepancy unless CONTRACTOR knew or reasonably should have known thereof.

B. Resolving Discrepancies

1. Except as may be otherwise specifically stated in the Contract Documents, the provisions of the Contract Documents shall take precedence in resolving any conflict, error, ambiguity, or discrepancy between the provisions of the Contract Documents and:

a. the provisions of any standard, specification, manual, code, or instruction (whether or not specifically incorporated by reference in the Contract Documents); or

b. the provisions of any Laws or Regulations applicable to the performance of the Work (unless such an interpretation of the provisions of the Contract Documents would result in violation of such Law or Regulation).

3.04 Amending and Supplementing Contract Documents

A. The Contract Documents may be amended to provide for additions, deletions, and revisions in the Work or to modify the terms and conditions thereof in one or more of the following ways: (i) a Written Amendment; (ii) a Change Order; or (iii) a Work Change Directive.

B. The requirements of the Contract Documents may be supplemented, and minor variations and deviations in the Work may be authorized, by one or more of the following ways: (i) a Field Order; (ii) ENGINEER's approval of a Shop Drawing or Sample; or (iii) ENGINEER's written interpretation or clarification.

3.05 Reuse of Documents

A. CONTRACTOR and any Subcontractor or Supplier or other individual or entity performing or furnishing any of the Work under a direct or indirect contract with OWNER: (i) shall not have or acquire any title to or ownership rights in any of the Drawings, Specifications, or other documents (or copies of any thereof) prepared by or bearing the seal of ENGINEER or ENGINEER's Consultant, including electronic media editions; and (ii) shall not reuse any of such Drawings, Specifications, other documents, or copies thereof on extensions of the Project or any other project without written consent of OWNER and ENGINEER and specific written verification or adaption by ENGINEER. This prohibition will survive final payment, completion, and acceptance of the Work, or termination or completion of the Contract. Nothing herein shall preclude CONTRACTOR from retaining copies of the Contract Documents for record purposes.

ARTICLE 4 – AVAILABILITY OF LANDS, SUBSURFACE AND PHYSICAL CONDITIONS, REFERENCE POINTS REFERENCE POINTS

4.01 Availability of Lands

A. OWNER shall furnish the Site. OWNER shall notify CONTRACTOR of any encumbrances or restrictions not of general application but specifically related to use of the Site with which CONTRACTOR must comply in performing the Work. OWNER will obtain in a timely manner and pay for easements for permanent structures or permanent changes in existing facilities. If CONTRACTOR and OWNER are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in the Contract Price or Contract Times, or both, as a result of any delay in OWNER's furnishing the Site, CONTRACTOR may make a Claim therefor as provided in paragraph 10.05.

B. Upon reasonable written request, OWNER shall furnish CONTRACTOR with a current statement of record legal title and legal description of the lands upon which the Work is to be performed and OWNER's interest therein as necessary for giving notice of or filing a mechanic's or construction lien against such lands in accordance with applicable Laws and Regulations.

C. CONTRACTOR shall provide for all additional lands and access thereto that may be required for temporary construction facilities or storage of materials and equipment.

4.02 Subsurface and Physical Conditions

* A. Reports and Drawings: The Supplementary Conditions identify:

1. those reports of explorations and tests of subsurface conditions at or contiguous to the Site that ENGINEER has used in preparing the Contract Documents; and

2. those drawings of physical conditions in or relating to existing surface or subsurface structures at or contiguous to the Site (except Underground Facilities) that ENGINEER has used in preparing the Contract Documents.

B. *Limited Reliance by CONTRACTOR on Technical Data Authorized:* CONTRACTOR may rely upon the general accuracy of the "technical data" contained in such reports and drawings, but such reports and drawings are not Contract Documents. Such "technical data" is identified in the Supplementary Conditions. Except for such reliance on such "technical data," CONTRACTOR may not rely upon or make any Claim against OWNER, ENGINEER, or any of ENGINEER's Consultants with respect to:

1. the completeness of such reports and drawings for CONTRACTOR's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by CONTRACTOR, and safety precautions and programs incident thereto; or

2. other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings; or

3. any CONTRACTOR interpretation of or conclusion drawn from any "technical data" or any such other data, interpretations, opinions, or information.

4.03 Differing Subsurface or Physical Conditions

A. *Notice:* If CONTRACTOR believes that any subsurface or physical condition at or contiguous to the Site that is uncovered or revealed either:

1. is of such a nature as to establish that any "technical data" on which CONTRACTOR is entitled to rely as provided in paragraph 4.02 is materially inaccurate; or

2. is of such a nature as to require a change in the Contract Documents; or

3. differs materially from that shown or indicated in the Contract Documents; or

4. is of an unusual nature, and differs materially from conditions ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract Documents; then CONTRACTOR shall, promptly after becoming aware thereof and before further disturbing the subsurface or physical conditions or performing any Work in connection therewith (except in an emergency as required by paragraph 6.16.A), notify OWNER and ENGINEER in writing about such condition. CONTRACTOR shall not further disturb such condition or perform any Work in connection therewith (except as aforesaid) until receipt of written order to do so.

** B. *ENGINEER's Review:* After receipt of written notice as required by paragraph 4.03.A, ENGINEER will promptly review the pertinent condition, determine the necessity of OWNER's obtaining additional exploration or tests with respect thereto, and advise OWNER in writing (with a copy to CONTRACTOR) of ENGINEER's findings and conclusions.

C. Possible Price and Times Adjustments

1. The Contract Price or the Contract Times, or both, will be equitably adjusted to the extent that the existence of such differing subsurface or physical condition causes an increase or decrease in CONTRACTOR's cost of, or time required for, performance of the Work; subject, however, to the following:

a. such condition must meet any one or more of the categories described in paragraph 4.03.A; and

b. with respect to Work that is paid for on a Unit Price Basis, any adjustment in Contract Price will be subject to the provisions of para- graphs 9.08 and 11.03.

2. CONTRACTOR shall not be entitled to any adjustment in the Contract Price or Contract Times if:

    a. CONTRACTOR knew of the existence of such conditions at the time CONTRACTOR made a final commitment to OWNER in respect of Contract Price and Contract Times by the submission of a Bid or becoming bound under a negotiated contract; or

    b. the existence of such condition could reasonably have been discovered or revealed as a result of any examination, investigation, exploration, test, or study of the Site and contiguous areas required by the Bidding Requirements or Contract Documents to be conducted by or for CONTRACTOR prior to CONTRACTOR's making such final commitment; or

    c. CONTRACTOR failed to give the written notice within the time and as required by paragraph 4.03.A.

3. If OWNER and CONTRACTOR are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in the Contract Price or Contract Times, or both, a Claim may be made therefor as provided in paragraph 10.05. However, OWNER, ENGINEER, and ENGINEER's Consultants shall not be liable to CONTRACTOR for any claims, costs, losses, or damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) sustained by CONTRACTOR on or in connection with any other project or anticipated project.

4.04 Underground Facilities

A. *Shown or Indicated:* The information and data shown or indicated in the Contract Documents with respect to existing Underground Facilities at or contiguous to the Site is based on information and data furnished to OWNER or ENGINEER by the owners of such Underground Facilities, including OWNER, or by others. Unless it is otherwise expressly provided in the Supplementary Conditions:

1. OWNER and ENGINEER shall not be responsible for the accuracy or completeness of any such information or data; and

2. the cost of all of the following will be included in the Contract Price, and CONTRACTOR shall have full responsibility for:

    a. reviewing and checking all such information and data,

    b. locating all Underground Facilities shown or indicated in the Contract Documents,

    c. coordination of the Work with the owners of such Underground Facilities, including OWNER, during construction, and

    d. the safety and protection of all such Underground Facilities and repairing any damage thereto resulting from the Work.

B. Not Shown or Indicated

1. If an Underground Facility is uncovered or revealed at or contiguous to the Site which was not shown or indicated, or not shown or indicated with reasonable accuracy in the Contract Documents, CONTRACTOR shall, promptly after becoming aware thereof and before further disturbing conditions affected thereby or performing any Work in connection therewith (except in an emergency as required by paragraph 6.16.A), identify the owner of such Underground Facility and give written notice to that owner and to OWNER and ENGINEER. ENGINEER will promptly review the Underground Facility and determine the extent, if any, to which a change is required in the Contract Documents to reflect and document the consequences of the existence or location of the Underground Facility. During such time, CONTRACTOR shall be responsible for the safety and protection of such Underground Facility.

2. If ENGINEER concludes that a change in the Contract Documents is required, a Work Change Directive or a Change Order will be issued to reflect and document such consequences. An equitable *adjustment shall be made i n the Contract Price or Contract Times, or both, to the extent that they are attributable to the existence or location of any Underground Facility that was not shown or *indicated or not shown or indicated with reasonable accuracy in the Contract Documents and that CONTRACTOR did not know of and could not reasonably have been expected to be aware of or to have anticipated. If OWNER and CONTRACTOR are unable to agree on entitlement to or on the amount or extent, if any, of any such adjustment in Contract Price or Contract Times, OWNER or CONTRACTOR may make a Claim therefor as provided in paragraph 10.05.

4.05 Reference Points

A. OWNER shall provide engineering surveys to establish reference points for construction which in ENGINEER's judgment are necessary to enable CONTRACTOR to proceed with the Work. CONTRACTOR shall be responsible for laying out the Work, shall protect and preserve the established reference points and property monuments, and shall make no changes or relocations without the prior written approval of OWNER. CONTRACTOR shall report to ENGINEER whenever any reference point or property monument is lost or destroyed or requires relocation because of necessary changes in grades or locations, and shall be responsible for the accurate replacement or relocation of such reference points or property monuments by professionally qualified personnel.**

4.06 Hazardous Environmental Condition at Site

A. *Reports and Drawings:* Reference is made to the Supplementary Conditions for the identification of those** reports and drawings relating to a Hazardous Environmental Condition identified at the Site, if any, that have been utilized by the ENGINEER in the preparation of the Contract Documents. *

B. *Limited Reliance by CONTRACTOR on Technical Data Authorized:* CONTRACTOR may rely upon the general accuracy of the "technical data" contained in such reports and drawings, but such reports and drawings are not Contract Documents. Such "technical data" is identified in the Supplementary Conditions. Except for such reliance on such "technical data," CONTRACTOR may not rely upon or make any Claim against OWNER, ENGINEER or any of ENGINEER's Consultants with respect to:

1. the completeness of such reports and drawings for CONTRACTOR's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences and procedures of construction to be employed by CONTRACTOR and safety precautions and programs incident thereto; or

2. other data, interpretations, opinions and information contained in such reports or shown or indicated in such drawings; or

3. any CONTRACTOR interpretation of or conclusion drawn from any "technical data" or any such other data, interpretations, opinions or information.

C. CONTRACTOR shall not be responsible for any Hazardous Environmental Condition uncovered or revealed at the Site which was not shown or indicated in Drawings or Specifications or identified in the Contract Documents to be within the scope of the Work. CONTRACTOR shall be responsible for a Hazardous Environmental Condition created with any materials brought to the Site by CONTRACTOR, Subcontractors, Suppliers, or anyone else for whom CONTRACTOR is responsible.

D. If CONTRACTOR encounters a Hazardous Environmental Condition or if CONTRACTOR or anyone for whom CONTRACTOR is responsible creates a Hazardous Environmental Condition, CONTRACTOR shall immediately: (i) secure or otherwise isolate such condition; (ii) stop all Work in connection with such condition and in any area affected thereby (except in an emergency as required by paragraph 6.16); and (iii) notify OWNER and ENGINEER (and promptly thereafter confirm such notice in writing). OWNER shall promptly consult with ENGINEER concerning the necessity for OWNER to retain a qualified expert to evaluate such condition or take corrective action, if any.

E. CONTRACTOR shall not be required to resume Work in connection with such condition or in any affected area until after OWNER has obtained any required permits related thereto and delivered to CONTRACTOR written notice: (i) specifying that such condition and any affected area is or has been rendered safe for the resumption of Work; or (ii) specifying any special conditions under which such Work may be resumed safely. If OWNER and CONTRACTOR cannot agree as to entitlement to or on the amount or extent, if any, of any adjustment in Contract Price or Contract Times, or both, as a result of such Work stop- page or such special conditions under which Work is agreed to be resumed by CONTRACTOR, either party may make a Claim therefor as provided in paragraph 10.05.

F. If after receipt of such written notice CONTRACTOR does not agree to resume such Work based on a reasonable belief it is unsafe, or does not agree to resume such Work under such special conditions, then OWNER may order the portion of the Work that is in the area affected by such condition to be deleted from the Work. If OWNER and CONTRACTOR cannot agree as to entitlement to or on the amount or extent, if any, of an adjustment in Contract Price or Contract Times as a result of deleting such portion of the Work, then either party may make a Claim therefor as provided in paragraph 10.05. OWNER may have such deleted portion of the Work performed by OWNER's own forces or others in accordance with Article 7.

G. To the fullest extent permitted by Laws and Regulations, OWNER shall indemnify and hold harmless CONTRACTOR, Subcontractors, ENGINEER, ENGINEER's Consultants and the officers, directors, partners, employees, agents, other consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to a Hazardous Environmental Condition, provided that such Hazardous Environmental Condition: (i) was not shown or indicated in the Drawings or Specifications or identified in the Contract Documents to be included within the scope of the Work, and (ii) was not created by CONTRACTOR or by anyone for whom CONTRACTOR is responsible. Nothing in this paragraph 4.06.E shall obligate OWNER to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

H. To the fullest extent permitted by Laws and Regulations, CONTRACTOR shall indemnify and hold harmless OWNER, ENGINEER, ENGINEER's Consultants, and the officers, directors, partners, employees, agents, other consultants, and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to a Hazardous Environmental Condition created by CONTRACTOR or by anyone for whom CONTRACTOR is responsible. Nothing in this paragraph 4.06.F shall obligate CONTRACTOR to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

I. The provisions of paragraphs 4.02, 4.03, and 4.04 are not intended to apply to a Hazardous Environmental Condition uncovered or revealed at the Site.

ARTICLE 5 - BONDS AND INSURANCE

5.01 Performance, Payment, and Other Bonds

A. CONTRACTOR shall furnish performance and payment Bonds, each in an amount at least equal to the Contract Price as security for the faithful performance and payment of all CONTRACTOR's obligations under the Contract Documents. These Bonds shall remain in effect at least until one year after the date when final payment becomes due, except as provided otherwise by Laws or Regulations or by the Contract Documents. CONTRACTOR shall also furnish such other Bonds as are required by the Contract Documents.*

B. All Bonds shall be in the form prescribed by the Contract Documents except as provided otherwise by Laws or Regulations, and shall be executed by such sureties as are named in the current list of "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies" as published in Circular 570 (amended) by the Financial Management Service, Surety Bond Branch, U.S. Department of the Treasury. All Bonds signed by an agent must be accompanied by a certified copy of such agent's authority to act.

C. If the surety on any Bond furnished by CON- TRACTOR is declared bankrupt or becomes insolvent or its right to do business is terminated in any state where any part of the Project is located or it ceases to meet the requirements of paragraph 5.01.B, CONTRACTOR shall within 20 days thereafter substitute another Bond and surety, both of which shall comply with the requirements of paragraphs 5.01.B and 5.02.

5.02 Licensed Sureties and Insurers

A. All Bonds and insurance required by the Contract Documents to be purchased and maintained by OWNER or CONTRACTOR shall be obtained from surety or insurance companies that are duly licensed or authorized in the jurisdiction in which the Project is located to issue Bonds or insurance policies for the limits and coverages so required. Such surety and insurance companies shall also meet such additional requirements and qualifications as may be provided in the Supplementary Conditions.

5.03 Certificates of Insurance

A. CONTRACTOR shall deliver to OWNER, with copies to each additional insured identified in the Supplementary Conditions, certificates of insurance (and other evidence of insurance requested by OWNER or any other additional insured) which CONTRACTOR is required to *****purchase and maintain. ~~OWNER shall deliver to CONTRACTOR, with copies to each additional insured identified in the Supplementary Conditions, certificates of insurance (and other evidence of insurance requested by CONTRACTOR or any other additional insured) which OWNER is required to purchase and maintain.~~

5.04 CONTRACTOR's Liability Insurance

*****A. CONTRACTOR shall purchase and maintain such liability and other insurance as is appropriate for the Work being performed and as will provide protection from claims set forth below which may arise out of or result from CONTRACTOR's performance of the Work and CONTRACTOR's other obligations under the Contract Documents, whether it is to be performed by CONTRACTOR, any Subcontractor or Supplier, or by anyone directly or indirectly employed by any of them to perform any of the Work, or by anyone for whose acts any of them may be liable:

1. claims under workers' compensation, disability benefits, and other similar employee benefit acts;
2. claims for damages because of bodily injury, occupational sickness or disease, or death of CONTRACTOR's employees;
3. claims for damages because of bodily injury, sickness or disease, or death of any person other than CONTRACTOR's employees;
4. claims for damages insured by reasonably available personal injury liability coverage which are sustained: (i) by any person as a result of an offense directly or indirectly related to the employment of such person by CONTRACTOR, or (ii) by any other person for any other reason;
5. claims for damages, other than to the Work itself, because of injury to or destruction of tangible property wherever located, including loss of use resulting therefrom; and
6. claims for damages because of bodily injury or death of any person or property damage arising out of the ownership, maintenance or use of any motor vehicle.

B. The policies of insurance so required by this paragraph 5.04 to be purchased and maintained shall:

*1. with respect to insurance required by para- graphs 5.04.A.3 through 5.04.A.6 inclusive, include as additional insureds (subject to any customary exclusion in respect of professional liability) OWNER, ENGINEER, ENGINEER's Consultants, and any other individuals or entities identified in the Supplementary Conditions, all of whom shall be listed as additional insureds, and include coverage for the respective officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of all such additional insureds, and the insurance afforded to these additional insureds shall provide primary coverage for all claims covered thereby;

2. include at least the specific coverages and be written for not less than the limits of liability provided in the Supplementary Conditions or required by Laws or Regulations, whichever is greater;

3. include completed operations insurance;

4. include contractual liability insurance covering CONTRACTOR's indemnity obligations under paragraphs 6.07, 6.11, and 6.20;

5. contain a provision or endorsement that the coverage afforded will not be canceled, materially changed or renewal refused until at least thirty days prior written notice has been given to OWNER and CONTRACTOR and to each other additional insured identified in the Supplementary Conditions to whom a certificate of insurance has been issued (and the certificates of insurance furnished by the CONTRACTOR pursuant to paragraph 5.03 will so provide);

6. remain in effect at least until final payment and at all times thereafter when CONTRACTOR may be correcting, removing, or replacing defective Work in accordance with paragraph 13.07; and

7. with respect to completed operations insurance, and any insurance coverage written on a claims-made basis, remain in effect for at least two years after final payment (and CONTRACTOR shall furnish OWNER and each other additional insured identified in the Supplementary Conditions, to whom a certificate of insurance has been issued, evidence satisfactory to OWNER and any such additional insured of continuation of such insurance at final payment and one year thereafter).*

~~*5.05 OWNER's Liability Insurance*~~

~~*~~A. In addition to the insurance required to be provided by CONTRACTOR under paragraph 5.04, OWNER, at OWNER's option, may purchase and maintain at OWNER's expense OWNER's own liability insurance as will protect OWNER against claims which may arise from operations under the Contract Documents.~~

~~*5.06 Property Insurance*~~

~~*~~ A. Unless otherwise provided in the Supplementary Conditions, OWNER shall purchase and maintain property insurance upon the Work at the Site in the amount of the full replacement cost thereof (subject to such deductible amounts as may be provided in the Supplementary Conditions or required by Laws and Regulations). This insurance shall:

1. include the interests of OWNER, CON- TRACTOR, Subcontractors, ENGINEER, ENGINEER's Consultants, and any other individuals or entities identified in the Supplementary Conditions, and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them, each of whom is deemed to have an insurable interest and shall be listed as an additional insured;

2. be written on a Builder's Risk "all-risk" or open peril or special causes of loss policy form that shall at least include insurance for physical loss or damage to the Work, temporary buildings, false work, and materials and equipment in transit, and shall insure against at least the following perils or causes of loss: fire, lightning, extended coverage, theft, vandalism and malicious mischief, earthquake, collapse, debris removal, demolition occasioned by enforcement of Laws and Regulations, water dam- age, and such other perils or causes of loss as may be specifically required by the Supplementary Conditions;

3. include expenses incurred in the repair or replacement of any insured property (including but not limited to fees and charges of engineers and architects);

4. cover materials and equipment stored at the Site or at another location that was agreed to in writing by OWNER prior to being incorporated in the Work, provided that such materials and equipment have been included in an Application for Payment recommended by ENGINEER;

5. allow for partial utilization of the Work by OWNER;

6. include testing and startup; and

7. be maintained in effect until final payment is made unless otherwise agreed to in writing by OWNER, CONTRACTOR, and ENGINEER with 30 days written notice to each other additional insured to whom a certificate of insurance has been issued.

~~*~~B. OWNER shall purchase and maintain such boiler and machinery insurance or additional property insurance as may be required by the Supplementary Conditions or Laws and Regulations which will include the interests of OWNER, CONTRACTOR, Subcontractors, ENGINEER, ENGINEER's Consultants, and any other individuals or entities identified in the Supplementary Conditions, each of whom is deemed to have an insurable interest and shall be listed as an insured or additional insured.

~~*~~ C. All the policies of insurance (and the certificates or other evidence thereof) required to be purchased and maintained in accordance with paragraph 5.06 will contain a provision or endorsement that the coverage afforded will not be canceled or materially changed or renewal refused until at least 30 days prior written notice has been given to OWNER and CONTRACTOR and to each other additional insured to whom a certificate of insurance has been issued and will contain waiver provisions in accordance with paragraph *5.07*.

~~*~~D. OWNER shall not be responsible for purchasing and maintaining any property insurance specified in this paragraph 5.06 to protect the interests of CONTRACTOR, Subcontractors, or others in the Work to the extent of any deductible amounts that are identified in the Supplementary Conditions. The risk of loss within such identified deductible amount will be borne by CONTRACTOR, Subcontractors, or others suffering any such loss, and if any of them wishes property insurance coverage within the limits of such amounts, each may purchase and maintain it at the purchaser's own expense.

*E. If CONTRACTOR requests in writing that other special insurance be included in the property insurance policies provided under paragraph 5.06, OWNER shall, if possible, include such insurance, and the cost thereof will be charged to CONTRACTOR by appropriate Change Order or Written Amendment. Prior to commencement of the Work at the Site, OWNER shall in writing advise CONTRACTOR whether or not such other insurance has been procured by OWNER.

5.07 Waiver of Rights

*A. OWNER and CONTRACTOR intend that all policies purchased in accordance with paragraph 5.06 will protect OWNER, CONTRACTOR, Subcontractors, ENGINEER, ENGINEER's Consultants, and all other individuals or entities identified in the Supplementary Conditions to be listed as insureds or additional insureds (and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them) in such policies and will provide primary coverage for all losses and damages caused by the perils or causes of loss covered thereby. All such policies shall contain provisions to the effect that in the event of payment of any loss or damage the insurers will have no rights of recovery against any of the insureds or additional insureds thereunder. OWNER and CONTRACTOR waive all rights against each other and their respective officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them for all losses and damages caused by, arising out of or resulting from any of the perils or causes of loss covered by such policies and any other property insurance applicable to the Work; and, in addition, waive all such rights against Subcontractors, ENGINEER, ENGINEER's Consultants, and all other individuals or entities identified in the Supplementary Conditions to be listed as insureds or additional insureds (and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them) under such policies for losses and damages so caused. None of the above waivers shall extend to the rights that any party making such waiver may have to the proceeds of insurance * held by OWNER as trustee or otherwise payable under any policy so issued.

B. OWNER waives all rights against CONTRACTOR, Subcontractors, ENGINEER, ENGINEER's Consultants, and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them for:

1. loss due to business interruption, loss of use, or other consequential loss extending beyond direct physical loss or damage to OWNER's property or the Work caused by, arising out of, or resulting from fire or other peril whether or not insured by OWNER; and

2. loss or damage to the completed Project or part thereof caused by, arising out of, or resulting from fire or other insured peril or cause of loss covered by any property insurance maintained on the completed Project or part thereof by OWNER during partial utilization pursuant to paragraph 14.05, after Substantial Completion pursuant to paragraph 14.04, or after final payment pursuant to paragraph 14.07.

C. Any insurance policy maintained by OWNER covering any loss, damage or consequential loss referred to in paragraph 5.07.B shall contain provisions to the effect that in the event of payment of any such loss, damage, or consequential loss, the insurers will have no rights of recovery against CONTRACTOR, Subcontractors, ENGINEER, or ENGINEER's Consultants and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them.

5.08 Receipt and Application of Insurance Proceeds

*A. Any insured loss under the policies of insurance required by paragraph 5.06 will be adjusted with OWNER and made payable to OWNER as fiduciary for the insureds, as their interests may appear, subject to the requirements of any applicable mortgage clause and of paragraph 5.08.B. OWNER shall deposit in a separate account any money so received and shall distribute it in accordance with such agreement as the parties in interest may reach. If no other special agreement is reached, the damaged Work shall be repaired or replaced, the moneys so received applied on account thereof, and the Work and the cost thereof covered by an appropriate Change Order or Written Amendment.

*B. OWNER as fiduciary shall have power to adjust and settle any loss with the insurers unless one of the parties in interest shall object in writing within 15 days after the occurrence of loss to OWNER's exercise of this power. If such objection be made, OWNER as fiduciary shall make settlement with the insurers in accordance with such agreement as the parties in interest may reach. If no such agreement among the parties in interest is reached, OWNER as fiduciary shall adjust and settle the loss with the insurers and, if required in writing by any party in interest, OWNER as fiduciary shall give bond for the proper performance of such duties.

5.09 Acceptance of Bonds and Insurance; Option to Replace

*A. If either OWNER or CONTRACTOR has any objection to the coverage afforded by or other provisions of the Bonds or insurance required to be purchased and maintained by the other party in accordance with Article 5 on the basis of non-conformance with the Contract Documents, the objecting party shall so notify the other party in writing within 10 days after receipt of the certificates (or other evidence requested) required by paragraph 2.05.C. OWNER and CONTRACTOR shall each provide to the other such additional information in respect of insurance provided as the other may reasonably request. If either party does not purchase or maintain all of the Bonds and insurance required of such party by the Contract Documents, such party shall notify the other party in writing of such failure to purchase prior to the start of the Work, or of such failure to maintain prior to any change in the required coverage. Without prejudice to any other right or remedy, the other party may elect to obtain equivalent Bonds or insurance to protect such other party's interests at the expense of the party who was required to provide such coverage, and a Change Order shall be issued to adjust the Contract Price accordingly.

5.10 Partial Utilization, Acknowledgment of Property Insurer

A. If OWNER finds it necessary to occupy or use a portion or portions of the Work prior to Substantial Completion of all the Work as provided in paragraph 14.05, no such use or occupancy shall commence before the insurers providing the property insurance pursuant to paragraph 5.06 have acknowledged notice thereof and in writing effected any changes in coverage necessitated thereby. The insurers providing the property insurance shall consent by endorsement on the policy or policies, but the property insurance shall not be canceled or permitted to lapse on account of any such partial use or occupancy.

ARTICLE 6 - CONTRACTOR'S RESPONSIBILITIES

6.01 Supervision and Superintendence

A. CONTRACTOR shall supervise, inspect, and direct the Work competently and efficiently, devoting such attention thereto and applying such skills and expertise as may be necessary to perform the Work in accordance with the Contract Documents. CONTRACTOR shall be solely responsible for the means, methods, techniques, sequences, and procedures of construction, but CONTRACTOR shall not be responsible for the negligence of OWNER or ENGINEER in the design or specification of a specific means, method, technique, sequence, or procedure of construction which is shown or indicated in and expressly required by the Contract Documents. CONTRACTOR shall be responsible to see that the completed Work complies accurately with the Contract Documents.

~~*B. At all times during the progress of the Work, CONTRACTOR shall assign a competent resident superintendent thereto who shall not be replaced without written notice to OWNER and ENGINEER except under extraordinary circumstances. The superintendent will be CONTRACTOR's representative at the Site and shall have authority to act on behalf of CONTRACTOR. All communications given to or received from the superintendent shall be binding on CONTRACTOR.~~

6.02 Labor; Working Hours

A. CONTRACTOR shall provide competent, suitably qualified personnel to survey, lay out, and construct the Work as required by the Contract Documents. CONTRACTOR shall at all times maintain good discipline and order at the Site.

B. Except as otherwise required for the safety or protection of persons or the Work or property at the Site or adjacent thereto, and except as otherwise stated in the Contract Documents, all Work at the Site shall be performed during regular working hours, and CONTRACTOR will not permit overtime work or the performance of Work on Saturday, Sunday, or any legal holiday without OWNER's written consent (which will not be unreasonably withheld) given after prior written notice to ENGINEER.

6.03 Services, Materials, and Equipment

A. Unless otherwise specified in the General Requirements, CONTRACTOR shall provide and assume full responsibility for all services, materials, equipment, labor, transportation, construction equipment and machinery, tools, appliances, fuel, power, light, heat, telephone, water, sanitary facilities, temporary facilities, and all other facilities and incidentals necessary for the performance, testing, start-up, and completion of the Work.

B. All materials and equipment incorporated into the Work shall be as specified or, if not specified, shall be of good quality and new, except as otherwise provided in the Contract Documents. All warranties and guarantees specifically called for by the Specifications shall expressly run to the benefit of OWNER. If required by ENGINEER, CONTRACTOR shall furnish satisfactory evidence (including reports of required tests) as to the source, kind, and quality of materials and equipment. All materials and equipment shall be stored, applied, installed, connected, erected, protected, used, cleaned, and conditioned in accordance with instructions of the applicable Supplier, except as otherwise may be provided in the Contract Documents.

6.04 Progress Schedule

A. CONTRACTOR shall adhere to the progress schedule established in accordance with paragraph 2.07 as it may be adjusted from time to time as provided below.

1. CONTRACTOR shall submit to ENGINEER for acceptance (to the extent indicated in paragraph 2.07) proposed adjustments in the progress schedule that will not result in changing the Contract Times (or Milestones). Such adjustments will conform generally to the progress schedule then in effect and additionally will comply with any provisions of the General Requirements applicable thereto.

2. Proposed adjustments in the progress schedule that will change the Contract Times (or Milestones) shall be submitted in accordance with the requirements of Article 12. Such adjustments may only be made by a Change Order or Written Amendment in accordance with Article 12.

**6.05 Substitutes and "Or-Equals"*

A. Whenever an item of material or equipment is specified or described in the Contract Documents by using the name of a proprietary item or the name of a particular Supplier, the specification or description is intended to establish the type, function, appearance, and quality required. Unless the specification or description contains or is followed by words reading that no like, equivalent, or "or-equal" item or no substitution is permitted, other items of material or equipment or material or equipment of other Suppliers may be submitted to ENGINEER for review under the circumstances described below.

1. "Or-Equal" Items: If in ENGINEER's sole discretion an item of material or equipment proposed by CONTRACTOR is functionally equal to that named and sufficiently similar so that no change in related Work will be required, it may be considered by ENGINEER as an "or-equal" item, in which case review and approval of the proposed item may, in ENGINEER's sole discretion, be accomplished without compliance with some or all of the requirements for approval of proposed substitute items. For the purposes of this paragraph 6.05.A.1, a proposed item of material or equipment will be considered functionally equal to an item so named if:

    a. in the exercise of reasonable judgment ENGINEER determines that: (i) it is at least equal in quality, durability, appearance, strength, and design characteristics; (ii) it will reliably perform at least equally well the function imposed by the design concept of the completed Project as a functioning whole, and;

    b. CONTRACTOR certifies that: (i) there is no increase in cost to the OWNER; and (ii) it will conform substantially, even with deviations, to the detailed requirements of the item named in the Contract Documents.

2. Substitute Items

    a. If in ENGINEER's sole discretion an item of material or equipment proposed by CONTRACTOR does not qualify as an "or-equal" item under paragraph 6.05.A.1, it will be considered a proposed substitute item.

    b. CONTRACTOR shall submit sufficient information as provided below to allow ENGINEER to determine that the item of material or equipment proposed is essentially equivalent to that named and an acceptable substitute therefor. Requests for review of proposed substitute items of material or equipment will not be accepted by ENGINEER from anyone other than CON- TRACTOR.

    c. The procedure for review by ENGINEER will be as set forth in paragraph 6.05.A.2.d, as supplemented in the General Requirements and as ENGINEER may decide is appropriate under the circumstances.

    d. CONTRACTOR shall first make written application to ENGINEER for review of a proposed substitute item of material or equipment that CONTRACTOR seeks to furnish or use. The application shall certify that the proposed substitute item will perform adequately the functions and achieve the results called for by the general design, be similar in substance to that specified, and be suited to the same use as that specified. The application will state the extent, if any, to which the use of the proposed substitute item will prejudice CONTRACTOR's achievement of Substantial Completion on time, whether or not use of the proposed substitute item in the Work will require a change in any of the Contract Documents (or in the provisions of any other direct contract with OWNER for work on the Project) to adapt the design to the proposed substitute item and whether or not incorporation or use of the proposed substitute item in connection with the Work is subject to payment of any license fee or royalty. All variations of the proposed substitute item from that specified will be identified in the application, and available engineering, sales, maintenance, repair, and replacement services will be indicated. The application will also contain an itemized estimate of all costs or credits that will result directly or indirectly from use of such substitute item, including costs of redesign and claims of other contractors affected by any resulting change, all of which will be considered by ENGINEER in evaluating the proposed substitute item. ENGINEER may require CONTRACTOR to furnish additional data about the proposed substitute item.

B. Substitute Construction Methods or Procedures: If a specific means, method, technique, sequence, or procedure of construction is shown or indicated in and expressly required by the Contract Documents, CON- TRACTOR may furnish or utilize a substitute means, meth- od, technique, sequence, or procedure of construction approved by ENGINEER. CONTRACTOR shall submit sufficient information to allow ENGINEER, in ENGINEER's sole discretion, to determine that the substitute proposed is equivalent to that expressly called for by the Contract Documents. The procedure for review by ENGINEER will be similar to that provided in subparagraph 6.05.A.2.

C. *Engineer's Evaluation:* ENGINEER will be allowed a reasonable time within which to evaluate each proposal or submittal made pursuant to paragraphs 6.05.A and 6.05.B. ENGINEER will be the sole judge of accept- ability. No "or-equal" or substitute will be ordered, installed or utilized until ENGINEER's review is complete, which will be evidenced by either a Change Order for a substitute or an approved Shop Drawing for an "or equal." ENGINEER will advise CONTRACTOR in writing of any negative determination.

D. *Special Guarantee:* OWNER may require CON- TRACTOR to furnish at CONTRACTOR's expense a special performance guarantee or other surety with respect to any substitute.

E. *ENGINEER's Cost Reimbursement:* ENGINEER will record time required by ENGINEER and ENGINEER's Consultants in evaluating substitute proposed or submitted by CONTRACTOR pursuant to paragraphs 6.05.A.2 and 6.05.B and in making changes in the Contract Documents (or in the provisions of any other direct contract with OWNER for work on the Project) occasioned thereby. Whether or not ENGINEER approves a substitute item so proposed or submitted by CONTRACTOR, CONTRACTOR shall reimburse OWNER for the charges of ENGINEER and ENGINEER's Consultants for evaluating each such proposed substitute.

F. *CONTRACTOR's Expense:* CONTRACTOR shall provide all data in support of any proposed substitute or "or-equal" at CONTRACTOR's expense.

6.06 Concerning Subcontractors, Suppliers, and Others

A. CONTRACTOR shall not employ any Subcontractor, Supplier, or other individual or entity (including those acceptable to OWNER as indicated in paragraph 6.06.B), whether initially or as a replacement, against whom OWNER may have reasonable objection. CONTRACTOR shall not be required to employ any Subcontractor, Supplier, or other individual or entity to furnish or perform any of the Work against whom CONTRACTOR has reasonable objection.

B. If the Supplementary Conditions require the identity of certain Subcontractors, Suppliers, or other individuals or entities to be submitted to OWNER in advance for acceptance by OWNER by a specified date prior to the Effective Date of the Agreement, and if CONTRACTOR has submitted a list thereof in accordance with the Supplementary Conditions, OWNER's acceptance (either in writing or by failing to make written objection thereto by the date indicated for acceptance or objection in the Bidding Documents or the Contract Documents) of any such Subcontractor, Supplier, or other individual or entity so identified may be revoked on the basis of reasonable objection after due investigation.

CONTRACTOR shall submit an acceptable replacement for the rejected Subcontractor, Supplier, or other individual or entity, and the Contract Price will be adjusted by the difference in the cost occasioned by such replacement, and an appropriate Change Order will be issued or Written Amendment signed. No acceptance by OWNER of any such Subcontractor, Supplier, or other individual or entity, whether initially or as a replacement, shall constitute a waiver of any right of OWNER or ENGINEER to reject defective Work.

C. CONTRACTOR shall be fully responsible to OWNER and ENGINEER for all acts and omissions of the Subcontractors, Suppliers, and other individuals or entities performing or furnishing any of the Work just as CONTRACTOR is responsible for CONTRACTOR's own acts and omissions. Nothing in the Contract Documents shall create for the benefit of any such Subcontractor, Supplier, or other individual or entity any contractual relationship between OWNER or ENGINEER and any such Subcontractor, Supplier or other individual or entity, nor shall it create any obligation on the part of OWNER or ENGINEER to pay or to see to the payment of any moneys due any such Subcontractor, Supplier, or other individual or entity except as may otherwise be required by Laws and Regulations.

D. CONTRACTOR shall be solely responsible for scheduling and coordinating the Work of Subcontractors, Suppliers, and other individuals or entities performing or furnishing any of the Work under a direct or indirect contract with CONTRACTOR.

E. CONTRACTOR shall require all Subcontractors, Suppliers, and such other individuals or entities performing or furnishing any of the Work to communicate with ENGINEER through CONTRACTOR.

**F. The divisions and sections of the Specifications and the identifications of any Drawings shall not control CONTRACTOR in dividing the Work among Subcontractors or Suppliers or delineating the Work to be performed by any specific trade.

G. All Work performed for CONTRACTOR by a Subcontractor or Supplier will be pursuant to an appropriate agreement between CONTRACTOR and the Subcontractor or Supplier which specifically binds the Subcontractor or Supplier to the applicable terms and conditions of the Contract Documents for the benefit of OWNER and ENGINEER. Whenever any such agreement is with a Subcontractor or Supplier who is listed as an additional insured on the property insurance provided in paragraph 5.06, the agreement between the CONTRACTOR and the Subcontractor or Supplier will contain provisions whereby the Subcontractor or Supplier waives all rights against OWNER, CONTRACTOR, ENGINEER, ENGINEER's Consultants, and all other individuals or entities identified in the Supplementary Conditions to be listed as insureds or additional insureds (and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them) for all losses and damages caused by, arising out of, relating to, or resulting from any of the perils or causes of loss covered by such policies and any other property insurance applicable to the Work. If the insurers on any such policies require separate waiver forms to be signed by any Subcontractor or Supplier, CONTRACTOR will obtain the same.

6.07 Patent Fees and Royalties

A. CONTRACTOR shall pay all license fees and royalties and assume all costs incident to the use in the performance of the Work or the incorporation in the Work of any invention, design, process, product, or device which is the subject of patent rights or copyrights held by others. If a particular invention, design, process, product, or device is specified in the Contract Documents for use in the performance of the Work and if to the actual knowledge of OWNER or ENGINEER its use is subject to patent rights or copyrights calling for the payment of any license fee or royalty to others, the existence of such rights shall be disclosed by OWNER in the Contract Documents. To the fullest extent permitted by Laws and Regulations, CONTRACTOR shall indemnify and hold harmless OWNER, ENGINEER, ENGINEER's Consultants, and the officers, directors, partners, employees or agents, and other consultants of each and any of them

from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device not specified in the Contract Documents.

6.08 Permits

******A. Unless otherwise provided in the Supplementary Conditions, CONTRACTOR shall obtain and pay for all construction permits and licenses. OWNER shall assist CONTRACTOR, when necessary, in obtaining such permits and licenses. CONTRACTOR shall pay all governmental charges and inspection fees necessary for the prosecution of the Work which are applicable at the time of opening of Bids, or, if there are no Bids, on the Effective Date of the Agreement. CONTRACTOR shall pay all charges of utility owners for connections to the Work, and OWNER shall pay all charges of such utility owners for capital costs related thereto, such as plant investment fees.

6.09 Laws and Regulations

A. CONTRACTOR shall give all notices and comply with all Laws and Regulations applicable to the performance of the Work. Except where otherwise expressly required by applicable Laws and Regulations, neither OWNER nor ENGINEER shall be responsible for monitoring CONTRACTOR's compliance with any Laws or Regulations.

B. If CONTRACTOR performs any Work knowing or having reason to know that it is contrary to Laws or Regulations, CONTRACTOR shall bear all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such Work; however, it shall not be CONTRACTOR's primary responsibility to make certain that the Specifications and Drawings are in accordance with Laws and Regulations, but this shall not relieve CONTRACTOR of CONTRACTOR's obligations under paragraph 3.03.

C. Changes in Laws or Regulations not known at the time of opening of Bids (or, on the Effective Date of the Agreement if there were no Bids) having an effect on the cost or time of performance of the Work may be the subject of an adjustment in Contract Price or Contract Times. If OWNER and CONTRACTOR are unable to agree on entitlement to or on the amount or extent, if any, of any such adjustment, a Claim may be made therefor as provided in paragraph 10.05.

*6.10 Taxes ***

A. CONTRACTOR shall pay all sales, consumer, use, and other similar taxes required to be paid by CONTRACTOR in accordance with the Laws and Regulations of the place of the Project which are applicable during the performance of the Work.

*6.11 Use of Site and Other Areas ***

A Limitation on Use of Site and Other Areas

1. CONTRACTOR shall confine construction equipment, the storage of materials and equipment, and the operations of workers to the Site and other areas permitted by Laws and Regulations, and shall not unreasonably encumber the Site and other areas with construction equipment or other materials or equipment. CONTRACTOR shall assume full responsibility for any damage to any such land or area, or to the owner or occupant thereof, or of any adjacent land or areas resulting from the performance of the Work.

2. Should any claim be made by any such owner or occupant because of the performance of the Work, CONTRACTOR shall promptly settle with such other party by negotiation or otherwise resolve the claim by arbitration or other dispute resolution proceeding or at law.

3. To the fullest extent permitted by Laws and Regulations, CONTRACTOR shall indemnify and hold harmless OWNER, ENGINEER, ENGINEER's Consultant, and the officers, directors, partners, employees, agents, and other consultants of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any claim or action, legal or equitable, brought by any such owner or occupant against OWNER, ENGINEER, or any other party indemnified hereunder to the extent caused by or based upon CONTRACTOR's performance of the Work.

B. *Removal of Debris During Performance of the Work:* During the progress of the Work CONTRACTOR shall keep the Site and other areas free from accumulations of waste materials, rubbish, and other debris. Removal and disposal of such waste materials, rubbish, and other debris shall conform to applicable Laws and Regulations.

C. *Cleaning:* Prior to Substantial Completion of the Work CONTRACTOR shall clean the Site and make it ready for utilization by OWNER. At the completion of the Work CONTRACTOR shall remove from the Site all tools, appliances, construction equipment and machinery, and surplus materials and shall restore to original condition all property not designated for alteration by the Contract Documents.

D. *Loading Structures:* CONTRACTOR shall not load nor permit any part of any structure to be loaded in any manner that will endanger the structure, nor shall CONTRACTOR subject any part of the Work or adjacent property to stresses or pressures that will endanger it.

6.12 Record Documents

A. CONTRACTOR shall maintain in a safe place at the Site one record copy of all Drawings, Specifications, Addenda, Written Amendments, Change Orders, Work Change Directives, Field Orders, and written interpretations and clarifications in good order and annotated to show changes made during construction. These record documents together with all approved Samples and a counterpart of all approved Shop Drawings will be available to ENGINEER for reference. Upon completion of the Work, these record documents, Samples, and Shop Drawings will be delivered to ENGINEER for OWNER.

6.13 Safety and Protection

A. CONTRACTOR shall be solely responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the Work. CONTRACTOR shall take all necessary precautions for the safety of, and shall provide the necessary protection to prevent damage, injury or loss to:

1. all persons on the Site or who may be affected by the Work;

2. all the Work and materials and equipment to be incorporated therein, whether in storage on or off the Site; and

3. other property at the Site or adjacent thereto, including trees, shrubs, lawns, walks, pavements, roadways, structures, utilities, and Under- ground Facilities not designated for removal, relocation, or replacement in the course of construction.

B. CONTRACTOR shall comply with all applicable Laws and Regulations relating to the safety of persons or property, or to the protection of persons or property from damage, injury, or loss; and shall erect and maintain all necessary safeguards for such safety and protection. CONTRACTOR shall notify owners of adjacent property and of Underground Facilities and other utility owners when prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation, and replacement of their property. All damage, injury, or loss to any property referred to in paragraph 6.13.A.2 or 6.13.A.3 caused, directly or indirectly, in whole or in part, by CONTRACTOR, any Subcontractor, Supplier, or any other individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, shall be remedied by CONTRACTOR (except damage or loss attributable to the fault of Drawings or Specifications or to the acts or omissions of OWNER or ENGINEER or ENGINEER's Consultant, or anyone employed by any of them, or anyone for whose acts any of them may be liable, and not attributable, directly or indirectly, in whole or in part, to the fault or negligence of CONTRACTOR or any Subcontractor, Supplier, or other individual or entity directly or indirectly employed by any of them).

CONTRACTOR's duties and responsibilities for safety and for protection of the Work shall continue until such time as all the Work is completed and ENGINEER has issued a notice to OWNER and CONTRACTOR in accordance with paragraph 14.07.B that the Work is acceptable (except as otherwise expressly provided in connection with Substantial Completion).

6.14 Safety Representative

A. CONTRACTOR shall designate a qualified and experienced safety representative at the Site whose duties and responsibilities shall be the prevention of accidents and the maintaining and supervising of safety precautions and programs.

6.15 Hazard Communication Programs

A. CONTRACTOR shall be responsible for coordinating any exchange of material safety data sheets or other hazard communication information required to be made available to or exchanged between or among employers at the Site in accordance with Laws or Regulations.

6.16 Emergencies

A. In emergencies affecting the safety or protection of persons or the Work or property at the Site or adjacent thereto, CONTRACTOR is obligated to act to prevent threatened damage, injury, or loss. CONTRACTOR shall give ENGINEER prompt written notice if CONTRACTOR believes that any significant changes in the Work or variations from the Contract Documents have been caused thereby or are required as a result thereof. If ENGINEER determines that a change in the Contract Documents is required because of the action taken by CONTRACTOR in response to such an emergency, a Work Change Directive or Change Order will be issued.

6.17 Shop Drawings and Samples

A. CONTRACTOR shall submit Shop Drawings to ENGINEER for review and approval in accordance with the acceptable schedule of Shop Drawings and Sample submittals. All submittals will be identified as ENGINEER may require and in the number of copies specified in the General Requirements. The data shown on the Shop Drawings will be complete with respect to quantities, dimensions, specified performance and design criteria, materials, and similar data to show ENGINEER the services, materials, and equipment CONTRACTOR proposes to provide and to enable ENGINEER to review the information for the limited purposes required by paragraph 6.17.E.

B. CONTRACTOR shall also submit Samples to ENGINEER for review and approval in accordance with the acceptable schedule of Shop Drawings and Sample submittals. Each Sample will be identified clearly as to material, Supplier, pertinent data such as catalog numbers, and the use for which intended and otherwise as ENGINEER may require to enable ENGINEER to review the submittal for the limited purposes required by paragraph 6.17.E. The numbers of each Sample to be submitted will be as specified in the Specifications.

C. Where a Shop Drawing or Sample is required by the Contract Documents or the schedule of Shop Drawings and Sample submittals acceptable to ENGINEER as required by paragraph 2.07, any related Work performed prior to ENGINEER's review and approval of the pertinent submittal will be at the sole expense and responsibility of CONTRACTOR.

D. Submittal Procedures

1. Before submitting each Shop Drawing or Sample, CONTRACTOR shall have determined and verified:

a. all field measurements, quantities, dimensions, specified performance criteria, installation requirements, materials, catalog numbers, and similar information with respect thereto;

b. all materials with respect to intended use, fabrication, shipping, handling, storage, assembly, and installation pertaining to the performance of the Work;

c. all information relative to means, methods, techniques, sequences, and procedures of construction and safety precautions and programs incident thereto; and

d. CONTRACTOR shall also have reviewed and coordinated each Shop Drawing or Sample with other Shop Drawings and Samples and with the requirements of the Work and the Contract Documents.

2. Each submittal shall bear a stamp or specific written indication that CONTRACTOR has satisfied CONTRACTOR's obligations under the Contract Documents with respect to CONTRACTOR's review and approval of that submittal.

3. At the time of each submittal, CONTRAC- TOR shall give ENGINEER specific written notice of such variations, if any, that the Shop Drawing or Sample submitted may have from the requirements of the Contract Documents, such notice to be in a written communication separate from the submittal; and, in addition, shall cause a specific notation to be made on each Shop Drawing and Sample submitted to ENGINEER for review and approval of each such variation.

E. ENGINEER's Review

*1. ENGINEER will ~~timely~~ review and approve Shop Drawings and Samples in accordance with the schedule of Shop Drawings and Sample submittals acceptable to ENGINEER. ENGINEER's review and approval will be only to determine if the items covered by the submittals will, after installation or incorporation in the Work, conform to the information given in the Contract Documents and be compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents.

2. ENGINEER's review and approval will not extend to means, methods, techniques, sequences, or procedures of construction (except where a particular means, method, technique, sequence, or procedure of construction is specifically and expressly called for by the Contract Documents) or to safety precautions or programs incident thereto. The review and approval of a separate item as such will not indicate approval of the assembly in which the item functions.

3. ENGINEER's review and approval of Shop Drawings or Samples shall not relieve CONTRACTOR from responsibility for any variation from the requirements of the Contract Documents unless CONTRACTOR has in writing called ENGINEER's attention to each such variation at the time of each submittal as required by paragraph 6.17.D.3 and ENGINEER has given written approval of each such variation by specific written notation thereof incorporated in or accompanying the Shop Drawing or Sample approval; nor will any approval by ENGINEER relieve CONTRACTOR from responsibility for complying with the requirements of paragraph 6.17.D.1.

F. Resubmittal Procedures

1. CONTRACTOR shall make corrections required by ENGINEER and shall return the required number of corrected copies of Shop Drawings and submit as required new Samples for review and approval. CONTRACTOR shall direct specific attention in writing to revisions other than the corrections called for by ENGINEER on previous submittals.

6.18 Continuing the Work

A. CONTRACTOR shall carry on the Work and adhere to the progress schedule during all disputes or disagreements with OWNER. No Work shall be delayed or postponed pending resolution of any disputes or disagreements, except as permitted by paragraph 15.04 or as OWNER and CONTRACTOR may otherwise agree in writing.

6.19 CONTRACTOR's General Warranty and Guarantee

A. CONTRACTOR warrants and guarantees to OWNER, ENGINEER, and ENGINEER's Consultants that all Work will be in accordance with the Contract Documents and will not be defective. CONTRACTOR's warranty and guarantee hereunder excludes defects or damage caused by:

1. abuse, modification, or improper maintenance or operation by persons other than CONTRACTOR, Subcontractors, Suppliers, or any other individual or entity for whom CONTRACTOR is responsible; or

2. normal wear and tear under normal usage. B. CONTRACTOR's obligation to perform and complete the Work in accordance with the Contract Documents shall be absolute. None of the following will constitute an acceptance of Work that is not in accordance with the Contract Documents or a release of CONTRACTOR's obligation to perform the Work in accordance with the Contract Documents:

a. observations by ENGINEER;
b. recommendation by ENGINEER or payment by OWNER of any progress or final payment;
c. the issuance of a certificate of Substantial Completion by ENGINEER or any payment related thereto by OWNER;
d. use or occupancy of the Work or any part thereof by OWNER;
e. any acceptance by OWNER or any failure to do so;
f. any review and approval of a Shop Drawing or Sample submittal or the issuance of a notice of acceptability by ENGINEER;
g. any inspection, test, or approval by others; or
h. any correction of defective Work by OWNER.

6.20 Indemnification

~~*A. To the fullest extent permitted by Laws and Regulations, CONTRACTOR shall indemnify and hold harmless OWNER, ENGINEER, ENGINEER's Consultants, and the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to the performance of the Work, provided that any such claim, cost, loss, or damage:~~

~~1. is attributable to bodily injury, sickness, disease, or death, or to injury to or destruction of tangible property (other than the Work itself), including the loss of use resulting therefrom; and~~

~~2. is caused in whole or in part by any negligent act or omission of CONTRACTOR, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work or anyone for whose acts any of them may be liable, regardless of whether or not caused in part by any negligence or omission of an individual or entity indemnified hereunder or whether liability is imposed upon such indemnified party by Laws and Regulations regardless of the negligence of any such individual or entity.~~

B. In any and all claims against OWNER or ENGINEER or any of their respective consultants, agents, officers, directors, partners, or employees by any employee (or the survivor or personal representative of such employee) of CONTRACTOR, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, the indemnification obligation under paragraph 6.20.A shall not be limited in any way by any limitation on the amount or type of damages, compensation, or benefits payable by or for CONTRACTOR or any such Subcontractor, Supplier, or other individual or entity under workers' compensation acts, disability benefit acts, or other employee benefit acts.

~~*C. The indemnification obligations of CONTRACTOR under paragraph 6.20.A shall not extend to the liability of ENGINEER and ENGINEER's Consultants or to the officers, directors, partners, employees, agents, and other consultants and subcontractors of each and any of them arising out of:~~

~~1. the preparation or approval of, or the failure to prepare or approve, maps, Drawings, opinions, reports, surveys, Change Orders, designs, or~~ Specifications~~; or~~

~~2. giving directions or instructions, or failing to give them, if that is the primary cause of the~~ injury ~~or damage.~~

ARTICLE 7 - OTHER WORK

7.01 Related Work at Site

A. OWNER may perform other work related to the Project at the Site by OWNER's employees, or let other direct contracts therefor, or have other work performed by utility owners. If such other work is not noted in the Contract Documents, then:

1. written notice thereof will be given to CONTRACTOR prior to starting any such other work; and

2. if OWNER and CONTRACTOR are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in the Contract Price or Contract Times that should be allowed as a result of such other work, a Claim may be made therefor as provided in paragraph 10.05.

B. CONTRACTOR shall afford each other contractor who is a party to such a direct contract and each utility owner (and OWNER, if OWNER is performing the other work with OWNER's employees) proper and safe access to the Site and a reasonable opportunity for the introduction and storage of materials and equipment and the execution of such other work and shall properly coordinate the Work with theirs. Unless otherwise provided in the Contract Documents, CONTRACTOR shall do all cutting, fitting, and patching of the Work that may be required to properly connect or otherwise make its several parts come together and properly integrate with such other work. CONTRACTOR shall not endanger any work of others by cutting, excavating, or otherwise altering their work and will only cut or alter their work with the written consent of ENGINEER and the others whose work will be affected. The duties and responsibilities of CONTRACTOR under this paragraph are for the benefit of such utility owners and other contractors to the extent that there are comparable provisions for the benefit of CONTRACTOR in said direct contracts between OWNER and such utility owners and other contractors.

C. If the proper execution or results of any part of CONTRACTOR's Work depends upon work performed by others under this Article 7, CONTRACTOR shall inspect such other work and promptly report to ENGINEER in writing any delays, defects, or deficiencies in such other work that render it unavailable or unsuitable for the proper execution and results of CONTRACTOR's Work. CONTRACTOR's failure to so report will constitute an acceptance of such other work as fit and proper for integration with CONTRACTOR's Work except for latent defects and deficiencies in such other work.

7.02 Coordination

A. If OWNER intends to contract with others for the performance of other work on the Project at the Site, the following will be set forth in Supplementary Conditions:

1. the individual or entity who will have authority and responsibility for coordination of the activities among the various contractors will be identified;
2. the specific matters to be covered by such authority and responsibility will be itemized; and
3. the extent of such authority and responsibilities will be provided.

B. Unless otherwise provided in the Supplementary Conditions, OWNER shall have sole authority and responsibility for such coordination.

ARTICLE 8 - OWNER'S RESPONSIBILITIES

8.01 Communications to Contractor

A. Except as otherwise provided in these General Conditions, OWNER shall issue all communications to CONTRACTOR through ENGINEER.

8.02 Replacement of ENGINEER

A. In case of termination of the employment of ENGINEER, OWNER shall appoint an engineer to whom CONTRACTOR makes no reasonable objection, whose status under the Contract Documents shall be that of the former ENGINEER.

8.03 Furnish Data

A. OWNER shall promptly furnish the data required of OWNER under the Contract Documents.

8.04 Pay Promptly When Due

A. OWNER shall make payments to CONTRACTOR promptly when they are due as provided in paragraphs 14.02.C and 14.07.C.

8.05 Lands and Easements; Reports and Tests

A. OWNER's duties in respect of providing lands and easements and providing engineering surveys to establish reference points are set forth in paragraphs 4.01 and 4.05. Paragraph 4.02 refers to OWNER's identifying and making available to CONTRACTOR copies of reports of explorations and tests of subsurface conditions and drawings of physical conditions in or relating to existing surface or subsurface structures at or contiguous to the Site that have been utilized by ENGINEER in preparing the Contract Documents.

8.06 Insurance

~~*A. OWNER's responsibilities, if any, in respect to purchasing and maintaining liability and property insurance are set forth in Article 5.~~

8.07 Change Orders

A. OWNER is obligated to execute Change Orders as indicated in paragraph 10.03.

8.08 Inspections, Tests, and Approvals

A. OWNER's responsibility in respect to certain inspections, tests, and approvals is set forth in paragraph 13.03.B.

8.09 Limitations on OWNER's Responsibilities

A. The OWNER shall not supervise, direct, or have control or authority over, nor be responsible for, CONTRACTOR's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of CONTRACTOR to comply with Laws and Regulations applicable to the performance of the Work. OWNER will not be responsible for CONTRACTOR's failure to perform the Work in accordance with the Contract Documents.

8.10 Undisclosed Hazardous Environmental Condition

A. OWNER's responsibility in respect to an undisclosed Hazardous Environmental Condition is set forth in paragraph 4.06.

8.11 Evidence of Financial Arrangements

A. If and to the extent OWNER has agreed to furnish CONTRACTOR reasonable evidence that financial arrangements have been made to satisfy OWNER's obligations under the Contract Documents, OWNER's responsibility in respect thereof will be as set forth in the Supplementary Conditions.

ARTICLE 9 - ENGINEER'S STATUS DURING CONSTRUCTION

9.01 OWNER'S Representative

A. ENGINEER will be OWNER's representative during the construction period. The duties and responsibilities and the limitations of authority of ENGINEER as OWNER's representative during construction are set forth in the Contract Documents and will not be changed without written consent of OWNER and ENGINEER.

**9.02 Visits to Site*

A. ENGINEER will make visits to the Site at intervals appropriate to the various stages of construction as ENGINEER deems necessary in order to observe as an experienced and qualified design professional the progress that has been made and the quality of the various aspects of CONTRACTOR's executed Work. Based on information obtained during such visits and observations, ENGINEER, for the benefit of OWNER, will determine, in general, if the Work is proceeding in accordance with the Contract Documents. ENGINEER will not be required to make exhaustive or continuous inspections on the Site to check the quality or quantity of the Work. ENGINEER's efforts will be directed toward providing for OWNER a greater degree of confidence that the completed Work will conform generally to the Contract Documents. On the basis of such visits and observations, ENGINEER will keep OWNER informed of the progress of the Work and will endeavor to guard OWNER against defective Work.

B. ENGINEER's visits and observations are subject to all the limitations on ENGINEER's authority and responsibility set forth in paragraph 9.10, and particularly, but without limitation, during or as a result of ENGINEER's visits or observations of CONTRACTOR's Work ENGINEER will not supervise, direct, control, or have authority over or be responsible for CONTRACTOR's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of CONTRACTOR to comply with Laws and Regulations applicable to the performance of the Work.

9.03 Project Representative

A. If OWNER and ENGINEER agree, ENGINEER will furnish a Resident Project Representative to assist ENGINEER in providing more extensive observation of the Work. The responsibilities and authority and limitations thereon of any such Resident Project Representative and assistants will be as provided in paragraph 9.10 and in the Supplementary Conditions. If OWNER designates another representative or agent to represent OWNER at the Site who is not ENGINEER's Consultant, agent or employee, the responsibilities and authority and limitations thereon of such other individual or entity will be as provided in the Supplementary Conditions.

9.04 Clarifications and Interpretations

A. ENGINEER will issue with reasonable promptness such written clarifications or interpretations of the requirements of the Contract Documents as ENGINEER may deter- mine necessary, which shall be consistent with the intent of and reasonably inferable from the Contract Documents. Such written clarifications and interpretations will be binding on OWNER and CONTRACTOR. If OWNER and CONTRACTOR are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in the Contract Price or Contract Times, or both, that should be allowed as a result of a written clarification or interpretation, a Claim may be made therefor as provided in paragraph 10.05.

***9.05 Authorized Variations in Work*

A. ENGINEER may authorize minor variations in the Work from the requirements of the Contract Documents which do not involve an adjustment in the Contract Price or the Contract Times and are compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents. These may be accomplished by a Field Order and will be binding on OWNER and also on CONTRACTOR, who shall perform the Work involved promptly. If OWNER and CONTRACTOR are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in the Contract Price or Contract Times, or both, as a result of a Field Order, a Claim may be made therefor as provided in paragraph 10.05.

9.06 Rejecting Defective Work

A. ENGINEER will have authority to disapprove or reject Work which ENGINEER believes to be defective, or that ENGINEER believes will not produce a completed Project that conforms to the Contract Documents or that will prejudice the integrity of the design concept of the completed Project as a functioning whole as indicated by the Contract Documents. ENGINEER will also have authority to require special inspection or testing of the Work as provided in paragraph 13.04, whether or not the Work is fabricated, installed, or completed.

9.07 Shop Drawings, Change Orders and Payments

A. In connection with ENGINEER's authority as to Shop Drawings and Samples, see paragraph 6.17.

B. In connection with ENGINEER's authority as to Change Orders, see Articles 10, 11, and 12.

C. In connection with ENGINEER's authority as to Applications for Payment, see Article 14.

9.08 Determinations for Unit Price Work

A. ENGINEER will determine the actual quantities and classifications of Unit Price Work performed by CONTRACTOR. ENGINEER will review with CONTRACTOR the ENGINEER's preliminary determinations on such matters before rendering a written decision thereon (by recommendation of an Application for Payment or otherwise). ENGINEER's written decision thereon will be final and binding (except as modified by ENGINEER to reflect changed factual conditions or more accurate data) upon OWNER and CONTRACTOR, subject to the provisions of paragraph 10.05.

9.09 Decisions on Requirements of Contract Documents and Acceptability of Work

A. ENGINEER will be the initial interpreter of the requirements of the Contract Documents and judge of the acceptability of the Work thereunder. Claims, disputes and other matters relating to the acceptability of the Work, the quantities and classifications of Unit Price Work, the interpretation of the requirements of the Contract Documents pertaining to the performance of the Work, and Claims seeking changes in the Contract Price or Contract Times will be referred initially to ENGINEER in writing, in accordance with the provisions of paragraph 10.05, with a request for a formal decision.

B. When functioning as interpreter and judge under this paragraph 9.09, ENGINEER will not show partiality to OWNER or CONTRACTOR and will not be liable in connection with any interpretation or decision rendered in good faith in such capacity. The rendering of a decision by ENGINEER pursuant to this paragraph 9.09 with respect to any such Claim, dispute, or other matter (except any which have been waived by the making or acceptance of final payment as provided in paragraph 14.07) will be a condition precedent to any exercise by OWNER or CONTRACTOR of such rights or remedies as either may otherwise have under the Contract Documents or by Laws or Regulations in respect of any such Claim, dispute, or other matter.

9.10 Limitations on ENGINEER's Authority and Responsibilities

A. Neither ENGINEER's authority or responsibility under this Article 9 or under any other provision of the Contract Documents nor any decision made by ENGINEER in good faith either to exercise or not exercise such authority or responsibility or the undertaking, exercise, or performance of any authority or responsibility by ENGINEER shall create, impose, or give rise to any duty in contract, tort, or otherwise owed by ENGINEER to CONTRACTOR, any Subcontractor, any Supplier, any other individual or entity, or to any surety for or employee or agent of any of them.

B. ENGINEER will not supervise, direct, control, or have authority over or be responsible for CONTRACTOR's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of CONTRACTOR to comply with Laws and Regulations applicable to the performance of the Work. ENGINEER will not be responsible for CONTRACTOR's failure to perform the Work in accordance with the Contract Documents.

C. ENGINEER will not be responsible for the acts or omissions of CONTRACTOR or of any Subcontractor, any Supplier, or of any other individual or entity performing any of the Work.

D. ENGINEER's review of the final Application for Payment and accompanying documentation and all maintenance and operating instructions, schedules, guarantees, Bonds, certificates of inspection, tests and approvals, and other documentation required to be delivered by paragraph 14.07.A will only be to determine generally that their content complies with the requirements of, and in the case of certificates of inspections, tests, and approvals that the results certified indicate compliance with, the Contract Documents.

E. The limitations upon authority and responsibility set forth in this paragraph 9.10 shall also apply to ENGINEER's Consultants, Resident Project Representative, and assistants.

ARTICLE 10 - CHANGES IN THE WORK; CLAIMS

10.01 Authorized Changes in the Work

A. Without invalidating the Agreement and without notice to any surety, OWNER may, at any time or from time to time, order additions, deletions, or revisions in the Work by a Written Amendment, a Change Order, or a Work Change Directive. Upon receipt of any such document, CONTRACTOR shall promptly proceed with the Work involved which will be performed under the applicable conditions of the Contract Documents (except as otherwise specifically provided).

B. If OWNER and CONTRACTOR are unable to agree on entitlement to, or on the amount or extent, if any, of an adjustment in the Contract Price or Contract Times, or both, that should be allowed as a result of a Work Change Directive, a Claim may be made therefor as provided in paragraph 10.05.

10.02 Unauthorized Changes in the Work

A. CONTRACTOR shall not be entitled to an increase in the Contract Price or an extension of the Contract Times with respect to any work performed that is not required by the Contract Documents as amended, modified, or supplemented as provided in paragraph 3.04, except in the case of an emergency as provided in paragraph 6.16 or in the case of uncovering Work as provided in paragraph 13.04.B.

10.03 Execution of Change Orders

A. OWNER and CONTRACTOR shall execute appropriate Change Orders recommended by ENGINEER (or Written Amendments) covering:

1. changes in the Work which are: (i) ordered by OWNER pursuant to paragraph 10.01.A, (ii) required because of acceptance of defective Work under paragraph 13.08.A or OWNER's correction of defective Work under paragraph 13.09, or (iii) agreed to by the parties;

2. changes in the Contract Price or Contract Times which are agreed to by the parties, including any undisputed sum or amount of time for Work actually performed in accordance with a Work Change Directive; and

3. changes in the Contract Price or Contract Times which embody the substance of any written decision rendered by ENGINEER pursuant to para- graph 10.05; provided that, in lieu of executing any such Change Order, an appeal may be taken from any such decision in accordance with the provisions of the Contract Documents and applicable Laws and Regulations, but during any such appeal, CONTRACTOR shall carry on the Work and adhere to the progress schedule as provided in paragraph 6.18.A.

10.04 Notification to Surety

A. If notice of any change affecting the general scope of the Work or the provisions of the Contract Documents (including, but not limited to, Contract Price or Contract Times) is required by the provisions of any Bond to be given to a surety, the giving of any such notice will be CONTRACTOR's responsibility. The amount of each applicable Bond will be adjusted to reflect the effect of any such change.

10.05 Claims and Disputes

A. *Notice:* Written notice stating the general nature of each Claim, dispute, or other matter shall be delivered by the claimant to ENGINEER and the other party to the Contract promptly (but in no event later than 30 days) after the start of the event giving rise thereto. Notice of the amount or extent of the Claim, dispute, or other matter with supporting data shall be delivered to the ENGINEER and the other party to the Contract within 60 days after the start of such event (unless ENGINEER allows additional time for claimant to submit additional or more accurate data in support of such Claim, dispute, or other matter). A Claim for an adjustment in Contract Price shall be prepared in accordance with the provisions of paragraph 12.01.B. A Claim for an adjustment in Contract Time shall be prepared in accordance with the provisions of paragraph 12.02.B. Each Claim shall be accompanied by claimant's written statement that the adjustment claimed is the entire adjustment to which the claimant believes it is entitled as a result of said event. The opposing party shall submit any response to ENGINEER and the claimant within 30 days after receipt of the claimant's last submittal (unless ENGINEER allows additional time).

B. *ENGINEER's Decision:* ENGINEER will render a formal decision in writing within 30 days after receipt of the last submittal of the claimant or the last submittal of the opposing party, if any. ENGINEER's written decision on such Claim, dispute, or other matter will be final and binding upon OWNER and CONTRACTOR unless:

1. an appeal from ENGINEER's decision is taken within the time limits and in accordance with the dispute resolution procedures set forth in Article 16; or

2. if no such dispute resolution procedures have been set forth in Article 16, a written notice of intention to appeal from ENGINEER's written decision is delivered by OWNER or CONTRACTOR to the other and to ENGINEER within 30 days after the date of such decision, and a formal proceeding is instituted by the appealing party in a forum of competent jurisdiction within 60 days after the date of such decision or within 60 days after Substantial Completion, whichever is later (unless otherwise agreed in writing by OWNER and CONTRACTOR), to exercise such rights or remedies as the appealing party may have with respect to such Claim, dispute, or other matter in accordance with applicable Laws and Regulations.

C. If ENGINEER does not render a formal decision in writing within the time stated in paragraph 10.05.B, a decision denying the Claim in its entirety shall be deemed to have been issued 31 days after receipt of the last submittal of the claimant or the last submittal of the opposing party, if any.

D. No Claim for an adjustment in Contract Price or Contract Times (or Milestones) will be valid if not submitted in accordance with this paragraph 10.05.

ARTICLE 11 - COST OF THE WORK; CASH ALLOWANCES; UNIT PRICE WORK

***11.01 Cost of the Work*

~~A. *Costs Included:* The term Cost of the Work means the sum of all costs necessarily incurred and paid by CONTRACTOR in the proper performance of the Work. When the value of any Work covered by a Change Order or when a Claim for an adjustment in Contract Price is determined on the basis of Cost of the Work, the costs to be reimbursed to CONTRACTOR will be only those additional or incremental costs required because of the change in the Work or because of the event giving rise to the Claim. Except as otherwise may be agreed to in writing by OWNER, such costs shall be in amounts no higher than those prevailing in the locality of the Project, shall include only the following items, and shall not include any of the costs itemized in paragraph 11.01.B.~~

~~1. Payroll costs for employees in the direct employ of CONTRACTOR in the performance of the Work under schedules of job classifications agreed upon by OWNER and CONTRACTOR. Such employees shall include without limitation superintendents, foremen, and other personnel employed full time at the Site. Payroll costs for employees not employed full time on the Work shall be apportioned on the basis of their time spent on the Work. Payroll costs shall include, but not~~

be limited to, salaries and wages plus the cost of fringe benefits, which shall include social security contributions, unemployment, excise, and payroll taxes, workers' compensation, health and retirement benefits, bonuses, sick leave, vacation and holiday pay applicable thereto. The expenses of performing Work outside of regular working hours, on Saturday, Sunday, or legal holidays, shall be included in the above to the extent authorized by OWNER.

2. Cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage thereof, and Suppliers' field services required in connection therewith. All cash discounts shall accrue to CONTRACTOR unless OWNER deposits funds with CONTRACTOR with which to make payments, in which case the cash discounts shall accrue to OWNER. All trade discounts, rebates and refunds and returns from sale of surplus materials and equipment shall accrue to OWNER, and CONTRACTOR shall make provisions so that they may be obtained.

3. Payments made by CONTRACTOR to Subcontractors for Work performed by Subcontractors. If required by OWNER, CONTRACTOR shall obtain competitive bids from subcontractors acceptable to OWNER and CONTRACTOR and shall deliver such bids to OWNER, who will then determine, with the advice of ENGINEER, which bids, if any, will be acceptable. If any subcontract provides that the Subcontractor is to be paid on the basis of Cost of the Work plus a fee, the Subcontractor's Cost of the Work and fee shall be determined in the same manner as CONTRACTOR's Cost of the Work and fee as provided in this paragraph 11.01.

4. Costs of special consultants (including but not limited to engineers, architects, testing laboratories, surveyors, attorneys, and accountants) employed for services specifically related to the Work.

5. Supplemental costs including the following:

   a. The proportion of necessary transportation, travel, and subsistence expenses of CONTRACTOR's employees incurred in discharge of duties connected with the Work.

   b. Cost, including transportation and maintenance, of all materials, supplies, equipment, machinery, appliances, office, and temporary facilities at the Site, and hand tools not owned by the workers, which are consumed in the performance of the Work, and cost, less market value, of such items used but not consumed which remain the property of CONTRACTOR.

   c. Rentals of all construction equipment and machinery, and the parts thereof whether rented from CONTRACTOR or others in accordance with rental agreements approved by OWNER with the advice of ENGINEER, and the costs of transportation, loading, unloading, assembly, dismantling, and removal thereof. All such costs shall be in accordance with the terms of said rental agreements. The rental of any such equipment, machinery, or parts shall cease when the use thereof is no longer necessary for the Work.

   d. Sales, consumer, use, and other similar taxes related to the Work, and for which CONTRACTOR is liable, imposed by Laws and Regulations.

   e. Deposits lost for causes other than negligence of CONTRACTOR, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, and royalty payments and fees for permits and licenses within the deductible amounts of property insurance established in accordance with paragraph 5.06.D), provided such losses and damages have resulted from causes other than the negligence of CONTRACTOR, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable. Such losses shall include settlements made with the written consent and approval of OWNER. No such losses, damages, and expenses shall be included in the Cost of the Work for the purpose of determining CONTRACTOR's fee.

   f. Losses and damages (and related expenses) caused by damage to the Work, not compensated by insurance or otherwise, sustained by CONTRACTOR in connection with the performance of the Work (except losses and damages

   g. The cost of utilities, fuel, and sanitary facilities at the Site.

   h. Minor expenses such as telegrams, long distance telephone calls, telephone service at the Site, expressage, and similar petty cash items in connection with the Work.

   i. When the Cost of the Work is used to determine the value of a Change Order or of a Claim, the cost of premiums for additional Bonds and insurance required because of the changes in the Work or caused by the event giving rise to the Claim.

   j. When all the Work is performed on the basis of cost-plus, the costs of premiums for all Bonds and insurance CONTRACTOR is required by the Contract Documents to purchase and maintain.

B. *Costs Excluded:* The term Cost of the Work shall not include any of the following items:

1. Payroll costs and other compensation of CONTRACTOR's officers, executives, principals (of partnerships and sole proprietorships), general managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, expediters, timekeepers, clerks, and other personnel employed by CONTRACTOR, whether at the Site or in CONTRACTOR's principal or branch office for general administration of the Work and not specifically included in the agreed upon schedule of job classifications referred to in paragraph 11.01.A.1 or specifically covered by paragraph 11.01.A.4, all of which are to be considered administrative costs covered by the CONTRACTOR's fee.

2. Expenses of CONTRACTOR's principal and branch offices other than CONTRACTOR's office at the Site.

3. Any part of CONTRACTOR's capital expenses, including interest on CONTRACTOR's capital employed for the Work and charges against CONTRACTOR for delinquent payments.

4. Costs due to the negligence of CONTRACTOR, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, including but not limited to, the correction of defective Work, disposal of materials or equipment wrongly supplied, and making good any damage to property.

5. Other overhead or general expense costs of any kind and the costs of any item not specifically and expressly included in paragraphs 11.01.A and 11.01.B.

C. *CONTRACTOR's Fee:* When all the Work is performed on the basis of cost-plus, CONTRACTOR's fee shall be determined as set forth in the Agreement. When the value of any Work covered by a Change Order or when a Claim for an adjustment in Contract Price is determined on the basis of Cost of the Work, CONTRACTOR's fee shall be determined as set forth in paragraph 12.01.C.

D. *Documentation:* Whenever the Cost of the Work for any purpose is to be determined pursuant to paragraphs 11.01.A and 11.01.B, CONTRACTOR will establish and maintain records thereof in accordance with generally accepted accounting practices and submit in a form acceptable to ENGINEER an itemized cost breakdown together with supporting data.

11.02 Cash Allowances

A. It is understood that CONTRACTOR has included in the Contract Price all allowances so named in the Contract Documents and shall cause the Work so covered to be performed for such sums as may be acceptable to OWNER and ENGINEER. CONTRACTOR agrees that:

1. the allowances include the cost to CON- TRACTOR (less any applicable trade discounts) of materials and equipment required by the allowances to be delivered at the Site, and all applicable taxes; and

2. CONTRACTOR's costs for unloading and handling on the Site, labor, installation costs, over- head, profit, and other expenses contemplated for the allowances have been included in the Contract Price and not in the allowances, and no demand for additional payment on account of any of the foregoing will be valid.

B. Prior to final payment, an appropriate Change Order will be issued as recommended by ENGINEER to reflect actual amounts due CONTRACTOR on account of Work covered by allowances, and the Contract Price shall be correspondingly adjusted.

11.03 Unit Price Work

A. Where the Contract Documents provide that all or part of the Work is to be Unit Price Work, initially the Contract Price will be deemed to include for all Unit Price Work an amount equal to the sum of the unit price for each separately identified item of Unit Price Work times the estimated quantity of each item as indicated in the Agreement. The estimated quantities of items of Unit Price Work are not guaranteed and are solely for the purpose of comparison of Bids and determining an initial Contract Price. Determinations of the actual quantities and classifications of Unit Price Work performed by CONTRACTOR will be made by ENGINEER subject to the provisions of paragraph 9.08.

B. Each unit price will be deemed to include an amount considered by CONTRACTOR to be adequate to cover CONTRACTOR's overhead and profit for each separately identified item.

*****C. OWNER or CONTRACTOR may make a Claim for an adjustment in the Contract Price in accordance with paragraph 10.05 if:

1. the quantity of any item of Unit Price Work performed by CONTRACTOR differs materially and significantly from the estimated quantity of such item indicated in the Agreement; and

2. there is no corresponding adjustment with respect any other item of Work; and

3. if CONTRACTOR believes that CONTRACTOR is entitled to an increase in Contract Price as a result of having incurred additional expense or OWNER believes that OWNER is entitled to a decrease in Contract Price and the parties are unable to agree as to the amount of any such increase or decrease.

ARTICLE 12 - CHANGE OF CONTRACT PRICE; CHANGE OF CONTRACT TIMES

12.01 Change of Contract Price

~~**A. The Contract Price may only be changed by a Change Order or by a Written Amendment. Any Claim for an adjustment in the Contract Price shall be based on written notice submitted by the party making the Claim to the ENGINEER and the other party to the Contract in accordance with the provisions of paragraph 10.05.~~

~~B. The value of any Work covered by a Change Order or of any Claim for an adjustment in the Contract Price will be determined as follows:~~

~~1. where the Work involved is covered by unit prices contained in the Contract Documents, by application of such unit prices to the quantities of the items involved (subject to the provisions of paragraph 11.03); or~~

~~2. where the Work involved is not covered by unit prices contained in the Contract Documents, by a mutually agreed lump sum (which may include an allowance for overhead and profit not necessarily in accordance with paragraph 12.01.C.2); or~~

~~3. where the Work involved is not covered by unit prices contained in the Contract Documents and agreement to a lump sum is not reached under paragraph 12.01.B.2, on the basis of the Cost of the Work (determined as provided in paragraph 11.01) plus a CONTRACTOR's fee for overhead and profit (determined as provided in paragraph 12.01.C).~~

~~C. *CONTRACTOR's Fee:* The CONTRACTOR's fee for overhead and profit shall be determined as follows:~~

~~1. mutually acceptable fixed fee; or~~

~~2. if a fixed fee is not agreed upon, then a fee based on the following percentages of the various portions of the Cost of the Work:~~

~~a. for costs incurred under paragraphs 11.01.A.1 and 11.01.A.2, the CONTRACTOR's fee shall be 15 percent;~~

~~b. for costs incurred under paragraph 11.01.A.3, the CONTRACTOR's fee shall be five percent;~~

~~c. where one or more tiers of subcontracts are on the basis of Cost of the Work plus a fee and no fixed fee is agreed upon, the intent of paragraph 12.01.C.2.a is that the Subcontractor who actually performs the Work, at whatever tier, will be paid a fee of 15 percent of the costs incurred by such Subcontractor under paragraphs 11.01.A.1 and 11.01.A.2 and that any higher tier Subcontractor and CONTRACTOR will each be paid a fee of five percent of the amount paid to the next lower tier Subcontractor;~~

~~d. no fee shall be payable on the basis of costs itemized under paragraphs 11.01.A.4, 11.01.A.5, and 11.01.B;~~

~~e. the amount of credit to be allowed by CONTRACTOR to OWNER for any change which results in a net decrease in cost will be the amount of the actual net decrease in cost plus a deduction in CONTRACTOR's fee by an amount equal to five percent of such net decrease; and~~

~~f. when both additions and credits are involved in any one change, the adjustment in CONTRACTOR's fee shall be computed on the basis of the net change in accordance with paragraphs 12.01.C.2.a through 12.01.C.2.e, inclusive.~~

12.02 Change of Contract Times

A. The Contract Times (or Milestones) may only be changed by a Change Order or by a Written Amendment. Any Claim for an adjustment in the Contract Times (or Milestones) shall be based on written notice submitted by the party making the claim to the ENGINEER and the other party to the Contract in accordance with the provisions of paragraph 10.05.

B. Any adjustment of the Contract Times (or Milestones) covered by a Change Order or of any Claim for an adjustment in the Contract Times (or Milestones) will be determined in accordance with the provisions of this Article 12.

12.03 Delays Beyond CONTRACTOR's Control

A. Where CONTRACTOR is prevented from completing any part of the Work within the Contract Times (or Milestones) due to delay beyond the control of CONTRACTOR, the Contract Times (or Milestones) will be extended in an amount equal to the time lost due to such delay if a Claim is made therefor as provided in paragraph 12.02.A. Delays beyond the control of CONTRACTOR shall include, but not be limited to, acts or neglect by OWNER, acts or neglect of utility owners or other contractors performing other work as contemplated by Article 7, fires, floods, epidemics, abnormal weather conditions, or acts of God.

12.04 Delays Within CONTRACTOR's Control

A. The Contract Times (or Milestones) will not be extended due to delays within the control of CONTRACTOR. Delays attributable to and within the control of a Subcontractor or Supplier shall be deemed to be delays within the control of CONTRACTOR.

12.05 Delays Beyond OWNER's and CONTRACTOR's Control

A. Where CONTRACTOR is prevented from completing any part of the Work within the Contract Times (or Milestones) due to delay beyond the control of both OWNER and CONTRACTOR, an extension of the Contract Times (or Milestones) in an amount equal to the time lost due to such delay shall be CONTRACTOR's sole and exclusive remedy for such delay.

12.06 Delay Damages

A. In no event shall OWNER or ENGINEER be liable to CONTRACTOR, any Subcontractor, any Supplier, or any other person or organization, or to any surety for or employee or agent of any of them, for damages arising out of or resulting from:

1. delays caused by or within the control of CONTRACTOR; or

2. delays beyond the control of both OWNER and CONTRACTOR including but not limited to fires, floods, epidemics, abnormal weather conditions, acts of God, or acts or neglect by utility owners or other contractors performing other work as contemplated by Article 7.

B. Nothing in this paragraph 12.06 bars a change in Contract Price pursuant to this Article 12 to compensate CONTRACTOR due to delay, interference, or disruption directly attributable to actions or inactions of OWNER or anyone for whom OWNER is responsible.

* ARTICLE 13 - TESTS AND INSPECTIONS; CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK

13.01 Notice of Defects

A. Prompt notice of all defective Work of which OWNER or ENGINEER has actual knowledge will be given to CONTRACTOR. All defective Work may be rejected, corrected, or accepted as provided in this Article 13.

13.02 Access to Work

A. OWNER, ENGINEER, ENGINEER's Consultants, other representatives and personnel of OWNER, independent testing laboratories, and governmental agencies with jurisdictional interests will have access to the Site and the Work at reasonable times for their observation, inspecting, and testing. CONTRACTOR shall provide them proper and safe conditions for such access and advise them of CONTRACTOR's Site safety procedures and programs so that they may comply therewith as applicable.

13.03 Tests and Inspections

A. CONTRACTOR shall give ENGINEER timely notice of readiness of the Work for all required inspections, tests, or approvals and shall cooperate with inspection and testing personnel to facilitate required inspections or tests.

B. OWNER shall employ and pay for the services of an independent testing laboratory to perform all inspections, tests, or approvals required by the Contract Documents except:

1. for inspections, tests, or approvals covered by paragraphs 13.03.C and 13.03.D below;

2. that costs incurred in connection with tests or inspections conducted pursuant to paragraph 13.04.B shall be paid as provided in said paragraph 13.04.B; and

3. as otherwise specifically provided in the Contract Documents.

C. If Laws or Regulations of any public body having jurisdiction require any Work (or part thereof) specifically to be inspected, tested, or approved by an employee or other representative of such public body, CONTRACTOR shall assume full responsibility for arranging and obtaining such inspections, tests, or approvals, pay all costs in connection therewith, and furnish ENGINEER the required certificates of inspection or approval.

D. CONTRACTOR shall be responsible for arranging and obtaining and shall pay all costs in connection with any inspections, tests, or approvals required for OWNER's and ENGINEER's acceptance of materials or equipment to be incorporated in the Work; or acceptance of materials, mix designs, or equipment submitted for approval prior to CONTRACTOR's purchase thereof for incorporation in the Work. Such inspections, tests, or approvals shall be performed by organizations acceptable to OWNER and ENGINEER.

E. If any Work (or the work of others) that is to be inspected, tested, or approved is covered by CONTRACTOR without written concurrence of ENGINEER, it must, if requested by ENGINEER, be uncovered for observation.

F. Uncovering Work as provided in paragraph 13.03.E shall be at CONTRACTOR's expense unless CON- TRACTOR has given ENGINEER timely notice of CONTRACTOR's intention to cover the same and ENGINEER has not acted with reasonable promptness in response to such notice.

13.04 Uncovering Work

A. If any Work is covered contrary to the written request of ENGINEER, it must, if requested by ENGINEER, be uncovered for ENGINEER's observation and replaced at CONTRACTOR's expense.

B. If ENGINEER considers it necessary or advisable that covered Work be observed by ENGINEER or inspected or tested by others, CONTRACTOR, at ENGINEER's request, shall uncover, expose, or otherwise make available for observation, inspection, or testing as ENGINEER may require, that portion of the Work in question, furnishing all necessary labor, material, and equipment. If it is found that such Work is defective, CONTRACTOR shall pay all Claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such uncovering, exposure, observation, inspection, and testing, and of satisfactory replacement or reconstruction (including but not limited to all costs of repair or replacement of work of others); and OWNER shall be entitled to an appropriate decrease in the Contract Price.

If the parties are unable to agree as to the amount thereof, OWNER may make a Claim therefor as provided in paragraph 10.05. If, however, such Work is not found to be defective, CONTRACTOR shall be allowed an increase in the Contract Price or an extension of the Contract Times (or Milestones), or both, directly attributable to such uncovering, exposure, observation, inspection, testing, replacement, and reconstruction. If the parties are unable to agree as to the amount or extent thereof, CONTRACTOR may make a Claim therefor as provided in paragraph 10.05.

13.05 OWNER May Stop the Work

A. If the Work is defective, or CONTRACTOR fails to supply sufficient skilled workers or suitable materials or equipment, or fails to perform the Work in such a way that the completed Work will conform to the Contract Documents, OWNER may order CONTRACTOR to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, this right of OWNER to stop the Work shall not give rise to any duty on the part of OWNER to exercise this right for the benefit of CONTRACTOR, any Subcontractor, any Supplier, any other individual or entity, or any surety for, or employee or agent of any of them.

13.06 Correction or Removal of Defective Work

A. CONTRACTOR shall correct all defective Work, whether or not fabricated, installed, or completed, or, if the Work has been rejected by ENGINEER, remove it from the Project and replace it with Work that is not defective. CONTRACTOR shall pay all Claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such correction or removal (including but not limited to all costs of repair or replacement of work of others).

13.07 Correction Period

~~*A. If within one year after the date of Substantial Completion or such longer period of time as may be prescribed by Laws or Regulations or by the terms of any applicable special guarantee required by the Contract Documents or by any specific provision of the Contract Documents, any Work is found to be defective, or if the repair of any damages to the land or areas made available for CONTRACTOR's use by OWNER or permitted by Laws and Regulations as contemplated in paragraph 6.11.A is found to be defective, CONTRACTOR shall promptly, without cost to OWNER and in accordance with OWNER's written instructions: (i) repair such defective land or areas, or (ii) correct such defective Work or, if the defective Work has been rejected by OWNER, remove it from the Project and replace it with Work that is not defective, and (iii) satisfactorily correct or repair or remove and replace any damage to other Work, to the work of others or other land or areas resulting therefrom. If CONTRACTOR does not promptly comply with the terms of such instructions, or in an emergency where delay would cause serious risk of loss or damage, OWNER may have the defective Work corrected or repaired or may have the rejected Work removed and replaced, and all Claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such correction or repair or such removal and replacement (including but not limited to all costs of repair or replacement of work of others) will be paid by CONTRACTOR.~~

B. In special circumstances where a particular item of equipment is placed in continuous service before Substantial Completion of all the Work, the correction period for that item may start to run from an earlier date if so provided in the Specifications or by Written Amendment.

C. Where defective Work (and damage to other Work resulting therefrom) has been corrected or removed and replaced under this paragraph 13.07, the correction period hereunder with respect to such Work will be extended for an additional period of one year after such correction or removal and replacement has been satisfactorily completed.

D. CONTRACTOR's obligations under this paragraph 13.07 are in addition to any other obligation or warranty. The provisions of this paragraph 13.07 shall not be construed as a substitute for or a waiver of the provisions of any applicable statute of limitation or repose.

13.08 Acceptance of Defective Work

A. If, instead of requiring correction or removal and replacement of defective Work, OWNER (and, prior to ENGINEER's recommendation of final payment, ENGINEER) prefers to accept it, OWNER may do so. CONTRACTOR shall pay all Claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) attributable to OWNER's evaluation of and determination to accept such defective Work (such costs to be approved by ENGINEER as to reasonableness) and the diminished value of the Work to the extent not otherwise paid by CONTRACTOR pursuant to this sentence. If any such acceptance occurs prior to ENGINEER's recommendation of final payment, a Change Order will be issued incorporating the necessary revisions in the Contract Documents with respect to the Work, and OWNER shall be entitled to an appropriate decrease in the Contract Price, reflecting the diminished value of Work so accepted. If the parties are unable to agree as to the amount thereof, OWNER may make a Claim therefor as provided in paragraph 10.05. If the acceptance occurs after such recommendation, an appropriate amount will be paid by CONTRACTOR to OWNER.

13.09 OWNER May Correct Defective Work

*A. If CONTRACTOR fails within a reasonable time after written notice from ENGINEER to correct defective Work or to remove and replace rejected Work as required by ENGINEER in accordance with paragraph 13.06.A, or if CONTRACTOR fails to perform the Work in accordance with the Contract Documents, or if CONTRACTOR fails to comply with any other provision of the Contract Documents, OWNER may, after seven days written notice to CONTRACTOR, correct and remedy any such deficiency.

B. In exercising the rights and remedies under this paragraph, OWNER shall proceed expeditiously. In connection with such corrective and remedial action, OWNER may exclude CONTRACTOR from all or part of the Site, take possession of all or part of the Work and suspend CONTRACTOR's services related thereto, take possession of CONTRACTOR's tools, appliances, construction equipment and machinery at the Site, and incorporate in the Work all materials and equipment stored at the Site or for which OWNER has paid CONTRACTOR but which are stored elsewhere. CONTRACTOR shall allow OWNER, OWNER's representatives, agents and employees, OWNER's other contractors, and ENGINEER and ENGINEER's Consultants access to the Site to enable OWNER to exercise the rights and remedies under this paragraph.

C. All Claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) incurred or sustained by OWNER in exercising the rights and remedies under this paragraph 13.09 will be charged against CON- TRACTOR, and a Change Order will be issued incorporating the necessary revisions in the Contract Documents with respect to the Work; and OWNER shall be entitled to an appropriate decrease in the Contract Price. If the parties are unable to agree as to the amount of the adjustment, OWNER may make a Claim therefor as provided in paragraph 10.05. Such claims, costs, losses and damages will include but not be limited to all costs of repair, or replacement of work of others destroyed or damaged by correction, removal, or replacement of CONTRACTOR's defective Work.

D. CONTRACTOR shall not be allowed an extension of the Contract Times (or Milestones) because of any delay in the performance of the Work attributable to the exercise by OWNER of OWNER's rights and remedies under this paragraph 13.09.

ARTICLE 14 - PAYMENTS TO CONTRACTOR AND COMPLETION

14.01 Schedule of Values

A. The schedule of values established as provided in paragraph 2.07.A will serve as the basis for progress payments and will be incorporated into a form of Application for Payment acceptable to ENGINEER. Progress payments on account of Unit Price Work will be based on the number of units completed.

14.02 Progress Payments

A. Applications for Payments

1. At least 20 days before the date established for each progress payment (but not more often than once a month), CONTRACTOR shall submit to ENGINEER for review an Application for Payment filled out and signed by CONTRACTOR covering the Work completed as of the date of the Application and accompanied by such supporting documentation as is required by the Contract Documents. If payment is requested on the basis of materials and equipment not incorporated in the Work but delivered and suitably stored at the Site or at another location agreed to in writing, the Application for Payment shall also be accompanied by a bill of sale, invoice, or other documentation warranting that OWNER has received the materials and equipment free and clear of all Liens and evidence that the materials and equipment are covered by appropriate property insurance or other arrangements to protect OWNER's interest therein, all of which must be satisfactory to OWNER.

2. Beginning with the second Application for Payment, each Application shall include an affidavit of CONTRACTOR stating that all previous progress payments received on account of the Work have been applied on account to discharge CONTRACTOR's legitimate obligations associated with prior Applications for Payment.

~~*3. The amount of retainage with respect to progress payments will be as stipulated in the Agreement.~~

B. Review of Applications

~~**1. ENGINEER will, within 10 days after receipt of each Application for Payment, either indicate in writing a recommendation of payment and present the Application to OWNER or return the Application to CONTRACTOR indicating in writing ENGINEER's reasons for refusing to recommend payment. In the latter case, CONTRACTOR may make the necessary corrections and resubmit the Application.~~

2. ENGINEER's recommendation of any payment requested in an Application for Payment will constitute a representation by ENGINEER to OWN- ER, based on ENGINEER's observations on the Site of the executed Work as an experienced and qualified design professional and on ENGINEER's review of the Application for Payment and the accompanying data and schedules, that to the best of ENGINEER's knowledge, information and belief:

a. the Work has progressed to the point indicated;

b. the quality of the Work is generally in accordance with the Contract Documents (subject to an evaluation of the Work as a functioning whole prior to or upon Substantial Completion, to the results of any subsequent tests called for in the Contract Documents, to a final determination of quantities and classifications for Unit Price Work under paragraph 9.08, and to any other qualifications stated in the recommendation); and

c. the conditions precedent to CONTRACTOR's being entitled to such payment appear to have been fulfilled in so far as it is ENGINEER's responsibility to observe the Work.

3. By recommending any such payment ENGINEER will not thereby be deemed to have represented that: (i) inspections made to check the quality or the quantity of the Work as it has been performed have been exhaustive, extended to every aspect of the Work in progress, or involved detailed inspections of the Work beyond the responsibilities specifically assigned to ENGINEER in the Contract Documents; or (ii) that there may not be other matters or issues between the parties that might entitle CON- TRACTOR to be paid additionally by OWNER or entitle OWNER to withhold payment to CONTRACTOR.

4. Neither ENGINEER's review of CONTRACTOR's Work for the purposes of recommending payments nor ENGINEER's recommendation of any payment, including final payment, will impose responsibility on ENGINEER to supervise, direct, or control the Work or for the means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for CONTRACTOR's failure to comply with Laws and Regulations applicable to CONTRACTOR's performance of the Work. Additionally, said review or recommendation will not impose responsibility on ENGINEER to make any examination to ascertain how or for what purposes CONTRACTOR has used the moneys paid on account of the Contract Price, or to determine that title to any of the Work, materials, or equipment has passed to OWNER free and clear of any Liens.

5. ENGINEER may refuse to recommend the whole or any part of any payment if, in ENGINEER's opinion, it would be incorrect to make the representations to OWNER referred to in paragraph 14.02.B.2. ENGINEER may also refuse to recommend any such payment or, because of subsequently discovered evidence or the results of subsequent inspections or tests, revise or revoke any such payment recommendation previously made, to such extent as may be necessary in ENGINEER's opinion to protect OWNER from loss because:

a. the Work is defective, or completed Work has been damaged, requiring correction or replacement;

b. the Contract Price has been reduced b Written Amendment or Change Orders;

c. OWNER has been required to correct defective Work or complete Work in accordance with paragraph 13.09; or

d. ENGINEER has actual knowledge of the occurrence of any of the events enumerated in paragraph 15.02.A.

C. Payment Becomes Due

*1. Ten days after presentation of the Application for Payment to OWNER with ENGINEER's recommendation, the amount recommended will (subject to the provisions of paragraph 14.02.D) become due, and when due will be paid by OWNER to CONTRACTOR.

**D. Reduction *in Payment*

1. OWNER may refuse to make payment of the full amount recommended by ENGINEER because:

a. claims have been made against OWN- ER on account of CONTRACTOR's performance or furnishing of the Work;

b. Liens have been filed in connection with the Work, except where CONTRACTOR has delivered a specific Bond satisfactory to OWNER to secure the satisfaction and discharge of such Liens;

c. there are other items entitling OWNER to a set-off against the amount recommended; or

d. OWNER has actual knowledge of the occurrence of any of the events enumerated in paragraphs 14.02.B.5.a through 14.02.B.5.c or paragraph 15.02.A.

2. If OWNER refuses to make payment of the full amount recommended by ENGINEER, OWNER must give CONTRACTOR immediate written notice (with a copy to ENGINEER) stating the reasons for such action and promptly pay CONTRACTOR any amount remaining after deduction of the amount so withheld. OWNER shall promptly pay CONTRACTOR the amount so withheld, or any adjustment thereto agreed to by OWNER and CONTRACTOR, when CONTRACTOR corrects to OWNER's satisfaction the reasons for such action.

3. If it is subsequently determined that OWNER's refusal of payment was not justified, the amount wrongfully withheld shall be treated as an amount due as determined by paragraph 14.02.C.1.

14.03 CONTRACTOR's Warranty of Title

* ~~A. CONTRACTOR warrants and guarantees that title to all Work, materials, and equipment covered by any Application for Payment, whether incorporated in the Project or not, will pass to OWNER no later than the time of payment free and clear of all Liens.~~

14.04 Substantial Completion

A. When CONTRACTOR considers the entire Work ready for its intended use CONTRACTOR shall notify OWNER and ENGINEER in writing that the entire Work is substantially complete (except for items specifically listed by CONTRACTOR as incomplete) and request that ENGINEER issue a certificate of Substantial Completion. Promptly thereafter, OWNER, CONTRACTOR, and ENGINEER shall make an inspection of the Work to determine the status of completion. If ENGINEER does not consider the Work substantially complete, ENGINEER will notify CONTRACTOR in writing giving the reasons therefor. If ENGINEER considers the Work substantially complete, ENGINEER will prepare and deliver to OWNER a tentative certificate of Substantial Completion which shall fix the date of Substantial Completion. There shall be attached to the certificate a tentative list of items to be completed or corrected before final payment. OWNER shall have seven days after receipt of the tentative certificate during which to make written objection to ENGINEER as to any provisions of the certificate or attached list

   If, after considering such objections, ENGINEER concludes that the Work is not substantially complete, ENGINEER will within 14 days after submission of the tentative certificate to OWNER notify CONTRACTOR in writing, stating the reasons therefor. If, after consideration of OWNER's objections, ENGINEER considers the Work substantially complete, ENGINEER will within said 14 days execute and deliver to OWNER and CONTRACTOR a definitive certificate of Substantial Completion (with a revised tentative list of items to be completed or corrected) reflecting such changes from the tentative certificate as ENGINEER believes justified after consideration of any objections from OWNER. At the time of delivery of the tentative certificate of Substantial Completion ENGINEER will deliver to OWNER and CONTRACTOR a written recommendation as to division of responsibilities pending final payment between OWNER and CONTRACTOR with respect to security, operation, safety, and protection of the Work, maintenance, heat, utilities, insurance, and warranties and guarantees. Unless OWNER and CONTRACTOR agree otherwise in writing and so inform ENGINEER in writing prior to ENGINEER's issuing the definitive certificate of Substantial Completion, ENGINEER's aforesaid recommendation will be binding on OWNER and CONTRACTOR until final payment.

B. OWNER shall have the right to exclude CONTRACTOR from the Site after the date of Substantial Completion, but OWNER shall allow CONTRACTOR reasonable access to complete or correct items on the tentative list.

14.05 Partial Utilization

A. Use by OWNER at OWNER's option of any substantially completed part of the Work which has specifically been identified in the Contract Documents, or which OWNER, ENGINEER, and CONTRACTOR agree constitutes a separately functioning and usable part of the Work that can be used by OWNER for its intended purpose without significant interference with CONTRACTOR's performance of the remainder of the Work, may be accomplished prior to Substantial Completion of all the Work subject to the following conditions.

   1. OWNER at any time may request CON- TRACTOR in writing to permit OWNER to use any such part of the Work which OWNER believes to be ready for its intended use and substantially complete. If CONTRACTOR agrees that such part of the Work is substantially complete, CONTRACTOR will certify to OWNER and ENGINEER that such part of the Work is substantially complete and request ENGINEER to issue a certificate of Substantial Completion for that part of the Work. CONTRACTOR at any time may notify OWNER and ENGINEER in writing that CONTRACTOR considers any such part of the Work ready for its intended use and substantially complete and request ENGINEER to issue a certificate of Substantial Completion for that part of the Work. Within a reasonable time after either such request, OWNER, CONTRACTOR, and ENGINEER shall make an inspection of that part of the Work to determine its status of completion. If ENGINEER does not consider that part of the Work to be substantially complete, ENGINEER will notify OWNER and CONTRACTOR in writing giving the reasons therefor. If ENGINEER considers that part of the Work to be substantially complete, the provisions of para- graph 14.04 will apply with respect to certification of Substantial Completion of that part of the Work and the division of responsibility in respect thereof and access thereto.

   2. No occupancy or separate operation of part of the Work may occur prior to compliance with the requirements of paragraph 5.10 regarding property insurance.

14.06 Final Inspection

A. Upon written notice from CONTRACTOR that the entire Work or an agreed portion thereof is complete, ENGINEER will promptly make a final inspection with OWNER and CONTRACTOR and will notify CONTRACTOR in writing of all particulars in which this inspection reveals that the Work is incomplete or defective. CONTRACTOR shall immediately take such measures as are necessary to complete such Work or remedy such deficiencies.

14.07 Final Payment

A. Application for Payment

1. After CONTRACTOR has, in the opinion of ENGINEER, satisfactorily completed all corrections identified during the final inspection and has delivered, in accordance with the Contract Documents, all maintenance and operating instructions, schedules, guarantees, Bonds, certificates or other evidence of insurance certificates of inspection, marked-up record documents (as provided in paragraph 6.12), and other documents, CONTRACTOR may make application for final payment following the procedure for progress payments.

2. The final Application for Payment shall be accompanied (except as previously delivered) by: (i) all documentation called for in the Contract Documents, including but not limited to the evidence of insurance required by subparagraph 5.04.B.7; (ii) consent of the surety, if any, to final payment; and (iii) complete and legally effective releases or waivers (satisfactory to OWNER) of all Lien rights arising out of or Liens filed in connection with the Work.

3. In lieu of the releases or waivers of Liens specified in paragraph 14.07.A.2 and as approved by OWNER, CONTRACTOR may furnish receipts or releases in full and an affidavit of CONTRACTOR that: (i) the releases and receipts include all labor, services, material, and equipment for which a Lien could be filed; and (ii) all payrolls, material and equipment bills, and other indebtedness connected with the Work for which OWNER or OWNER's property might in any way be responsible have been paid or otherwise satisfied. If any Subcontractor or Supplier fails to furnish such a release or receipt in full, CONTRACTOR may furnish a Bond or other collateral satisfactory to OWNER to indemnify OWNER against any Lien.

B. Review of Application and Acceptance

**1. If, on the basis of ENGINEER's observation of the Work during construction and final inspection, and ENGINEER's review of the final Application for Payment and accompanying documentation as required by the Contract Documents, ENGINEER is satisfied that the Work has been completed and CONTRACTOR's other obligations under the Contract Documents have been fulfilled, ENGINEER will, within ten days after receipt of the final Application for Payment, indicate in writing ENGINEER's recommendation of payment and present the Application for Payment to OWNER for payment. At the same time ENGINEER will also give written notice to OWNER and CONTRACTOR that the Work is acceptable subject to the provisions of paragraph 14.09. Otherwise, ENGINEER will return the Application for Payment to CONTRACTOR, indicating in writing the reasons for refusing to recommend final payment, in which case CONTRACTOR shall make the necessary corrections and resubmit the Application for Payment.

C. Payment Becomes Due

1. Thirty days after the presentation to OWN- ER of the Application for Payment and accompanying documentation, the amount recommended by ENGINEER will become due and, when due, will be paid by OWNER to CONTRACTOR.

14.08 Final Completion Delayed

A. If, through no fault of CONTRACTOR, final completion of the Work is significantly delayed, and if ENGINEER so confirms, OWNER shall, upon receipt of CONTRACTOR's final Application for Payment and recommendation of ENGINEER, and without terminating the Agreement, make payment of the balance due for that portion of the Work fully completed and accepted. If the remaining balance to be held by OWNER for Work not fully completed or corrected is less than the retainage stipulated in the Agreement, and if Bonds have been furnished as required in paragraph 5.01, the written consent of the surety to the payment of the balance due for that portion of the Work fully completed and accepted shall be submitted by CONTRACTOR to ENGINEER with the Application for such payment. Such payment shall be made under the terms and conditions governing final payment, except that it shall not constitute a waiver of Claims.

14.09 Waiver of Claims

A. The making and acceptance of final payment will constitute:

1. a waiver of all Claims by OWNER against CONTRACTOR, except Claims arising from unsettled Liens, from defective Work appearing after final inspection pursuant to paragraph 14.06, from failure to comply with the Contract Documents or the terms of any special guarantees specified therein, or from CONTRACTOR's continuing obligations under the Contract Documents; and

2. a waiver of all Claims by CONTRACTOR against OWNER other than those previously made in writing which are still unsettled.

ARTICLE 15 - SUSPENSION OF WORK AND TERMINATION

15.01 OWNER May Suspend Work

**A. At any time and without cause, OWNER may suspend the Work or any portion thereof for a period of not more than 90 consecutive days by notice in writing to CON- TRACTOR and ENGINEER which will fix the date on which Work will be resumed. CONTRACTOR shall resume the Work on the date so fixed. CONTRACTOR shall be allowed an adjustment in the Contract Price or an extension of the Contract Times, or both, directly attributable to any such suspension if CONTRACTOR makes a Claim therefor as provided in paragraph 10.05.

15.02 OWNER May Terminate for Cause

A. The occurrence of any one or more of the following events will justify termination for cause:

1. CONTRACTOR's persistent failure to perform the Work in accordance with the Contract Documents (including, but not limited to, failure to supply sufficient skilled workers or suitable materials or equipment or failure to adhere to the progress schedule established under paragraph 2.07 as adjusted from time to time pursuant to paragraph 6.04);

2. CONTRACTOR's disregard of Laws or Regulations of any public body having jurisdiction;

3. CONTRACTOR's disregard of the authority of ENGINEER; or

4. CONTRACTOR's violation in any substantial way of any provisions of the Contract Documents.

*B. If one or more of the events identified in paragraph 15.02.A occur, OWNER may, after giving CONTRACTOR (and the surety, if any) seven days written notice, terminate the services of CONTRACTOR, exclude CONTRACTOR from the Site, and take possession of the Work and of all CONTRACTOR's tools, appliances, construction equipment, and machinery at the Site, and use the same to the full extent they could be used by CONTRACTOR (without liability to CONTRACTOR for trespass or conversion), incorporate in the Work all materials and equipment stored at the Site or for which OWNER has paid CONTRACTOR but which are stored elsewhere, and finish the Work as OWNER may deem expedient. In such case, CONTRACTOR shall not be entitled to receive any further payment until the Work is finished. If the unpaid balance of the Contract Price exceeds all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) sustained by OWNER arising out of or relating to completing the Work, such excess will be paid to CONTRACTOR. If such claims, costs, losses, and damages exceed such unpaid balance, CONTRACTOR shall pay the difference to OWNER. Such claims, costs, losses, and damages incurred by OWNER will be reviewed by ENGINEER as to their reasonableness and, when so approved by ENGINEER, incorporated in a Change Order. When exercising any rights or remedies under this paragraph OWNER shall not be required to obtain the lowest price for the Work performed.

C. Where CONTRACTOR's services have been so terminated by OWNER, the termination will not affect any rights or remedies of OWNER against CONTRACTOR then existing or which may thereafter accrue. Any retention or payment of moneys due CONTRACTOR by OWNER will not release CONTRACTOR from liability.

15.03 OWNER May Terminate For Convenience

A. Upon seven days written notice to CON- TRACTOR and ENGINEER, OWNER may, without cause and without prejudice to any other right or remedy of OWNER, elect to terminate the Contract. In such case, CONTRACTOR shall be paid (without duplication of any items):

1. for completed and acceptable Work executed in accordance with the Contract Documents prior to the effective date of termination, including fair and reasonable sums for overhead and profit on such Work;

2. for expenses sustained prior to the effective date of termination in performing services and furnishing labor, materials, or equipment as required by the Contract Documents in connection with uncompleted Work, plus fair and reasonable sums for overhead and profit on such expenses;

3. for all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) incurred in settlement of terminated contracts with Subcontractors, Suppliers, and others; and

4. for reasonable expenses directly attributable to termination.

B. CONTRACTOR shall not be paid on account of loss of anticipated profits or revenue or other economic loss arising out of or resulting from such termination.

15.04 CONTRACTOR May Stop Work or Terminate

A. If, through no act or fault of CONTRACTOR, the Work is suspended for more than 90 consecutive days by OWNER or under an order of court or other public authority, or ENGINEER fails to act on any Application for Payment within 30 days after it is submitted, or OWNER fails for 30 days to pay CONTRACTOR any sum finally determined to be due, then CONTRACTOR may, upon seven days written notice to OWNER and ENGINEER, and provided OWNER or ENGINEER do not remedy such suspension or failure within that time, terminate the Contract and recover from OWNER payment on the same terms as provided in paragraph 15.03. In lieu of terminating the Contract and without prejudice to any other right or remedy, if ENGINEER has failed to act on an Application for Payment within 30 days after it is submitted, or OWNER has failed for 30 days to pay CONTRACTOR any sum finally determined to be due, CONTRACTOR may, seven days after written notice to OWNER and ENGINEER, stop the Work until payment is made of all such amounts due CONTRACTOR, including interest thereon. The provisions of this paragraph 15.04 are not intended to preclude CON- TRACTOR from making a Claim under paragraph 10.05 for an adjustment in Contract Price or Contract Times or other- wise for expenses or damage directly attributable to CONTRACTOR's stopping the Work as permitted by this paragraph.

ARTICLE 16 - DISPUTE RESOLUTION

16.01 Methods and Procedures

A. Dispute resolution methods and procedures, if any, shall be as set forth in the Supplementary Conditions. If no method and procedure has been set forth, and subject to the provisions of paragraphs 9.09 and 10.05, OWNER and CONTRACTOR may exercise such rights or remedies as either may otherwise have under the Contract Documents or by Laws or Regulations in respect of any dispute.

ARTICLE 17 - MISCELLANEOUS

17.01 Giving Notice

A. Whenever any provision of the Contract Documents requires the giving of written notice, it will be deemed to have been validly given if delivered in person to the individual or to a member of the firm or to an officer of the corporation for whom it is intended, or if delivered at or sent by registered or certified mail, postage prepaid, to the last business address known to the giver of the notice.

17.02 Computation of Times

A. When any period of time is referred to in the Contract Documents by days, it will be computed to exclude the first and include the last day of such period. If the last day of any such period falls on a Saturday or Sunday or on a day made a legal holiday by the law of the applicable jurisdiction, such day will be omitted from the computation.

17.03 Cumulative Remedies

A. The duties and obligations imposed by these General Conditions and the rights and remedies available hereunder to the parties hereto are in addition to, and are not to be construed in any way as a limitation of, any rights and remedies available to any or all of them which are otherwise imposed or available by Laws or Regulations, by special warranty or guarantee, or by other provisions of the Contract Documents, and the provisions of this paragraph will be as effective as if repeated specifically in the Contract Documents in connection with each particular duty, obligation, right, and remedy to which they apply.

17.04 Survival of Obligations

A. All representations, indemnifications, warranties, and guarantees made in, required by, or given in accordance with the Contract Documents, as well as all continuing obligations indicated in the Contract Documents, will survive final payment, completion, and acceptance of the Work or termination or completion of the Agreement.

17.05 Controlling Law

A. This Contract is to be governed by the law of the state in which the Project is located.

END OF DOCUMENT

This Page Intentionally Left Blank.

SECTION 00800

SUPPLEMENTARY CONDITIONS

These Supplementary Conditions amend or supplement the Standard General Conditions of the Construction Contract (No. 1910-8, 1996 edition) and other provisions of the Contract Documents as indicated below. All provisions which are not so amended or supplemented remain in full force and effect.

TABLE OF CONTENTS

ARTICLE 1. DEFINITIONS AND TERMINOLOGY 1
ARTICLE 2. PRELIMINARY MATTERS SC-2.02 2
ARTICLE 3. CONTRACT DOCUMENTS: INTENT, AMENDING, REUSE SC-3.01 2
ARTICLE 4. AVAILABILITY OF LANDS; SUBSURFACE AND PHYSICAL CONDITIONS; REFERENCE POINTS 2

ARTICLE 11. COST OF THE WORK; CASH ALLOWANCES; UNIT PRICE WORK 6
ARTICLE 12. CHANGE OF CONTRACT PRICE; CHANGE OF CONTRACT TIMES 6
ARTICLE 13. TESTS AND INSPECTIONS; CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK 7
ARTICLE 14. PAYMENTS TO CONTRACTOR AND COMPLETION 7
ARTICLE 15. SUSPENSION OF WORK AND TERMINATION 8
ARTICLE 17. MISCELLANEOUS 8

ARTICLE 1. DEFINITIONS AND TERMINOLOGY

Add the following language at the beginning of definition 1.01 A.12 entitled "Contract Documents" in the General Conditions: "The Advertisement for Bids, Instructions to Bidders, State Regulations,..."

Delete the words "The individual or entity named as such in the Agreement" in 1.01.A.19, “Engineer”, and insert the following in their place: "The individual or entity duly appointed by the Owner to undertake the duties and powers herein assigned to the Engineer, acting either directly or through duly appointed representatives."

Delete the words "and who is identified as such in the Supplementary Conditions" at the end of definition 1.01 A.20, entitled "ENGINEER'S Consultant."

Delete definition 1.01 A.41 entitled "Specifications" in the General Conditions in its entirety and insert the following in its place: "Sections included under Division 1 through Division 16 of the Contract Documents."

ARTICLE 2. PRELIMINARY MATTERS SC-2.02

Delete paragraph 2.02A of the General Conditions in its entirety.

SC-2.03

Add paragraph 2.03B:

Notwithstanding the time limitations provided in paragraph 2.03A, the OWNER may desire to commence the Contract Times later than the sixtieth day after the bid opening. The OWNER and CONTRACTOR, upon mutual agreement, may extend the commencement of the Contract Times to any date that they elect. OWNER must obtain CONTRACTOR's approval for extending the time beyond the dates/times stated in the Contract Documents.

SC-2.05

Delete paragraph 2.05C of the General Conditions in its entirety and insert the following in its place:

"C. Evidence of Insurance: CONTRACTOR shall deliver to OWNER, with a copy to the ENGINEER, Certificates of Insurance within 10 days after receipt of the notice of the acceptance of bid (and other evidence requested by OWNER) which CONTRACTOR is required to purchase and maintain in accordance with the requirements of Article 5."

ARTICLE 3. CONTRACT DOCUMENTS: INTENT, AMENDING, REUSE SC-3.01

Add the following sentence at the end of Paragraph 3.01A of the General Conditions:

"...by all. Each and every provision of law and clause required by law to be inserted in these Contract Documents shall be deemed to be inserted herein, and they shall be read and enforced as though it were included herein, and if through mistake or otherwise, any such provision is not inserted, or if not correctly inserted, then upon the application of either party, the Contract Documents shall forthwith be physically amended to make such insertion."

ARTICLE 4. AVAILABILITY OF LANDS; SUBSURFACE AND PHYSICAL CONDITIONS; REFERENCE POINTS

SC-4.02

Delete the term "Supplementary Conditions" of paragraph 4.02 A of the General Conditions and replace it with "Contract Documents".

SC-4.04

Change "of" to "or" on line 6 of paragraph 4.04 B.2 of the General Conditions.

Delete the following words from lines 8 and 9 of paragraph 4.04 B.2 of the General Conditions: "...or not shown or indicated with reasonable accuracy..."

SC-4.05

Add a new paragraph immediately after paragraph 4.05A of the General Conditions which is to read as follows:

"B. ENGINEER may check the lines, elevations and reference marks set by CONTRACTOR, and CONTRACTOR shall correct any errors disclosed by such check. Such a check shall not be considered as approval of CONTRACTOR's work and shall not relieve CONTRACTOR of the responsibility for construction of the entire Work in accordance with the Contract Documents. CONTRACTOR shall furnish personnel to assist ENGINEER in checking lines and grades."

ARTICLE 5. BONDS AND INSURANCE NOTICE TO CONTRACTOR:

1. Proof of Insurance coverage shall be furnished to the OWNER in accordance with the schedule for submittal of Bonds and Agreements.

2. Additionally refer to Article 2. PRELIMINARY MATTERS, Paragraph SC-2.05.C

SC-5.01

Insert these sentences following SC-5.01.A:

"The Surety Company providing the bonds shall have a rating of A or better within the Best Key Rating Guide and be licensed by the Massachusetts Division of Insurance. The CONTRACTOR shall pay the premiums for such Bonds."

SC-5.03

Delete the second sentence in paragraph 5.03A of the General Conditions, which begins "OWNER shall deliver to...."

SC-5.04

The limits of liability for the insurance required by paragraph 5.04A of the General Conditions shall provide coverage for not less than the following amounts or greater where required by law:

5.04 A.1 and 5.04 A.2 Workers' Compensation.

(1) Worker's Compensation per Statutory Requirements

(2) Coverage B - Employer's Liability $100,000/$500,000/$100,000

5.04 A.3, 5.04 A.4 and 5.04 A.5 Commercial General Liability Limits shall include coverage for Independent Contractors (also known as Owners and Contractors Protective Liability), explosion, collapse and underground hazard coverage (XCU), broad form property damage, blanket contractual liability and products/completed operations. The general aggregate limits shall be endorsed so that they respond on a per project and per location basis.

Limits: $1,000,000 each occurrence

$2,000,000 general aggregate

$2,000,000 products/completed operations aggregate

5.04 A.6 Automobile Liability for owned, hired and non-owned vehicles:

(1)	Bodily injury:	$1,000,000	Combined single limit
(2)	Property damage	$1,000,000	Combined single limit

Revise the beginning of paragraph 5.04.B.1 to read as follows: "with respect to insurance required by paragraphs 5.04.A.3 through 5.04.A.5 inclusive and paragraph 5.04.C, include as additional insureds…"

Delete paragraph 5.04.B.5 in its entirety and insert the following in its place:

"5. Contains a provision that notice of cancellation of insurance be delivered in accordance with policy provisions. In addition, the CONTRACTOR and/or its insurance broker/agent shall immediately notify the OWNER and ENGINEER should any insurance coverage be cancelled. The CONTRACTOR shall immediately stop work on the Project and shall not resume work until the CONTRACTOR provides evidence, to the OWNER and ENGINEER, in the form of an acceptable insurance certificate, of new insurance coverage that replaces all cancelled coverage that is required for the Project."

Add two new paragraphs immediately after paragraph 5.04B of the General Conditions which are to read as follows:

"C. The CONTRACTOR shall also provide:

1. CONTRACTOR shall, as a minimum, purchase and maintain excess liability insurance in the umbrella form with a combined single limit of not less than $5,000,000 per occurrence and in the aggregate. Evidence of such excess liability shall be delivered to OWNER in accordance with paragraph 2.05C in the form of a certificate indicating the policy numbers and limits of liability of all underlying insurance.

2. General Liability, Workers' Compensation, Automobile Liability and Umbrella Liability Policies will contain waivers of subrogation in favor of the Engineer and Owner.

5) If the aggregate limits of liability indicated in CONTRACTOR' insurance provided in accordance with paragraphs 5.03 and 5.04 are not sufficient to cover all claims for damages arising from his operations under this Contract and from any other work performed by him or if the commercial general liability insurance policy of insurance does not provide that the general aggregate limits apply on a per project and per location basis, CONTRACTOR shall have the policy amended so that the aggregate limits of liability required by this Contract will be available to cover all claims for damages due to operations under this Contract."

6) The General Contractor shall carry the coverage for Subcontractors naming the Subcontractors, the Town of Orleans, and AECOM Technical Services, Inc. as additional insured in the limits specified herein. SECTION 05020A-3, INSURANCE REQUIREMENTS FOR INCLUSION IN ALL SPECIFICATIONS AND CONTRACTS are separate from the Owners and Contractors Protective Liability and shall name the Town of Orleans, and AECOM Technical Services, Inc. as additional insured.

SC-5.05

Delete paragraph 5.05 of the General Conditions in its entirety.

SC-5.06

Delete Paragraph 5.06A of the General Conditions in its entirety.

Delete paragraph 5.06B of the General Conditions in its entirety.

Delete Paragraph 5.06C of the General Conditions in its entirety.

Delete paragraph 5.06D of the General Conditions in its entirety.

Delete paragraph 5.06E of the General Conditions in its entirety.

SC-5.07

Amend the last sentence of paragraph 5.07A of the General Conditions by striking out the words "held by OWNER as trustee or." As so amended, paragraph 5.07A remains in effect.

SC-5.08

Delete paragraph 5.08A of the General Conditions in its entirety.

Delete paragraph 5.08B of the General Conditions in its entirety.

SC-5.09

Delete paragraph 5.09A of the General Conditions in its entirety and insert the following in its place:

"A. If OWNER has any objection to the coverage afforded by or other provisions of the insurance required to be purchased and maintained by CONTRACTOR in accordance with this Article 5 on the basis of its not complying with the Contract Documents, OWNER will notify CONTRACTOR in writing thereof within thirty days of the date of delivery of such certificates to OWNER in accordance with paragraph 2.05C. CONTRACTOR will provide such additional information in respect of insurance provided by him as OWNER may reasonably request."

ARTICLE 6. CONTRACTOR'S RESPONSIBILITIES SC-6.01

Delete paragraph 6.01B of the General Conditions in its entirety and replace with the following:

"B. At the site of the Work the CONTRACTOR shall employ a full-time construction superintendent or foreman who shall have full authority to act for the CONTRACTOR. It is understood that such representative shall be acceptable to the ENGINEER and shall be one who will be continued in the capacity for the particular job involved unless the representative ceases to be on the CONTRACTOR's payroll. If at any time during the Work the representative is deemed by the ENGINEER to be no longer acceptable, the representative shall be promptly replaced by the CONTRACTOR. All communications to the superintendent or foreman shall be as binding as if given to the CONTRACTOR."

SC-6.04

Add the following paragraph after paragraph 6.04A.2 of the General Conditions:

"B. The CONTRACTOR's resident superintendent shall attend monthly progress meetings at the site of the work with the ENGINEER and others as appropriate to review schedule status and such other pertinent subjects as may be listed on the agenda by the ENGINEER."

SC-6.05

Revise the second sentence of Paragraph A to read as follows:

"Unless the specification indicates that a proprietary item is called for, other items of material or equipment or material or equipment of other suppliers may be submitted to ENGINEER for review under the circumstances described below, and in accordance with MGL c.30, s.39M."

SC-6.17

In paragraph 6.17 E.1 of the General Conditions, delete the word "timely" from the first line.

SC-6.20

Delete paragraph 6.20A of the General Conditions in its entirety and replace with the following:

"A. To the fullest extent permitted by law, the CONTRACTOR shall indemnify and hold harmless the OWNER, the ENGINEER, ENGINEER's consultants, and any of their officers, directors, employees, agents, affiliates, subsidiaries and partners from and against all claims, damages, losses and expenses, including but not limited to attorney's fees, arising out of or resulting from the performance of the Work, provided that such claim, damage, loss or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself) including loss of use resulting therefrom, but only to the extent caused in whole or in part by acts or omissions of the CONTRACTOR, a subcontractor, anyone directly or indirectly employed by them or anyone for whose acts they may be liable, regardless of whether or not such claim, damage, loss or expense is caused in part by a party indemnified hereunder. Such obligation shall apply to any such claims, damages, losses and expenses which arise and/or are incurred by any person or entity either during the performance of the Work and/or after completion of construction. Nothing in this paragraph shall be construed to negate, abridge, or reduce other rights or obligations of indemnity or contribution which would otherwise exist as to a party or person indemnified hereunder. CONTRACTOR hereby assumes the responsibility and liability for injury to or death of any and all persons, including the CONTRACTOR's employees, and for any and all damage to property caused by, resulting from, or arising out of any act, omission or neglect on the part of the CONTRACTOR, or of any Subcontractor or of anyone directly or indirectly employed by any of them or of anyone for whose acts, any of them may be liable. The Contractor hereby acknowledges its obligation under the foregoing paragraph to indemnify the Engineer and Owner against judgments suffered because of the contractor's work and to assume the cost of defending the Engineer and Owner against claims as described in the foregoing paragraph."

Delete paragraph 6.20C of the General Conditions in its entirety.

ARTICLE 8. OWNER'S RESPONSIBILITIES

SC-8.02

Delete the phrase "to whom the CONTRACTOR makes no reasonable objection."

SC-8.06

Delete paragraph 8.06A of the General Conditions in its entirety.

SC-8.09

Insert the following after the first sentence:

"However, the OWNER shall have the right to direct the CONTRACTOR to perform the Work according to any sequence schedule set forth in the Contract Documents or established pursuant thereto."

ARTICLE 9. ENGINEER'S STATUS DURING CONSTRUCTION SC-9.01

Add a new paragraph 9.01B after paragraph 9.01A of the General Conditions, which is to read as follows:

"B. Nothing contained in the Contract Documents shall be construed to create a contractual relationship of any kind (1) between the ENGINEER and CONTRACTOR, (2) between the OWNER and a Subcontractor or Subcontractors, or (3) between any person or entities other than the OWNER and CONTRACTOR. The ENGINEER shall, however, be entitled to performance and enforcement of obligations under the CONTRACT DOCUMENTS intended to facilitate performance of the ENGINEER'S duties."

SC-9.10

Insert the following after the first sentence on paragraph 9.10B:

"However, the ENGINEER shall have the right to direct the CONTRACTOR to perform the Work according to any sequence schedule set forth in the Contract Documents or established pursuant thereto."

ARTICLE 11. COST OF THE WORK; CASH ALLOWANCES; UNIT PRICE WORK

Delete Article 11 of the General Conditions in its entirety and replace with the following:

"A. The unit price of an item of Unit Price work shall be subject to reevaluation and adjustment under the following conditions:

(1) If the total extended bid price [Estimated Quantity times the Bid Unit Price] of a particular item of Unit Price Work amounts to 5 percent or more of the Original Contract Price and the variation in the quantity of the particular item of Unit Price Work performed by CONTRACTOR differs by more than 15 percent from the estimated quantity of such item indicated in the Agreement; and

(2) If there is no corresponding adjustment with respect to any other item of work; and

(3) If CONTRACTOR believes that CONTRACTOR has incurred additional expense as a result thereof, CONTRACTOR may make a claim for an adjustment in the Contract Price in accordance with Article 11 if the parties are unable to agree as to the effect of any such variations in the quantity of Unit Price Work performed. If OWNER believes that the quantity variation entitles OWNER to an adjustment in the unit price, OWNER shall be entitled to an adjustment in the unit price in an amount determined by the ENGINEER. ENGINEER shall not be liable in connection with any determination relating to adjustments which is rendered in good faith."

ARTICLE 12. CHANGE OF CONTRACT PRICE; CHANGE OF CONTRACT TIMES

SC-12.01

Delete paragraph 12.01 in its entirety.

SC-12.06

Add the following new paragraphs after paragraph 12.06 of the General Conditions: "12.07 Liquidated Damages:

"A. If the CONTRACTOR shall neglect, fail or refuse to complete the work within the time herein specified, or any proper extension thereof granted by the OWNER, then the CONTRACTOR does hereby agree, as a part consideration for the awarding of this Contract, to pay to the OWNER the amount specified in the Contract, not as a penalty but as liquidated damages for such breach of contract as hereinafter set forth, for each and every calendar day that the Contract shall be in default after the time stipulated in the Contract for completing the work. Such damages may be retained from time to time by the OWNER from progress payments or any amounts owing to the CONTRACTOR, or otherwise collected.

B. The said amount is fixed and agreed upon by and between the CONTRACTOR and the OWNER because of the impracticability and extreme difficulty of fixing and ascertaining the actual damages the OWNER would in such event sustain, and said amount is agreed to be the amount of damages which the OWNER would sustain and said amount shall be retained from time to time by the OWNER from current periodical estimates.

C. It is further agreed that time is of the essence of each and every portion of this Contract and of the specifications wherein as definite and certain length of times if fixed for the performance of any act whatsoever; and where under the Contract an additional time is allowed for the completion of any work, the new time limit fixed by such extension shall be of the essence of this Contract. Provided that the CONTRACTOR shall not be charged with liquidated damages of any excess cost when the OWNER determines that the CONTRACTOR is without fault and the CONTRACTOR's reasons for the time extension are acceptable to the OWNER; Provided, further, that the CONTRACTOR shall not be charged with liquidated damages or any excess cost when the delay in completion of the work is due:

1) to any preference, priority or allocation order duly issued by the Government;

2) to unforeseeable cause beyond the control and without the fault or negligence of the CONTRACTOR, including, but not restricted to, acts of God, or of the public enemy, acts of the OWNER, acts of another CONTRACTOR in the performance of a contract with the OWNER, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and severe weather; and

3) to any delays of subcontractors or suppliers occasioned by any of the causes specified in subsections C (1) and C (2) above;

D. Provided, further, that the CONTRACTOR shall, within thirty (30) days from the beginning of such delay, unless the OWNER shall grant a further period of time prior to the date of final settlement of the Contract, notify the OWNER, in writing, of the causes of the delay, who shall ascertain the facts and extent of the delay and notify the CONTRACTOR within a reasonable time of its decision in the matter."

ARTICLE 13. TESTS AND INSPECTIONS; CORRECTION, REMOVAL OR ACCEPTANCE OF DEFECTIVE WORK

SC-13.07

Delete paragraph 13.07A of the General Conditions and insert the following in its place:

"A. If within one year after the date of Substantial Completion or such longer period of time as may be prescribed by Laws or Regulations or by the terms of any applicable special guarantee required by the Contract Documents or by any specific provision of the Contract Documents, any work is found to be defective, CONTRACTOR shall promptly, without cost to OWNER and in accordance with OWNER's written instructions: (i) correct such defective work, or, if it has been rejected by OWNER, remove it from the site and replace it with work that is not defective, and (ii) satisfactorily correct or remove and replace any damage to other work or the work of others therefrom. If CONTRACTOR does not begin the repairs within ten (10) days of receipt of written notification and promptly comply with the terms of OWNER's written instructions, or in an emergency where delay would cause serious risk, loss or damage, OWNER may have the defective work corrected or the rejected work removed and replaced, and all claims, costs, losses and damages caused by or resulting from such removal and replacement (including but not limited to all costs of repair or replacement of work of others) will be paid by CONTRACTOR."

SC-13.09

Revise paragraph 13.09A of the General Conditions

"A. Delete the word "seven" and replace it with the word "ten" so that it reads "after ten days written notice to CONTRACTOR."

ARTICLE 14. PAYMENTS TO CONTRACTOR AND COMPLETION

SC-14.02

Delete paragraph 14.02A.3 and insert the following in its place:

"3. Retainage with respect to progress payments will be five percent or, if stipulated, the maximum allowed by law."

Add Paragraph 4. to read as follows:

"4. The CONTRACTOR shall submit Weekly Payroll Records Report and Statement of Compliance verifying compliance with the Minimum Prevailing Wage Law, MGL ch. 149, Sections 26-27H. These Statements of Compliance shall be submitted as a condition of payment for work performed during the period the reports apply."

SC-14.03

Delete paragraph 14.03A in its entirety and insert the following in its place:

"A. CONTRACTOR warrants and guarantees that title to all work, material and equipment covered by any Application for Payment, whether incorporated in the Project or not, will pass to OWNER no later than at the time of Application for Payment free and clear of all liens. CONTRACTOR shall provide written transfer of title and a certified paid invoice provided by the supplier."

ARTICLE 15. SUSPENSION OF WORK AND TERMINATION

SC-15.02

Add a new paragraph immediately after paragraph 15.02 A.4 of the General Conditions which is to read as follows:

"5. If the Work to be done under this Contract shall be abandoned, or if this Contract or any part thereof shall be sublet, without the previous written consent of OWNER, or if the contract or any claim thereunder shall be assigned by CONTRACTOR otherwise than as herein specified;"

ARTICLE 17. MISCELLANEOUS

SC-17.06, 17.07, 17.08, 17.09

Add the following new paragraphs after paragraph 17.05 of the General Conditions:

"17.06 Assignment:

The CONTRACTOR shall not assign the whole or any part of this Contract or any moneys due or to become due hereunder until thirty (30) days prior notice in writing has been given to the OWNER of the intention to assign, which notice shall state the identity and address of the prospective assignee. No assignment shall be made without the OWNER's prior written consent. Such consent shall not be unreasonably withheld. In case the CONTRACTOR assigns all or any part of the moneys due or to become due under this Contract, the instrument of assignment shall contain a clause substantially to the effect that it is agreed that the right of the assignee in and to any moneys due or to become due to the CONTRACTOR shall be subject to prior claims of all persons, firms and corporations of services rendered or materials supplied for the performance of the work called for in this Contract.

17.07 Liability

It is understood and agreed that members of the OWNER or the ENGINEER or any agent or employees of the OWNER signing this Agreement shall not be personally liable hereunder for any action incurred in connection with this Agreement.

17.08 State Statutes and Regulations

See Section 00830 for further modifications of the General Conditions due to state statutes and regulations.

17.09 Severability

If any provision of this Agreement shall be invalid or unenforceable to any extent or in any application, then the remainder of this Agreement and of such terms and conditions, except to such extent or in such application, shall not be affected thereby, and each and every term and condition of this Agreement shall be valid and enforced to the fullest extent and in the broadest application permitted by law."

ATTACHMENT A - Wage Rates

ATTACHMENT B - Excerpts from Chapter 30, Section 39F of the Massachusetts General Law

ATTACHMENT C - The Commonwealth of Massachusetts Supplemental Equal Employment Opportunity Anti-Discrimination and Affirmative Action Program.

ATTACHMENT D - Change Orders

A. REVISIONS TO GENERAL CONDITIONS

1. Definitions

The term "AWARDING AUTHORITY," as used herein, shall be considered to be synonymous with the term "OWNER," described in definition 1.01 A.30.

Delete definition 1.01 A.43 entitled "Substantial Completion" in the General Conditions in its entirety and insert the following in its place:

"Substantial Completion shall be interpreted in accordance with Massachusetts General Law

Chapter 30, Section 39G or 39K as appropriate."

2. Subsurface Conditions Found Different

Add the following sentence to the end of paragraph 4.03A of the General Conditions:

"...to do so. Adjustments resulting from subsurface or latent physical conditions will be in accordance with Massachusetts General Law Chapter 30, Section 39N."

3. Subcontracting

Add the following language at the end of paragraph 6.06F of the General Conditions:

"Except as required otherwise by Massachusetts General Law Chapter 149, Section 44F, for

Work governed by Chapter 149, sections 44A through 44H.

4. Permits

Delete paragraph 6.08A of the General Conditions in its entirety and insert the following in its place:

"A. Unless otherwise provided for in Section 00890 PERMITS, the AWARDING AUTHORITY shall be responsible for identifying and obtaining all federal, state, and local permits required by the nature and location of construction, including but not limited to railroad permits, building construction permits, and permits for street and highway cuts and openings. CONTRACTOR shall be responsible for obtaining all permits required of its equipment, work force, or particular operations in the performance of the Work and not otherwise specified to be obtained by the AWARDING AUTHORITY. These permit fees shall be paid by CONTRACTOR. CONTRACTOR shall pay all governmental charges and inspection fees necessary for the prosecution of the Work, which are applicable at the time of opening of bids, or, if there are no Bids, on the Effective Date of the Agreement. Town of Orleans building permit fees are waived."

5. Contractor Records

Add a new paragraph immediately after paragraph 6.09C of the General Conditions, which is to read as follows:

"D. The CONTRACTOR shall comply with all applicable provisions Chapter 30, Section 39R of the Massachusetts General Laws regarding, CONTRACTOR's records."

6. Massachusetts Sales and Use Tax

Add the following paragraph after paragraph 6.10A of the General Conditions:

"B. The materials and supplies to be used by the CONTRACTOR in the Work of this Contract are exempt from the Sales and Use Tax of the Commonwealth of Massachusetts. The AWARDING AUTHORITY tax exemption certificate number will be furnished to the CONTRACTOR."

7. Clarifications and Interpretations

Add the following language at the end of paragraph 9.04A of the General Conditions:

"The ENGINEER'S interpretation will be made in accordance with the requirements of Massachusetts General Law Chapter 30, Section 39P."

8. Change of Contract Price

Delete paragraphs 11.01, 11.02 and 12.01 of the General Conditions, having to do with Change of Contract Price. Changes in contract price will be governed by the section called "Change Orders," in Attachment D, Section 00830 and Article 11 in the Supplementary Conditions.

9. Payments

Delete paragraph 14.02B.1 of the General Conditions in its entirety and insert the following in its place:

"1. Progress Payments will be made in accordance with Massachusetts General Law Chapter 30, Section 39G, or 39K, as applicable."

Add the following new paragraph following paragraph 14.02C.1 of the General Conditions:

"2. The CONTRACTOR shall make payments to Subcontractors in accordance with the requirements of Massachusetts General Law Chapter 30, Section 39F."

Delete paragraph 14.07B of the General Conditions in its entirety and insert the following in its place:

"1. If, on the basis of the ENGINEER's observation of the Work during construction and final inspection and, upon the ENGINEER's review of the final Application for Payment and accompanying documentation, the ENGINEER is satisfied that the Work has been completed and that the CONTRACTOR's other obligations under the Contract Documents have been fulfilled, the ENGINEER will indicate in writing its recommendation of payment and present the Application to the AWARDING AUTHORITY for payment. Thereupon the ENGINEER will give written notice to the AWARDING AUTHORITY and the CONTRACTOR that the Work is acceptable subject to the provisions of paragraph 14.15. Otherwise, the ENGINEER will return the Application to CONTRACTOR, indicating in writing the reasons for refusing to recommend final payment. In such case the CONTRACTOR shall make the necessary corrections and resubmit the Application. If the Application and accompanying documentation are appropriate as to form and substance, the AWARDING AUTHORITY shall in accordance with the applicable provisions of the Massachusetts General Laws, make payment to the CONTRACTOR."

10. Suspension of Work and Termination

Delete paragraph 15.01A of the General Conditions in its entirety and insert the following in its place:

"A. The AWARDING AUTHORITY may order, at any time and without cause, the CONTRACTOR to suspend or delay the Work in accordance with Massachusetts General Law Chapter 30, Section 39O."

11. Labor Classifications and Minimum Wage Rates

Add the following paragraphs under the heading "Wage Rates" after paragraph 17.09 of the

Supplementary Conditions: "17.11 Wage Rates

A. Minimum Wage Rates as determined by the Commissioner of the Division of Occupational Safety of the Executive Office of Labor and Workforce Development under the provisions of Massachusetts General Laws Chapter 149, Sections 26-27D apply to this project. A copy of the wage schedule is included in Attachment A of Section 00830. If, after the Notice of Award, it becomes necessary to employ any person in a trade or occupation not classified in the wage determinations, such person shall be paid at not less than such rates as shall be determined by the Commissioner. Such approved minimum rate shall be retroactive to the time of the initial employment of such person in such trade or occupation. The CONTRACTOR shall notify the AWARDING AUTHORITY of its intention to employ persons in trades or occupations not classified in the wage determinations as soon as possible in order to allow sufficient time for the AWARDING AUTHORITY to obtain approved rates for such trades or occupations.

B. The schedule of wages referred to above are minimum rates only, and the AWARDING AUTHORITY will not consider any claims for additional compensation made by CONTRACTOR because of payment by the CONTRACTOR of any wage rate in excess of the applicable rate contained in the Contract.

C. The said schedule of wages shall continue to be the minimum rates to be paid during the life of this Agreement, except in the case of the duration of this Agreement exceeding one year, when the Contractor will be responsible for requesting and obtaining updated minimum wage rates from the Owner before the one-year anniversary of the project's start date, and a legible copy of said schedule shall be kept posted in a conspicuous place at the site of the Work.

D. CONTRACTOR and subcontractors shall submit a copy of weekly payroll records to the AWARDING AUTHORITY and the AWARDING AUTHORITY shall retain the records for a minimum of three years."

B. OTHER REGULATORY REQUIREMENTS:

1. Working Hours

No laborer, workman, mechanic, foreman, or inspector, working within the Commonwealth, in the employ of the CONTRACTOR, subcontractor, or other person doing or contracting to do the whole or a part of the work contemplated by this contract, shall be required or permitted to work more than eight hours in any one day or more than forty-eight hours in any one week, or more than six days in any one week, except in cases of emergency or required for this Project.

2. Commonwealth of Massachusetts Supplemental Equal Employment Opportunity, Non-Discrimination and Affirmative Action Program.

The Contractor shall abide by the Commonwealth of Massachusetts Supplemental Equal Employment Opportunity, Non-Discrimination and Affirmative Action Program, which is attached in its entirety on pages 00830-C.

3. MassDEP Community Sound Level Criteria

The Community Sound Level Criteria as established by the Commonwealth of Massachusetts' Department of Environmental Protection (MassDEP) must be conformed to prior to the AWARDING AUTHORITY's acceptance of the structure. The following sound level criteria must be met at the construction site:

A. The increase in the broadband noise level shall not be in excess of ten (10) dB(A) above ambient at the station boundary. The ambient level is defined as the A-weighted noise level that is exceeded ninety (90) percent of the time measured during the period in question.

B. The primary noise source(s) shall not produce a puretone condition. Puretone is any given octave band center frequency that exceeds the two adjacent center frequencies by three (3) or more decibels.

4. OSHA 10 Hour Certification Requirements

All employees of the Contractor who work at the jobsite must have received OSHA 10 Hour safety training, and have proof, at the jobsite, of being certified by OSHA as having received the training. The Contractor must provide written proof (copy of OSHA card each employee is required to carry is preferred) of this certification for every employee with submission of the first certified payroll report for each employee.

"General Decision Number: MA20230008 03/03/2023

Superseded General Decision Number: MA20220008

State: Massachusetts

Construction Types: Heavy (Heavy and Marine)

Counties: Barnstable, Bristol, Dukes, Essex, Middlesex, Nantucket, Norfolk, Plymouth and Suffolk Counties in Massachusetts.

HEAVY AND MARINE CONTRUCTION PROJECTS

Note: Contracts subject to the Davis-Bacon Act are generally required to pay at least the applicable minimum wage rate required under Executive Order 14026 or Executive Order 13658. Please note that these Executive Orders apply to covered contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but do not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(2)-(60).

If the contract is entered into on or after January 30, 2022, or the contract is renewed or extended (e.g., an option is exercised) on or after January 30, 2022:	. Executive Order 14026 generally applies to the contract. . The contractor must pay all covered workers at least $16.20 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in 2023.
If the contract was awarded on or between January 1, 2015 and January 29, 2022, and the contract is not renewed or extended on or after January 30, 2022:	. Executive Order 13658 generally applies to the contract. . The contractor must pay all covered workers at least $12.15 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on that contract in 2023.

The applicable Executive Order minimum wage rate will be adjusted annually. If this contract is covered by one of the Executive Orders and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must still submit a conformance request.

Additional information on contractor requirements and worker protections under the Executive Orders is available at http://www.dol.gov/whd/govcontracts.

B. PAID VACATION: Employees with 4 months to 1 year of service receive 1/2 day's pay per month; 1 week vacation for 1 - 5 years of service; 2 weeks vacation for 5 - 10 years of service; and 3 weeks vacation for more than 10 years of service

---

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

==========

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at https://www.dol.gov/agencies/whd/government-contracts.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

* an existing published wage determination

* a survey underlying a wage determination
* a Wage and Hour Division letter setting forth a position on a wage determination matter
* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

END OF GENERAL DECISIO"

THE COMMONWEALTH OF MASSACHUSETTS
EXECUTIVE OFFICE OF LABOR AND WORKFORCE DEVELOPMENT
DEPARTMENT OF LABOR STANDARDS

Prevailing Wage Rates

As determined by the Director under the provisions of the Massachusetts General Laws, Chapter 149, Sections 26 to 27H

CHARLES D. BAKER
Governor

KARYN E. POLITO
Lt. Governor

ROSALIN ACOSTA
Secretary

MICHAEL FLANAGAN
Director

Awarding Authority: Town of Orleans

Contract Number: 2022-01 **City/Town:** ORLEANS

Description of Work: 15,750 lf of 8", 10" and 12" PVC gravity sewer, approximately 7,500 lf of 6" and 8" PVC force main approximately 20,750 lf of 1.5", 2" and 3" low pressure sewer and 1 Submersible Pumping Station

Job Location: 19 School Road

Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- **The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor.** For multi-year CM AT RISK projects, the awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. The annual update requirement is not applicable to 27F "rental of equipment" contracts. **The updated wage schedule must be provided to all contractors, including general and sub-contractors, working on the construction project.**
- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the "Wage Request Number" on all pages of this schedule.
- An Awarding Authority must request an updated wage schedule if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
- The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or a sub-contractor.
- Apprentices working on the project are required to be registered with the Massachusetts Division of Apprentice Standards (DAS). Apprentices must keep their apprentice identification card on their persons during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **Any apprentice not registered with DAS regardless of whether they are registered with another federal, state, local, or private agency must be paid the journeyworker's rate.**
- Every contractor or subcontractor working on the construction project must submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee's name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. For a sample payroll reporting form go to http://www.mass.gov/dols/pw.
- Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
- Contractors must obtain the wage schedules from awarding authorities. Failure of a contractor or subcontractor to pay the prevailing wage rates listed on the wage schedule to all employees who perform construction work on the project is a violation of the law and subjects the contractor or subcontractor to civil and criminal penalties.
- Employees not receiving the prevailing wage rate set forth on the wage schedule may file a complaint with the Fair Labor Division of the office of the Attorney General at (617) 727-3465.

Additional Apprentice Information:

Minimum wage rates for apprentices employed on public works projects are listed above as a percentage of the pre-determined hourly wage rate established by the Commissioner under the provisions of the M.G.L. c. 149, ss. 26-27D. Apprentice ratios are established by the Division of Apprenticeship Training pursuant to M.G.L. c. 23, ss. 11E-11L.

All apprentices must be registered with the Division of Apprenticeship Training in accordance with M.G.L. c. 23, ss. 11E-11L.

All steps are six months (1000 hours.)
Ratios are expressed in allowable number of apprentices to journeymen or fraction thereof, unless otherwise specified.

If you are in need of legal advice or counsel, consult a lawyer.*

Certain excerpts from the Massachusetts General Laws are applicable to Construction contracts. Attention is directed to the following Sections of Chapter 30 as amended.

Chapter 30: Section 39F. Construction contracts; assignment and subrogation; subcontractor defined; enforcement of claim for direct payment; deposit, reduction of disputed amounts

Section 39F. (1) Every contract awarded pursuant to sections forty-four A to L, inclusive, of chapter one hundred and forty-nine shall contain the following subparagraphs (a) through (i) and every contract awarded pursuant to section thirty-nine M of chapter thirty shall contain the following subparagraphs (a) through (h) and in each case those subparagraphs shall be binding between the general contractor and each subcontractor.

(a) Forthwith after the general contractor receives payment on account of a periodic estimate, the general contractor shall pay to each subcontractor the amount paid for the labor performed and the materials furnished by that subcontractor, less any amount specified in any court proceedings barring such payment and also less any amount claimed due from the subcontractor by the general contractor.

(b) Not later than the sixty-fifth day after each subcontractor substantially completes his work in accordance with the plans and specifications, the entire balance due under the subcontract less amounts retained by the awarding authority as the estimated cost of completing the incomplete and unsatisfactory items of work, shall be due the subcontractor; and the awarding authority shall pay that amount to the general contractor. The general contractor shall forthwith pay to the subcontractor the full amount received from the awarding authority less any amount specified in any court proceedings barring such payment and also less any amount claimed due from the subcontractor by the general contractor.

(c) Each payment made by the awarding authority to the general contractor pursuant to subparagraphs (a) and (b) of this paragraph for the labor performed and the materials furnished by a subcontractor shall be made to the general contractor for the account of that subcontractor; and the awarding authority shall take reasonable steps to compel the general contractor to make each such payment to each such subcontractor. If the awarding authority has received a demand for direct payment from a subcontractor for any amount which has already been included in a payment to the general contractor or which is to be included in a payment to the general contractor for payment to the subcontractor as provided in subparagraphs (a) and (b), the awarding authority shall act upon the demand as provided in this section.

(d) If, within seventy days after the subcontractor has substantially completed the subcontract work, the subcontractor has not received from the general contractor the balance due under the subcontract including any amount due for extra labor and materials furnished to the general contractor, less any amount retained by the awarding authority as the estimated cost of completing the incomplete and unsatisfactory items of work, the subcontractor may demand direct payment of that balance

from the awarding authority. The demand shall be by a sworn statement delivered to or sent by certified mail to the awarding authority, and a copy shall be delivered to or sent by certified mail to the general contractor at the same time. The demand shall contain a detailed breakdown of the balance due under the subcontract and also a statement of the status of completion of the subcontract work. Any demand made after substantial completion of the subcontract work shall be valid even if delivered or mailed prior to the seventieth day after the subcontractor has substantially completed the subcontract work. Within ten days after the subcontractor has delivered or so mailed the demand to the awarding authority and delivered or so mailed a copy to the general contractor, the general contractor may reply to the demand. The reply shall be by a sworn statement delivered to or sent by certified mail to the awarding authority and a copy shall be delivered to or sent by certified mail to the subcontractor at the same time. The reply shall contain a detailed breakdown of the balance due under the subcontract including any amount due for extra labor and materials furnished to the general contractor and of the amount due for each claim made by the general contractor against the subcontractor.

(e) Within fifteen days after receipt of the demand by the awarding authority, but in no event prior to the seventieth day after substantial completion of the subcontract work, the awarding authority shall make direct payment to the subcontractor of the balance due under the subcontract including any amount due for extra labor and materials furnished to the general contractor, less any amount (i) retained by the awarding authority as the estimated cost of completing the incomplete or unsatisfactory items of work, (ii) specified in any court proceedings barring such payment, or (iii) disputed by the general contractor in the sworn reply; provided, that the awarding authority shall not deduct from a direct payment any amount as provided in part (iii) if the reply is not sworn to, or for which the sworn reply does not contain the detailed breakdown required by subparagraph (d). The awarding authority shall make further direct payments to the subcontractor forthwith after the removal of the basis for deductions from direct payments made as provided in parts (i) and (ii) of this subparagraph.

(f) The awarding authority shall forthwith deposit the amount deducted from a direct payment as provided in part (iii) of subparagraph (e) in an interest-bearing joint account in the names of the general contractor and the subcontractor in a bank in Massachusetts selected by the awarding authority or agreed upon by the general contractor and the subcontractor and shall notify the general contractor and the subcontractor of the date of the deposit and the bank receiving the deposit. The bank shall pay the amount in the account, including accrued interest, as provided in an agreement between the general contractor and the subcontractor or as determined by decree of a court of competent jurisdiction.

(g) All direct payments and all deductions from demands for direct payments deposited in an interest-bearing account or accounts in a bank pursuant to subparagraph (f) shall be made out of amounts payable to the general contractor at the time of receipt of a demand for direct payment from a subcontractor and out of amounts which later become payable to the general contractor and in the order of receipt of such demands from subcontractors. All direct payments shall discharge the obligation of the awarding authority to the general contractor to the extent of such payment.

(h) The awarding authority shall deduct from payments to a general contractor amounts which, together with the deposits in interest-bearing accounts pursuant to subparagraph (f), are sufficient to satisfy all unpaid balances of demands for direct payment received from subcontractors. All such amounts shall be earmarked for such direct payments, and the subcontractors shall have a right in such deductions prior to any claims against such amounts by creditors of the general contractor.

(i) If the subcontractor does not receive payment as provided in subparagraph (a) or if the general contractor does not submit a periodic estimate for the value of the labor or materials performed or furnished by the subcontractor and the subcontractor does not receive payment for same when due less the deductions provided for in subparagraph (a), the subcontractor may demand direct payment by following the procedure in subparagraph (d) and the general contractor may file a sworn reply as provided in that same subparagraph. A demand made after the first day of the month following that for which the subcontractor performed or furnished the labor and materials for which the subcontractor seeks payment shall be valid even if delivered or mailed prior to the time payment was due on a periodic estimate from the general contractor. Thereafter the awarding authority shall proceed as provided in subparagraph (e), (f), (g) and (h).

(2) Any assignment by a subcontractor of the rights under this section to a surety company furnishing a bond under the provisions of section twenty-nine of chapter one hundred forty-nine shall be invalid. The assignment and subrogation rights of the surety to amounts included in a demand for direct payment which are in the possession of the awarding authority or which are on deposit pursuant to subparagraph (f) of paragraph (1) shall be subordinate to the rights of all subcontractors who are entitled to be paid under this section and who have not been paid in full.

(3) "Subcontractor" as used in this section (i) for contracts awarded as provided in sections forty-four A to forty-four H, inclusive, of chapter one hundred forty-nine shall mean a person who files a sub-bid and receives a subcontract as a result of that filed sub- bid or who is approved by the awarding authority in writing as a person performing labor or both performing labor and furnishing materials pursuant to a contract with the general contractor, (ii) for contracts awarded as provided in paragraph (a) of section thirty-nine M of chapter thirty shall mean a person approved by the awarding authority in writing as a person performing labor or both performing labor and furnishing materials pursuant to a contract with the general contractor, and (iii) for contracts with the commonwealth not awarded as provided in forty-four A to forty-four H, inclusive, of chapter one hundred forty-nine shall also mean a person contracting with the general contractor to supply materials used or employed in a public works project for a price in excess of five thousand dollars.

(4) A general contractor or a subcontractor shall enforce a claim to any portion of the amount of a demand for direct payment deposited as provided in subparagraph (f) of paragraph 1 by a petition in equity in the superior court against the other and the bank shall not be a necessary party. A subcontractor shall enforce a claim for direct payment or a right to require a deposit as provided in subparagraph (f) of paragraph 1 by a petition in equity in the superior court against the awarding authority and the general contractor shall not be a necessary party. Upon motion of any party the court shall advance for speedy trial any petition filed as provided in this paragraph. Sections fifty-nine and fifty- nine B of chapter two hundred thirty-one shall apply to such petitions. The court shall enter an interlocutory decree upon which execution shall issue for any part of a claim found due pursuant to sections fifty-nine and fifty-nine B and, upon motion of any party, shall advance for speedy trial the petition to collect the remainder of the claim. Any party aggrieved by such interlocutory decree shall have the right to appeal therefrom as from a final decree. The court shall not consolidate for trial the petition of any subcontractor with the petition of one or more subcontractors or the same general contract unless the court finds that a substantial portion of the evidence of the same events during the course of construction (other than the fact that the claims sought to be consolidated arise under the same general contract) is applicable to the petitions sought to be consolidated and that such consolidation will prevent unnecessary duplication of evidence. A decree in any such proceeding shall not include interest on the disputed amount deposited in excess of the interest earned for the period of any such deposit. No person except a subcontractor filing a demand for direct payment for which no funds due the general contractor are available for direct payment shall have a right to file a petition in court of equity against the awarding authority claiming a demand for direct payment is premature and such subcontractor must file the petition before the awarding authority has made a direct payment to the subcontractor and has made a deposit of the disputed portion as provided in part (iii) of subparagraph (e) and in subparagraph (f) of paragraph (1).

(5) In any petition to collect any claim for which a subcontractor has filed a demand for direct payment the court shall, upon motion of the general contractor, reduce by the amount of any deposit of a disputed amount by the awarding authority as provided in part (iii) of subparagraph (e) and in subparagraph (f) of paragraph (1) any amount held under a trustee writ or pursuant to a restraining order or injunction.

Chapter 30: Section 39K. Public building construction contracts; payments

Section 39K. Every contract for the construction, reconstruction, alteration, remodeling, repair or demolition of any public building by the commonwealth, or by any county, city, town, district, board, commission or other public body, when the amount is more than five thousand dollars in the case of the commonwealth and more than two thousand dollars in the case of any county, city, town, district, board, commission or other public body, shall contain the following paragraph:— Within fifteen days (30 days in the case of the commonwealth, including local housing authorities) after receipt from the contractor, at the place designated by the awarding authority if such a place is so designated, of a periodic estimate requesting payment of the amount due for the preceding month, the awarding authority will make a periodic payment to the contractor for the workperformed during the preceding month and for the materials not incorporated in the work but delivered and suitably stored at the site (or at some location agreed upon in writing) to which the contractor has title or to which a subcontractor has title and has authorized the contractor to transfer title to the awarding authority, upon certification by the contractor that he is the lawful owner and that the materials are free from all encumbrances, but less (1) a retention based on its estimate of the fair value of its claims against the contractor and less (2) a retention for direct payments to subcontractors based on demands for same in accordance with the provisions of section thirty-nine F, and less (3) a retention not exceeding five per cent of the approved amount of the periodic payment. After the receipt of a periodic estimate requesting final payment and within sixty-five days after (a) the contractor fully completes the work or substantially completes the work so that the value of the work remaining to be done is, in the estimate of the awarding authority, less than one per cent of the original contract price, or (b) the contractor substantially completes the work and the awarding authority takes possession

for occupancy, whichever occurs first, the awarding authority shall pay the contractor the entire balance due on the contract less (1) a retention based on its estimate of the fair value of its claims against the contractor and of the cost of completing the

incomplete and unsatisfactory items of work and less (2) a retention for direct payments to subcontractors based on demands for same in accordance with the provisions of section thirty-nine F, or based on the record of payments by the contractor to the subcontractors under this contract if such record of payment indicates that the contractor has not paid subcontractors as provided in section thirty-nine F. If the awarding authority fails to make payment as herein provided, there shall be added to each such payment daily interest at the rate of three percentage points above the rediscount rate than charged by the Federal Reserve Bank of Boston commencing on the first day after said payment is due and continuing until the payment is delivered or mailed to the contractor; provided, that no interest shall be due, in any event, on the amount due on a periodic estimate for final payment until fifteen days (twenty-four days in the case of the commonwealth) after receipt of such a periodic estimate from the contractor, at the place designated by the awarding authority if such a place is so designated. The contractor agrees to pay to each subcontractor a portion of any such interest paid in accordance with the amount due each subcontractor.

The awarding authority may make changes in any periodic estimate submitted by the contractor and the payment due on said periodic estimate shall be computed in accordance with the changes so made, but such changes or any requirement for a corrected periodic estimate shall not affect the due date for the periodic payment or the date for the commencement of interest charges on the amount of the periodic payment computed in accordance with the changes made, as provided herein; provided, that the awarding authority may, within seven days after receipt, return to the contractor for correction, any periodic estimate which is not in the required form or which contains computations not arithmetically correct and, in that event, the date of receipt of such periodic estimate shall be the date of receipt of the corrected periodic estimate in proper form and with arithmetically correct computations. The date of receipt of a periodic estimate received on a Saturday shall be the first working day thereafter. The provisions of section thirty-nine G shall not apply to any contract for the construction, reconstruction, alteration, remodeling, repair or demolition of any public building to which this section applies.

All periodic estimates shall be submitted to the awarding authority, or to its designee as set forth in writing to the contractor, and the date of receipt by the awarding authority or its designee shall be marked on the estimate. All periodic estimates shall contain a separate item for each filed subtrade and each sub-subtrade listed in sub-bid form as required by specifications and a column listing the amount paid to each subcontractor and sub-subcontractor as of the date the periodic estimate is filed. The person making payment for the awarding authority shall add the daily interest provided for herein to each payment for each day beyond the due date based on the date of receipt marked on the estimate.

A certificate of the architect to the effect that the contractor has fully or substantially completed the work shall, subject to the provisions of section thirty-nine J, be conclusive for the purposes of this section.

Notwithstanding the provisions of this section, at any time after the value of the work remaining to be done is, in the estimation of the awarding authority, less than 1 per cent of the adjusted contract price, or the awarding authority has determined that the contractor has substantially completed the work and the awarding authority has taken possession for occupancy, the awarding authority may send to the general contractor by certified mail, return receipt requested, a complete and final list of all incomplete and unsatisfactory work items, including, for each item on the list, a good faith estimate of the fair and reasonable cost of completing such item. The general contractor shall then complete all such work items within 30 days of receipt of such list or before the contract completion date, whichever is later. If the general contractor fails to complete all incomplete and unsatisfactory work items within 45 days after receipt of such items furnished by the awarding authority or before the contract completion date, whichever is later, subsequent to an additional 14 days' written notice to the general contractor by certified mail, return receipt requested, the awarding authority may terminate the contract and complete the incomplete and unsatisfactory work items and charge the cost of same to the general contractor and such termination shall be without prejudice to any other rights or remedies the awarding authority may have under the contract. The awarding authority shall note any such termination in the evaluation form to be filed by the awarding authority pursuant to the provisions of section 44D of chapter 149.

Chapter 30: Section 39N. Construction contracts; equitable adjustment in contract price for differing subsurface or latent physical conditions

Section 39N. Every contract subject to section forty-four A of chapter one hundred and forty-nine or subject to section thirty-nine M of chapter thirty shall contain the following paragraph in its entirety and an awarding authority may adopt reasonable rules or regulations in conformity with that paragraph concerning the filing, investigation and settlement of such claims:

If, during the progress of the work, the contractor or the awarding authority discovers that the actual subsurface or latent physical conditions encountered at the site differ substantially or materially from those shown on the plans or indicated in the contract documents either the contractor or the contracting authority may request an equitable adjustment in the contract price of the contract applying to work affected by the differing site conditions. A request for such an adjustment shall be in writing and shall be delivered by the party making such claim to the other party as soon as possible after such conditions are discovered. Upon receipt of such a claim from a contractor, or upon its own initiative, the contracting authority shall make an investigation of such physical conditions, and, if they differ substantially or materially from those shown on the plans or indicated in the contract documents or from those ordinarily encountered and generally recognized as inherent in work of the character provided for in the plans and contract documents and are of such a nature as to cause an increase or decrease in the cost of performance of the work or a change in the construction methods required for the performance of the work which results in an increase or decrease in the cost of the work, the contracting authority shall make an equitable adjustment in the contract price and the contract shall be modified in writing accordingly.

Chapter 30: Section 39O. Contracts for construction and materials; suspension, delay or interruption due to order of awarding authority; adjustment in contract price; written claim

Section 39O. Every contract subject to the provisions of section thirty-nine M of this chapter or subject to section forty-four A of chapter one hundred forty-nine shall contain the following provisions (a) and (b) in their entirety and, in the event a suspension, delay, interruption or failure to act of the awarding authority increases the cost of performance

to any subcontractor, that subcontractor shall have the same rights against the general contractor for payment for an increase in the cost of his performance as provisions (a) and (b) give the general contractor against the awarding authority, but nothing in provisions (a) and (b) shall in any way change, modify or alter any other rights which the general contractor or the subcontractor may have against each other.

(a) The awarding authority may order the general contractor in writing to suspend, delay, or interrupt all or any part of the work for such period of time as it may determine to be appropriate for the convenience of the awarding authority; provided however, that if there is a suspension, delay or interruption for fifteen days or more or due to a failure of the awarding authority to act within the time specified in this contract, the awarding authority shall make an adjustment in the contract price for any increase in the cost of performance of this contract but shall not include any profit to the general contractor on such increase; and provided further, that the awarding authority shall not make any adjustment in the contract price under this provision for any suspension, delay, interruption or failure to act to the extent that such is due to any cause for which this contract provides for an equitable adjustment of the contract price under any other contract provisions.

(b) The general contractor must submit the amount of a claim under provision (a) to the awarding authority in writing as soon as practicable after the end of the suspension, delay, interruption or failure to act and, in any event, not later than the date of final payment under this contract and, except for costs due to a suspension order, the awarding authority shall not approve any costs in the claim incurred more than twenty days before the general contractor notified the awarding authority in writing of the act or failure to act

THE COMMONWEALTH OF MASSACHUSETTS SUPPLEMENTAL EQUAL EMPLOYMENT OPPORTUNITY ANTI-DISCRIMINATION AND AFFIRMATIVE ACTION PROGRAM

APPENDIX A1

Certification Statements wording required in the BID PROPOSAL of contracts bid under the provisions of c.30, s39M (Non-Building/Public Works Contract).

Pursuant to M.G.L. Ch. 62C, s49A, I certify under the penalties of perjury that I, to my best knowledge and belief, have filed all state tax returns and paid all State Taxes Required under law.

C.30 s39 (c) The undersigned hereby certifies that he is able to furnish labor that can work in harmony with all other elements of labor employed or to be employed in the work.

The undersigned bidder hereby certifies he/she will comply with the specific affirmative action steps contained in the Equal Employment Opportunity/Affirmative Action (EEO/AA) provisions of this Contract, including compliance with the Disadvantaged Business Enterprise provisions as required under these contract provisions. The contractor receiving the award of the contract shall incorporate the EEO/AA provisions of this contract into all subcontracts and purchase orders so that such provisions will be binding upon each subcontractor or vendor.

C.30 s39 (a) The undersigned certifies under penalties of perjury that this bid is in all respects bonafide, fair and made without collusion or fraud with any other person. As use in this paragraph the "person" shall mean any natural person, joint venture, partnership, corporation or other business or legal entity.

Certification undersigned is not presently debarred from doing public construction work in the Commonwealth of Massachusetts under the provisions of Section Twenty-Nine F of Chapter Twenty-Nine, or any other applicable debarment provisions of any other Chapter of the General Laws or any rule or regulations promulgated thereunder; and is not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency.

SECTION 00830

ATTACHMENT D

CHANGE ORDERS

Policy:

This section supplements Article 12, Change of Contract Price, in the General Conditions and Supplementary Conditions.

All executed change orders submitted to the Engineer for review and processing must be prepared in accordance with the attached change order format (Appendix A) with the appropriate number of copies, calculation sheet(s) (Appendix B) and all other supporting documentation necessary for evaluation. Failure to comply with these instructions will result in delays in processing the change order.

In order to avoid possible delays with approval of change orders, at the beginning of the project and as circumstances warrant, the Contractor shall submit a list of construction equipment, identifying major pieces of equipment to be utilized on the project. The list shall include the Contractor's designation, if any, the manufacturer, model, year of manufacture, serial number, size and horsepower of equipment. The Contractor shall also provide for approval a proposed bluebook equipment rental rate development that separately lists for each piece of equipment the monthly rental rate, area adjustment factor, depreciation factor, estimated operating cost per hour and total hourly rate. In the event the Contractor fails or is unable to provide appropriate rate information the Engineer may develop equipment rental rates for use on change orders.

Payment of Change Orders:

Payment of all change orders shall be in accordance with the relevant provisions of Massachusetts General Laws, Chapter 30, Section 39G for non-building construction and Section 39K for building construction as amended from time to time.

Payment of change orders shall be made in accordance with one of the following three methods:

A. Existing unit prices as set forth in the contract; or

B. Agreed upon lump sum or unit prices; or

C. Time and materials

A. Payment for work for which there is a unit price in the contract:

Where the contract contains a unit price for work and the Engineer orders a change for work of the same kind as other work contained in the contract and is performed under similar physical conditions, the Contractor shall accept full and final payment at the contract unit price(s) for the acceptable quantities. Under certain circumstances, the unit prices may be subject to revaluation and adjustment. See Article 11 in the Supplementary Conditions.

B. Payment for work or materials for which no price is contained in the contract:

If the Engineer directs, the Contractor shall submit promptly in writing to the Engineer an offer to do the required work on a lump sum or unit price basis, as specified by the Engineer. The stated price, either lump sum or unit price, shall be divided so as to show that it is the sum of:

1. The estimated cost of Labor, plus
2. Direct Labor Cost, plus
3. Material and Freight Costs, plus
4. Equipment Costs, plus
5. An amount not to exceed 20% of the sum of items 1 through 4 for overhead and profit, plus (if applicable),
6. In the case of work done by a subcontractor an amount not to exceed 7 ½%, for the general contractor of the sum of the cost (not including subcontractor's overhead and profit) of items 1 through 4 for his overhead and profit (less, if applicable),

7. Credits for work deleted from the contract, including actual costs of the deleted work plus the percentage of overhead, profit, bonds and insurance attributable to such credit amount.

C. Payment for work on a time and materials basis:

Unless an agreed lump sum and/or unit price is obtained as noted above and is so stated in the change price, the Contractor shall accept as full payment for which no agreement is contained in contract, an amount equal to:

1. The estimated cost of Labor, plus
2. The Direct Labor Costs, plus
3. Equipment Costs, plus
4. Material and Freight Costs, plus
5. An amount not to exceed 20% of the sum of items 1 through 4 for overhead and profit, plus, if applicable,
6. In the case of work done by a subcontractor an amount not to exceed 7 ½%, for the general contractor of the sum of the cost (not including subcontractor's overhead and profit) of items 1 through 4 for his overhead and profit (less, if applicable),
7. Credit for work deleted from the Contract, including actual costs of the deleted work plus the percentage of overhead, profit, bonds and insurance attributable to such credit amount.

Explanation of items 1 through 7 as outlined in "B" and "C" above:

1. Labor - Only those workers employed on the project who are doing the extra work, including the foreman in charge, are allowable. General foremen, superintendents, or other supervisory personnel are considered to be included in the overhead markup as provided in items 5 and/or 6. Hourly labor rates in excess of those as listed in the contract wage rates require documentation. As a minimum, an explanation and the appropriate copy of the certified payroll are required.
2. Direct Labor Costs - These costs are limited to those which are required in the contract document. Coverage in excess of the contract provisions, secured by the contractor/subcontractor(s) at his option, are ineligible. The following list of typical direct labor charges is provided for your assistance and is in no way intended to be complete or all encompassing:

   Workman's Compensation

   Federal/State: Social Security Tax and Unemployment Tax;

   Health, Welfare and Pension Benefits; (this cost is included in the wage rates appearing in the Attachment A Massachusetts Wage Rates.

Liability insurance:	Bodily injury; excess umbrella; property damage; public liability
Blasters insurance:	If applied to any required direct labor costs
Builders risk insurance:	If applied to any required direct labor costs
Experience modification insurance:	If applied to any required direct labor costs
Surcharges:	If applied to any required direct labor costs

   Following award and prior to execution of a construction contract, the Contractor and filed subbidders (where applicable) shall submit for review by the Owner, documentation to establish the markup percentage(s).

   The documented direct labor markup for this contract may be adjusted on an annual basis as measured from the date the contract is executed. The contract agreement will provide for the establishment of the Direct Labor Cost percentage.
3. Material and Freight - Only those materials required as a result of the change order and reasonable freight charges for delivery of same are allowable.
4. Equipment - Only the equipment required as a result of the change order is allowable.

Equipment rental rates shall be governed by the current Equipment Watch, division of Intertec Publishing [Formerly Nielson/Dataquest] Rental Rate Bluebook for Construction Equipment (the "Bluebook"). In determining the rental rate the following shall apply:

a. For equipment already on the project - the monthly prorated rental rate by the hourly use shall be applicable;

b. For equipment not on the project the daily rate, the weekly rate, or monthly rate will prevail, whichever will prove to be most cost effective. Small tools and manual equipment are examples of costs not allowable under this item. These costs are considered to be included in the overhead markup as provided in items 5 and/or 6.

(1 Month (Normal Use) = 176 hours)

5. Overhead and Profit - All other costs not previously mentioned are considered to be included in this item, be it for the general contractor or subcontractor(s).

6. Overhead and Profit - All other costs not previously mentioned are considered to be included in this item, be it for the general contractor or subcontractor(s).

7. Credits - Work deleted, material and equipment removed from the contract, stored and/or returned shall be credited to the cost of the change order, less documented costs.

This change order will be prepared in such manner as to clearly separate Eligible and Ineligible Costs (as applicable to state-funded projects).

The Contractor shall furnish itemized statements of the cost of the work ordered and shall give the Engineer access to all accounts, bills and vouchers relating thereto; and unless the Contractor shall furnish such itemized statements, and access to all accounts, bills and vouchers, he shall not be entitled to payment for any items of extra work for which such information is sought by the Engineer.

Engineer	10 hours @	$8.80/hour	$85.00
Operator	10 hours @	$9.50/hour	$95.00
Laborers	24 hours @	$7.00/hour	$168.00
			$448.00

2.Direct Labor Cost (use the agreed upon Direct Labor Cost)

*(30)% of $448.

*(used for example purposes only) $134.00

3.Materials & Freight

150 1.f. of 12" pipe @ $2.00/1.f.	$300.00
15 v.f. precast SMH	$1,700.00
Freight (slip 652-1 enclosed)	$25.00
	$2,025.00

EXAMPLE

4.Equipment

1 Backhoe - 10 hours @ $80.00/hour	$800.00
1 Truck-crane - 10 hours @ $100.00/hour	$1,000.00
	$1,800.00
TOTAL (items 1 through 4):	**$4,407.00**

5.(20%) markup for Overhead, Profit

(20%) of $4,407 $881.00

6.(7½ %) markup on subcontractor's cost for general contractor(if subcontractor is involved)

(7½ %) of $4,407 $331.00

7.Credits (deductibles)-$323.00

TOTAL COST: $5,296.00

Reminder: Provide support documentation as necessary i.e. vouchers, correspondence, calculation, photographs, reports**.**

DOCUMENT 00852

SPECIAL CONDITIONS - GENERAL

1.01 STATUTORY REQUIREMENTS IN GENERAL

A. Keep fully informed of all existing and future state and federal laws and municipal ordinances and regulations in any manner affecting those engaged or employed in the Work, or the materials used or employed in the Work, or in any way affecting the conduct of the Work, and of all such orders and decrees of bodies or tribunals having any jurisdiction or authority over the same and of all provisions required by law to be made a part of this Contract, all of which provisions are hereby incorporated by reference and made a part thereof. If any discrepancy or inconsistency is discovered in the Contract Documents for this Work in relation to any such law, ordinance, regulation, order or decree, report the same to the Engineer in writing. At all times observe and comply with, and cause all agents and employees to observe and comply with all such existing and future laws, ordinances, regulations, orders and decrees; and protect and indemnify the Owner and Engineer and all of its and their officers, agents, and servants against any claim or liability arising from or based on the violation of any such law, ordinance, regulation, order or decree, whether by itself or its employees or subcontractors.

B. All materials furnished and Work done are to comply with all state and federal laws and regulations.

1.02 POLICE OFFICERS

A. Any police officers, reserve, special or otherwise, employed by the Contractor, shall be paid the prevailing wage rates paid to regular police officers of the municipality in which the Work is to be performed.

1.03 RELATION OF SEWER MAINS TO WATER LINES

A. Horizontal Separation

1. Whenever possible, sewers should be laid at least 10 feet, horizontally, from any existing or proposed water mains.

2. Should local conditions prevent a lateral separation of 10 feet, a sewer may be laid closer than 10 feet to a water main if:

a. It is laid in a separate trench.

b. It is laid in the same trench with the water mains located at one side on a bench of undisturbed earth.

c. In either case the elevation of the crown of the sewer is at least 18 inches below the invert of the water main.

B. Vertical Separation

1. Whenever sewers must cross under water mains, the sewer shall be laid at such elevation that the top of the sewer is at least 18 inches below the bottom of the water main. When the elevation of the sewer cannot be buried to meet the above requirement, the water main shall be relocated to provide this separation or reconstruction with slip-on or mechanical-joint cast-iron pipe, or prestressed concrete cylinder pipe for a distance of 10 feet on each side of the sewer. One full length of water main shall be centered over the sewer so that both joints will be as far from the sewer as possible.

2. When a sewer crosses above a water main, the following measures will be taken:

a. Both pipes will be encased in concrete for a distance of 10 feet on either side of the crossing, or

b. The sewer will be encased in concrete and the water main will be constructed of mechanical joint ductile iron pipe for a distance of 10 feet on either side of the crossing.

C. Special Conditions

1. When it is impossible to obtain proper horizontal and vertical separation as stipulated above, the water main shall be constructed of slip-on or mechanical-joint cast-iron pipe or prestressed concrete cylinder pipe and the sewer constructed of mechanical-joint cast-iron pipe and both services shall be pressure tested to assure water tightness.

1.04 RESOLUTION OF CONFLICT WITHIN CONTRACT DOCUMENTS

A. In the event of conflicts or discrepancies among the Contract Documents, interpretations will be based on the following priorities:

1. Federal, State, and Local Law
2. Change Orders
3. The Agreement
4. Addenda, with those of later date having precedence over those of earlier date.
5. Special Conditions
6. Supplementary Conditions
7. General Conditions
8. Division 1 of the Specifications
9. Drawings
   9.1. Project-specific drawings
   9.2. Schedules
   9.3. General details and figures
10. Technical Specifications

Article 1. Payment to Subcontractor (MGL Chapter 30, Section 39F)

Section 39F: Construction contracts; assignment and subrogation; subcontractor defined; enforcement of claim for direct payment; deposit, reduction of disputed amounts

(1) Every contract awarded pursuant to sections forty-four A to L, inclusive, of chapter one hundred and forty-nine shall contain the following subparagraphs (a) through (i) and every contract awarded pursuant to section thirty-nine M of chapter thirty shall contain the following subparagraphs (a) through (h) and in each case those subparagraphs shall be binding between the general contractor and each subcontractor.

(a) Forthwith after the general contractor receives payment on account of a periodic estimate, the general contractor shall pay to each subcontractor the amount paid for the labor performed and the materials furnished by that subcontractor, less any amount specified in any court proceedings barring such payment and also less any amount claimed due from the subcontractor by the general contractor.

(b) Not later than the sixty-fifth day after each subcontractor substantially completes his work in accordance with the plans and specifications, the entire balance due under the subcontract less amounts retained by the awarding authority as the estimated cost of completing the incomplete and unsatisfactory items of work, shall be due the subcontractor; and the awarding authority shall pay that amount to the general contractor. The general contractor shall forthwith pay to the subcontractor the full amount received from the awarding authority less any amount specified in any court proceedings barring such payment and also less any amount claimed due from the subcontractor by the general contractor.

(c) Each payment made by the awarding authority to the general contractor pursuant to subparagraphs (a) and (b) of this paragraph for the labor performed and the materials furnished by a subcontractor shall be made to the general contractor for the account of that subcontractor; and the awarding authority shall take reasonable steps to compel the general contractor to make each such payment to each such subcontractor. If the awarding authority has received a demand for direct payment from a subcontractor for any amount which has already been included in a payment to the general contractor or which is to be included in a payment to the general contractor for payment to the subcontractor as provided in subparagraphs (a) and (b), the awarding authority shall act upon the demand as provided in this section.

(d) If, within seventy days after the subcontractor has substantially completed the subcontract work, the subcontractor has not received from the general contractor the balance due under the subcontract including any amount due for extra labor and materials furnished to the general contractor, less any amount retained by the awarding authority as the estimated cost of completing the incomplete and unsatisfactory items of work, the subcontractor may demand direct payment of that balance from the awarding authority. The demand shall be by a sworn statement delivered to or sent by certified mail to the awarding authority, and a copy shall be delivered to or sent by certified mail to the general contractor at the same time. The demand shall contain a detailed breakdown of the balance due under the subcontract and also a statement of the status of completion of the subcontract work. Any demand made after substantial completion of the subcontract work shall be valid even if delivered or mailed prior to the seventieth day after the subcontractor has substantially completed the subcontract work. Within ten days after the subcontractor has delivered or so mailed the demand to the awarding authority and delivered or so mailed a copy to the general contractor, the general contractor may reply to the demand. The reply shall be by a sworn statement delivered to or sent by certified mail to the awarding authority and a copy shall be delivered to or sent by certified mail to the subcontractor at the same time. The reply shall contain a detailed breakdown of the balance due under the subcontract including any amount due for extra labor and materials furnished to the general contractor and of the amount due for each claim made by the general contractor against the subcontractor.

(e) Within fifteen days after receipt of the demand by the awarding authority, but in no event prior to the seventieth day after substantial completion of the subcontract work, the awarding authority shall make direct payment to the subcontractor of the balance due under the subcontract including any amount due for extra labor and materials furnished to the general contractor, less any amount (i) retained by the awarding authority as the estimated cost of completing the incomplete or unsatisfactory items of work, (ii) specified in any court proceedings barring such payment, or (iii) disputed by the general contractor in the sworn reply; provided, that the awarding authority shall not deduct from a direct payment any amount as provided in part (iii) if the reply is not sworn to, or for which the sworn reply does not contain the detailed breakdown required by subparagraph (d). The awarding authority shall make further direct payments to the subcontractor forthwith after the removal of the basis for deductions from direct payments made as provided in parts (i) and (ii) of this subparagraph.

(f) The awarding authority shall forthwith deposit the amount deducted from a direct payment as provided in part (iii) of subparagraph (e) in an interest-bearing joint account in the names of the general contractor and the subcontractor in a bank in Massachusetts selected by the awarding authority or agreed upon by the general contractor and the subcontractor and shall notify the general contractor and the subcontractor of the date of the deposit and the bank receiving the deposit. The bank shall pay the amount in the account, including accrued interest, as provided in an agreement between the general contractor and the subcontractor or as determined by decree of a court of competent jurisdiction.

(g) All direct payments and all deductions from demands for direct payments deposited in an interest-bearing account or accounts in a bank pursuant to subparagraph (f) shall be made out of amounts payable to the general contractor at the time of receipt of a demand for direct payment from a subcontractor and out of amounts which later become payable to the general contractor and in the order of receipt of such demands from subcontractors. All direct payments shall discharge the obligation of the awarding authority to the general contractor to the extent of such payment.

(h) The awarding authority shall deduct from payments to a general contractor amounts which, together with the deposits in interest-bearing accounts pursuant to subparagraph (f), are sufficient to satisfy all unpaid balances of demands for direct payment received from subcontractors. All such amounts shall be earmarked for such direct payments, and the subcontractors shall have a right in such deductions prior to any claims against such amounts by creditors of the general contractor.

(i) If the subcontractor does not receive payment as provided in subparagraph (a) or if the general contractor does not submit a periodic estimate for the value of the labor or materials performed or furnished by the subcontractor and the subcontractor does not receive payment for same when due less the deductions provided for in subparagraph (a), the subcontractor may demand direct payment by following the procedure in subparagraph (d) and the general contractor may file a sworn reply as provided in that same subparagraph. A demand made after the first day of the month following that for which the subcontractor performed or furnished the labor and materials for which the subcontractor seeks payment shall be valid even if delivered or mailed prior to the time payment was due on a periodic estimate from the general contractor. Thereafter the awarding authority shall proceed as provided in subparagraph (e), (f), (g) and (h).

(2) Any assignment by a subcontractor of the rights under this section to a surety company furnishing a bond under the provisions of section twenty-nine of chapter one hundred forty-nine shall be invalid. The assignment and subrogation rights of the surety to amounts included in a demand for direct payment which are in the possession of the awarding authority or which are on deposit pursuant to subparagraph (f) of paragraph (1) shall be subordinate to the rights of all subcontractors who are entitled to be paid under this section and who have not been paid in full.

(3) "Subcontractor" as used in this section (i) for contracts awarded as provided in sections forty-four A to forty-four H, inclusive, of chapter one hundred forty-nine shall mean a person who files a sub-bid and receives a subcontract as a result of that filed sub-bid or who is approved by the awarding authority in writing as a person performing labor or both performing labor and furnishing materials pursuant to a contract with the general contractor, (ii) for contracts awarded as provided in paragraph (a) of section thirty-nine M of chapter thirty shall mean a person approved by the awarding authority in writing as a person performing labor or both performing labor and furnishing materials pursuant to a contract with the general contractor, and (iii) for contracts with the commonwealth not awarded as provided in forty-four A to forty-four H, inclusive, of chapter one hundred forty-nine shall also mean a person contracting with the general contractor to supply materials used or employed in a public works project for a price in excess of five thousand dollars.

(4) A general contractor or a subcontractor shall enforce a claim to any portion of the amount of a demand for direct payment deposited as provided in subparagraph (f) of paragraph 1 by a petition in equity in the superior court against the other and the bank shall not be a necessary party. A subcontractor shall enforce a claim for direct payment or a right to require a deposit as provided in subparagraph (f) of paragraph 1 by a petition in equity in the superior court against the awarding authority and the general contractor shall not be a necessary party. Upon motion of any party the court shall advance for speedy trial any petition filed as provided in this paragraph. Sections fifty-nine and fifty-nine B of chapter two hundred thirty-one shall apply to such petitions. The court shall enter an interlocutory decree upon which execution shall issue for any part of a claim found due pursuant to sections fifty-nine and fifty-nine B and, upon motion of any party, shall advance for speedy trial the petition to collect the remainder of the claim. Any party aggrieved by such interlocutory decree shall have the right to appeal therefrom as from a final decree. The court shall not consolidate for trial the petition of any subcontractor with the petition of one or more subcontractors or the same general contract unless the court finds that a substantial portion of the evidence of the same events during the course of construction (other than the fact that the claims sought to be consolidated arise under the same general contract) is applicable to the petitions sought to be consolidated and that such consolidation will prevent unnecessary duplication of evidence. A decree in any such proceeding shall not include interest on the disputed amount deposited in excess of the interest earned for the period of any such deposit. No person except a subcontractor filing a demand for direct payment for which no funds due the general contractor are available for direct payment shall have a right to file a petition in court of equity against the awarding authority claiming a demand for direct payment is premature and such subcontractor must file the petition before the awarding authority has made a direct payment to the subcontractor and has made a deposit of the disputed portion as provided in part (iii) of subparagraph (e) and in subparagraph (f) of paragraph (1).

(5) In any petition to collect any claim for which a subcontractor has filed a demand for direct payment the court shall, upon motion of the general contractor, reduce by the amount of any deposit of a disputed amount by the awarding authority as provided in part (iii) of subparagraph (e) and in subparagraph (f) of paragraph (1) any amount held under a trustee writ or pursuant to a restraining order or injunction.

Article 2. Deviations from Plans and Specifications (MGL Chapter 30, Section 39I)

Section 39I: Deviations from plans and specifications

Every contractor having a contract for the construction, alteration, maintenance, repair or demolition of, or addition to, any public building or public works for the commonwealth, or of any political subdivision thereof, shall perform all the work required by such contract in conformity with the plans and specifications contained therein. No willful and substantial deviation from said plans and specifications shall be made unless authorized in writing by the awarding authority or by the engineer or architect in charge of the work who is duly authorized by the awarding authority to approve such deviations. In order to avoid delays in the prosecution of the work required by such contract such deviation from the plans or specifications may be authorized by a written order of the awarding authority or such engineer or architect so authorized to approve such deviation. Within thirty days thereafter, such written order shall be confirmed by a certificate of the awarding authority stating: (1) If such deviation involves any substitution or elimination of materials, fixtures or equipment, the reasons why such materials, fixtures or equipment were included in the first instance and the reasons for substitution or elimination, and, if the deviation is of any other nature, the reasons for such deviation, giving justification therefor; (2) that the specified deviation does not materially injure the project as a whole; (3) that either the work substituted for the work specified is of the same cost and quality, or that an equitable adjustment has been agreed upon between the contracting agency and the contractor and the amount in dollars of said adjustment; and (4) that the deviation is in the best interest of the contracting authority.

Such certificate shall be signed under the penalties of perjury and shall be a permanent part of the file record of the work contracted for.

Whoever violates any provision of this section willfully and with intent to defraud shall be punished by a fine of not more than five thousand dollars or by imprisonment for not more than six months, or both.

Article 3. No Arbitrary Decisions are Final (MGL Chapter 30, Section 39J)

Section 39J: Public construction contracts; effect of decisions of contracting body or administrative board

Notwithstanding any contrary provision of any contract for the construction, reconstruction, alteration, remodeling, repair or demolition of any public building or public works by the commonwealth, or by any county, city, town, district, board, commission or other public body, when the amount of the contract is more than five thousand dollars in the case of the commonwealth and more than two thousand dollars in the case of any county, city, town, district, board, commission or other public body, a decision, by the contracting body or by any administrative board, official or agency, or by any architect or engineer, on a dispute, whether of fact or of law, arising under said contract shall not be final or conclusive if such decision is made in bad faith, fraudulently, capriciously, or arbitrarily is unsupported by substantial evidence, or is based upon error of law.

Article 4. Construction Work by Foreign Corporations (MGL Chapter 30, Section 39L)

Section 39L: Public construction work by foreign corporations; restrictions and reports

Section 39L. The commonwealth and every county, city, town, district, board, commission or other public body which, as the awarding authority, requests proposals, bids or sub-bids for any work in the construction, reconstruction, alteration, remodeling, repair or demolition of any public building or other public works (1) shall not enter into a contract for the work with, and shall not approve as a subcontractor furnishing labor and materials for a part of the work, a foreign corporation which has not filed with the awarding authority a certificate of the state secretary stating that the corporation has complied with requirements of section 15.03 of subdivision A of Part 15 of chapter 156D and the date of compliance, and further has filed all annual reports required by section 16.22 of subdivision B of Part 16 of said chapter 156D, and (2) shall report to the state secretary and to the department of corporations and taxation any foreign corporation performing work under such contract or subcontract, and any person, other than a corporation, performing work under such contract or subcontract, and residing or having a principal place of business outside the commonwealth.

Article 5. Substitution of Equal Products (MGL Chapter 30, Section 39M (b))

Section 39M: Contracts for construction and materials; manner of awarding

(a) Every contract for the construction, reconstruction, alteration, remodeling or repair of any public work, or for the purchase of any material, as hereinafter defined, by the commonwealth, or political subdivision thereof, or by any county, city, town, district or housing authority that is and estimated by the awarding authority to cost less than $10,000 dollars shall be obtained through the exercise of sound business practices as defined in section 2 of chapter 30B. The awarding authority shall make and keep a record of each procurement that, at a minimum, shall include the name and address of the person from whom the services were procured. An awarding authority that utilizes a vendor on a statewide contract procured through the operational services division, or a blanket contract procured by the awarding authority pursuant to this section, shall be deemed to have obtained the contract through sound business practices.

Every contract for the construction, reconstruction, alteration, remodeling or repair of any public work, or for the purchase of any material, as hereinafter defined, by the commonwealth, or political subdivision thereof, or by any county, city, town, district or housing authority that is estimated by the awarding authority to cost not less than $10,000 but not more than $50,000 shall be awarded to the responsible bidder offering to perform the contract at the lowest price. The awarding authority shall make public notification of the contract and shall seek written responses from no fewer than 3 persons who customarily perform such work. For purposes of this subsection, the term "public notification" shall include, but need not be limited to, posting, at least 2 weeks before the time specified in the notification for the receipt of responses, the contract and scope-of-work statement: (1) on the website of the awarding authority, (2) on the COMMBUYS system administered by the operational services division, (3) in the central register published pursuant to section 20A of chapter 9 and (4) in a conspicuous place in or near the primary office of the awarding authority; provided, however, that if the awarding authority obtains a minimum of 2 written responses from a vendor list established through a blanket contract or a statewide contract procured through the operational services division, and the lowest of those written responses is deemed acceptable to the awarding authority, public notification is not required. The solicitation shall include a scope-of-work statement that defines the work to be performed and provides potential responders with sufficient information regarding the objectives and requirements of the awarding authority and the time period within which the work shall be completed. The awarding authority shall record the names and addresses of all persons from whom written responses were sought, the names of the persons submitting written responses and the date and amount of each written response.

An awarding authority may utilize a vendor list established through a statewide contract procured through the operational services division to identify 1 or more of the persons from whom it will seek written responses for purposes of this subsection. An awarding authority may also procure a blanket contract to establish a listing of vendors in certain defined categories of work that are under contract to provide services for multiple individual tasks of not more than $50,000 each, and from whom written responses will be sought. Any such blanket contract procured by the awarding authority shall be procured pursuant to this section or sections 44A to 44J, inclusive, of chapter 149 which are applicable to projects over $50,000.

Every contract for the construction, reconstruction, alteration, remodeling or repair of any public work, or for the purchase of any material, as hereinafter defined, by the commonwealth, or political subdivision thereof, or by any county, city, town, district or housing authority that is estimated by the awarding authority to cost more than $50,000, and every contract for the construction, reconstruction, installation, demolition, maintenance or repair of any building by a public agency, as defined by subsection (1) of section 44A of chapter 149, estimated to cost more than $50,000 but not more than $150,000, shall be awarded to the lowest eligible responsible bidder on the basis of competitive bids publicly opened and read by the awarding authority forthwith upon expiration of the time for the filing thereof; provided, however, that such awarding authority may reject any and all bids, if it is in the public interest to do so. Every bid for such contract shall be accompanied by a bid deposit in the form of: (1) a bid bond, (2) cash, or (3) a certified check on, or a treasurer's or cashier's check issued by, a responsible bank or trust company, payable to the awarding authority. The amount of the bid deposit shall be 5 per cent of the value of the bid. Any person submitting a bid pursuant to this section shall, on such bid, certify as follows:

The undersigned certifies under penalties of perjury that this bid is in all respects bona fide, fair and made without collusion or fraud with any other person. As used in this paragraph the word "person" shall mean any natural person, joint venture, partnership, corporation or other business or legal entity.

_____

(Name of person signing bid)

_____

(Company)

This subsection shall not apply to the award of any contract subject to the provisions of sections 44A to 44J, inclusive, of chapter 149 and every such contract shall continue to be awarded as provided therein. In cases of extreme emergency: (1) caused by enemy attack, sabotage or other such hostile actions or (2) resulting from an imminent security threat explosion, fire, flood, earthquake, hurricane, tornado or other such catastrophe, an awarding authority may, without competitive bids and notwithstanding any general or special law, award contracts otherwise subject to this subsection to perform work and to purchase or rent materials and equipment, all as may be necessary for temporary repair and restoration to service of any and all public work in order to preserve the health and safety of persons or property; provided, that this exception shall not apply to any permanent reconstruction, alteration, remodeling or repair of any public work.

(b) Specifications for such contracts, and specifications for contracts awarded pursuant to the provisions of said sections forty-four A to forty-four L of said chapter one hundred and forty-nine, shall be written to provide for full competition for each item of material to be furnished under the contract; except, however, that said specifications may be otherwise written for sound reasons in the public interest stated in writing in the public records of the awarding authority or promptly given in writing by the awarding authority to anyone making a written request therefor, in either instance such writing to be prepared after reasonable investigation. Every such contract shall provide that an item equal to that named or described in the said specifications may be furnished; and an item shall be considered equal to the item so named or described if, in the opinion of the awarding authority: (1) it is at least equal in quality, durability, appearance, strength and design, (2) it will perform at least equally the function imposed by the general design for the public work being contracted for or the material being purchased, and (3) it conforms substantially, even with deviations, to the detailed requirements for the item in the said specifications. For each item of material the specifications shall provide for either a minimum of three named brands of material or a description of material which can be met by a minimum of three manufacturers or producers, and for the equal of any one of said name or described materials.

(c) The term "lowest responsible and eligible bidder" shall mean the bidder: (1) whose bid is the lowest of those bidders possessing the skill, ability and integrity necessary for the faithful performance of the work; (2) who shall certify, that he is able to furnish labor that can work in harmony with all other elements of labor employed or to be employed in the work; (3) who shall certify that all employees to be employed at the worksite will have successfully completed a course in construction safety and health approved by the United States Occupational Safety and Health Administration that is at least 10 hours in duration at the time the employee begins work and who shall furnish documentation of successful completion of said course with the first certified payroll report for each employee; (4) who, where the provisions of section 8B of chapter 29 apply, shall have been determined to be qualified thereunder; and (5) who obtains within 10 days of the notification of contract award the security by bond required under section 29 of chapter 149; provided that for the purposes of this section the term "security by bond" shall mean the bond of a surety company qualified to do business under the laws of the commonwealth and satisfactory to the awarding authority; provided further, that if there is more than 1 surety company, the surety companies shall be jointly and severally liable.

(d) The provisions of this section shall not apply (1) to the extent that they prevent the approval of such specifications by any contributing federal agency, (2) to materials purchased under specifications of the state department of highways at prices established by the said department pursuant to advertisement and bidding in connection with work to be performed under the provisions of chapter eighty-one or chapter ninety, (3) to any transaction between the commonwealth and any of its political subdivisions or between the commonwealth and any public service corporation, and (4) to any contract of not more than $50,000 awarded by a governmental body, as defined by section two of chapter thirty B, in accordance with the provisions of section five of said chapter thirty B; and (5) to any contract solely for the purchase of material awarded by a governmental body, as defined by section 2 of chapter 30B, in accordance with section 5 of said chapter 30B, or procured through the operational services division pursuant to sections 22 and 52 of chapter 7.

(e) The word "material" as used in this section shall mean and include any article, assembly, system, or any component part thereof.

Article 6. Differing Site Conditions (MGL Chapter 30, Section 39N)

Section 39N: Construction contracts; equitable adjustment in contract price for differing subsurface or latent physical conditions

Section 39N. Every contract subject to section forty-four A of chapter one hundred and forty-nine or subject to section thirty-nine M of chapter thirty shall contain the following paragraph in its entirety and an awarding authority may adopt reasonable rules or regulations in conformity with that paragraph concerning the filing, investigation and settlement of such claims:

If, during the progress of the work, the contractor or the awarding authority discovers that the actual subsurface or latent physical conditions encountered at the site differ substantially or materially from those shown on the plans or indicated in the contract documents either the contractor or the contracting authority may request an equitable adjustment in the contract price of the contract applying to work affected by the differing site conditions. A request for such an adjustment shall be in writing and shall be delivered by the party making such claim to the other party as soon as possible after such conditions are discovered. Upon receipt of such a claim from a contractor, or upon its own initiative, the contracting authority shall make an investigation of such physical conditions, and, if they differ substantially or materially from those shown on the plans or indicated in the contract documents or from those ordinarily encountered and generally recognized as inherent in work of the character provided for in the plans and contract documents and are of such a nature as to cause an increase or decrease in the cost of performance of the work or a change in the construction methods required for the performance of the work which results in an increase or decrease in the cost of the work, the contracting authority shall make an equitable adjustment in the contract price and the contract shall be modified in writing accordingly.

Article 7. Equitable Adjustments for Delays (MGL Chapter 30, Section 39O)

Section 39O: Contracts for construction and materials; suspension, delay or interruption due to order of awarding authority; adjustment in contract price; written claim

Section 39O. Every contract subject to the provisions of section thirty-nine M of this chapter or subject to section forty-four A of chapter one hundred forty-nine shall contain the following provisions (a) and (b) in their entirety and, in the event a suspension, delay, interruption or failure to act of the awarding authority increases the cost of performance to any subcontractor, that subcontractor shall have the same rights against the general contractor for payment for an increase in the cost of his performance as provisions (a) and (b) give the general contractor against the awarding authority, but nothing in provisions (a) and (b) shall in any way change, modify or alter any other rights which the general contractor or the subcontractor may have against each other.

(a) The awarding authority may order the general contractor in writing to suspend, delay, or interrupt all or any part of the work for such period of time as it may determine to be appropriate for the convenience of the awarding authority; provided however, that if there is a suspension, delay or interruption for fifteen days or more or due to a failure of the awarding authority to act within the time specified in this contract, the awarding authority shall make an adjustment in the contract price for any increase in the cost of performance of this contract but shall not include any profit to the general contractor on such increase; and provided further, that the awarding authority shall not make any adjustment in the contract price under this provision for any suspension, delay, interruption or failure to act to the extent that such is due to any cause for which this contract provides for an equitable adjustment of the contract price under any other contract provisions.

(b) The general contractor must submit the amount of a claim under provision (a) to the awarding authority in writing as soon as practicable after the end of the suspension, delay, interruption or failure to act and, in any event, not later than the date of final payment under this contract and, except for costs due to a suspension order, the awarding authority shall not approve any costs in the claim incurred more than twenty days before the general contractor notified the awarding authority in writing of the act or failure to act involved in the claim.

Article 8. Decisions on Interpretation of Specifications (MGL Chapter 30, Section 39P)

Section 39P: Contracts for construction and materials; awarding authority's decisions on interpretation of specifications, etc.; time limit; notice

Section 39P. Every contract subject to section thirty-nine M of this chapter or section forty-four A of chapter one hundred forty-nine which requires the awarding authority, any official, its architect or engineer to make a decision on interpretation of the specifications, approval of equipment, material or any other approval, or progress of the work, shall require that the decision be made promptly and, in any event, no later than thirty days after the written submission for decision; but if such decision requires extended investigation and study, the awarding authority, the official, architect or engineer shall, within thirty days after the receipt of the submission, give the party making the submission written notice of the reasons why the decision cannot be made within the thirty day period and the date by which the decision will be made.

Article 9. Contractor's Records (MGL Chapter 30, Section 39R)

Section 39R: Keeping and maintaining of books, records and accounts; statement of management on internal accounting control; financial statements; enforcement

Section 39R. (a) The words defined herein shall have the meaning stated below whenever they appear in this section:

(1) "Contractor" means any person, corporation, partnership, joint venture, sole proprietorship, or other entity awarded a contract pursuant to sections thirty-eight A1/2 to thirty-eight O, inclusive, of chapter seven and any contract awarded or executed pursuant to section eleven C of chapter twenty-five A, section thirty-nine M of chapter thirty, or sections forty-four A to forty-four H, inclusive, of chapter one hundred and forty-nine, which is for an amount or estimated amount greater than one hundred thousand dollars.

(2) "Contract" means any contract awarded or executed pursuant to sections thirty-eight A1/2 to thirty-eight O, inclusive, of chapter seven and any contract awarded or executed pursuant to section eleven C of chapter twenty-five A, section thirty-nine M of chapter thirty, or sections forty-four A through forty-four H, inclusive, of chapter one hundred and forty-nine, which is for amount or estimated amount greater than one hundred thousand dollars.

(3) "Records" means books of original entry, accounts, checks, bank statements and all other banking documents, correspondence, memoranda, invoices, computer printouts, tapes, discs, papers and other documents or transcribed information of any type, whether expressed in ordinary or machine language.

(4) "Independent Certified Public Accountant" means a person duly registered in good standing and entitled to practice as a certified public accountant under the laws of the place of his residence or principal office and who is in fact independent. In determining whether an accountant is independent with respect to a particular person, appropriate consideration should be given to all relationships between the accountant and that person or any affiliate thereof. Determination of an accountant's independence shall not be confined to the relationships existing in connection with the filing of reports with the awarding authority.

(5) "Audit", when used in regard to financial statements, means an examination of records by an independent certified public accountant in accordance with generally accepted accounting principles and auditing standards for the purpose of expressing a certified opinion thereon, or, in the alternative, a qualified opinion or a declination to express an opinion for stated reasons.

(6) "Accountant's Report", when used in regard to financial statements, means a document in which an independent certified public accountant indicates the scope of the audit which he has made and sets forth his opinion regarding the financial statements taken as a whole with a listing of noted exceptions and qualifications, or an assertion to the effect that an overall opinion cannot be expressed. When an overall opinion cannot be expressed the reason therefor shall be stated. An accountant's report shall include as a part thereof a signed statement by the responsible corporate officer attesting that management has fully disclosed all material facts to the independent certified public accountant, and that the audited financial statement is a true and complete statement of the financial condition of the contractor.

(7) "Management", when used herein, means the chief executive officers, partners, principals or other person or persons primarily responsible for the financial and operational policies and practices of the contractor.

(8) Accounting terms, unless otherwise defined herein, shall have a meaning in accordance with generally accepted accounting principles and auditing standards.

(b) Subsection (a)(2) hereof notwithstanding, every agreement or contract awarded or executed pursuant to sections thirty-eight A1/2 to thirty-eight O, inclusive, of chapter seven, or eleven C of chapter twenty-five A, and pursuant to section thirty-nine M of chapter thirty or to section forty-four A through H, inclusive, of chapter one hundred and forty-nine, shall provide that:

(1) The contractor shall make, and keep for at least six years after final payment, books, records, and accounts which in reasonable detail accurately and fairly reflect the transactions and dispositions of the contractor, and

(2) until the expiration of six years after final payment, the office of inspector general, and the commissioner of capital asset management and maintenance shall have the right to examine any books, documents, papers or records of the contractor or of his subcontractors that directly pertain to, and involve transactions relating to, the contractor or his subcontractors, and

(3) if the agreement is a contract as defined herein, the contractor shall describe any change in the method of maintaining records or recording transactions which materially affect any statements filed with the awarding authority, including in his description the date of the change and reasons therefor, and shall accompany said description with a letter from the contractor's independent certified public accountant approving or otherwise commenting on the changes, and

(4) if the agreement is a contract as defined herein, the contractor has filed a statement of management on internal accounting controls as set forth in paragraph (c) below prior to the execution of the contract, and

(5) if the agreement is a contract as defined herein, the contractor has filed prior to the execution of the contracts and will continue to file annually, an audited financial statement for the most recent completed fiscal year as set forth in paragraph (d) below.

(c) Every contractor awarded a contract shall file with the awarding authority a statement of management as to whether the system of internal accounting controls of the contractor and its subsidiaries reasonably assures that:

(1) transactions are executed in accordance with management's general and specific authorization;

(2) transactions are recorded as necessary

i. to permit preparation of financial statements in conformity with generally accepted accounting principles, and

ii. to maintain accountability for assets;

(3) access to assets is permitted only in accordance with management's general or specific authorization; and

(4) the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action was taken with respect to any difference.

Every contractor awarded a contract shall also file with the awarding authority a statement prepared and signed by an independent certified public accountant, stating that he has examined the statement of management on internal accounting controls, and expressing an opinion as to

(1) whether the representations of management in response to this paragraph and paragraph (b) above are consistent with the result of management's evaluation of the system of internal accounting controls; and

(2) whether such representations of management are, in addition, reasonable with respect to transactions and assets in amounts which would be material when measured in relation to the applicant's financial statements.

(d) Every contractor awarded a contract by the commonwealth or by any political subdivision thereof shall annually file with the commissioner of capital asset management and maintenance during the term of the contract a financial statement prepared by an independent certified public accountant on the basis of an audit by such accountant. The final statement filed shall include the date of final payment. All statements shall be accompanied by an accountant's report. Such statements shall be made available to the awarding authority upon request.

(e) The office of inspector general, the commissioner of capital asset management and maintenance and any other awarding authority shall enforce the provisions of this section. The commissioner of capital asset management and maintenance may after providing an opportunity for the inspector general and other interested parties to comment, promulgate pursuant to the provisions of chapter thirty A such rules, regulations and guidelines as are necessary to effectuate the purposes of this section. Such rules, regulations and guidelines may be applicable to all awarding authorities. A contractor's failure to satisfy any of the requirements of this section may be grounds for debarment pursuant to section forty-four C of chapter one hundred and forty-nine.

(f) Records and statements required to be made, kept or filed under the provisions of this section shall not be public records as defined in section seven of chapter four and shall not be open to public inspection; provided, however, that such records and statements shall be made available pursuant to the provisions of clause (2) of paragraph (b).

Article 10. Limitations on Hours of Work (MGL Chapter 149, Section 34)

Section 34: Public contracts; stipulation as to hours and days of work; void contracts

Section 34. Every contract, except for the purchase of material or supplies, involving the employment of laborers, workmen, mechanics, foremen or inspectors, to which the commonwealth or any county or any town, subject to section thirty, is a party, shall contain a stipulation that no laborer, workman, mechanic, foreman or inspector working within the commonwealth, in the employ of the contractor, sub-contractor or other person doing or contracting to do the whole or a part of the work contemplated by the contract, shall be required or permitted to work more than eight hours in any one day or more than forty-eight hours in any one week, or more than six days in any one week, except in cases of emergency, or, in case any town subject to section thirty-one is a party to such a contract, more than eight hours in any one day, except as aforesaid; provided, that in contracts entered into by the department of highways for the construction or reconstruction of highways there may be inserted in said stipulation a provision that said department, or any contractor or sub-contractor for said department, may employ laborers, workmen, mechanics, foremen and inspectors for more than eight hours in any one day in such construction or reconstruction when, in the opinion of the commissioner, public necessity so requires. Every such contract not containing the aforesaid stipulation shall be null and void.

Article 11. Advertising Invitations to Bid (MGL Chapter 149, Section 44J)

Section 44J: Invitations to bid; notice; contents; violations; penalty

(1) No public agency or authority of the commonwealth or any political subdivision thereof shall award any contract for which competitive bids are required pursuant to section forty-four A of this chapter or section thirty-nine M of chapter thirty, or for which competitive proposals are required pursuant to subsection (4) of section forty-four E of this chapter or section eleven C of chapter twenty-five A, unless a notice inviting bids or proposals therefor shall have been posted no less than one week prior to the time specified in such notice for the receipt of said bids or proposals in a conspicuous place in or near the offices of the awarding authority, and shall have remained posted until the time so specified, and unless such notice shall also have been published at least once not less than two weeks prior to the time so specified in the central register published by the secretary of state pursuant to section twenty A of chapter nine and in a newspaper of general circulation in the locality of the proposed project, and on the COMMBUYS system administered by the operational services division. Said notice shall also be published at such other times and in such other newspapers or trade periodicals as the commissioner of capital asset management and maintenance may require, having regard to the locality of the work involved.

(2) Said notice shall specify the time and place where plans and specifications of the proposed work may be had; the time and place of submission of general bids; and the time and place for opening of the general bids. For contracts subject to the provisions of sections forty-four A to H, inclusive, of this chapter, said notice shall also specify the time and place for submission of filed sub-bids, where required pursuant to section forty-four F; and the time and place for opening of said filed sub-bids.

Said notice shall also provide sufficient facts concerning the nature and scope of such project, the type and elements of construction, and such other information as will assist applicants in deciding to bid on such contract.

(3) No contract or preliminary plans and specifications shall be split or divided for the purpose of evading the provisions of this section.

(4) General bids and filed sub-bids for any contract subject to this section shall be in writing and shall be opened in public at the time and place specified in the posted or published notice, and after being so opened shall be open to public inspection.

(5) The provisions of this section shall not apply to any transaction between the commonwealth and any public service corporation.

(6) The provisions of this section may be waived in cases of extreme emergency involving the health and safety of the people and their property, upon the written approval of said commissioner. The written approval shall contain a description of the circumstances and the reasons for the commissioner's determination.

(7) Whoever violates any provision of this section shall be punished by a fine of not more than ten thousand dollars or by imprisonment in the state prison for not more than three years or in a jail or house of correction for not more than two and one-half years, or by both said fine and imprisonment; and in the event of final conviction, said person shall be incapable of holding any office of honor, trust or profit under the commonwealth or under any county, district of municipal agency.

Each and every person who shall cause or conspire to cause any contract or preliminary plans and specifications to be split or divided for the purpose of evading the provisions of this section shall forfeit and pay to the commonwealth, a political subdivision thereof or other awarding authority subject to this section, the sum of not more than five thousand dollars and, in addition, such person or persons shall pay, apportioned among them, double the amount of damages which the commonwealth or political subdivision thereof or other awarding authority may have sustained by reason of the doing of such act, together with the costs of the action.

(8) If an awarding authority rejects all general bids or does not receive any general bids, and advertises for a second opening of general bids with the original filed sub-bids as set forth in subsection (1) of section forty-four E the notice for receipt of such general bids may be published in the central register and elsewhere as required not less than one week prior to the time specified for such second opening of general bids.

(9) No request for proposals or invitation for bids issued under sections 38A 1/2 to 38O, inclusive, of chapter 7, section 11C of chapter 25A, section 39M of chapter 30, this section and sections 44A to 44H, inclusive, shall be advertised if the awarding authority's cost estimate is greater than 1 year old.

Article 12. Excavations; Notice; Penalties (MGL Chapter 82, Section 40)

Section 40: Definitions

Section 40. The following words, as used in this section and sections 40A to 40E, inclusive, shall have the following meanings:

"Company", natural gas pipeline company, petroleum or petroleum products pipeline company, public utility company, cable television company, and municipal utility company or department that supply gas, electricity, telephone, communication or cable television services or private water companies within the city or town where such excavation is to be made.

"Description of excavation location", such description shall include the name of the city or town, street, way, or route number where appropriate, the name of the streets at the nearest intersection to the excavation, the number of the buildings closest to the excavation or any other description, including landmarks, utility pole numbers or other information which will accurately define the location of the excavation.

"Emergency", a condition in which the safety of the public is in imminent danger, such as a threat to life or health or where immediate correction is required to maintain or restore essential public utility service.

"Excavation", an operation for the purpose of movement or removal of earth, rock or the materials in the ground including, but not limited to, digging, blasting, augering, backfilling, test boring, drilling, pile driving, grading, plowing in, hammering, pulling in, jacking in, trenching, tunneling and demolition of structures, excluding excavation by tools manipulated only by human power for gardening purposes and use of blasting for quarrying purposes.

"Excavator", any entity including, but not limited to, a person, partnership, joint venture, trust, corporation, association, public utility, company or state or local government body which performs excavation operations.

"Premark", to delineate the general scope of the excavation or boring on the paved surface of the ground using white paint, or stakes or other suitable white markings on nonpaved surfaces. No premarking shall be acceptable if such marks can reasonably interfere with traffic or pedestrian control or are misleading to the general public. Premarking shall not be required of any continuous excavation that is over 500 feet in length.

"Safety zone", a zone designated on the surface by the use of standard color-coded markings which contains the width of the facilities plus not more than 18 inches on each side.

"Standard color-coded markings", red - electric power lines, cables, conduit or light cables; yellow - gas, oil, street petroleum, or other gaseous materials; orange - communications cables or conduit, alarm or signal lines; blue - water, irrigation and slurry lines; green - sewer and drain lines; white - premark of proposed excavation.

"System", the underground plant damage prevention system as defined in section 76D of chapter 164.

Section 40A: Excavations; notice

Section 40A. No excavator installing a new facility or an addition to an existing facility or the relay or repair of an existing facility shall, except in an emergency, make an excavation, in any public or private way, any company right-of-way or easement or any public or privately owned land or way, unless at least 72 hours, exclusive of Saturdays, Sundays and legal holidays but not more than 30 days before the proposed excavation is to be made, such excavator has premarked not more than 500 feet of the proposed excavation and given an initial notice to the system. Such initial notice shall set forth a description of the excavation location in the manner as herein defined. In addition, such initial notice shall indicate whether any such excavation will involve blasting and, if so, the date and the location at which such blasting is to occur.

The notice requirements shall be waived in an emergency as defined herein; provided, however, that before such excavation begins or during a life-threatening emergency, notification shall be given to the system and the initial point of boring or excavation shall be premarked. The excavator shall ensure that the underground facilities of the utilities in the area of such excavation shall not be damaged or jeopardized.

In no event shall any excavation by blasting take place unless notice thereof, either in the initial notice or a subsequent notice accurately specifying the date and location of such blasting shall have been given and received at least 72 hours in advance, except in the case of an unanticipated obstruction requiring blasting when such notice shall be not less than four hours prior to such blasting. If any such notice cannot be given as aforesaid because of an emergency requiring blasting, it shall be given as soon as may be practicable but before any explosives are discharged.

Section 40B: Designation of location of underground facilities

Section 40B. Within 72 hours, exclusive of Saturdays, Sundays and legal holidays, from the time the initial notice is received by the system or at such time as the company and the excavator agree, such company shall respond to the initial notice or subsequent notice by designating the location of the underground facilities within 15 feet in any direction of the premarking so that the existing facilities are to be found within a safety zone. Such safety zone shall be so designated by the use of standard color-coded markings. The providing of such designation by the company shall constitute prima facie evidence of an exercise of reasonable precaution by the company as required by this section; provided, however, that in the event that the excavator has given notice as aforesaid at a location at which because of the length of excavation the company cannot reasonably designate the entire location of its facilities within such 72 hour period, then such excavator shall identify for the company that portion of the excavation which is to be first made and the company shall designate the location of its facilities in such portion within 72 hours and shall designate the location of its facilities in the remaining portion of the location within a reasonable time thereafter. When an emergency notification has been given to the system, the company shall make every attempt to designate its facilities as promptly as possible.

Section 40C: Excavator's responsibility to maintain designation markings; damage caused by excavator

Section 40C. After a company has designated the location of its facilities at the location in accordance with section 40B, the excavator shall be responsible for maintaining the designation markings at such locations, unless such excavator requests remarking at the location due to the obliteration, destruction or other removal of such markings. The company shall then remark such location within 24 hours following receipt of such request.

When excavating in close proximity to the underground facilities of any company when such facilities are to be exposed, non-mechanical means shall be employed, as necessary, to avoid damage in locating such facility and any further excavation shall be performed employing reasonable precautions to avoid damage to any underground facilities including, but not limited to, any substantial weakening of structural or lateral support of such facilities, penetration or destruction of any pipe, main, wire or conduit or the protective coating thereof, or damage to any pipe, main, wire or conduit.

If any damage to such pipe, main, wire or conduit or its protective coating occurs, the company shall be notified immediately by the excavator responsible for causing such damage.

The making of an excavation without providing the notice required by section 40A with respect to any proposed excavation which results in any damage to a pipe, main, wire or conduit, or its protective coating, shall be prima facie evidence in any legal or administrative proceeding that such damage was caused by the negligence of such person.

Section 40D: Local laws requiring excavation permits; public ways

Section 40D. Nothing in this section shall affect or impair local ordinances or by-laws requiring a permit to be obtained before excavation in a public way or on private property; but notwithstanding any general or special law, ordinance or by-law to the contrary, to the extent that any permit issued under the provisions of the state building code or state fire code requires excavation by an excavator on a public way or on private property, the permit shall not be valid unless the excavator notifies the system as required pursuant to sections 40 and 40A, before the commencement of the excavation, and has complied with the permitting requirements of chapter 82A.

Section 40E: Violations of Secs. 40A to 40E; punishment

Section 40E. Any person or company found by the department of telecommunications and energy, after a hearing, to have violated any provision of sections 40A to 40E, inclusive, shall be fined $1,000 for the first offense and not less than $5,000 nor more than $10,000 for any subsequent offense within 12 consecutive months as set forth by the rules of said department; provided, however, that nothing herein shall be construed to require forfeiture of any penal sum by a state or local government body for violation of section 40A or 40C; and provided, further, that nothing herein shall be construed to require the forfeiture of any penal sum by a residential property owner for the failure to premark for an excavation on such person's residential property.

Article 13. Price Adjustments for Certain Materials in Construction Projects (MGL Chapter 30, Section 38A)

Section 38A: Price adjustment clause in contracts for road, bridge, water and sewer projects awarded under Sec. 39M

Section 38A. Contracts for road and bridge projects awarded as a result of a proposal or invitation for bids under section 39M shall include a price adjustment clause for each of the following materials: fuel, both diesel and gasoline; asphalt; concrete; and steel. Contracts for water and sewer projects awarded as a result of a proposal or invitation for bids under said section 39M shall include a price adjustment clause for fuel, both diesel and gasoline; liquid asphalt; and portland cement contained in cast-in-place concrete. A base price for each material shall be set by the awarding authority or agency and shall be included in the bid documents at the time the project is advertised. The awarding authority or agency shall also identify in the bid documents the price index to be used for each material. The price adjustment clause shall provide for a contract adjustment to be made on a monthly basis when the monthly cost change exceeds plus or minus 5 per cent.

END OF DOCUMENT

DOCUMENT 00858

SPECIAL CONDITIONS - PERMITS AND LICENSES

1.01 LIST OF PERMITS AND/OR LICENSES

A. The Town of Orleans has received the following Permits and Licenses:

1. Cape Cod Commission – Consistency Review
2. Massachusetts Department of Environmental Protection – CWMP Approval
3. Orleans, MA Conservation Commission - Order of Conditions
4. Massachusetts Department of Transportation - State-Highway Access Permit

The Applications and Permits and Licenses are included as an Attachment and are made part of the Contract Documents.

The Contractor is responsible for comping with the terms, conditions and any special conditions specified in the Permits and Licensees.

B. The Town of Orleans has applied for and anticipates obtaining the following Permits and Licenses prior to the bid date.

1. Not used

C. ATTACHMENTS

1. The Town of Orleans has obtained various easements for the Project. The Easements are included as an Attachment and are made part of the Contract Documents.
2. Archeological Report by Public Archeological Laboratory.

D. Town of Orleans, MA Trench Permit and Road Opening Permit (To be issued after the Contract is awarded).

E. Other Permits to be obtained by the Contractor as required by Federal, State and/or Local Regulatory Agencies.

CAPE COD
COMMISSION

March 15, 2022

Maria E. Pinaud
Director, Municipal Services Division
Bureau of Water Resources
MassDEP, 5th Floor
One Winter Street
Boston, MA 02108

Ms. Pinaud,

This letter is regarding a consistency determination for those projects in the Town of Orleans included on the Draft Calendar Year 2022 Intended Use Plan (IUP) for the Clean Water State Revolving Fund (SRF). As you know, Cape Cod communities are subject to the Cape Cod Area Wide Water Quality Management Plan (208 Plan), which was certified and approved by the Massachusetts Department of Environmental Protection and the United States Environmental Protection Agency in 2015. Clean Water State Revolving Fund regulations (310 CMR 44.00) require projects be deemed consistent with the 208 Plan through written notice by the Regional Land Use Planning Agency for the region in which the municipal applicant is located.

The Town of Orleans proposes two separate projects, the first being an extension of the sewer collection system and construction of a new pump station. This project will replace 474 septic tanks using a combination of gravity and low-pressure sewers, with project costs totaling $32,906,000. This project, the Meetinghouse Pond Area Collection System and Pump Station, is a critical component of the Town's nitrogen removal commitments under the Pleasant Bay Watershed Permit, that will also provide water quality benefits to Town Cove and the town's drinking water supply points. The Town also proposes the installation of 18 permeable reactive barriers, totaling $63,320,000 in project costs, with $17,094,000 included on the 2022 IUP. The full scale PRB implementation plan is based on results from the Eldredge Park PRB demonstration project using the process outlined in draft amendments to the Orleans CWMP. Final locations and phasing for additional PRBs are anticipated in the Town's amended CWMP, which is expected by 2023 in alignment with the Pleasant Bay Watershed Permit. The overall project is anticipated to yield approximately 3,300 kg/year of nitrogen reduction from the Pleasant Bay, Rock Harbor, and Nauset Harbor watersheds.

The proposed work is included in the CWMP for the Town of Orleans, which was approved through Development of Regional Impact (DRI) review on October 13, 2011, and in subsequent Notices of

Project Change filed in 2018. The CWMP provides a strategy for wastewater management to achieve reductions of nitrogen loading to restore and protect Orlean's marine embayments. Additionally, these projects are acknowledged as components of the program for Orleans to meet its nitrogen removal commitments in Phases 2 and 3 of the Pleasant Bay Targeted Watershed Management Plan (TWMP) written in May 2018 and determined consistent with the 208 Plan on June 21, 2018, and consistent with the details of the Pleasant Bay Watershed Permit.

For the purposes of SRF financing, the Orleans projects included on the Draft 2022 IUP are consistent with the 208 Plan.

Please feel free to get in touch with me if you have any questions.

Sincerely,

Kristy Senatori

CERTIFICATE OF THE SECRETARY OF ENERGY AND ENVIRONMENTAL AFFAIRS
ON THE
SINGLE ENVIRONMENTAL IMPACT REPORT

PROJECT NAME	: Town of Orleans Comprehensive Wastewater Management Plan
PROJECT MUNICIPALITY	: Town of Orleans
PROJECT WATERSHED	: Cape and Islands
EOEA NUMBER	: 14414
PROJECT PROPONENT	: Town of Orleans
DATE NOTICED IN MONITOR	: December 22, 2010

As Secretary of Energy and Environmental Affairs, I hereby determine that the Single Environmental Impact Report (SEIR) submitted on this project **adequately and properly complies** with the Massachusetts Environmental Policy Act (M.G.L. c. 30, ss. 61-62I) and with its implementing regulations (301 CMR 11.00).

The comments I have received on the SEIR from MassDEP, the Cape Cod Commission (CCC) and others indicate that since the Secretary's issuance of the Certificate on the Expanded Environmental Notification Form (EENF), the Town of Orleans (the Town) has worked closely with MassDEP and CCC to provide additional information to address the comments raised on the EENF pertaining to water quality monitoring at the Orleans Wastewater Treatment Facility (Orleans WWTF) site, the Town's Adaptive Management Plan (AMP) and the project's potential impacts to coastal resource areas. I commend the Town on its continued coordination and outreach efforts in this regard. As a consequence of these efforts, MassDEP, CCC, the Pleasant Bay Resource Management Alliance and others have indicated their strong support for the Town's Comprehensive Wastewater Management Plan (CWMP).

I have received a number of comments on the SEIR that express continuing concerns regarding the Town's proposed centralized sewer system design, potential impacts to the

Namskaket Marsh embayment from the groundwater discharge at the Tri-Town site, and the Total Maximum Daily Loads (TMDLs) established for the coastal embayments surrounding the Town of Orleans.

I have fully considered all of the comments received on the EENF and the SEIR and, on balance, I am convinced that the Town has satisfactorily evaluated the project's potential environmental impacts and committed to an appropriate package of mitigation commitments. While I acknowledge the remaining concerns of a number of residents from the Town of Orleans and neighboring Cape Cod communities, I am confident that these concerns can be adequately addressed during the state and local permitting process and through the implementation of the Town's Adaptive Management Plan. Towards that end, I am directing the Town to continue the same high-level of coordination and cooperation with state, regional and local officials that it has shown throughout the MEPA review process for this project as the project proceeds to permitting.

Thus, after careful review of the SEIR and comment letters, and after consultation with MassDEP, the Cape Cod Commission and others, I believe that the SEIR has addressed the substantive issues outlined in the scope and has demonstrated to MEPA's and the permitting agencies' satisfaction that the Town of Orleans has avoided, minimized, and mitigated impacts to the maximum extent feasible. The project may proceed to state permitting where I expect that MassDEP will continue to scrutinize potential project impacts and require additional mitigation where appropriate.

Project Overview

The Orleans CWMP calls for the phased construction of a new centralized municipal sewer system and implementation of non-structural program elements to achieve significant reductions of nitrogen loading and meet TMDL limits for the coastal embayments surrounding the Town of Orleans over a 20-year phased project construction period.

The Town of Orleans' CWMP includes:

- Orleans WWTF

  Constructing a new centralized wastewater treatment and disposal facility to be located at the existing 26-acre Tri-Town Septage Treatment facility site in Orleans capable of achieving effluent concentration limits of 3-5 mg/L for total nitrogen (TN) with an initial designed capacity to treat and dispose up to 0.64 million gallons per day (MGD) of wastewater flows;

- Core Program Sewers

  Constructing approximately 74 miles of new municipal sewer pipe, and approximately 63 sewer pump stations in 6 construction phases to collect and convey approximately 0.64 MGD of wastewater flows from 2,800 individual properties located in the Pleasant Bay, Nauset and Rock Harbor watersheds for treatment and on-site disposal at the Orleans WWTF;

- Non Structural Program Elements

  Implementing non-structural program elements to provide additonal reductions in nutrient loading within the embayments surrounding Orleans including: fertilizer use controls, stormwater management controls, water conservation measures and enhancement of embayment flushing;

- Adaptive Management Plan

  Employing an Adaptive Management Plan that establishes a process for identifying measurable reductions in nitrogen loading; compliance with TMDLs for the coastal embayments surrounding Orleans; and the need for any adjustments or mid-course revisions to the Orleans CWMP prior to constructing the later Core Program phases; and,

- Regional Wastewater Management Opportunities

  The Town's Final CWMP has been designed to also accommodate potential additional future wastewater flows from the neighboring towns of Eastham and/or Brewster (Regional Program).

MEPA Review History

In May 2009, the Town of Orleans (the Town), in accordance with Section 11.05(7) of the MEPA regulations, submitted an EENF with a request that the Secretary allow the Proponent to fulfill its EIR obligations under MEPA with a Single EIR, rather than the usual process of a Draft and Final EIR. The EENF received an extended comment period pursuant to Section 11.06(8) of the MEPA regulations and the Town voluntarily extended the comment period an additional four weeks. The EENF included clear descriptions of the project, a description of the extensive planning and alternatives analysis conducted to date, identified potential environmental impacts associated with the project and provided initial commitments to mitigate impacts. Comments received from MassDEP, the Cape Cod Commission (CCC) and others indicated overwhelming support for the analysis and conclusions included in the EENF and its consistency with legal

requirements. In July 2009, the Secretary issued a Certificate on the EENF and based on a review of the EENF and after consultation with state agencies, determined that the EENF met the regulatory requirements and permitted the Proponent to file a SEIR in fulfillment of Section 11.03 of the MEPA regulations.

State Permits and Jurisdiction

The project is undergoing review pursuant to Sections 11.03(5)(a)(3) and (5)(b)(1) of the MEPA regulations, because the project will likely involve the construction of sewer mains ten or more miles in length and the development of a new wastewater treatment facility with a capacity of more than 1,000,000 gallons per day. The project will require a Groundwater Discharge Permit, a Chapter 91 License, and a 401 Water Quality Certificate from MassDEP. The project must be reviewed by the Natural Heritage Endangered Species Program (NHESP) and the Massachusetts Historical Commission (MHC) because portions of the project occur within Priority Habitat and within or adjacent to recorded archaeological sites and archaeologically sensitive areas, respectively. The project may require a Conservation and Management Permit from NHESP. It may require Federal Consistency Review with the Massachusetts Coastal Zone Management (MCZM) Office. It may also require a Construction Access Permit from the Massachusetts Highway Department. The project may need to obtain a Section 404 Permit from the U.S. Army Corps of Engineers. The project should comply with the National Pollutant Discharge Elimination System (NPDES) General Permit for stormwater discharges from a construction site. It will also require an Order of Conditions from the Orleans Conservation Commission and on appeal only, a Superseding Order of Conditions from MassDEP.

The Town anticipates applying for State Revolving Fund (SRF) loans for subsequent planning and construction of proposed sewer project. Therefore, MEPA jurisdiction is broad and extends to all aspects of the project that may cause Damage to the Environment, as defined in the MEPA regulations.

REVIEW OF THE SINGLE ENVIRONMENTAL IMAPCT REPORT and FINAL CWMP

Project Description

The SEIR includes a detailed discussion of the findings of the Massachusetts Estuaries Project (MEP) Technical Reports and/or TMDLs established for Pleasant Bay, Rock Harbor, Namskaket and Little Namskaket embayments used by the Town in the design of the Orleans

CWMP. The SEIR provides additional information to satisfactorily demonstrate that the Tri-Town site is an acceptable effluent recharge site that could accommodate the treatment and on-site discharge of the Core Program's estimated wastewater flows. The SEIR provides a detailed description of the Town's proposed Adaptive Management Plan and its water quality monitoring program for the Tri-Town site and the coastal embayments surrounding the Town of Orleans. The SEIR identifies significant environmental benefits and impacts, and measures that will be taken to avoid, minimize and mitigate the Core Program sewer project's unavoidable impacts to environmental resource areas. The SEIR includes a proposed schedule for completing the final design and environmental permitting for the Orleans CWMP and each phase of its sewer construction program. The SEIR includes additional information and maps identifying the areas in Orleans where construction of new sewers or cluster systems are proposed and the locations where sewer lines, pumping stations, and other facilities will be located.

Structural Program Elements

Core Sewer Program

The Town's core sewer construction plan (Core Program) involves the phased construction of new sewers to eliminate septic systems in areas of Orleans having the greatest need for nitrogen control and located upgradient of nitrogen sensitive watersheds and major freshwater ponds. As described in the SEIR, the Core program's sewer service area was designed to provide for the collection of as much wastewater nitrogen as necessary using the least amount of wastewater collection and conveyance infrastructure.

The Core Program includes the construction of a new centralized wastewater treatment facility (Orleans WWTF) to be located at the existing 26-acre Tri-Town Septage Treatment facility located near the intersection of Route 6 and Route 6A at 29 Overland Way in Orleans. The new Orleans WWTF is designed with an initial capacity to treat and dispose up to 0.64 MGD and will employ a 4-stage Bardenpho nitrogen removal process that will provide treatment levels capable of achieving nitrogen effluent concentrations of 3-5 milligrams per liter (mg/l) of total effluent Nitrogen (Level 2 nitrogen limits) and the removal of numerous pathogenic organisms. Under the Core Program, a total of approximately 74 miles of new municipal sewer pipe, and approximately 63 sewer pump stations will be constructed in 6 construction phases to collect and convey 2030 design year wastewater flows (approximately 0.64 MGD) from 2,800 individual properties (approximately 53% percent of the Town) located in the Pleasant Bay, Nauset and Rock Harbor watersheds for treatment and on-site disposal at the Orleans WWTF site. Construction of Phase 1 of the Core Program is expected to be completed in 2017 and will include the construction of the new Orleans WWTF (to operate at 50% design capacity) and approximately 15 miles of new sewers and 7 pump stations located primarily throughout the downtown area of Orleans.

Phase II of the Core Program will include the construction of approximately 11 miles of sewers and 10 pump stations. Phase 2 will also involve the construction of five separate below-ground cluster wastewater treatment systems with approximately 11 miles of additional gravity sewers and new pump stations to serve neighborhoods located in the watersheds of four impacted coastal embayments and one freshwater pond including the headwaters of the Paw Wah Pond, Lonnies Pond, Arey's Pond, Mill Pond and Baker's Pond, respectively. As described in the SEIR, these cluster systems will provide interim nitrogen and phosphorous removal to these impacted surface water bodies in the early phases (Phases 1 and 2) of Core Program construction and many years in advance of the construction of the later phases of Core Program construction for these areas of Orleans. The Town proposes to eventually convert and incorporate these cluster wastewater treatment systems to serve as pump stations for the Core Program municipal sewer system. The Town anticipates that the Phase 2 sewer construction work will be completed in 2020. Construction of the remaining Core Program phases (Phases 3-6) is anticipated to be completed in 2032.

Septage Handling Facility

The Orleans WWTF will include facilities for a new septage receiving and handling station to replace the existing Tri-Town Septage Treatment Facility and will be designed to receive, treat and dispose of truck-transported septage from non-sewered areas in Orleans together with septage from the other Tri-Town District communities of Brewster and Eastham.

Sludge Handling Facility

The Orleans WWTF will also include new facilities for preparing remaining sludge materials resulting from the wastewater treatment and septage handling processes for off-site trucking for suitable reuse and disposal.

Non Structural Program Elements

The Orleans CWMP also calls for the implementation of a number of cost-effective non-structural elements designed to provide measurable reductions in nitrogen loading to the embayments surrounding Orleans such as fertilizer management, stormwater management, enhanced embayment flushing and land use controls.

According to the information provided in the SEIR, fertilizer use and stormwater runoff can contribute up to 7% and 8% of watershed nitrogen load to coastal embayments in Orleans, respectively. The Town has committed to implement fertilizer use controls to reduce the use of fertilizer products on lawns, gardens and agricultural areas in Orleans. The Town has also committed to adopting stormwater management regulations to reduce nutrient loading from surface runoff to embayments surrounding Orleans, and to pilot the potential use of enhanced

embayment flushing to increase the assimilative capacity of coastal embayments to reduce nitrogen loading by increasing their flushing rates. MassDEP has indicated that some of these non-structural program elements may hold promise for reducing nutrient loading to coastal embayments but will require an extensive evaluation by MassDEP to determine if an acceptable nitrogen reduction credit can be applied in the Orleans CWMP.

Water Quality and Wastewater Treatment

Marine Embayments

The SEIR includes a detailed discussion of the findings of the MEP Technical Reports and/or TMDLs established for Pleasant Bay, Rock Harbor, Namskaket and Little Namskaket embayments used by the Town in the design of the Final Orleans CWMP. The Town has continued to participate in MEP's efforts to conduct water quality sampling and identify nutrient loading problems for the Town's coastal embayments. The Technical Reports produced by the MEP are used by MassDEP and the US Environmental Protection Agency (EPA) to establish Total Maximum Daily Loads (TMDLs) for nitrogen loading to these coastal emabyments and their tributaries. The MEP has provided Technical Reports for Pleasant Bay and the Northside Cape Cod Bay embayments of Rock Harbor, Namskaket and Little Namskaket Creek. The final MEP Technical Report for Nauset Marsh has been delayed. MassDEP and EPA have established TMDLs for Pleasant Bay and its coastal tributaries.

The TMDLs for the Northside Cape Cod Bay embayments has not yet been released. As described in the SEIR and the comments received from CCC, the Town incorporated information from the draft MEP Technical Report findings for Nauset Marsh in the Town's final design of the Orleans CWMP. Specifically, the Orleans CWMP includes a conservative target percentage (55%) nitrogen removal for Nauset Marsh. CCC supports the Town's interim use of this nitrogen removal estimate for Nauset Marsh. According to the comments received from MassDEP and CCC, the estimated nitrogen loading reductions resulting from the Town's phased construction of the Core Program are consistent with published or expected TMDLs for the watersheds and embayments surrounding the Town of Orleans. As a condition of its approval of the Orleans CWMP project, CCC will require the Town to review the final MEP Report for Nauset Marsh when it becomes available to determine what if any revisions to the Orleans CWMP may be needed to address nutrient loading and water quality issues affecting the Nauset Marsh/Town Cove embayment.

MassDEP and CCC have requested that the Town provide confirmatory modeling results using the Linked Water Quality Model to identify estimated reductions in nitrogen loading and interim water quality improvements associated with each phase of the Town's Core Program sewer construction program. The Town will be required to complete the confirmatory modeling

for the Orleans CWMP as a condition of MassDEP's Groundwater Discharge Permit and CCC's Development of Regional Impact (DRI) approval process. MassDEP's comments on the SEIR identified the need for additional water quality modeling at the Little Naskaket Marsh and renewed monitoring and characterization of the Tri-Town plume. According to MassDEP comments, the wastewater plume from the Tri-Town site was last monitored in 2001 by the USGS and determined to be moving in a northwesterly direction. MassDEP has indicated that the Town will be required to fully characterize the plume's direction and extend of its leading edge as part of the Town's ongoing water quality monitoring program responsibilities. Studies of the Tri-Town wastewater plume and their findings will be made part of the Adaptive Management Plan and included in the Town's annual TMDL Compliance Report described below.

Freshwater Ponds

As described in the SEIR, Phase 2 work will include the construction of five separate below-ground cluster wastewater treatment systems with approximately 11 miles of additional gravity sewers and pump stations to serve neighborhoods located in the headwaters of the watersheds for four impacted coastal embayments and one freshwater pond including Paw Wah Pond, Lonnies Pond, Arey's Pond, Mill Pond and Baker's Pond, respectively. Each of the five cluster wastewater treatment systems will have a design capacity to accommodate approximately 10,000 – 20,000 gpd of wastewater flow (15 – 30 properties) to achieve an effluent nitrogen concentration of 5- 8 mg/L. These cluster systems will provide interim nitrogen and phosphorous removal to these impacted surface water bodies in the early phases (Phases 1 and 2) of Core Program construction and many years in advance of the construction of the later Core Program sewer phases in these areas of Orleans. The Town proposes to eventually convert and incorporate these cluster wastewater treatment systems to serve as pump stations for the Core Program municipal sewer system. The Phase 2 sewer construction work is expected to be completed in 2018. Construction of the remaining Core Program phases (Phases 3-6) is anticipated to be completed by 2030.

In comments previously submitted on the EENF, CCC recommended that the Town consider constructing an interim cluster wastewater collection and treatment system to serve the neighborhoods located in the headwaters of for Cedar Pond area as part of the Town's Phase 1 Core Program work. According to the information provided in the SEIR, factors contributing to the impairment of Cedar Pond have not yet been adequately identified. The Town has committed to review the forthcoming amended MEP Report for Rock Harbor when it becomes available to re-evaluate the need for constructing a cluster sewer system to serve the Cedar Pond neighborhoods.

Orleans Wastewater Treatment Facility

The proposed Orleans WWTF will have an initial design capacity of 0.64 MGD and will employ a 4-stage Bardenpho nitrogen removal process that will achieve nitrogen effluent concentrations of 3-5 milligrams per liter (mg/l) of total effluent Nitrogen. Treated wastewater effluent will be discharged to 10 rapid infiltration beds. The Town completed a review of existing hydrogeological studies, hydraulic load testing and other groundwater modeling analyses and determined that the Tri-Town site has an effluent disposal capacity (approximately 1.78 mgd) to accommodate the Core Program's wastewater flows. As discussed below, the Orleans WWTF is designed with reserve treatment capacity to accommodate the treatment of potential future additional wastewater flows anticipated from sewering the entire Town of Orleans under the Town's Expanded Program design. Acoording to the information provided in the SEIR, under the Extended Program, a total of 1.14 MGD of wastewater flow will be collected from 5,300 individual properties for treatment at the Orleans WWTF. According to the Town, construction of the Extended Program would require an additional 15-20 years from the completion of the Core Program sewer construction work.

The treatment and on-site disposal of the Core Program's wastewater flows will utilize approximately 60% of the infiltration system's capacity. The disposal of treated effluent under the Regional Program would utilize approximately 90% of the infiltration system's discharge capacity. The disposal of treated effluent under the Town's Extended Program would exceed the infiltration system's capacity and require one or more additional off-site groundwater disposal sites or water reuse options.

As described in the SEIR, approximately 67% of the treated wastewater effluent from the Tri-Town site will discharge to Namskaket Marsh, 9% will discharge to Little Namskaket Marsh and approximately 25% will discharge to Cape Cod Bay. The MEP Reports for the Namskaket and Little Namskaket Marsh systems indicate that these embayments have adequate assimilative capacity to prevent nitrogen overloading from the discharge of the Core Program's treated wastewater flows. The Town has concluded that the disposal of treated effluent from the Orleans WWTF will not impact local groundwater and surface water resources including existing water table mound heights and nutrient loading to both the Namskaket Marsh and Little Namskaket Marsh. The Town has committed to monitor groundwater resources around the periphery and down gradient of the Orleans WWTF site to identify any impacts on groundwater resources and coastal embayments surrounding the Town of Orleans. According to the comments received from MassDEP, this groundwater monitoring commitment will be incorporated into MassDEP's Groundwater Discharge Permit for the Orleans WWTF. CCC has indicated that the Town will be required to conduct groundwater monitoring of the Tri-Town site as part of the Town's Adaptive Management Plan as a condition of CCC's DRI approval process.

Adaptive Management Plan (AMP)

The Orleans CWMP contains an AMP that identifies a systematic process for determining the effectiveness of the early phases of Core Program construction and the need for any revisions to the Orleans CWMP before initiating later Core Program construction phases. The AMP includes a Groundwater and Surface Water Quality Monitoring Plan that identifies specific annual water quality monitoring activities to be completed by the Town for the Tri-Town Site area, sensitive coastal embayments and select freshwater ponds in Orleans. The AMP requires the Town to coordinate its ongoing water quality monitoring activities with MassDEP, CCC, and the ongoing water quality monitoring and modeling activities in Orleans being carried out by MEP, the United States Geological Survey (USGS), the Pleasant Bay Alliance, the Orleans Ponds Coalition and the Orleans Marine and Fresh Water Quality Task Force.

The AMP also requires the Town to prepare an annual TMDL Compliance Report to document the reductions in watershed nitrogen loads achieved from the Town's phased sewer construction program. MassDEP will review the TMDL Compliance Report to determine the Town's compliance with the established TDMLs included in the Orleans CWMP. The TMDL Compliance Report will also be used to identify the need to make any adjustments or mid-course corrections to the Orleans CWMP prior to initiating the next phase of project construction. The annual TMDL Compliance Report will be distributed to MassDEP, CCC, MEP, local area watershed associations and representatives from neighboring towns.

Comments received from the Sierra Club, Clean Water Action and others have requested that the Orleans CWMP incorporate a monitoring program to identify the presence of contaminants of emerging concern (CECs) in wastewater flows and effluent discharges at the Orleans WWTF. According to MassDEP, no regulations or policies are in place to govern the monitoring or treatment of CECs at WWTFs as this issue is currently being studied by MassDEP, the US Environmental Protection Agency (EPA) and others. MassDEP has indicated that when such CEC policies and regulations are established, they could be included in the Town's AMP for the Orleans CWMP. I ask that the Town work closely with MassDEP to ensure that the final design of the Orleans WWTF may be modified in the future to accommodate potential future opportunities for CEC monitoring and treatment.

Wetlands and Waterways

Most of Orleans' proposed Core Program sewer construction project is located within existing roadway right-of-ways. According to the information provided in the SEIR, the Town's sewer project will not directly impact BVW resources. The Town has indicated that the Core Program sewer line routes and/or pumping station locations may encroach in the 100-foot buffers

of regulated wetland resource areas and result in impacts to wetland buffer zone area. Prior to construction of projects within the resource area buffer zones, the Town will apply for wetlands related permits, in accordance with MassDEP and the Orleans Conservation Commission regulations. I anticipate that the Town will continue to examine alternatives that avoid impacts to wetland resource areas, their associated buffer zones, riverfront protection areas, and 100-year flood plain areas during permit review.

According to the SEIR, the Core program construction activities will not be located within tidelands and will not require a Chapter 91 License from MassDEP. The project may be revised as it advances to final design and permitting. In the event the project undergoes further revisions that result in the alterations to tidelands, the Town will need to contact the MEPA Office to determine if further MEPA review is required to address impacts to waterways and tidelands and if a Public Benefits Determination will be required.

Rare Species

As described in the SEIR, the Tri-Town Septage Treatment Facility site, is located within Priority Habitat for the Eastern Box Turtle (*Terrapene carolina*), the Diamond-backed Terrapin (*Malaclemys terrapin*), Salt Reedgrass (*Spartina cynosuroides*) and Mitchell's Sedge (*Carex mitchelliana*). According to NHESP's previous comments on the EENF, the construction of the Orleans WWTF will occur within mapped habitat for the Eastern Box Turtle (Terrapene carolina). The Town, in consultation with NHESP, completed an evaluation of alternative site layouts for the Orleans WWTF facility. The SEIR includes a detailed description of the Town's revised site layout for the Orleans WWTF that locates the facility's rapid infiltration beds to the northern most portion of the site and maximize the reuse of existing disturbed areas and septage facility infrastructure for wastewater treatment. According to the Town, the revised site layout will result in the permanent alteration of approximately 4.9 acres of on-site habitat and will avoid fragmentation of undisturbed habitat areas within the proposed Orleans WWTF site to avoid a 'take' of the Eastern Box Turtle. NHESP's comments on the SEIR indicate that the construction of the Orleans WWTF will create temporary disturbances from site grading and may result in more than 5 acres of impact to mapped habitat for the Eastern Box Turtle. NHESP anticipates that the Town may be able to further reduce the projects temporary impacts to habitat by revising the project's proposed site grading and re-vegetation plans.

I ask that the Town continue to work closely with NHESP and consult with the Orleans Conservation Commission during the final CWMP project design and for each phase of Core Program construction to identify necessary construction and post-construction conditions and commitments to avoid adverse impacts to resource area habitats for state-listed species that may be located within and adjacent to the Orleans WWTF site, the five local cluster system project sites and the Core program sewer collection area.

Historical/Archeological Resources

As described in the SEIR, portions of the Core Program's sewer construction work are located within the Old King's Highway Regional Historical District (OKHRHD). The Town has committed to design and construct above ground sewer pump stations located within the OKHRHD with appropriate architectural features consistent with OKHRHD standards. According to the Town, the proposed cluster wastewater treatment systems may also be located within or adjacent to areas where archaeological resources may be present. The Town has committed to complete a reconnaissance archeological survey for each of these cluster site locations. MHC recommends that the Town submit to MHC for review and comment detailed project plans for Core Program construction phase as they may become available. Detailed project plans for Core Program construction phase should also be submitted to the OKHRHD for review and comment I ask that the Town continue to work closely with MHC during final project design and prior to each successive sewer construction phase to identify opportunities to avoid, minimize and mitigate project construction impacts to historic and archeological resources in the project area.

Greenhouse Gas Emissions (GHG)

The project requires an EIR and therefore is subject to the requirements of the MEPA Greenhouse Gas Emissions Policy and Protocol ("the Policy"): http://www.mass.gov/envir/mepa/downloads/GHGPolicyRev1108.pdf . The policy requires project proponents to quantify the direct and indirect CO_2 emissions from the proposed project, including CO_2 emissions associated with the buildings & plant operations, and to compare those emissions to a project baseline, which includes no-build conditions as well as an assessment of the emissions associated with the current effective building code ("base case").

In this instance, the Town consulted with MassDEP, DOER and EPA and developed a "base case WWTF" using GHG emissions data obtained from EPA's Energy Star Portfolio Manager database for comparable WWTFs having similarly sized treatment capacities, wastewater nutrient loads and seasonal demand fluctuations. The Town's estimated GHG emissions for the Base Case WWTF is approximately 900 tons of carbon dioxide per year (CO_2/yr). The SEIR presented an evaluation of 20 GHG reduction mitigation measures associated with wastewater treatment processing, building systems and facility operation and management. The Town has committed to incorporate a number of GHG reduction measures related to Building and Process systems for the Orleans WWTF that will result in a reduction of approximately 64 tons CO_2/yr from the Base Case WWTF, a reduction of approximately 6 percent. Comments received from the Department of Energy Resources (DOER) indicate that even greater reductions may be achieved by through the use of alternative nitrogen demand technology. I encourage the Town to

consider DOER's comments. The Town also identified 11 additional GHG reduction measures including the use of on-site renewable energy (solar photovoltaic (PV), Wind Turbine) that the Town has committed to further explore during final design of the Orleans WWTF. As described in the SEIR, these 11 additional GHG reduction measures could result in a reduction of approximately 309 tons CO_2/yr (34.3%) from the Base Case WWTF. The Town should commit to continue to work closely with MassDEP and DOER during final WWTF design and permitting to identify and incorporate appropriate energy efficiency measures into the buildings, treatment processes and operations for the Orleans WWTF. MassDEP has indicated that it will work with the Town to incorporate these GHG reduction measures through its project financing and permitting authority. Upon completion of the construction of the Orleans WWTF, the Town should provide a certification to the MEPA Office signed by an appropriate professional (e.g., engineer, architect, general contractor) indicating that the all of the GHG mitigation measures committed to by the Town as described in the SEIR and this section of the Certificate that collectively will reduce Building and Process systems GHG Emissions for the proposed project by at least 6 percent have been incorporated into the Orleans WWTF project. This certification should be supported by as-built plans. For those measures that are operational in nature (i.e. TDM, recycling) the Town should provide an updated plan identifying the measures, the schedule for implementation and how progress towards achieving the measures will be obtained. MassDEP should incorporate this self-certification requirement into its Section 61 finding for this project.

Sewering and Growth Management

The SEIR includes a discussion of potential land use control mechanisms to limit unwanted secondary growth related to the construction of the Town's Core Program sewer project. The Orleans Board of Health adopted its Nutrient Management Regulation in 2008 restricting wastewater flow to 110 gpd per 10,000 sf of lot area for new development or expansion of existing development. The Town is proposing to implement a 'flow-neutral' Sewer Use Regulation to be administered through the Orleans Board of Health, which would limit the redevelopment of existing properties by restricting the amount of additional wastewater flow/nitrogen load from the redeveloped property to the amount of wastewater flow from the property to what is allowed under Title 5 and local zoning. The Town is also proposing to adopt Section 1A of the Chapter 83 of the Massachusetts General Laws to enable the Town to implement a "checkerboard" sewer connection bylaw that will allow the Town to select specific lots that will be connected to the municipal sewer system and lots that do not need sewering and therefore will not be allowed to connect to the new sewer system. Lastly, the Town is also considering implementing an accelerated program of open space acquisition in nitrogen-sensitive watersheds to avoid the potential nitrogen loads from the future development of these currently undeveloped properties. The Town should adopt and implement any proposed growth by-laws, regulations, and policies prior to the construction of any new sewers.

Costs to Homeowners

As described in the SEIR/Final CWMP, the Core Program will be constructed in six phases over 15-20 years and will have an estimated capitol cost of approximately $150,000,000. The estimated operation and maintenance (O&M) costs for the Core Program total approximately $1.4 million dollars. According to the Town, construction of the Expanded Program to extend the new centralized sewer system to the remaining properties located outside of the Core program area will cost an additional $96,000,000 in capital costs. The Town proposes to recover 80% of the project's municipal debt service through user and non-user property taxation and 20% through betterment assessments to be paid by users of the sewer system. The SEIR provides average cost estimates (capital and O&M) for households connected to the Core Program sewer system ($2,592.00) and those households not connected to the Core Program sewer system ($2,544.00). According to the information provided in the SEIR, the proposed Core Program of new sewer construction may qualify for available state and/or federal loan and grant assistance including the State Revolving Fund (SRF) and the US Department of Agriculture's Rural Development Grant program thereby reducing the average cost estimates (capital and O&M) for households connected to the Core Program sewer system from $2,592.00 to $1,692.00 and those households not connected to the Core Program sewer system from $2,544.00 to $1,965.00.

Future Sewer Expansion

The Town's Core Program sewer collection system has been designed to accommodate larger wastewater flows associated with the potential future expansion of new sewers to the entire Town of Orleans (Expanded Program) and/or additional wastewater flows from the neighboring towns of Eastham and Brewster (Regional Program).

Expanded Program

Under the Expanded Program, new sewers would be extended to all of the Town of Orleans and would result in the collection and conveyance of a total of 1.14 MGD of wastewater from 5,300 individual properties for treatment at the Orleans WWTF. As mentioned elsewhere in this Certificate, additional wastewater disposal sites and/or treated effluent reuse options may be required to accommodate the disposal of the Expanded Program wastewater flows.

Regional Program

The SEIR includes a detailed discussion of potential regional approaches to address the wastewater treatment and disposal needs for the Towns of Orleans, Eastham and Brewster, and the regional issues pertaining to nutrient loading, wastewater treatment and disposal affecting the Nauset Marsh/Town Cove and Pleasant Bay coastal embayments.

According to the comments received from the Town of Eastham, Eastham recently completed its wastewater planning study and identified as its preferred alternative a regional wastewater treatment option with the Town of Orleans involving the conveyance of a portion of Eastham's wastewater flows from the Nauset/Town Cove/Rock Harbor Watersheds to the Orleans WWTF for treatment and disposal. The Town of Eastham has expressed an interest in working with the Town of Orleans to identify opportunities for constructing its sewer connection to the Orleans WWTF in the early phases of Orleans' Core Program construction.

The SEIR indentifies a number of options for a regional wastewater treatment approach with the Town of Brewster including the conveyance of a portion of Brewster's wastewater flows from the Pleasant Bay Watershed to the Orleans WWTF for treatment and disposal and/or locating a new satellite WWTF in the Town of Brewster to treat a portion of Orleans' and Brewster' wastewater flows from the Pleasant Bay Watershed. As described in the comments received from the Town of Brewster on the SEIR, Brewster has recently initiated efforts to complete an Integrated Water Resources Management Plan. As part of its planning process, the Town of Brewster has expressed a desire to continue to work with the Town of Orleans, MassDEP and others to address regional water and wastewater management issues affecting their shared watersheds and coastal embayments.

I ask the Towns of Orleans, Eastham and Brewster work closely together with MassDEP and CCC and others including the Pleasant Bay Resource Management Alliance and the Cape Cod Water Protection Collaborative to continue the discussion of possible opportunities to integrate the Town of Orleans' wastewater treatment planning efforts with the water and wastewater management planning efforts being undertaken by the Towns of Eastham and Brewster.

Construction Impacts

The construction period will be the major source of impacts from the project, including impacts from earth moving, impacts to vegetation, potential impacts from erosion and sedimentation, traffic impacts on adjacent roadways, and impacts to adjacent land uses. Construction period impacts and mitigation measures have been described in the SEIR, including impacts from noise and dust, impacts on trees and other vegetation, and traffic impacts. This section of the SEIR includes a discussion of measures that will be taken by the Town to minimize and mitigate construction period impacts (in particular impacts on sensitive receptors or exceptional resources). Given the availability of Ultra Low Sulfur Diesel (ULSD) fuel and the requirements for off-road engines in 2010, the construction equipment for the project should operate on ULSD fuel to reduce emissions of fine particulate matter. The Town should consult with MassDEP to discuss additional construction period diesel mitigation measures. I strongly encourage the Town to commit to using lower emission equipment in addition to requiring its contractors to retrofit diesel-powered equipment with emissions controls, such as particulate filters or traps, and use low-sulfur diesel fuel. The Town should require its contractors to use

On-Road Low Sulfur Diesel (LSD) fuel in their off-road construction equipment which can increase the removal of particulate matter (PM) by approximately 25% beyond that which can be removed by retrofitting diesel-powered equipment. All construction-related refueling and equipment maintenance activities should be conducted under cover on impervious surface areas with containment, and outside of any wetlands resource areas, endangered species habitat areas, residential areas and wellhead protection areas.

The Town should develop and enforce a spills contingency plan to address potential releases of oil and/or hazardous materials from pre and post construction activities as recommended by MassDEP. To the extent feasible, existing access routes within the ROW will be used for construction access. In areas where access roads do not exist, the Proponent will construct temporary access roads along existing land contours to minimize grading requirements for construction vehicle access. Best Management Practices (BMPs) that will be implemented during construction include the use of swamp mats and erosion control barriers, and a Stormwater Pollution Prevention Plan.

Mitigation and Section 61 Findings

The SEIR includes a separate chapter on mitigation measures and proposed Section 61 Findings for all state permits and approvals required for the project. This section of the SEIR provides a description of the Town's proposed mitigation plan, and discusses the value of the proposed mitigation in terms of the resources it provides and the opportunities for open space protection, and active and/or passive recreation it affords. Final Section 61 Findings will be prepared by state agencies issuing permits for this project and will include conditions considered binding upon the Proponent as mitigation commitments. State agencies and the Town should forward final copies of Section 61 Findings to the MEPA Office for the project file and for notice in the Environmental Monitor. I ask the Town to continue to work closely with MassDEP, CCC and the Pleasant Bay Resource Management Alliance to design and implement a sustainable Comprehensive Wastewater Facilities Plan and mitigation plan for the Town of Orleans that will help to offset the proposed project's municipal sewering impacts.

Conclusion

After a thorough consideration of the comments received from MassDEP and others, I am satisfied that any outstanding design issues relating to sewer layout and construction phasing will be fully considered and addressed during state and local permitting. As noted elsewhere in this Certificate, the Town should continue to work closely with MassDEP, NHESP and MHC during final project design.

January 28, 2011

c. Signed and Stamped by

Sep 01, 2022
d. Final Revision Date

Variable, as noted
e. Scale

f. Additional Plan or Document Title

g. Date

B. Findings

1. Findings pursuant to the Massachusetts Wetlands Protection Act:

Following the review of the above-referenced Notice of Intent and based on the information provided in this application and presented at the public hearing, this Commission finds that the areas in which work is proposed is significant to the following interests of the Wetlands Protection Act (the Act). Check all that apply:

[X]	a. Public Water Supply	[ ]	b. Land Containing Shellfish	[X]	c. Prevention of Pollution
[X]	d. Private Water Supply	[ ]	e. Fisheries	[ ]	f. Protection of Wildlife Habitat
[X]	g. Groundwater Supply	[ ]	h. Storm Damage Prevention	[ ]	i. Flood Control

2. This Commission hereby finds the project, as proposed, is: (check one of the following boxes)

Approved subject to:

[X] a. the following conditions which are necessary in accordance with the performance standards set forth in the wetlands regulations. This Commission orders that all work shall be performed in accordance with the Notice of Intent referenced above, the following General Conditions, and any other special conditions attached to this Order. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, these conditions shall control.

B. Findings (cont.)

Denied because:

☐ b. the proposed work cannot be conditioned to meet the performance standards set forth in the wetland regulations. Therefore, work on this project may not go forward unless and until a new Notice of Intent is submitted which provides measures which are adequate to protect the interests of the Act, and a final Order of Conditions is issued. A description of the performance standards which the proposed work cannot meet is attached to this Order.

☐ c. the information submitted by the applicant is not sufficient to describe the site, the work, or the effect of the work on the interests identified in the Wetlands Protection Act. Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides sufficient information and includes measures which are adequate to protect the Act's interests, and a final Order of Conditions is issued. A description of the specific information which is lacking and why it is necessary is attached to this Order as per 310 CMR 10.05(6)(c)

☒ 3. Buffer Zone Impacts: Shortest distance between limit of project disturbance and the wetland resource area specified in 310 CMR 10.02(1) — <1' a. linear feet

Inland Resource Area Impacts: Check all that apply below. (For Approvals Only)

Resource Area	Proposed Alteration	Permitted Alteration	Proposed Replacement	Permitted Replacement
☐ 4. Bank	a. linear feet	b. linear feet	c. linear feet	d. linear feet
☐ 5. Bordering Vegetated Wetland	a. square feet	b. square feet	c. square feet	d. square feet

	Sq ft between 100-200 ft	g. square feet	h. square feet	i. square feet	j. square feet

B. Findings (cont.)

* **#23.** If the project is for the purpose of restoring or enhancing a wetland resource area in addition to the square footage that has been entered in Section B.5.c (BVW) or B.17.c (Salt Marsh) above, please enter the additional amount here.

☐ 23. Restoration/Enhancement *:

a. square feet of BVW

b. square feet of salt marsh

☐ 24. Stream Crossing(s):

a. number of new stream crossings

b. number of replacement stream crossings

C. General Conditions Under Massachusetts Wetlands Protection Act

The following conditions are only applicable to Approved projects.

1. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Order.
2. The Order does not grant any property rights or any exclusive privileges; it does not authorize any injury to private property or invasion of private rights.
3. This Order does not relieve the permittee or any other person of the necessity of complying with all other applicable federal, state, or local statutes, ordinances, bylaws, or regulations.
4. The work authorized hereunder shall be completed within three years from the date of this Order unless either of the following apply:
   a. The work is a maintenance dredging project as provided for in the Act; or
   b. The time for completion has been extended to a specified date more than three years, but less than five years, from the date of issuance. If this Order is intended to be valid for more than three years, the extension date and the special circumstances warranting the extended time period are set forth as a special condition in this Order.
   c. If the work is for a Test Project, this Order of Conditions shall be valid for no more than one year.
5. This Order may be extended by the issuing authority for one or more periods of up to three years each upon application to the issuing authority at least 30 days prior to the expiration date of the Order. An Order of Conditions for a Test Project may be extended for one additional year only upon written application by the applicant, subject to the provisions of 310 CMR 10.05(11)(f).
6. If this Order constitutes an Amended Order of Conditions, this Amended Order of Conditions does not extend the issuance date of the original Final Order of Conditions and the **Order will expire on Oct 19, 2025** unless extended in writing by the Department.
7. Any fill used in connection with this project shall be clean fill. Any fill shall contain no trash, refuse, rubbish, or debris, including but not limited to lumber, bricks, plaster, wire, lath, paper, cardboard, pipe, tires, ashes, refrigerators, motor vehicles, or parts of any of the foregoing.

C. General Conditions Under Massachusetts Wetlands Protection Act

8. This Order is not final until all administrative appeal periods from this Order have elapsed, or if such an appeal has been taken, until all proceedings before the Department have been completed.

9. No work shall be undertaken until the Order has become final and then has been recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land upon which the proposed work is to be done. In the case of the registered land, the Final Order shall also be noted on the Land Court Certificate of Title of the owner of the land upon which the proposed work is done. The recording information shall be submitted to the Conservation Commission on the form at the end of this Order, which form must be stamped by the Registry of Deeds, prior to the commencement of work.

10. A sign shall be displayed at the site not less than two square feet or more than three square feet in size bearing the words,

"Massachusetts Department of Environmental Protection" [or, "MassDEP"]

"File Number 054-2596 "

11. Where the Department of Environmental Protection is requested to issue a Superseding Order, the Conservation Commission shall be a party to all agency proceedings and hearings before MassDEP.

12. Upon completion of the work described herein, the applicant shall submit a Request for Certificate of Compliance (WPA Form 8A) to the Conservation Commission.

13. The work shall conform to the plans and special conditions referenced in this order.

14. Any change to the plans identified in Condition #13 above shall require the applicant to inquire of the Conservation Commission in writing whether the change is significant enough to require the filing of a new Notice of Intent.

15. The Agent or members of the Conservation Commission and the Department of Environmental Protection shall have the right to enter and inspect the area subject to this Order at reasonable hours to evaluate compliance with the conditions stated in this Order, and may require the submittal of any data deemed necessary by the Conservation Commission or Department for that evaluation.

16. This Order of Conditions shall apply to any successor in interest or successor in control of the property subject to this Order and to any contractor or other person performing work conditioned by this Order.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

17. Prior to the start of work, and if the project involves work adjacent to a Bordering Vegetated Wetland, the boundary of the wetland in the vicinity of the proposed work area shall be marked by wooden stakes or flagging. Once in place, the wetland boundary markers shall be maintained until a Certificate of Compliance has been issued by the Conservation Commission.

18. All sedimentation barriers shall be maintained in good repair until all disturbed areas have been fully stabilized with vegetation or other means. At no time shall sediments be deposited in a wetland or water body. During construction, the applicant or his/her designee shall inspect the erosion controls on a daily basis and shall remove accumulated sediments as needed. The applicant shall immediately control any erosion problems that occur at the site and shall also immediately notify the Conservation Commission, which reserves the right to require additional erosion and/or damage prevention controls it may deem necessary. Sedimentation barriers shall serve as the limit of work unless another limit of work line has been approved by this Order.

19. The work associated with this Order (the "Project")

[X] (1) is subject to the Massachusetts Stormwater Standards

[ ] (2) is NOT subject to the Massachusetts Stormwater Standards

If the work is subject to the Stormwater Standards, then the project is subject to the following conditions:

a) All work, including site preparation, land disturbance, construction and redevelopment, shall be implemented in accordance with the construction period pollution prevention and erosion and sedimentation control plan and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollution Discharge Elimination System Construction General Permit as required by Stormwater Condition 8. Construction period erosion, sedimentation and pollution control measures and best management practices (BMPs) shall remain in place until the site is fully stabilized.

b) No stormwater runoff may be discharged to the post-construction stormwater BMPs unless and until a Registered Professional Engineer provides a Certification that:

i. all construction period BMPs have been removed or will be removed by a date certain specified in the Certification. For any construction period BMPs intended to be converted to post construction operation for stormwater attenuation, recharge, and/or treatment, the conversion is allowed by the MassDEP Stormwater Handbook BMP specifications and that the BMP has been properly cleaned or prepared for post construction operation, including removal of all construction period sediment trapped in inlet and outlet control structures;

ii. as-built final construction BMP plans are included, signed and stamped by a Registered Professional Engineer, certifying the site is fully stabilized;

iii. any illicit discharges to the stormwater management system have been removed, as per the requirements of Stormwater Standard 10;

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

iv. all post-construction stormwater BMPs are installed in accordance with the plans (including all planting plans) approved by the issuing authority, and have been inspected to ensure that they are not damaged and that they are in proper working condition;

v. any vegetation associated with post-construction BMPs is suitably established to withstand erosion.

c) The landowner is responsible for BMP maintenance until the issuing authority is notified that another party has legally assumed responsibility for BMP maintenance. Prior to requesting a Certificate of Compliance, or Partial Certificate of Compliance, the responsible party (defined in General Condition 18(e)) shall execute and submit to the issuing authority an Operation and Maintenance Compliance Statement ("O&M Statement) for the Stormwater BMPs identifying the party responsible for implementing the stormwater BMP Operation and Maintenance Plan ("O&M Plan") and certifying the following:

i.) the O&M Plan is complete and will be implemented upon receipt of the Certificate of Compliance, and

ii.) the future responsible parties shall be notified in writing of their ongoing legal responsibility to operate and maintain the stormwater management BMPs and implement the Stormwater Pollution Prevention Plan.

d) Post-construction pollution prevention and source control shall be implemented in accordance with the long-term pollution prevention plan section of the approved Stormwater Report and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollution Discharge Elimination System Multi-Sector General Permit.

e) Unless and until another party accepts responsibility, the landowner, or owner of any drainage easement, assumes responsibility for maintaining each BMP. To overcome this presumption, the landowner of the property must submit to the issuing authority a legally binding agreement of record, acceptable to the issuing authority, evidencing that another entity has accepted responsibility for maintaining the BMP, and that the proposed responsible party shall be treated as a permittee for purposes of implementing the requirements of Conditions 18(f) through 18(k) with respect to that BMP. Any failure of the proposed responsible party to implement the requirements of Conditions 18(f) through 18(k) with respect to that BMP shall be a violation of the Order of Conditions or Certificate of Compliance. In the case of stormwater BMPs that are serving more than one lot, the legally binding agreement shall also identify the lots that will be serviced by the stormwater BMPs. A plan and easement deed that grants the responsible party access to perform the required operation and maintenance must be submitted along with the legally binding agreement.

f) The responsible party shall operate and maintain all stormwater BMPs in accordance with the design plans, the O&M Plan, and the requirements of the Massachusetts Stormwater Handbook.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

g) The responsible party shall:
1. Maintain an operation and maintenance log for the last three (3) consecutive calendar years of inspections, repairs, maintenance and/or replacement of the stormwater management system or any part thereof, and disposal (for disposal the log shall indicate the type of material and the disposal location);
2. Make the maintenance log available to MassDEP and the Conservation Commission ("Commission") upon request; and
3. Allow members and agents of the MassDEP and the Commission to enter and inspect the site to evaluate and ensure that the responsible party is in compliance with the requirements for each BMP established in the O&M Plan approved by the issuing authority.

h) All sediment or other contaminants removed from stormwater BMPs shall be disposed of in accordance with all applicable federal, state, and local laws and regulations.

i) Illicit discharges to the stormwater management system as defined in 310 CMR 10.04 are prohibited.

j) The stormwater management system approved in the Order of Conditions shall not be changed without the prior written approval of the issuing authority.

k) Areas designated as qualifying pervious areas for the purpose of the Low Impact Site Design Credit (as defined in the MassDEP Stormwater Handbook, Volume 3, Chapter 1, Low Impact Development Site Design Credits) shall not be altered without the prior written approval of the issuing authority.

l) Access for maintenance, repair, and/or replacement of BMPs shall not be withheld. Any fencing constructed around stormwater BMPs shall include access gates and shall be at least six inches above grade to allow for wildlife passage.

Special Conditions (if you need more space for additional conditions, please attach a text document):

This Order is subject to the Standard Conditions on all Orders dated 11/1/18 and the completion of the Acknowledgment of Contractor Form.

20. For Test Projects subject to 310 CMR 10.05(11), the applicant shall also implement the monitoring plan and the restoration plan submitted with the Notice of Intent. If the conservation commission or Department determines that the Test Project threatens the public health, safety or the environment, the applicant shall implement the removal plan submitted with the Notice of Intent or modify the project as directed by the conservation commission or the Department.

D. Findings Under Municipal Wetlands Bylaw or Ordinance

1. Is a municipal wetlands bylaw or ordinance applicable? ☒ Yes ☐ No

2. The Town of Orleans hereby finds (check one that applies):
   Conservation Commission

   ☐ a. that the proposed work cannot be conditioned to meet the standards set forth in a municipal ordinance or bylaw, specifically:

   _____ _____
   1. Municipal Ordinance or Bylaw 2. Citation

   Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides measures which are adequate to meet these standards, and a final Order of Conditions is issued.

   ☒ b. that the following additional conditions are necessary to comply with a municipal ordinance or bylaw:

   Orleans Wetlands Bylaw/Regulations Ch 160/196A
   1. Municipal Ordinance or Bylaw 2. Citation

3. The Commission orders that all work shall be performed in accordance with the following conditions and with the Notice of Intent referenced above. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, the conditions shall control.

   The special conditions relating to municipal ordinance or bylaw are as follows (if you need more space for additional conditions, attach a text document):

   This Order is subject to the Standard Conditions on all Orders dated 11/1/18 and the completion of the Acknowledgment of Contractor Form:

E. Signatures

This Order is valid for three years, unless otherwise specified as a special condition pursuant to General Conditions #4, from the date of issuance.

10/19/22
1. Date of Issuance

Please indicate the number of members who will sign this form.
This Order must be signed by a majority of the Conservation Commission.

6
2. Number of Signers

The Order must be mailed by certified mail (return receipt requested) or hand delivered to the applicant. A copy also must be mailed or hand delivered at the same time to the appropriate Department of Environmental Protection Regional Office, if not filing electronically, and the property owner, if different from applicant.

Signatures:

☒ by hand delivery on
10/19/22
Date

☐ by certified mail, return receipt requested, on
Date

F. Appeals

The applicant, the owner, any person aggrieved by this Order, any owner of land abutting the land subject to this Order, or any ten residents of the city or town in which such land is located, are hereby notified of their right to request the appropriate MassDEP Regional Office to issue a Superseding Order of Conditions. The request must be made by certified mail or hand delivery to the Department, with the appropriate filing fee and a completed Request for Departmental Action Fee Transmittal Form, as provided in 310 CMR 10.03(7) within ten business days from the date of issuance of this Order. A copy of the request shall at the same time be sent by certified mail or hand delivery to the Conservation Commission and to the applicant, if he/she is not the appellant.

Any appellants seeking to appeal the Department's Superseding Order associated with this appeal will be required to demonstrate prior participation in the review of this project. Previous participation in the permit proceeding means the submission of written information to the Conservation Commission prior to the close of the public hearing, requesting a Superseding Order, or providing written information to the Department prior to issuance of a Superseding Order.

The request shall state clearly and concisely the objections to the Order which is being appealed and how the Order does not contribute to the protection of the interests identified in the Massachusetts Wetlands Protection Act (M.G.L. c. 131, § 40), and is inconsistent with the wetlands regulations (310 CMR 10.00). To the extent that the Order is based on a municipal ordinance or bylaw, and not on the Massachusetts Wetlands Protection Act or regulations, the Department has no appellate jurisdiction.

G. Recording Information

Prior to commencement of work, this Order of Conditions must be recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land subject to the Order. In the case of registered land, this Order shall also be noted on the Land Court Certificate of Title of the owner of the land subject to the Order of Conditions. The recording information on this page shall be submitted to the Conservation Commission listed below.

FINDINGS AND STANDARD CONDITIONS ON ALL ORDERS, AS APPLICABLE
In accordance with M.G.L. Chapter 131, Section 40 and the Orleans Wetlands Protection Bylaw, Ch160

DEP #: 054-2596
Applicant: John Kelly

The Commission finds that, the Applicant, through the Public Hearing, has presented to the Commission clear and convincing evidence and was able to demonstrate that all State and Local Wetland Interests will be protected, the Commission hereby approves the project with the issuance of this Order and all of its protective Conditions.

---

1. Preface: Failure to comply with all conditions of this Order of Conditions may result in the following: Stop Work Order, Fines, or the inability to obtain a Certificate of Compliance.

2. Recording: No work shall be undertaken until the Order has been recorded in compliance with General Condition #9 (page 6) of this Order and proof of such recording has been submitted to this Commission.

3. Acknowledgement of Contractor: No work may proceed until the Commission is provided with an executed Acknowledgement of Contractor form proving that these Orders have been reviewed and received by such Contractor and that the Contractor understands the Order and all Conditions. The Contractor shall furnish any sub-contractor with a copy of this Order. The approved Contractor must monitor their work throughout the project to ensure its success and establishment. If he/she is unable to continue with the project, the new contractor must meet with the Conservation Commission or their Administrator for approval before commencing work under the Order.

4. Other Permits: No work may proceed until the Applicant has received all other permits required by law, (i.e. building permit, Board of Health, Planning Board, Board of Appeals, Army Corps of Engineers, etc.)

5. Appeals: No work shall be undertaken until all administrative appeal periods from this Order have elapsed or, if such an appeal has been filed, until all appeal proceedings have been completed.

6. Transfer of Ownership: If the Applicant transfers the interests authorized herein by conveyance of realty, the deed shall reference this Order and the terms and Conditions specified herein, and this Order shall be recorded along with the deed.

7. Term: ***This Order is valid for three (3) years.*** Application for an Extension must be submitted, ***in writing, thirty (30) days prior to the date of its expiration.***

8. Certificae of Compliance: ***Upon completion of the work permitted by this Order, or the expiration of this Order, a Certificate of Compliance shall be requested from the Commission in writing.*** Where a project has been completed in accordance with plans stamped by a professional engineer, architect, or other qualified professional, a written statement by such professional certifying compliance with the plans and Orders, shall accompany the request for the Certificate of Compliance. Please note the request should accompany the appropriate completed DEP form and Town of Orleans fee.

9. Approved Plans: ***A copy of this Order of Conditions and all approved plans shall be kept on site at all times during construction.*** All contractors and sub-contractors retained during construction must be provided with a copy of this Order and subsequent plans by the Applicant and should be prepared to produce the Order along with approved plans and supporting documents, upon request of the Conservation Commission. ***No deviations from the plans are allowed herein without prior Commission approval.*** All notes on the approved plans herein are adopted as additional conditions of this Order unless otherwise stated, except that where the Commission's Orders are more restrictive, they shall apply.

10. DEP Signage: A visible sign shall be displayed at the site, not less than two (2) square feet or more than three (3) square feet in size bearing the words "Massachusetts Department of Environmental Protection SE 54-" or "MA DEP SE 54-". Said sign is to remain in place until a Certificate of Compliance has been issued.

11. Silt Fence: If need is determined by the Commission, a continuous, securely staked fabric sedimentation barrier or other erosion control measures shall be installed along the Limit of Work and/or the access route as shown on the approved plan. ***Five (5) days prior to construction, notice shall be given to the Conservation office that all sedimentation controls or other markings required by these Orders are in place and ready for inspection by the Conservation Administrator.*** Properly installed sedimentation controls shall remain in place and be maintained throughout construction until the site is stabilized with vegetation and its removal has been permitted by the Commission or its Administrator.
Additional erosion control measures may be required during construction activity, if needed, at the Commission or its Administrator's discretion.

12. Limit of Work: The Limit of Work as shown on the plan shall be clearly marked by stakes or by installation of a sedimentation barrier/silt fence, and be inspected and approved by the Commission or its Administrator prior to commencement of construction, and shall remain in place and in good order until all disturbed areas have been revegetated. ***No work shall take place within the buffer zone or resource area outside the Limit of Work as marked on the plan without further approval by the Commission or its Administrator.***

13. Excavated Materials: All excess excavated materials shall be stockpiled per approved plan and as far from the resource area as possible. Excess materials shall be removed from the site upon completion of grading/construction. In no event shall excavated materials or additional materials brought on the site be stock piled less than 25' from the edge of a wetland or resource area unless approved by the Commission for special purposes.

14. Fertilizer Use: No fertilizer is permitted within 100' of a Resource Area per Town of Orleans General By-Law Chapter 103. If lawn and/or shrub fertilizers are used, in accordance with the exemptions allowed under Chapter 103, extreme care must be exercised to avoid contamination into the wetlands or groundwater.

15. Roof Runoff: Gutters and downspouts to drywells, or stone trenches at the roof drip line, are to be utilized to contain roof runoff. Drywell capacity should be able to accommodate a 2" rainfall in a 24-hour period. The size and location of the drywells shall be identified on the plan.

16. Vegetation Mitigation: All areas disturbed during construction are to be revegetated with suitable native plant materials according to the approved plans. Revegetation shall commence immediately upon completion of construction, unless otherwise addressed by an approved land management or landscape plan, and is to be completed by the beginning of the first growing season following completion of construction. Planting plans must be completed as part of this Order. Plants will be placed to ensure good coverage for the type and size of plant. More plants may be required than are shown on the planting plan and plants installed will be maintained and replaced until they have survived. Said vegetation and plants shall be successfully established, through multiple growing seasons, before a Certificate of Compliance can be granted.

17. Right of Entry: The Conservation Commission and/or its Administrator shall have the right of entry, during the period of the open Order, to inspect the property to determine and evaluate compliance with the provisions of this Order.

18. Violations: Failure to comply with any Conditions set forth herein shall be deemed a violation and good cause, after notice and an opportunity to be heard, to revoke or modify this Order, to impose fines of up to $300 per day per violation, to impose a stop work Order, or to require mitigation or such other measures as are legally justified. ***Owners, contractors, and sub-contractors will be liable for any violation of these Orders.***

In issuing these Orders, the Commission has relied on the information and data provided by the Applicant. If, subsequent to the issuance of this Order, such information and data prove to be false, incomplete, or inaccurate, this Order may be modified or revoked in whole or in part and the Commission may institute appropriate legal proceedings.

Town of Orleans
Conservation Commission

Town Hall
19 School Road
Orleans, Massachusetts 02653-3699
t: (508) 240-3700 ext 2425
f: (508) 240-3388

APPLICANT: John Kelly

DEP #: 054-2596

Attn:Homeowner and Engineer:

The Standard Conditions on all Orders issued by the Conservation Commission make it clear that no deviations from the approved Plan are to be permitted without prior Commission approval and that a silt fence on the limit of work must remain securely staked and in **good condition** throughout the project. Failure to comply with these conditions will subject the homeowner and contractors to fines of $300 per day.

The purpose of this notice is to make sure that you, any subsequent owners, all engineers and all contractors are made aware of these conditions. The property owner will bear the ultimate responsibility for compliance, so please be sure that any deviations from approved Plans are brought to the attention of the Conservation Commission before any work commences.

Accordingly, your contractor(s) should read the statement below and return a signed copy of this notice to the Orleans Conservation Commission at the address shown above before any work on this project is undertaken.

Acknowledgment of Contractor(s):

I have read the attached Order of Conditions and noted Standard Condition #6, "No deviations from the Plan approved herein or from these Orders are permitted without prior Commission approval" and #9, "A continuous securely staked fabric sedimentation barrier or other erosion control measures shall be installed along this work limit or the access route as shown on the Plan."

John Jannell, Conservation Administrator
Town of Orleans Conservation Commission
Orleans Town Hall
19 School Road
Orleans, MA 02653

SUBJECT: NOTICE OF INTENT
Meetinghouse Pond Area Collection System and Pumping Station
Orleans, Massachusetts

Dear Mr. Jannell:

On behalf of our client, the Town of Orleans, AECOM respectfully submits the enclosed Notice of Intent (NOI) for the Meetinghouse Pond Area Collection System and Pumping Station Project. Per your instructions, we are enclosing 14 copies of the NOI including narrative, associated figures, and plans. We have also provided a digital copy and are concurrently notifying abutters by certified mail, return receipt requested.

The enclosed NOI regards installation of Meetinghouse Pond Area proposed gravity sewers, low-pressure sewers, and force main. A portion of the proposed sewers and force main are located within Coastal Bank, Land Subject to Coastal Storm Flowage, or buffer zones. No permanent impacts are anticipated as all work is proposed within paved or gravel roads, which will be restored to existing conditions after pipeline installation. Temporary impacts are unavoidable due to the need to locate the sewers at the low topographic point in the service area in order to collect sewage flow by gravity, and then convey it to the WWTP via a force main connecting to the previously installed Phase I collection system.

We look forward to discussing the project with the Conservation Commission members at the hearing on October 18th. If there are any questions or additional information needs prior to the hearing and site visit, please feel free to contact me at (978) 905-2968 or Jennifer.Doyle-Breen@AECOM.com.

Sincerely,

Jennifer Doyle-Breen
Associate Vice President

A. General Information (continued)

6. General Project Description:

The proposed project that includes the construction of service connections, a combination of gravity sewers and low-pressure sewers, a force main, and a sewage pumping station to service the Meetinghouse Pond area. Please see attached Project Narrative for further details.

7a. Project Type Checklist: (Limited Project Types see Section A. 7b.)

1. ☐ Single Family Home
2. ☐ Residential Subdivision
3. ☐ Commercial/Industrial
4. ☐ Dock/Pier
5. ☒ Utilities
6. ☐ Coastal engineering Structure
7. ☐ Agriculture (e.g., cranberries, forestry)
8. ☐ Transportation
9. ☐ Other

7b. Is any portion of the proposed activity eligible to be treated as a limited project (including Ecological Restoration Limited Project) subject to 310 CMR 10.24 (coastal) or 310 CMR 10.53 (inland)?

1. ☒ Yes ☐ No

If yes, describe which limited project applies to this project. (See 310 CMR 10.24 and 10.53 for a complete list and description of limited project types)

310 CMR 10.24(7)(b) and 10.53(3)(d): The construction, reconstruction, operation or maintenance of sewer lines.

If the proposed activity is eligible to be treated as an Ecological Restoration Limited Project (310 CMR10.24(8), 310 CMR 10.53(4)), complete and attach Appendix A: Ecological Restoration Limited Project Checklist and Signed Certification.

8. Property recorded at the Registry of Deeds for:

a. County	b. Certificate # (if registered land)
Barnstable	
c. Book	**d. Page Number**
Please see Attachment D	

B. Buffer Zone & Resource Area Impacts (temporary & permanent)

1. ☐ Buffer Zone Only – Check if the project is located only in the Buffer Zone of a Bordering Vegetated Wetland, Inland Bank, or Coastal Resource Area.
2. ☐ Inland Resource Areas (see 310 CMR 10.54-10.58; if not applicable, go to Section B.3, Coastal Resource Areas).

Check all that apply below. Attach narrative and any supporting documentation describing how the project will meet all performance standards for each of the resource areas altered, including standards requiring consideration of alternative project design or location.

B. Buffer Zone & Resource Area Impacts (temporary & permanent) (cont'd)

For all projects affecting other Resource Areas, please attach a narrative explaining how the resource area was delineated.

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
a. ☐ Bank	1. linear feet	2. linear feet
b. ☐ Bordering Vegetated Wetland	1. square feet	2. square feet
c. ☐ Land Under Waterbodies and Waterways	1. square feet 3. cubic yards dredged	2. square feet

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
d. ☐ Bordering Land Subject to Flooding	1. square feet	2. square feet
	3. cubic feet of flood storage lost	4. cubic feet replaced
e. ☐ Isolated Land Subject to Flooding	1. square feet	
	2. cubic feet of flood storage lost	3. cubic feet replaced
f. ☐ Riverfront Area	1. Name of Waterway (if available) - **specify coastal or inland**	

2. Width of Riverfront Area (check one):

   ☐ 25 ft. - Designated Densely Developed Areas only

   ☐ 100 ft. - New agricultural projects only

   ☐ 200 ft. - All other projects

3. Total area of Riverfront Area on the site of the proposed project: _____ square feet

4. Proposed alteration of the Riverfront Area:

   a. total square feet _____ b. square feet within 100 ft. _____ c. square feet between 100 ft. and 200 ft. _____

5. Has an alternatives analysis been done and is it attached to this NOI? ☐ Yes ☐ No

6. Was the lot where the activity is proposed created prior to August 1, 1996? ☐ Yes ☐ No

3. ☒ Coastal Resource Areas: (See 310 CMR 10.25-10.35)

Note: for coastal riverfront areas, please complete **Section B.2.f**. above.

B. Buffer Zone & Resource Area Impacts (temporary & permanent) (cont'd)

Check all that apply below. Attach narrative and supporting documentation describing how the project will meet all performance standards for each of the resource areas altered, including standards requiring consideration of alternative project design or location.

Online Users: Include your document transaction number (provided on your receipt page) with all supplementary information you submit to the Department.

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
a. ☐ Designated Port Areas	Indicate size under Land Under the Ocean, below	
b. ☐ Land Under the Ocean	1. square feet 2. cubic yards dredged	
c. ☐ Barrier Beach	Indicate size under Coastal Beaches and/or Coastal Dunes below	
d. ☐ Coastal Beaches	1. square feet	2. cubic yards beach nourishment
e. ☐ Coastal Dunes	1. square feet	2. cubic yards dune nourishment

Resource Area	Size of Proposed Alteration	Proposed Replacement (if any)
f. ☒ Coastal Banks	1580 1. linear feet	
g. ☐ Rocky Intertidal Shores	1. square feet	
h. ☐ Salt Marshes	1. square feet	2. sq ft restoration, rehab., creation
i. ☐ Land Under Salt Ponds	1. square feet 2. cubic yards dredged	
j. ☐ Land Containing Shellfish	1. square feet	
k. ☐ Fish Runs	Indicate size under Coastal Banks, inland Bank, Land Under the Ocean, and/or inland Land Under Waterbodies and Waterways, above 1. cubic yards dredged	
l. ☒ Land Subject to Coastal Storm Flowage	23,000 1. square feet	

4. ☐ Restoration/Enhancement
If the project is for the purpose of restoring or enhancing a wetland resource area in addition to the square footage that has been entered in Section B.2.b or B.3.h above, please enter the additional amount here.

a. square feet of BVW

b. square feet of Salt Marsh

5. ☐ Project Involves Stream Crossings

a. number of new stream crossings

b. number of replacement stream crossings

City/Town

C. Other Applicable Standards and Requirements

☐ This is a proposal for an Ecological Restoration Limited Project. Skip Section C and complete Appendix A: Ecological Restoration Limited Project Checklists – Required Actions (310 CMR 10.11).

Streamlined Massachusetts Endangered Species Act/Wetlands Protection Act Review

1. Is any portion of the proposed project located in **Estimated Habitat of Rare Wildlife** as indicated on the most recent Estimated Habitat Map of State-Listed Rare Wetland Wildlife published by the Natural Heritage and Endangered Species Program (NHESP)? To view habitat maps, see the *Massachusetts Natural Heritage Atlas* or go to http://maps.massgis.state.ma.us/PRI_EST_HAB/viewer.htm.

   a. ☐ Yes ☐ No

   If yes, include proof of mailing or hand delivery of NOI to:

   Natural Heritage and Endangered Species Program
   Division of Fisheries and Wildlife
   1 Rabbit Hill Road
   Westborough, MA 01581

   August 2021
   b. Date of map

   If *yes*, the project is also subject to Massachusetts Endangered Species Act (MESA) review (321 CMR 10.18). To qualify for a streamlined, 30-day, MESA/Wetlands Protection Act review, please complete Section C.1.c, and include requested materials with this Notice of Intent (NOI); *OR* complete Section C.2.f, if applicable. *If MESA supplemental information is not included with the NOI, by completing Section 1 of this form, the NHESP will require a separate MESA filing which may take up to 90 days to review (unless noted exceptions in Section 2 apply, see below).*

   c. Submit Supplemental Information for Endangered Species Review*

      1. ☐ Percentage/acreage of property to be altered:

         (a) within wetland Resource Area _____ percentage/acreage

         (b) outside Resource Area _____ percentage/acreage

      2. ☐ Assessor's Map or right-of-way plan of site

2. ☐ Project plans for entire project site, including wetland resource areas and areas outside of wetlands jurisdiction, showing existing and proposed conditions, existing and proposed tree/vegetation clearing line, and clearly demarcated limits of work **

   (a) ☐ Project description (including description of impacts outside of wetland resource area & buffer zone)

   (b) ☐ Photographs representative of the site

* Some projects **not** in Estimated Habitat may be located in Priority Habitat, and require NHESP review (see https://www.mass.gov/ma-endangered-species-act-mesa-regulatory-review).
Priority Habitat includes habitat for state-listed plants and strictly upland species not protected by the Wetlands Protection Act.

** MESA projects may not be segmented (321 CMR 10.16). The applicant must disclose full development plans even if such plans are not required as part of the Notice of Intent process.

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands

WPA Form 3 – Notice of Intent

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

Provided by MassDEP:

MassDEP File Number

Document Transaction Number

City/Town

C. Other Applicable Standards and Requirements (cont'd)

(c) ☐ MESA filing fee (fee information available at https://www.mass.gov/how-to/how-to-file-for-a-mesa-project-review).
Make check payable to "Commonwealth of Massachusetts - NHESP" and ***mail to NHESP*** at above address

*Projects altering **10 or more acres** of land, also submit:*

(d) ☐ Vegetation cover type map of site

(e) ☐ Project plans showing Priority & Estimated Habitat boundaries

(f) OR Check One of the Following

1. ☐ Project is exempt from MESA review.
Attach applicant letter indicating which MESA exemption applies. (See 321 CMR 10.14, https://www.mass.gov/service-details/exemptions-from-review-for-projectsactivities-in-priority-habitat; the NOI must still be sent to NHESP if the project is within estimated habitat pursuant to 310 CMR 10.37 and 10.59.)

2. ☐ Separate MESA review ongoing. a. NHESP Tracking # b. Date submitted to NHESP

3. ☐ Separate MESA review completed.
Include copy of NHESP "no Take" determination or valid Conservation & Management Permit with approved plan.

3. For coastal projects only, is any portion of the proposed project located below the mean high water line or in a fish run?

a. ☐ Not applicable – project is in inland resource area only b. ☐ Yes ☒ No

If yes, include proof of mailing, hand delivery, or electronic delivery of NOI to either:

South Shore - Cohasset to Rhode Island border, and the Cape & Islands:

Division of Marine Fisheries -
Southeast Marine Fisheries Station
Attn: Environmental Reviewer
836 South Rodney French Blvd.
New Bedford, MA 02744
Email: dmf.envreview-south@mass.gov

North Shore - Hull to New Hampshire border:

Division of Marine Fisheries -
North Shore Office
Attn: Environmental Reviewer
30 Emerson Avenue
Gloucester, MA 01930
Email: dmf.envreview-north@mass.gov

Also if yes, the project may require a Chapter 91 license. For coastal towns in the Northeast Region, please contact MassDEP's Boston Office. For coastal towns in the Southeast Region, please contact MassDEP's Southeast Regional Office.

c. ☐ Is this an aquaculture project? d. ☐ Yes ☐ No

If yes, include a copy of the Division of Marine Fisheries Certification Letter (M.G.L. c. 130, § 57).

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands

City/Town

C. Other Applicable Standards and Requirements (cont'd)

Online Users: Include your document transaction number (provided on your receipt page) with all supplementary information you submit to the Department.

4. Is any portion of the proposed project within an Area of Critical Environmental Concern (ACEC)?

   a. ☒ Yes ☐ No If yes, provide name of ACEC (see instructions to WPA Form 3 or MassDEP Website for ACEC locations). **Note:** electronic filers click on Website.

   Pleasant Bay

   b. ACEC

5. Is any portion of the proposed project within an area designated as an Outstanding Resource Water (ORW) as designated in the Massachusetts Surface Water Quality Standards, 314 CMR 4.00?

   a. ☐ Yes ☒ No

6. Is any portion of the site subject to a Wetlands Restriction Order under the Inland Wetlands Restriction Act (M.G.L. c. 131, § 40A) or the Coastal Wetlands Restriction Act (M.G.L. c. 130, § 105)?

   a. ☐ Yes ☒ No

7. Is this project subject to provisions of the MassDEP Stormwater Management Standards?

   a. ☒ Yes. Attach a copy of the Stormwater Report as required by the Stormwater Management Standards per 310 CMR 10.05(6)(k)-(q) and check if:

      1. ☐ Applying for Low Impact Development (LID) site design credits (as described in Stormwater Management Handbook Vol. 2, Chapter 3)

      2. ☒ A portion of the site constitutes redevelopment

      3. ☐ Proprietary BMPs are included in the Stormwater Management System.

   b. ☐ No. Check why the project is exempt:

      1. ☐ Single-family house

      2. ☐ Emergency road repair

      3. ☐ Small Residential Subdivision (less than or equal to 4 single-family houses or less than or equal to 4 units in multi-family housing project) with no discharge to Critical Areas.

D. Additional Information

☐ This is a proposal for an Ecological Restoration Limited Project. Skip Section D and complete Appendix A: Ecological Restoration Notice of Intent – Minimum Required Documents (310 CMR 10.12).

Applicants must include the following with this Notice of Intent (NOI). See instructions for details.

Online Users: Attach the document transaction number (provided on your receipt page) for any of the following information you submit to the Department.

1. ☐ USGS or other map of the area (along with a narrative description, if necessary) containing sufficient information for the Conservation Commission and the Department to locate the site. (Electronic filers may omit this item.)

2. ☐ Plans identifying the location of proposed activities (including activities proposed to serve as a Bordering Vegetated Wetland [BVW] replication area or other mitigating measure) relative to the boundaries of each affected resource area.

1. Signature of Applicant

9/27/22
2. Date

3. Signature of Property Owner (if different)

4. Date

5. Signature of Representative (if any)

9/27/22
6. Date

For Conservation Commission:
Two copies of the completed Notice of Intent (Form 3), including supporting plans and documents, two copies of the NOI Wetland Fee Transmittal Form, and the city/town fee payment, to the Conservation Commission by certified mail or hand delivery.

For MassDEP:
One copy of the completed Notice of Intent (Form 3), including supporting plans and documents, one copy of the NOI Wetland Fee Transmittal Form, and a **copy** of the state fee payment to the MassDEP Regional Office (see Instructions) by certified mail or hand delivery.

Other:
If the applicant has checked the "yes" box in any part of Section C, Item 3, above, refer to that section and the Instructions for additional submittal requirements.

The original and copies must be sent simultaneously. Failure by the applicant to send copies in a timely manner may result in dismissal of the Notice of Intent.

B. Fees

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

Fee should be calculated using the following process & worksheet. ***Please see Instructions before filling out worksheet.***

Step 1/Type of Activity: Describe each type of activity that will occur in wetland resource area and buffer zone.

Step 2/Number of Activities: Identify the number of each type of activity.

Step 3/Individual Activity Fee: Identify each activity fee from the six project categories listed in the instructions.

Step 4/Subtotal Activity Fee: Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

Step 5/Total Project Fee: Determine the total project fee by adding the subtotal amounts from Step 4.

Step 6/Fee Payments: To calculate the state share of the fee, divide the total fee in half and subtract $12.50. To calculate the city/town share of the fee, divide the total fee in half and add $12.50.

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands

NOI Wetland Fee Transmittal Form

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

B. Fees (continued)

Step 1/Type of Activity	Step 2/Number of Activities	Step 3/Individual Activity Fee	Step 4/Subtotal Activity Fee

Step 5/Total Project Fee: _____

Step 6/Fee Payments:

Total Project Fee: _____ a. Total Fee from Step 5

State share of filing Fee: _____ b. 1/2 Total Fee **less $**12.50

City/Town share of filling Fee: _____ c. 1/2 Total Fee **plus** $12.50

C. Submittal Requirements

a.) Complete pages 1 and 2 and send with a check or money order for the state share of the fee, payable to the Commonwealth of Massachusetts.

Department of Environmental Protection
Box 4062
Boston, MA 02211

b.) **To the Conservation Commission:** Send the Notice of Intent or Abbreviated Notice of Intent; a **copy** of this form; and the city/town fee payment.

To MassDEP Regional Office (see Instructions): Send a copy of the Notice of Intent or Abbreviated Notice of Intent; a **copy** of this form; and a **copy** of the state fee payment. (E-filers of Notices of Intent may submit these electronically.)

Project Narrative

1.0 Introduction and Proposed Project Activities

1.1 Introduction

Excess nitrogen in the groundwater is impairing the water quality in coastal waters and estuaries in the Town of Orleans, Massachusetts. Because of this, in 2011, a comprehensive wastewater management plan (CWMP) that recommended sewer installation in approximately 60 percent of Orleans over 20 years was prepared and approved. The proposed new sewer system is being constructed in two phases that each covers a different area of Orleans: Phase 1 comprises the Downtown area and Phase 2 comprises the Meetinghouse Pond area (Attachment A, Figure 1). Phase 1 is substantially complete.

Phase 1 consisted of construction of a combination of gravity sewers and low-pressure sewers to service the Downtown area, construction of force mains, three sewage pumping stations, and a WWTF, and installation of the effluent disposal system. A Notice of Intent (NOI) application package was filed on August 28, 2019 for the Phase 1 portion of the project and the Conservation Commission issued an order of conditions on September 18, 2019.

This NOI application package is being submitted for the Phase 2 portion of the project that includes the construction of service connections, a combination of gravity sewers and low-pressure sewers, a force main, and a sewage pumping station to service the Meetinghouse Pond area, as shown in Attachments A and B. Additional details of the subject of this NOI are provided below.

1.2 Proposed Collection System

The proposed Meetinghouse Pond area collection system consists of approximately 15,750 linear feet of gravity sewers, 20,750 linear feet of low-pressure sewers, and 7,500 linear feet of force main. An estimated 486 users (properties/utility accounts) will be connected into the system with about 215 privately owned and maintained grinder pumps used to pump to the gravity system. The collection system for the Downtown area was designed to accept the future flows from the Meetinghouse Pond area, and the flow from proposed Meetinghouse Pond area pumping station—Pumping Station No. 4—will discharge to Tributary 1 of the Downtown area sewer project at the intersection of Lots Hollow Road and Finlay Road.

The wastewater collection system and associated force main will be installed by open trench cut and cover methods (within existing roadways). Polyvinyl chloride (PVC) pipe, couplings, and fittings will conform to ASTM D3034 for gravity sewers and ASTM D2241 for force mains. Joints for PVC pipe will be push-on joints using permanently bonded elastomeric ring joints. Each manhole-to-

manhole section of sewer pipeline will be leak tested using low-pressure air for gravity sewer lines and pressurized water for force mains. Manholes will be protected with external manhole encapsulation systems. Once installed, the system will create a barrier to water infiltration, effectively protect the manhole support structure and frame from ground moisture, and prevent corrosion and freeze-thaw damage. In addition, leakage tests will be performed for each sewer manhole.

1.3 Proposed Pumping Station

A sewage pumping station, Pumping Station No. 4, to be located immediately east of the Orleans Town Hall parking lot at 19 School Road, is included in the Meetinghouse Pond area collection system design and as part of this NOI. The pumping station site will be cleared and paved. The pumping station design includes the following:

- Wet well;
- Monitoring well;
- Valve vault;
- Transformer pad;
- Electrical pad;
- Four electrical pull boxes;
- Emergency generator on a generator enclosure pad;
- Catch basin;
- Leaching basin; and
- Three parking spaces.

The pumping station design includes a wet well, which is a concrete structure with a protective coating (entire interior of the structure) that will be set below grade with an equipment removal hatch flush with grade. The wet well will contain two submersible raw wastewater pumps and space to accommodate a third pump in the future. The proposed pump station and appurtenances are located outside of the wetland buffer zones.

2.0 Existing Conditions and Regulated Areas

The proposed Meetinghouse Pond project area consist mainly of previously developed areas within the Town of Orleans. Crystal Lake, Meetinghouse Pond, and Uncle Harvey's Pond border the project area to the south while the Orleans Cemetery borders the project area to the north (Attachment A). The vast majority of the project area is existing paved roadways and other

developed areas, such as existing lawn areas. A combination of businesses, residences, and naturally vegetated areas are located in the vicinity of the proposed project limits of work.

According to the Massachusetts Department of Conservation and Recreation's Areas of Critical Environmental Concern (ACEC) Program MassGIS layer (April 2009), portions of the project in the vicinity of Crystal Lake and Meetinghouse Pond are located in the Pleasant Bay ACEC, which was designated in 1987 (see Table 1). The installation of the sewers in the project boundaries and within the Pleasant Bay ACEC was previously approved by the Executive Office of Energy and Environmental Affairs (EEA) via review of an Environmental Notification Form and Single Environmental Impact Report, and a Massachusetts Environmental Policy Act Certificate was issued on January 28, 2011 (EEA Number 14414).

Table 1. Summary of Proposed Sewer Segments Within Pleasant Bay ACEC

Road	*Approximate Sewer Segment*		*Project Plan Sheet (Attachment B)*
	Beginning Station	*Ending Station*	
Cheney Road	9+00	10+25	04 C-142
Grist Road	4+50	5+00	04 C-144
High Tide Lane	5+00	8+25	04 C-144
	2+75	9+50	04 C-149
Lake Farm Lane	8+00	10+25	04 C-110
Lewis Road	5+25	6+25	04 C-143
Loomis Lane	3+00	9+50	04 C-139
	13+75	17+75	04 C-140
Pond View Road	5+00	5+50	04 C-150

Work will not occur within any areas mapped as Priority or Estimated Habitat or Certified Vernal Pools as identified by the Natural Heritage and Endangered Species Program datalayers (August 2017; accessed in OLIVER in August 2019). Portions of the limits of work are located within the FEMA 100-year floodplain (Land Subject to Coastal Storm Flowage (LSCSF)), Coastal Bank, and the 0-25 foot, 25-50 foot, and 50-100 foot Buffer Zones, as discussed in more detail below. The environmental constraints maps in Attachment A and the project plans in Attachment B illustrate environmental resources in the project area.

Site visits were conducted by BSC Group as part of this project. Numerous vegetated wetlands in the vicinity of the project were investigated and/or flagged as follows:

- **Location 1:** Behind 23 monument road;
- **Location 3:** South of Lake Farm Lane and North of Megs Lane, in between the two streets. Mixed Wooded Marsh and Marsh/Bog wetland types;
- **Location 4:** North of Uncle Vicks Way near the intersection where it meets Monument Road. Marsh/Bog wetland type;
- **Location 5:** West of Uncle Vicks Way. Wooded Marsh wetland type;
- **Location 6:** Behind 14 and 16 River Road;
- **Location 7:** West of the intersection of Ministers Prim Road and River Road. Wooded Marsh wetland type;
- **Location 8:** West of Karen Way and North of Main Street, near the intersection of Karen Way, Main Street and Deerwood Lane. Wooded Marsh wetland type;
- **Location 9:** Directly east of Loomis Lane, west of Manito road, in between the two. Wooded Marsh wetland type;

- **Location 10:** West of Pine Ridge Lane near the intersection where it meets Great Oak Road. Mixed Marsh/Bog and Cranberry Bog wetland type;
- **Location 11:** South of Great Oak Road near the intersection where it meets Pine Ridge Lane. Wooded Marsh wetland type;
- **Location 12:** South of Finlay Road near the intersection where it meets Kettle Pond Way. Wooded Marsh wetland type;
- **Location 13:** North of Finlay Road near the intersection where it meets Kettle Pond Way, south of Daleys Terrace. Cranberry Bog wetland type;
- **Location 14:** East of Grist Road near the intersection where it meets Barley Neck Road. Wooded Marsh wetland type;
- **Location 15:** North of Beach Road near the intersections where it meets Main Street. Wooded Marsh wetland type;
- **Location 16:** North of High Tide Lane near the intersection where it meets Cedar Way. Wooded Marsh wetland type;
- **Location 17:** West of Natural Drive and East of Mill Lane in between the intersections where they both meet Pochet Road. Wooded Marsh wetland type;
- **Location 18:** Located on Brick Hill Lane, north of Larboard Lane and south of Nuthatch Circle, in between the two. Wooded Marsh wetland type;
- **Location 20:** Between 3 Labrador Lane and 6 Brick Hill Road;
- **Location 22:** South of Windy Hill Lane, to the east of the intersection where Barley Neck Road meets Harveys Lane. Wooded Marsh wetland type;
- **Location 23:** Located East of the curve in Coles Place. Wooded Marsh wetland type;
- **Location 24:** Off Nauset Farms Way;
- **Location 25:** Northeast of Nauset Farms Private Way. Marsh/Bog wetland type;
- **Location 26:** Near the intersection of Brick Hill Road and Pochet Road, to the east of Larboard Lane. Open Water wetland type;
- **Location 27:** Northwest of the cul-de-sac on Lake Farm Lane. Certified Vernal Pool wetland type; and
- **Location 31:** South of Pond Road and West of Monument Road, near the intersection between the two. Wooded Marsh wetland type.

The locations of the vegetated wetlands in the vicinity of the project are shown on Environmental Constraints Map 2 in Attachment A. Additional details including vegetative community composition as observed by BSC Group can be found in the wetland data sheets for most of the delineated wetlands, provided in Attachment C.

3.0 Regulated Area Impacts

The installation of the Meetinghouse Pond area proposed gravity sewers, low-pressure sewers, service connections, and force main will result in impacts to jurisdictional areas protected under the Massachusetts Wetlands Protection Act and associated regulations and the Town of Orleans Wetlands Regulations (Chapter 196A) (see Table 2). These jurisdictional areas include: Coastal Bank, Land Subject to Coastal Storm Flowage (LSCSF), and the 0-50 foot, and 50-100 foot Buffer Zones (Attachment A, Figures 2 and 3 and Attachment B). No direct impacts to vegetated wetlands would occur.

Proposed Pumping Station No. 4 (located immediately east of the Orleans Town Hall parking lot) is not located within a jurisdictional area.

All impacts will be located within paved or gravel roadways and will be temporary in nature. Impacts were calculated with an approximate excavation trench width of 10 feet for all gravity sewers, force mains, and laterals. All disturbed areas will be restored to pre-existing conditions after construction is complete, and no elevation changes are proposed.

Table 2. Summary of Proposed Temporary and Permanent Jurisdictional Area Impacts Associated with the Meetinghouse Pond Area Collection System and Pumping Station Project Limits of Work

Jurisdictional Area	*Temporary Impacts*
Coastal Bank	1580 linear feet
Land Subject to Coastal Storm Flowage*	23,000 square feet
0-50 foot Buffer Zone*	36,000 square feet
50-100 foot Buffer Zone*	63,200 square feet

*Impacted areas of Land Subject to Coastal Storm Flowage and the various Buffer Zones often overlapped.
** Permanent impacts resulting from the construction of Pumping Station No. 3 (paved access driveway and/or pumping station components).
Please Note: All values are approximate.

4.0 Compliance with Performance Standards

Portions of this project qualify as a Limited Project under the MA Wetlands Protection Act Regulations at 310 CMR 10.24(7)(b) and 10.53(3)(d): The construction, reconstruction, operation or maintenance of sewer lines. Consequently, the Orleans Conservation Commission may elect to waive performance standards for resources areas in which impacts will occur. Nevertheless, the proposed work meets all performance standards as discussed below.

4.1 Coastal Bank

All impacts to Coastal Bank from sewer installation activities will be temporary in nature and pre-construction grades will be restored. The proposed work on Coastal Bank will not involve the construction of a new bulkhead, revetment, seawall, groin, or other coastal engineering structure. Work on Coastal Bank will not have an adverse effect due to wave action on the movement of sediment from the coastal bank to coastal beaches or land subject to tidal action. No buildings will be constructed on Coastal Bank, stability of the coastal bank will not be affected, and no work on Coastal Bank will be located within specified habitat sites of rare vertebrate or invertebrate species as part of this project. Therefore, the proposed work meets the performance standards for Coastal Bank at 310 CMR 10.30(3-8).

4.2 Land Subject to Coastal Storm Flowage

While no specific performance standards are provided for LSCSF in the Massachusetts Wetlands Protection Act Regulations, the Town of Orleans Wetlands Regulations (196A) provides the following:

> "A proposed project that may result in alteration of land subject to coastal storm flowage shall not cause or create the likelihood of the following:
> (1) Reduction in the ability of the land to absorb and contain waters.
> (2) Reduction in the ability of the land to buffer more inland areas from flooding and wave damage.
> (3) Displacement or diversion of flood waters to other areas.
> (4) Damage to other structures or property.
> (5) Pollution of groundwater, surface water, or salt water.
> (6) Reduction of an area's capacity to provide for wildlife.
> (7) An increase in the elevation or velocity of flood waters.
> (8) Prevention of the migration of resource areas such as salt marshes due to sea level rise."

Due to the temporary and at-grade/subsurface nature of the proposed work in LSCSF (most of which is currently developed), activities within LSCSF would comply with the performance standards above.

4.3 Buffer Zones

Work for the project will occur within the 0-25 foot, 25-50 foot, and 50-100 foot Buffer Zones. All temporary impacts within the buffer zones will be restored to approximate pre-existing conditions following proposed project activities. The plans provided in Attachment B illustrate the 0-50 foot and 50-100 foot buffer boundaries; for clarity due to the amount of detail already shown in the plans, the 0-25 foot boundary is not depicted.

According to the Town of Orleans Wetlands Regulations, "installation of underground utilities (gas mains, water mains, power lines, etc.) within the buffer zone are to be considered as new construction and must be conditioned as such. Any installation within the 50 foot buffer strip of a resource area will require a variance from the regulations." The proposed work within the 0-25 foot and 25-50 foot buffer zones will occur within existing paved or gravel road surfaces. However, an Alternatives Analysis and request for a variance is discussed below.

4.4 Alternatives Analysis

As described in Section 11 of the 2010 Comprehensive Wastewater Management Plan/Supplemental Environmental Impact Report (CWMP/SEIR), three plans were considered for meeting Orleans' wastewater management needs, including:

- Plan 1: Decentralized wastewater treatment at four sites and effluent disposal at 11 sites;
- Plan 2: Centralized treatment and disposal at the site of the existing Tri-Town Septage Treatment Facility; and
- Plan 3: Centralized treatment and disposal at sites in South Orleans and/or Brewster with summer spray irrigation of Brewster golf courses.

As detailed in the 2010 CWMP/SEIR, each plan was analyzed with respect to cost, environmental and technical factors and subject to a significant public review. As a result of this process, a decision was made to proceed with a program centered on Plan 2, and this approach was approved through the Massachusetts Environmental Policy Act, Cape Cod Commission, and Town Meeting review processes. The approach includes phased sewering in the Town as well as construction of a new WWTF. As described in Section 1.0 , Phase 2 of the program is to construct service connections, a combination of gravity sewers and low-pressure sewers, a force main, and a sewage pumping station to service the Meetinghouse Pond area. The total length of sewers will be approximately 6.9 miles. In addition to the new sewers, approximately 1.42 miles of new effluent force main are proposed between Pump Station No. 4 and the discharge location at sewer manhole 100 in Finlay Road by the intersection of Lots Hollow Road.

4.5 Compliance with Massachusetts Stormwater Policy

According to MassDEP's *Checklist for Redevelopment Projects*, a redevelopment is defined to include the following:

- "Maintenance and improvement of existing roadways, including widening less than a single lane, adding shoulders, correcting substandard intersections, improving existing drainage systems, and repaving;
- Development rehabilitation, expansion and phased projects on previously developed sites, provided the redevelopment results in no net increase in impervious area; and
- Remedial projects specifically designed to provide improved stormwater management, such as projects to separate storm drains and sanitary sewers, and stormwater retrofit projects."

The proposed project will not result in a net increase in impervious area at the project site with the exception of the proposed pumping station, which is outside of jurisdictional areas regulated under the Massachusetts Wetlands Protection Act and the Town of Orleans Wetland Regulations . The Stormwater Checklist provided in Attachment E describes how the proposed stormwater management design addresses each of the applicable standards.

5.0 Mitigation

5.1 General Construction

An erosion and sedimentation control program, consisting of compost silt socks and silt fences, catch basin, silt sack sediment traps, sedimentation filter bags, and temporary stockpile area staked straw bales, will be implemented to minimize impacts to the adjacent resource areas during the construction phase of the project. Proper implementation of the erosion and sedimentation control program would:

- Minimize exposed soil areas through sequencing and temporary stabilization; and
- Place structures to manage stormwater runoff and erosion.

Prior to any ground disturbance, erosion control barriers consisting of compost silt socks and silt fence would be installed along the limits of work in the areas shown in Attachment B. The erosion control areas depicted represent the minimum amount of erosion control to be used at the site, and the contractor will be required to install additional erosion control as necessary to prevent erosion or sedimentation of jurisdictional resource areas. If sediment has accumulated to a depth which impairs proper functioning of the barrier, it would be removed by hand. This material would be either

reused at the site or disposed of at a suitable offsite location. Any damaged sections of erosion control would be repaired or replaced immediately upon discovery.

Dewatering (where necessary) will be conducted in compliance with the USEPA/MassDEP Construction General Permit requirements, thereby minimizing potential impacts to adjacent resources. Any catch basins, drain, or outfalls to be used in dewatering operations will be receive water treated by filters, onsite settling basins, settling tank trucks, or other devices so that no observable sediments or pollutants are carried into any resource area, street drain, or adjacent property. Measures will be taken so that no erosion or scouring shall occur on public or private property, or on the banks or bottoms of waterbodies, as a result of dewatering operations.

Waste material, debris, and trash will be cleaned from the work site at the end of each day and placed in trash barrels and/or dumpsters for disposal off site. Dumping of spoils material, waste, or other debris into wetland resource areas and/or buffer zones will not be allowed.

5.2 Temporary Impacts

Temporary impacts as a result of the project will be mitigated in place. Paved and gravel roadways will be repaved following construction activities and all temporarily disturbed surfaces will be restored to pre-existing grades.

GENERAL NOTES

1. HORIZONTAL DATUM IN U.S. SURVEY FEET IS REFERENCED TO THE MASSACHUSETTS STATE PLANE, MAINLAND COORDINATE SYSTEM (NAD83).
2. VERTICAL DATUM IN U.S. SURVEY FEET IS REFERENCED TO THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88).
3. THE INFORMATION SHOWN HEREON IS BASED ON THE REFERENCED DATA ACCUMULATION PLANS. THESE PLANS DO NOT REPRESENT A PROPERTY OR BOUNDARY SURVEY, AND THE PROPERTY LINES SHOWN DO NOT REPRESENT A LAND SURVEYOR'S PROPERTY BOUNDARY OPINION. THE BOUNDARY INFORMATION SHOWN ON THESE PLANS WAS COMPILED FROM OTHER MAPS, RECORD RESEARCH, AND OTHER SOURCES OF INFORMATION. THE BOUNDARIES SHOWN HEREON SHALL NOT BE CONSTRUED AS HAVING BEEN OBTAINED AS THE RESULT OF AN ACCURATE ON THE GROUND SURVEY, AND ARE SUBJECT TO CHANGE AS AN ACCURATE FIELD SURVEY MAY DISCLOSE.
4. SIDELINES OF RIGHTS OF WAY AND PROPERTY LINES ARE AS SHOWN ON PLANS PREPARED BY BSC GROUP, ENTITLED: "MEETINGHOUSE POND AREA SANITARY SEWER PROJECT": OCTOBER 8, 2021 AND SUBSEQUENT DATES. WHERE SUPPLEMENTAL RIGHT OF WAY AND PROPERTY LINE INFORMATION WAS REQUIRED, TOWN OF ORLEANS AND/OR MASS GIS DATA WAS USED. UPDATED AND SUPPLEMENTAL BUILDING LOCATIONS ARE BASED ON PLANIMETRICS FROM BLUE SKY AERIAL SURVEY OF SPRING 2021.
5. LOCATION OF WATER, SEWER, TELEPHONE, ELECTRIC, AND GAS LINES ARE APPROXIMATE, BASED UPON RECORD LOCATION INFORMATION PROVIDED TO BSC GROUP, INC. AND FOR REFERENCE ONLY.
6. THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING ALL NECESSARY PERMITS AT NO ADDITIONAL COST TO THE OWNER.
7. ALL CONSTRUCTION OPERATIONS SHALL BE ACCOMPLISHED IN ACCORDANCE WITH APPLICABLE STATE STATUES AND U.S. OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION REGULATIONS (O.S.H.A). COPIES OF O.S.H.A.'S STANDARDS MAY BE PURCHASED FROM THE U.S GOVERNMENT PRINTING OFFICE. THE CONTRACTOR ALONE WILL BE RESPONSIBLE FOR THE EXECUTION OF THE WORK IN ACCORDANCE WITH ALL APPLICABLE HEALTH AND SAFETY REQUIREMENTS.
8. THE CONTRACTOR SHALL HAVE A HEALTH AND SAFETY PLAN AND SHALL PROVIDE COPIES OF SAME TO THE ENGINEER.
9. THE CONTRACTOR SHALL TAKE ALL NECESSARY MEASURES AND SHALL PROVIDE ALL NECESSARY CONTINUOUS BARRIERS OF SUFFICIENT TYPE, SIZE AND STRENGTH TO PREVENT ACCESS TO ALL OPEN EXCAVATIONS AT THE COMPLETION OF EACH DAY'S WORK.
10. CONTRACTOR SHALL FOLLOW ALL REQUIREMENTS OF THE LOCAL MUNICIPALITY AND THE STATE WHEN WORKING IN THEIR RIGHTS OF WAY.
11. NO WORK, STORAGE, OR TRESPASS SHALL BE PERMITTED BEYOND THE BOUNDARIES OF ANY EASEMENTS OR PUBLIC RIGHTS OF WAY WITHOUT WRITTEN PERMISSION OF THE PROPERTY OWNER.
12. ALL CONSTRUCTION ACTIVITY SHALL BE CONFINED TO THE AREA WITHIN THE LIMIT OF WORK AS SHOWN ON THE PLANS. LIMIT OF WORK SHALL BE DEFINED AS THE SERVICE RECIPIENTS PROPERTY LINE AND THE ADJACENT RIGHT-OF-WAY. RIGHTS OF ENTRY AND/OR EASEMENTS HAVE BEEN OBTAINED FOR ALL PROPERTIES INCLUDED IN THIS PROJECT.
13. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SECURING A SITE FOR DISPOSAL OF ALL EXCAVATED UNACCEPTABLE MATERIAL THAT IS UNSUITABLE FOR USE AS BACKFILL AND ALL OTHER EXCESS EXCAVATED MATERIALS. THE CONTRACTOR SHALL PROVIDE THE ENGINEER WITH THE LOCATION OF THE DISPOSAL SITE AND WRITTEN PERMISSION FOR USE OF THE SITE FROM THE PROPERTY OWNER. THE COST FOR SECURING AND MAINTAINING THE DISPOSAL SITE SHALL BE THE CONTRACTOR'S RESPONSIBILITY.
14. IF AT ANY TIME THE CONSTRUCTION EXCAVATION REVEALS ANY ARTICLE OF HISTORIC OR ARCHEOLOGICAL SIGNIFICANCE, WORK AT THE LOCATION WILL CEASE AND THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER.
15. THE CONTRACTOR SHALL COORDINATE ALL WORK AS NECESSARY WITH MASSDOT AND THE TOWN OF ORLEANS AND/OR ITS REPRESENTATIVES.
16. WORKING HOURS WITHIN THE TOWN ARE 7:00 A.M. TO 5:00 P.M., MONDAY THROUGH FRIDAY OR AS SPECIFIED IN THE MASSDOT PERMIT AND SPECIFICATIONS. PERMISSION IS REQUIRED FROM THE TOWN VIA THE ENGINEER TO WORK ON SUNDAY, LEGAL HOLIDAYS, OR ANY WEEKDAY NIGHT PAST THE HOURS SPECIFIED. THIS PERMISSION MUST BE REQUESTED 72 HOURS IN ADVANCE. SUNDAY WORK WILL ONLY BE ALLOWED IN CASE OF EMERGENCY.
17. EXISTING VALVES OR HYDRANTS SHALL BE OPERATED BY THE MUNICIPAL OWNER. THE CONTRACTOR SHALL COORDINATE WITH THE MUNICIPAL OWNER OF THE WATER SYSTEM.
18. THE CONTRACTOR IS RESPONSIBLE FOR PERFORMING ALL WORK AS INDICATED ON THE DRAWINGS, IN THE SPECIFICATIONS AND AS DIRECTED BY THE ENGINEER IN CONFORMANCE WITH ALL APPLICABLE CODES AND IN A PROPER AND WORKMANLIKE MANNER.
19. CONTRACTOR TO SUBMIT WORK SCHEDULE INCLUDING NECESSARY UTILITY RELOCATIONS BASED ON RESULTS OF TEST PITS. NO PIPE INSTALLATION SHALL OCCUR PRIOR TO APPROVAL OF THE SCHEDULE AND COMPLETION OF TEST PITS.
20. THE CONTRACTOR IS RESPONSIBLE FOR SEQUENCING OF ALL WORK TO AVOID CONFLICTS BETWEEN ALL NEW WORK.
21. THE CONTRACTOR SHALL PREPARE AND SUBMIT A TRAFFIC MANAGEMENT PLAN FOR ALL WORK PRIOR TO THE START OF CONSTRUCTION TO SHOW HOW TRAFFIC FLOW WILL BE MAINTAINED DURING CONSTRUCTION. THE CONTRACTOR SHALL FURNISH ALL PROTECTIVE AND/OR WARNING DEVICES AS REQUIRED TO CONTROL TRAFFIC AND PROTECT THE PUBLIC IN ALL WORK AREAS.
22. ALL SIGNAGE AND PAVEMENT MARKINGS SHALL BE IN ACCORDANCE WITH LOCAL AND STATE GUIDELINES.
23. THE CONTRACTOR SHALL MAINTAIN EMERGENCY ACCESS TO ALL AREAS AFFECTED BY THE WORK AT ALL TIMES. THE CONTRACTOR IS RESPONSIBLE FOR PROVIDING AN EMERGENCY RESPONSE PLAN. THIS PLAN SHALL BE COORDINATED WITH THE ENGINEER, THE TOWN AND ALL EMERGENCY DEPARTMENTS.
24. PRIOR TO CLOSING ANY ROADWAY (PARTIALLY OR COMPLETELY), MUNICIPAL POLICE, THE TOWN AND LOCAL FIRE OFFICIALS SHALL BE NOTIFIED. THE CONTRACTOR SHALL COMPLY WITH ANY CONDITIONS SET BY THE PUBLIC SAFETY OFFICIALS, IN CONJUNCTION WITH THE OWNER AND ENGINEER.
25. CONTRACTOR TO PROVIDE AND MAINTAIN SEDIMENTATION AND EROSION CONTROL MEASURES TO PROTECT ALL CATCH BASINS, DRAINAGE INLETS AND SWALES IN THE CONSTRUCTION ZONE.
26. ALL EROSION CONTROL MEASURES FOR THE WORK ZONE SHALL BE IN PLACE PRIOR TO THE START OF CONSTRUCTION.
27. THE CONTRACTOR IS RESPONSIBLE FOR THE PROTECTION OF THE EXISTING FEATURES AND STRUCTURES WITHIN AND ADJACENT TO THE WORK. CONTRACTOR SHALL BOX ALL TREES, SHRUBS, FLOWER BOXES, AND HEDGES BEFORE PLACING EARTH AGAINST OR NEAR THEM. IN THE EVENT OF DAMAGE, REPAIRS OR REPLACEMENT SHALL BE COMPLETED AT THE CONTRACTOR'S EXPENSE AS APPROVED BY THE ENGINEER.
28. EXCAVATION OF ANY TYPE SHALL BE ACCOMPLISHED IN SUCH A MANNER THAT UNDERGROUND UTILITIES OR STRUCTURES ARE NOT DAMAGED. ALL ROADWAYS, PARKING AREAS, SIDEWALKS AND OTHER STRUCTURES DISTURBED BY CONSTRUCTION IN OR OUTSIDE THE PROJECT AREA SHALL BE RETURNED TO THEIR ORIGINAL CONDITION OR BETTER. ALL COSTS RELATED TO THE REPAIR OF DAMAGED UTILITIES OR STRUCTURES SHALL BE BORNE BY THE CONTRACTOR.
29. CONTRACTOR SHALL SAW-CUT ALL PAVEMENT, ROADS, AND DRIVEWAYS TO BE DISTURBED DURING CONSTRUCTION.
30. THE CONTRACTOR IS RESPONSIBLE FOR MAINTAINING PROPER AND ADEQUATE TRENCH SHORING AND BRACING AT ALL TIMES IN ACCORDANCE WITH REQUIRED SAFETY STANDARDS.
31. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO VERIFY ALL EXISTING CONDITIONS AT EACH SITE RECEIVING SEWER SERVICE, INCLUDING BUT NOT LIMITED TO, INVERT ELEVATIONS AT EACH MANHOLE, DEPTH AND LOCATION OF EXISTING PIPING TO ON-SITE WASTE DISPOSAL SYSTEMS (OWDS) AND THE LOCATION OF EXISTING OWDS.
32. ALL NEW GRAVITY SEWER SERVICES SHALL BE 6" DIAMETER PVC UNLESS OTHERWISE NOTED. ALL NEW LOW PRESSURE SEWER SERVICES SHALL BE 1-1/4" DIAMETER UNLESS OTHERWISE NOTED
33. ALL NEW PRECAST SEWER MANHOLE INVERTS ARE TO BE CONSTRUCTED IN ACCORDANCE WITH DETAILS.

GENERAL NOTES - (CONT.)

35. ALL UNEXCAVATED ROCK WITHIN 3'-0" HORIZONTALLY OF THE ENDS OF BUILDING CONNECTIONS, BRANCHES AND STUBS, AND DOWN TO A HORIZONTAL PLANE 6-INCHES BELOW THE BOTTOMS OF SUCH CONNECTIONS, BRANCHES AND STUBS, SHALL BE REMOVED.
36. ROCK REMOVAL BY THE MECHANICAL METHOD SHALL CONSIST OF CUTTING AWAY ROCK AT TRENCH BOTTOM TO FORM A LEVEL BEARING SURFACE 6" BELOW INVERT ELEVATION OF PIPE.
37. NO TREES OR TREE LIMBS ALONG THE ENTIRE ROUTE OF CONSTRUCTION ON PUBLIC WAYS SHALL BE CUT UNLESS OTHERWISE DIRECTED BY THE ENGINEER AND APPROVED BY THE TOWN.
38. THE CONTRACTOR SHALL EXERCISE CARE TO PREVENT DAMAGE TO ROOT SYSTEMS OF EXISTING TREES OR SHRUBS IN LOCATIONS OF NEW SEWER LINES.
39. THE LOCATIONS OF UTILITIES SHOWN ON THESE PLANS ARE APPROXIMATE. THE CONTRACTOR SHALL COORDINATE WITH THE TOWN AND UTILITY COMPANIES INVOLVED TO VERIFY IN THE FIELD THE EXACT LOCATION, SIZE, AND MATERIAL OF CONSTRUCTION OF MAINS AND SERVICES TO PREVENT DAMAGE. LOSS OF SERVICE DURING CONSTRUCTION AND FOR REPLACEMENT OF SERVICES. THE CONTRACTOR SHALL NOTIFY "DIG SAFE" 72-HOURS PRIOR TO ANY EXCAVATION.
40. THE CONTRACTOR IS RESPONSIBLE TO VERIFY THE DEPTH OF EXISTING UTILITY CROSSINGS EITHER BELOW OR ABOVE THE NEW PIPING. METHODS FOR DETERMINING DEPTHS TO UTILITIES WILL BE BY TEST PITS OR BY VACUUM EXCAVATION, WHICHEVER IS DEEMED ACCEPTABLE AT THE SPECIFIC LOCATION.
41. EXISTING UTILITIES TO REMAIN IN SERVICE DURING CONSTRUCTION. ANY INTERRUPTION OF SERVICE SHALL BE COORDINATED WITH THE ENGINEER AND APPROVED BY THE TOWN.
42. EXISTING UTILITIES INTERFERING WITH THE WORK SHALL BE RELOCATED AS DIRECTED BY THE ENGINEER.
43. THE CONTRACTOR IS RESPONSIBLE FOR MAKING ALL ARRANGEMENTS FOR ANCHORING, SUPPORTING AND/OR RELOCATING AND PROTECTING ALL UTILITIES DURING CONSTRUCTION. ALL COSTS SHALL BE INCLUDED IN THE UNIT PRICES BID. IN THE EVENT OF DAMAGE, THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE COST OF ALL REPAIRS.
44. THE CONTRACTOR SHALL MAINTAIN ACCESS TO ALL EXISTING FIRE HYDRANTS AT ALL TIMES. SHOULD AN EXISTING HYDRANT NEED TO BE TAKEN OUT OF SERVICE, THE CONTRACTOR SHALL NOTIFY THE LOCAL FIRE DEPARTMENT 24 HOURS PRIOR TO TAKING IT OUT OF SERVICE.
45. IF WATER MAINS NEED TO BE RE-LAYED AS A RESULT OF NEW PIPELINE CONSTRUCTION, THE WATER MAINS SHALL BE LAID A MINIMUM OF 10-FEET HORIZONTALLY FROM AN EXISTING SEWER OR STORM SEWER, UNLESS OTHERWISE DIRECTED BY THE ENGINEER. WHEN WATER MAINS MUST CROSS ABOVE A SEWER, THE WATER MAIN SHALL BE LAID AT SUCH AN ELEVATION THAT THE TOP OF THE SEWER IS AT LEAST 18-INCHES BELOW THE BOTTOM OF THE WATER MAIN. WHERE RE-LAYED WATER MAINS ARE SHOWN TO CROSS SEWERS, THE RE-LAYED WATER MAIN SHALL BE INSTALLED SO THAT A FULL LENGTH OF WATER MAIN CROSSES THE SEWER MIDWAY BETWEEN THE JOINTS OF THE WATER MAIN.
46. CONTRACTOR SHALL MAKE HIS OWN ARRANGEMENTS TO OBTAIN WATER FOR FLUSHING, CHLORINATION, AND TESTING. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING, FURNISHING, INSTALLING, AND REMOVING ALL NECESSARY MATERIAL (TAPS, CORPORATIONS, AND SERVICE PIPE) REQUIRED FOR PROPER TESTING AND CHLORINATION OF WATER MAINS.
47. AFTER TESTING, ALL CORPORATIONS INSTALLED FOR TESTING AND CHLORINATION SHALL BE REMOVED AND REPLACED WITH BRASS PLUGS. WATER TIGHTNESS OF BRASS PLUGS SHALL BE OBSERVED VISUALLY UNDER PRESSURE.
48. ALL ROAD CUTS SHALL BE RESTORED WITH SUB-BASE MATERIAL AT THE END OF EACH WORK DAY. CONTRACTOR SHALL MAINTAIN ROAD CUTS UNTIL THE TEMPORARY/PERMANENT PAVEMENT IS INSTALLED.
49. TEMPORARY TRENCH PAVEMENT SHALL BE INSTALLED AT THE END OF EACH WEEK AND DAILY FOR STATE ROADS UNLESS OTHERWISE DIRECTED BY THE OWNER. PERMANENT TRENCH PAVEMENT SHALL BE INSTALLED 90 TO 180 DAYS AFTER PIPELINE INSTALLATION UNLESS OTHERWISE DIRECTED BY THE OWNER.
50. THE CONTRACTOR SHALL RESTORE ALL DISTURBED AREAS TO PRE-CONSTRUCTION GRADES UPON COMPLETION OF SEWER CONSTRUCTION, EXCEPT WHERE PERMANENT GRADE CHANGES ARE SPECIFICALLY NOTED OR ORDERED.
51. ALL ROADS AND DRIVEWAYS SHALL BE REPLACED TO COMPLY WITH MASSDOT REQUIREMENTS AND TOWN OF ORLEANS SPECIFICATIONS AS APPLICABLE.
52. ALL PAVED GUTTERS (ASPHALT WING), ALL STONE CURBS, AND ALL CONCRETE CURB ALONG ROADWAYS DISTURBED BY CONSTRUCTION SHALL BE REPLACED IN KIND AT NO ADDITIONAL COST TO THE OWNER.
53. ALL EXISTING FRAMES, COVERS, BOXES, ETC. SHALL BE RAISED TO FINISH GRADES PRIOR TO PLACEMENT OF PAVEMENT WEARING COURSE.
54. THE CONTRACTOR SHALL REMOVE AND DISPOSE OF ALL WASTE BUILDING MATERIAL, CONCRETE, MASONRY, TREES, SHRUBS, DEBRIS AND OTHER MATERIALS NECESSARY FOR THE SATISFACTORY COMPLETION OF THE WORK AND AS REQUIRED BY THE OWNER. CONSTRUCTION DEBRIS SHALL BE DISPOSED OF IN STRICT ACCORDANCE WITH ALL APPLICABLE LOCAL, STATE AND FEDERAL LAWS.
55. THE CONTRACTOR SHALL BE RESPONSIBLE FOR CONTINUOUS CLEANING OF MUD, DIRT AND DEBRIS OFF STREETS, WHEN SUCH MUD, DIRT OR DEBRIS IS DEPOSITED THERE AS A RESULT OF HIS CONSTRUCTION ACTIVITY. ANY DEBRIS, MUD, OR DELETERIOUS MATERIAL FROM THE PROJECT WILL BE REMOVED FROM THE STREET AND SURROUNDING STREETS BY CONTRACTOR AT THE END OF EACH WORKING DAY, OR BEFORE, IF DIRECTED BY THE OWNER OR ENGINEER.
56. USE WATER SPRINKLING, TEMPORARY ENCLOSURES AND OTHER SUITABLE METHODS TO LIMIT DUST AND DIRT RISING AND SCATTERING IN THE AIR.
57. CONTRACTOR IS RESPONSIBLE FOR REPLACING ALL EXISTING PAVEMENT MARKINGS INCLUDING CENTER LINES, EDGE LINES, STOP LINES, CROSSWALKS AND LETTERING FOLLOWING PLACEMENT OF TEMPORARY PAVEMENT AND FOLLOWING PERMANENT PAVEMENT OR AS DIRECTED BY THE ENGINEER. THERMOPLASTIC PLASTIC ROAD PAINT SHALL BE UTILIZED FOR ALL PAVEMENT MARKING IN STATE ROADWAYS. ACETONE ROAD PAINT SHALL BE UTILIZED FOR ALL ROADWAY MARKING IN TOWN ROADWAYS. REFER TO SECTION 02503, PAVING, CURBING, SIDEWALKS AND ROADWAYS.

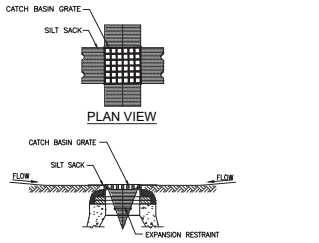
SILT FENCE WITH SILT SOCK

NOT TO SCALE

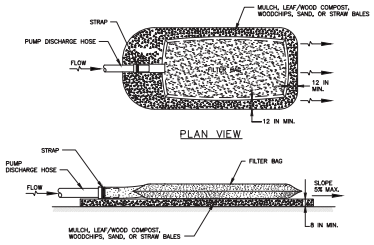


NOTES:

1. INSTALL SILT SACK IN ALL CATCH BASINS BEFORE COMMENCING WORK OR IN PAVED AREAS AFTER BINDER COURSE IS PLACED AND STRAW BALES HAVE BEEN REMOVED. GRATE TO BE PLACED OVER SILT SACK.
2. SILT SACK SHALL BE INSPECTED PERIODICALLY AND AFTER ALL STORMS.
3. EVENTS AND CLEANING OR REPLACEMENT SHALL BE PERFORMED PROMPTLY AS NEEDED.

SILT SACK SEDIMENT TRAP

NOT TO SCALE



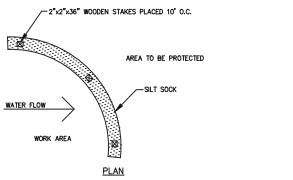
CONSTRUCTION SPECIFICATIONS

1. TIGHTLY SEAL SLEEVE AROUND THE PUMP DISCHARGE HOSE WITH A STRAP OR SIMILAR DEVICE.
2. PLACE FILTER BAG ON SUITABLE BASE (E.G., MULCH, LEAF/WOOD COMPOST, WOODCHIPS, SAND, OR STRAW BALES) LOCATED ON A LEVEL OR 5% MAXIMUM SLOPING SURFACE. DISCHARGE TO A STABILIZED AREA. EXTEND BASE A MINIMUM OF 12 INCHES FROM EDGES OF BAG.
3. CONTROL PUMPING RATE TO PREVENT EXCESSIVE PRESSURE WITHIN THE FILTER BAG IN ACCORDANCE WITH THE MANUFACTURER RECOMMENDATIONS. AS THE BAG FILLS WITH SEDIMENT, REDUCE PUMPING RATE.
4. REMOVE AND PROPERLY DISPOSE OF FILTER BAG UPON COMPLETION OF PUMPING OPERATIONS OR AFTER BAG HAS REACHED CAPACITY, WHICHEVER OCCURS FIRST. SPREAD THE DEWATERED SEDIMENT FROM THE BAG IN AN APPROVED UPLAND AREA AND STABILIZE WITH SEED AND MULCH BY THE END OF THE WORK DAY. RESTORE THE SURFACE AREA BENEATH THE BAG TO ORIGINAL CONDITION UPON REMOVAL OF THE DEVICE.
5. USE NONWOVEN GEOTEXTILE WITH DOUBLE STITCHED SEAMS USING HIGH STRENGTH THREAD. SIZE SLEEVE TO ACCOMMODATE A MAXIMUM 4 INCH DIAMETER PUMP DISCHARGE HOSE. THE BAG MUST BE MANUFACTURED FROM A NONWOVEN GEOTEXTILE THAT MEETS OR EXCEEDS MINIMUM AVERAGE ROLL VALUES (MARV) FOR THE FOLLOWING:

GRAB TENSILE	250 LB	ASTM D-4632
PUNCTURE	150 LB	ASTM D-4833
FLOW RATE	70 GAL/MIN/FT²	ASTM D-4491
PERMITTIVITY (SEC^{-1})	1.2 SEC^{-1}	ASTM D-4491
UV RESISTANCE	70% STRENGTH @ 500 HOURS	ASTM D-4355
APPARENT OPENING SIZE (AOS)	0.15–0.18 MM	ASTM D-4751
SEAM STRENGTH	90%	ASTM D-4632

6. REPLACE FILTER BAG IF BAG CLOGS OR HAS RIPS, TEARS, OR PUNCTURES. DURING OPERATION KEEP CONNECTION BETWEEN PUMP HOSE AND FILTER BAG WATER TIGHT. REPLACE BEDDING IF IT BECOMES DISPLACED.

SEDIMENTATION FILTER BAG

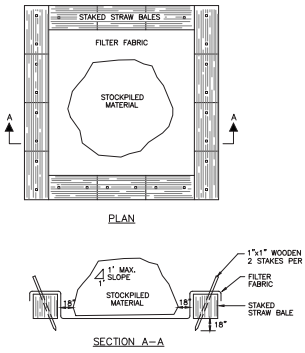


NOTES:

1. SEE SPECIFICATIONS FOR SILT SOCK AND COMPOST FILL MATERIAL REQUIREMENTS.

COMPOST SILT SOCK

NOT TO SCALE



NOTE:

Wetland Data Sheets

MassDEP Bordering Vegetated Wetland (310 CMR 10.55) Delineation Field Data Form

Applicant: Town of Orleans Prepared by: BSC Group, Inc. Paul Mancuso Project location: Orleans, MA DEP File #: SE
Wetland #: W1-100 Upland Plot
Check all that apply:

- ❑ Vegetation alone presumed adequate to delineate BVW boundary: fill out Section I only
- ❑ Vegetation and other indicators of hydrology used to delineate BVW boundary: fill out Sections I and II
- ❑ Method other than dominance test used (attach additional information)

Section I.

Vegetation	Observation Plot Number:		Transect Number:	Date of Delineation:
A. Sample Layer & Plant Species (by common/scientific name)	B. Percent Cover (or basal Area)	C. Percent Dominance	D. Dominant Plant (yes or no)	E. Wetland Indicator Category*
Ground Cover				
Garlic mustard / Alliaria petiolate	10%	10%	No	FACU-
English ivy / Hedera helix	70%	70%	Yes	FACU
Grass spp. /	20%	20%	Yes	FACU
Saplings				
Morrows honeysuckle / Lonicera morrowii	20%	100%	Yes	NI
Climbing Woody Vines				
Trees				
Norway maple / Acer platanoides	25%	100%	Yes	FACU

* *Use an asterisk to mark wetland indicator plants: plant species listed in the Wetlands Protection Act (MGL c.131, s.40); plants in the genus Sphagnum; plants listed as FAC, FAC+, FACW-, FACW, FACW+, or OBL; or plants with physiological or morphological adaptations. If any plants are identified as wetland indicator plants due to physiological or morphological adaptations, describe the adaptation next to the asterisk.*

Vegetation conclusion:

Number of dominant wetland indicator plants: 0 Number of dominant non-wetland indicator plants: 4

Is the number of dominant wetland plants equal to or greater than the number of dominant non-wetland plants? no

If vegetation alone is presumed adequate to delineate the BVW boundary, submit this form with the Request for Determination of Applicability or Notice of Intent

Section II. Indicators of Hydrology

Hydric Soil Interpretation

1. Soil Survey

Is there a published soil survey for this site? yes no
title/date:
map number:
soil type mapped:
hydric soil inclusions:

Are field observations consistent with soil survey? yes no
Remarks:

2. Soil Description

Horizon	Depth	Matrix Color	Mottles Color
A	0”-9”	10YR 4/3	
B	9”-12”	10YR 4/4	
Refusal after 12”			

Remarks:

3. Other:

Conclusion: Is soil hydric? no

Other Indicators of Hydrology: (check all that apply & describe)

- ❑ Site Inundated: _____
- ❑ Depth to free water in observation hole: _____
- ❑ Depth to soil saturation in observation hole: _____
- ❑ Water marks: _____
- ❑ Drift lines: _____
- ❑ Sediment Deposits: _____
- ❑ Drainage patterns in BVW: _____
- ❑ Oxidized rhizospheres: _____

White oak / Quercus alba	10%	33%	Yes	FACU-

* *Use an asterisk to mark wetland indicator plants: plant species listed in the Wetlands Protection Act (MGL c.131, s.40); plants in the genus Sphagnum; plants listed as FAC, FAC+, FACW-, FACW, FACW+, or OBL; or plants with physiological or morphological adaptations. If any plants are identified as wetland indicator plants due to physiological or morphological adaptations, describe the adaptation next to the asterisk.*

Vegetation conclusion:

Number of dominant wetland indicator plants: 2 Number of dominant non-wetland indicator plants:4

Is the number of dominant wetland plants equal to or greater than the number of dominant non-wetland plants? no

If vegetation alone is presumed adequate to delineate the BVW boundary, submit this form with the Request for Determination of Applicability or Notice of Intent

Section II. Indicators of Hydrology

Hydric Soil Interpretation

1. Soil Survey

Is there a published soil survey for this site? yes no
title/date:
map number:
soil type mapped:
hydric soil inclusions:

Are field observations consistent with soil survey? yes no
Remarks:

2. Soil Description

Horizon	Depth	Matrix Color	Mottles Color
Organic layer	0”-2”		
A	2”-20”	10YR 4/4	

Remarks:
No redox or depletions

3. Other:

Conclusion: Is soil hydric? no

Other Indicators of Hydrology: (check all that apply & describe)

- ❑ Site Inundated: _____
- ❑ Depth to free water in observation hole: _____
- ❑ Depth to soil saturation in observation hole: _____
- ❑ Water marks: _____
- ❑ Drift lines: _____
- ❑ Sediment Deposits: _____
- ❑ Drainage patterns in BVW: _____
- ❑ Oxidized rhizospheres: _____
- ❑ Water-stained leaves: _____
- ❑ Recorded Data (streams, lake, or tidal gauge; aerial photo; other):
  _____
  _____
  _____
- ❑ Other: _____

Vegetation and Hydrology Conclusion

	Yes	No
Number of wetland indicator plants ≥ # of non-wetland indicator plants	____	No
Wetland hydrology present:		
Hydric soil present	____	No
Other indicators of hydrology present	____	No
Sample location is in a BVW	____	No

Submit this form with the Request for Determination of Applicability or Notice of Intent.

A. Sample Layer & Plant Species (by common/scientific name)	B. Percent Cover (or basal Area)	C. Percent Dominance	D. Dominant Plant (yes or no)	E. Wetland Indicator Category*
Ground Cover				
Jewelweed/ Impatiens capensis	75%	47%	Yes	FACW
Soft rush/ Juncus effuses	10%	6%	No	
Green briar/ Smilax rotundifolia	40%	24%	Yes	FAC
Arrowwood/ Viburnum dentatum	20%	12%	No	
Grape vine/ Vitis spp.	15%	9%	No	
Saplings				
Climbing Woody Vines				
Trees				

* *Use an asterisk to mark wetland indicator plants: plant species listed in the Wetlands Protection Act (MGL c.131, s.40); plants in the genus Sphagnum; plants listed as FAC, FAC+, FACW-, FACW, FACW+, or OBL; or plants with physiological or morphological adaptations. If any plants are identified as wetland indicator plants due to physiological or morphological adaptations, describe the adaptation next to the asterisk.*

Vegetation conclusion:

Number of dominant wetland indicator plants: 2 Number of dominant non-wetland indicator plants: 0

Is the number of dominant wetland plants equal to or greater than the number of dominant non-wetland plants? Yes

If vegetation alone is presumed adequate to delineate the BVW boundary, submit this form with the Request for Determination of Applicability or Notice of Intent

Section II. Indicators of Hydrology

Hydric Soil Interpretation

1. Soil Survey

Is there a published soil survey for this site? yes no
title/date:

Saplings				
Climbing Woody Vines				
Trees				
Red maple/ Acer rubrum	75%	100%	Yes	FAC

* *Use an asterisk to mark wetland indicator plants: plant species listed in the Wetlands Protection Act (MGL c.131, s.40); plants in the genus Sphagnum; plants listed as FAC, FAC+, FACW-, FACW, FACW+, or OBL; or plants with physiological or morphological adaptations. If any plants are identified as wetland indicator plants due to physiological or morphological adaptations, describe the adaptation next to the asterisk.*

Vegetation conclusion:

Number of dominant wetland indicator plants: 4 Number of dominant non-wetland indicator plants: 0

Is the number of dominant wetland plants equal to or greater than the number of dominant non-wetland plants? Yes

If vegetation alone is presumed adequate to delineate the BVW boundary, submit this form with the Request for Determination of Applicability or Notice of Intent

Section II. Indicators of Hydrology

Hydric Soil Interpretation

1. Soil Survey

Is there a published soil survey for this site? yes no
title/date:

Submit this form with the Request for Determination of Applicability or Notice of Intent.

Attachment D

Property Owner and Abutter Information
Affidavit of Service
Notification to Abutters

NOTIFICATION TO ABUTTERS UNDER THE MASS. WETLANDS PROTECTION ACT

In accordance with the second paragraph of the Massachusetts General Laws Chapter 131 Section 40, the Orleans Wetlands Protection Bylaw (Chapter 160), and the Town of Orleans Wetlands Regulations 196A, you are hereby notified of the following:

A. The name of the applicant is the Town of Orleans (c/o John Kelly)

B. The applicant has filed a Notice of Intent with the Conservation Commission for the Town of Orleans seeking permission to remove, fill, dredge or alter an Area Subject to Protection under the Wetlands Protection Act (General Laws Chapter 131, Section 40), the Orleans Wetlands Protection Bylaw (Chapter 160), and the Town of Orleans Wetlands Regulations 196A. The proposed project involves the construction of service connections, a combination of gravity sewers and low-pressure sewers, a force main, and a sewage pumping station to service the Meetinghouse Pond area.

C. The address of the lot where the activity is proposed is: multiple locations in the Meetinghouse Pond area, including the following roads:

Uncle Vicks Way	Loomis Lane
Monument Road	Manito Road
Finlay Road	Cheney Road
Main Street	Lewis Road
Barley Neck Road	Grist Road
Pochet Road	Mill Lane
Great Oak Road	Natural Drive
Pine Ridge Road	Larboard Lane
Beach Road	Cedar Lane
Cole Place	High Tide Lane
Harveys Lane	Pond View Road
River Road	Windy Hill Lane
Lucy's Lane	Nauset Farms Way
Karen Way	Baxter Lane
Deerwood Lane	Bayberry Way
	Packet Landing

D. Copies of the Notice of Intent may be examined at the Town of Orleans Conservation Commission, (508) 240-3700 x2425, Orleans Town Hall, 19 School Road. Orleans, MA 02653, between the hours of:

8:30 AM - 4:30 PM – Monday - Friday

E. Copies of the Notice of Intent may be obtained from either (check one):

_____ the applicant __X__ or the applicant's representative (Jennifer Doyle-Breen (AECOM))

by calling this telephone number 978-905-2968 between the hours of

9am and 5pm__ on the following days of the week: Monday-Friday.

F. Information regarding the date, time and place of the public hearing may be obtained from: Town of Orleans Conservation Commission by calling this telephone number (508) 240-3700 x 2425 between the hours of 8:30 AM - 4:30 PM.

NOTE: Notice of the public hearing, including its date, time, and place will be published at least five (5) business days in advance in the Cape Codder **in a public legal notice.**

NOTE: Notice of the public hearing, including its date, time, and place will be posted in Town Hall not less than forty-eight (48) hours in advance (do not count Saturdays, Sundays and holidays.) To view the agenda, please visit https://www.town.orleans.ma.us/conservation

NOTE: You may also contact the Orleans Conservation Commission or the nearest Department of Environmental Protection Regional Office for more information about this application or the Wetlands Protection Act. DEP administrative jurisdiction over Orleans is the Southeast Region: (SERO) 20 Riverside Drive, Lakeville, MA 02347 (508-946-2700).

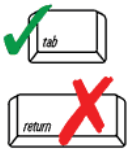
Stormwater Checklist

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands Program

Checklist for Stormwater Report

A. Introduction

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.



A Stormwater Report must be submitted with the Notice of Intent permit application to document compliance with the Stormwater Management Standards. The following checklist is NOT a substitute for the Stormwater Report (which should provide more substantive and detailed information) but is offered here as a tool to help the applicant organize their Stormwater Management documentation for their Report and for the reviewer to assess this information in a consistent format. As noted in the Checklist, the Stormwater Report must contain the engineering computations and supporting information set forth in Volume 3 of the Massachusetts Stormwater Handbook. The Stormwater Report must be prepared and certified by a Registered Professional Engineer (RPE) licensed in the Commonwealth.

The Stormwater Report must include:

- The Stormwater Checklist completed and stamped by a Registered Professional Engineer (see page 2) that certifies that the Stormwater Report contains all required submittals.[1] This Checklist is to be used as the cover for the completed Stormwater Report.
- Applicant/Project Name
- Project Address
- Name of Firm and Registered Professional Engineer that prepared the Report
- Long-Term Pollution Prevention Plan required by Standards 4-6
- Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan required by Standard 8[2]
- Operation and Maintenance Plan required by Standard 9

In addition to all plans and supporting information, the Stormwater Report must include a brief narrative describing stormwater management practices, including environmentally sensitive site design and LID techniques, along with a diagram depicting runoff through the proposed BMP treatment train. Plans are required to show existing and proposed conditions, identify all wetland resource areas, NRCS soil types, critical areas, Land Uses with Higher Potential Pollutant Loads (LUHPPL), and any areas on the site where infiltration rate is greater than 2.4 inches per hour. The Plans shall identify the drainage areas for both existing and proposed conditions at a scale that enables verification of supporting calculations.

As noted in the Checklist, the Stormwater Management Report shall document compliance with each of the Stormwater Management Standards as provided in the Massachusetts Stormwater Handbook. The soils evaluation and calculations shall be done using the methodologies set forth in Volume 3 of the Massachusetts Stormwater Handbook.

To ensure that the Stormwater Report is complete, applicants are required to fill in the Stormwater Report Checklist by checking the box to indicate that the specified information has been included in the Stormwater Report. If any of the information specified in the checklist has not been submitted, the applicant must provide an explanation. The completed Stormwater Report Checklist and Certification must be submitted with the Stormwater Report.

A stormwater report has not been included since no new impervious surface is proposed

[1] The Stormwater Report may also include the Illicit Discharge Compliance Statement required by Standard 10. If not included in the Stormwater Report, the Illicit Discharge Compliance Statement must be submitted prior to the discharge of stormwater runoff to the post-construction best management practices.

[2] For some complex projects, it may not be possible to include the Construction Period Erosion and Sedimentation Control Plan in the Stormwater Report. In that event, the issuing authority has the discretion to issue an Order of Conditions that approves the project and includes a condition requiring the proponent to submit the Construction Period Erosion and Sedimentation Control Plan before commencing any land disturbance activity on the site.

Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands Program

Checklist for Stormwater Report

B. Stormwater Checklist and Certification

The following checklist is intended to serve as a guide for applicants as to the elements that ordinarily need to be addressed in a complete Stormwater Report. The checklist is also intended to provide conservation commissions and other reviewing authorities with a summary of the components necessary for a comprehensive Stormwater Report that addresses the ten Stormwater Standards.

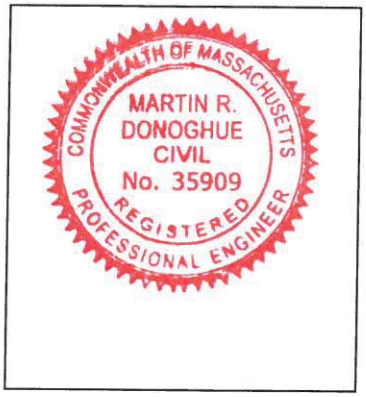
Note: Because stormwater requirements vary from project to project, it is possible that a complete Stormwater Report may not include information on some of the subjects specified in the Checklist. If it is determined that a specific item does not apply to the project under review, please note that the item is not applicable (N.A.) and provide the reasons for that determination.

A complete checklist must include the Certification set forth below signed by the Registered Professional Engineer who prepared the Stormwater Report.

Registered Professional Engineer's Certification

I have reviewed the Stormwater Report, including the soil evaluation, computations, Long-term Pollution Prevention Plan, the Construction Period Erosion and Sedimentation Control Plan (if included), the Long-term Post-Construction Operation and Maintenance Plan, the Illicit Discharge Compliance Statement (if included) and the plans showing the stormwater management system, and have determined that they have been prepared in accordance with the requirements of the Stormwater Management Standards as further elaborated by the Massachusetts Stormwater Handbook. I have also determined that the information presented in the Stormwater Checklist is accurate and that the information presented in the Stormwater Report accurately reflects conditions at the site as of the date of this permit application.

Registered Professional Engineer Block and Signature



9/27/22
Signature and Date

Checklist

Project Type: Is the application for new development, redevelopment, or a mix of new and redevelopment?

☐ New development

☒ Redevelopment

☐ Mix of New Development and Redevelopment

Checklist for Stormwater Report

Checklist (continued)

LID Measures: Stormwater Standards require LID measures to be considered. Document what environmentally sensitive design and LID Techniques were considered during the planning and design of the project:

☐ No disturbance to any Wetland Resource Areas

☐ Site Design Practices (e.g. clustered development, reduced frontage setbacks)

☐ Reduced Impervious Area (Redevelopment Only)

☒ Minimizing disturbance to existing trees and shrubs

☐ LID Site Design Credit Requested:

- ☐ Credit 1
- ☐ Credit 2
- ☐ Credit 3

☐ Use of "country drainage" versus curb and gutter conveyance and pipe

☐ Bioretention Cells (includes Rain Gardens)

☐ Constructed Stormwater Wetlands (includes Gravel Wetlands designs)

☐ Treebox Filter

☐ Water Quality Swale

☐ Grass Channel

☐ Green Roof

☒ Other (describe): no new impervious pavement

Standard 1: No New Untreated Discharges

☒ No new untreated discharges

☐ Outlets have been designed so there is no erosion or scour to wetlands and waters of the Commonwealth

☐ Supporting calculations specified in Volume 3 of the Massachusetts Stormwater Handbook included.

Checklist for Stormwater Report

Checklist (continued)

Standard 2: Peak Rate Attenuation N/A - no new impervious surface

☒ Standard 2 waiver requested because the project is located in land subject to coastal storm flowage and stormwater discharge is to a wetland subject to coastal flooding.

☐ Evaluation provided to determine whether off-site flooding increases during the 100-year 24-hour storm.

☐ Calculations provided to show that post-development peak discharge rates do not exceed pre-development rates for the 2-year and 10-year 24-hour storms. If evaluation shows that off-site flooding increases during the 100-year 24-hour storm, calculations are also provided to show that post-development peak discharge rates do not exceed pre-development rates for the 100-year 24-hour storm.

Standard 3: Recharge N/A - no new impervious surface

☐ Soil Analysis provided.

☐ Required Recharge Volume calculation provided.

☐ Required Recharge volume reduced through use of the LID site Design Credits.

☐ Sizing the infiltration, BMPs is based on the following method: Check the method used.

☐ Static ☐ Simple Dynamic ☐ Dynamic Field[1]

☐ Runoff from all impervious areas at the site discharging to the infiltration BMP.

☐ Runoff from all impervious areas at the site is *not* discharging to the infiltration BMP and calculations are provided showing that the drainage area contributing runoff to the infiltration BMPs is sufficient to generate the required recharge volume.

☐ Recharge BMPs have been sized to infiltrate the Required Recharge Volume.

☐ Recharge BMPs have been sized to infiltrate the Required Recharge Volume *only* to the maximum extent practicable for the following reason:

☐ Site is comprised solely of C and D soils and/or bedrock at the land surface

☐ M.G.L. c. 21E sites pursuant to 310 CMR 40.0000

☐ Solid Waste Landfill pursuant to 310 CMR 19.000

☐ Project is otherwise subject to Stormwater Management Standards only to the maximum extent practicable.

☐ Calculations showing that the infiltration BMPs will drain in 72 hours are provided.

☐ Property includes a M.G.L. c. 21E site or a solid waste landfill and a mounding analysis is included.

[1] 80% TSS removal is required prior to discharge to infiltration BMP if Dynamic Field method is used.

Checklist for Stormwater Report

Checklist (continued)

Standard 3: Recharge (continued)

☐ The infiltration BMP is used to attenuate peak flows during storms greater than or equal to the 10-year 24-hour storm and separation to seasonal high groundwater is less than 4 feet and a mounding analysis is provided.

☐ Documentation is provided showing that infiltration BMPs do not adversely impact nearby wetland resource areas.

Standard 4: Water Quality N/A - no new BMPs proposed

The Long-Term Pollution Prevention Plan typically includes the following:

- Good housekeeping practices;
- Provisions for storing materials and waste products inside or under cover;
- Vehicle washing controls;
- Requirements for routine inspections and maintenance of stormwater BMPs;
- Spill prevention and response plans;
- Provisions for maintenance of lawns, gardens, and other landscaped areas;
- Requirements for storage and use of fertilizers, herbicides, and pesticides;
- Pet waste management provisions;
- Provisions for operation and management of septic systems;
- Provisions for solid waste management;
- Snow disposal and plowing plans relative to Wetland Resource Areas;
- Winter Road Salt and/or Sand Use and Storage restrictions;
- Street sweeping schedules;
- Provisions for prevention of illicit discharges to the stormwater management system;
- Documentation that Stormwater BMPs are designed to provide for shutdown and containment in the event of a spill or discharges to or near critical areas or from LUHPPL;
- Training for staff or personnel involved with implementing Long-Term Pollution Prevention Plan;
- List of Emergency contacts for implementing Long-Term Pollution Prevention Plan.

☐ A Long-Term Pollution Prevention Plan is attached to Stormwater Report and is included as an attachment to the Wetlands Notice of Intent.

☐ Treatment BMPs subject to the 44% TSS removal pretreatment requirement and the one inch rule for calculating the water quality volume are included, and discharge:

- ☐ is within the Zone II or Interim Wellhead Protection Area
- ☐ is near or to other critical areas
- ☐ is within soils with a rapid infiltration rate (greater than 2.4 inches per hour)
- ☐ involves runoff from land uses with higher potential pollutant loads.

☐ The Required Water Quality Volume is reduced through use of the LID site Design Credits.

☐ Calculations documenting that the treatment train meets the 80% TSS removal requirement and, if applicable, the 44% TSS removal pretreatment requirement, are provided.

Checklist for Stormwater Report

Checklist (continued)

Standard 4: Water Quality (continued)

☐ The BMP is sized (and calculations provided) based on:

- ☐ The ½" or 1" Water Quality Volume or
- ☐ The equivalent flow rate associated with the Water Quality Volume and documentation is provided showing that the BMP treats the required water quality volume.

☐ The applicant proposes to use proprietary BMPs, and documentation supporting use of proprietary BMP and proposed TSS removal rate is provided. This documentation may be in the form of the propriety BMP checklist found in Volume 2, Chapter 4 of the Massachusetts Stormwater Handbook and submitting copies of the TARP Report, STEP Report, and/or other third party studies verifying performance of the proprietary BMPs.

☐ A TMDL exists that indicates a need to reduce pollutants other than TSS and documentation showing that the BMPs selected are consistent with the TMDL is provided.

Standard 5: Land Uses With Higher Potential Pollutant Loads (LUHPPLs)

☐ The NPDES Multi-Sector General Permit covers the land use and the Stormwater Pollution Prevention Plan (SWPPP) has been included with the Stormwater Report.

☐ The NPDES Multi-Sector General Permit covers the land use and the SWPPP will be submitted ***prior to*** the discharge of stormwater to the post-construction stormwater BMPs. N/A - no LUHPPLs are present

☒ The NPDES Multi-Sector General Permit does ***not*** cover the land use.

☐ LUHPPLs are located at the site and industry specific source control and pollution prevention measures have been proposed to reduce or eliminate the exposure of LUHPPLs to rain, snow, snow melt and runoff, and been included in the long term Pollution Prevention Plan.

☐ All exposure has been eliminated.

☐ All exposure has ***not*** been eliminated and all BMPs selected are on MassDEP LUHPPL list.

☐ The LUHPPL has the potential to generate runoff with moderate to higher concentrations of oil and grease (e.g. all parking lots with >1000 vehicle trips per day) and the treatment train includes an oil grit separator, a filtering bioretention area, a sand filter or equivalent.

Standard 6: Critical Areas N/A - no treatment train BMPs are proposed

☐ The discharge is near or to a critical area and the treatment train includes only BMPs that MassDEP has approved for stormwater discharges to or near that particular class of critical area.

☐ Critical areas and BMPs are identified in the Stormwater Report.

Checklist for Stormwater Report

Checklist (continued)

Standard 7: Redevelopments and Other Projects Subject to the Standards only to the maximum extent practicable

☒ The project is subject to the Stormwater Management Standards only to the maximum Extent Practicable as a:

- ☒ Limited Project
- ☐ Small Residential Projects: 5-9 single family houses or 5-9 units in a multi-family development provided there is no discharge that may potentially affect a critical area.
- ☐ Small Residential Projects: 2-4 single family houses or 2-4 units in a multi-family development with a discharge to a critical area
- ☐ Marina and/or boatyard provided the hull painting, service and maintenance areas are protected from exposure to rain, snow, snow melt and runoff
- ☐ Bike Path and/or Foot Path
- ☒ Redevelopment Project
- ☐ Redevelopment portion of mix of new and redevelopment.

☐ Certain standards are not fully met (Standard No. 1, 8, 9, and 10 must always be fully met) and an explanation of why these standards are not met is contained in the Stormwater Report.

☐ The project involves redevelopment and a description of all measures that have been taken to improve existing conditions is provided in the Stormwater Report. The redevelopment checklist found in Volume 2 Chapter 3 of the Massachusetts Stormwater Handbook may be used to document that the proposed stormwater management system (a) complies with Standards 2, 3 and the pretreatment and structural BMP requirements of Standards 4-6 to the maximum extent practicable and (b) improves existing conditions.

Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control

A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan must include the following information:

- Narrative;
- Construction Period Operation and Maintenance Plan;
- Names of Persons or Entity Responsible for Plan Compliance;
- Construction Period Pollution Prevention Measures;
- Erosion and Sedimentation Control Plan Drawings;
- Detail drawings and specifications for erosion control BMPs, including sizing calculations;
- Vegetation Planning;
- Site Development Plan;
- Construction Sequencing Plan;
- Sequencing of Erosion and Sedimentation Controls;
- Operation and Maintenance of Erosion and Sedimentation Controls;
- Inspection Schedule;
- Maintenance Schedule;
- Inspection and Maintenance Log Form.

☐ A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan containing the information set forth above has been included in the Stormwater Report.

Checklist for Stormwater Report

Checklist (continued)

Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control (continued)

☐ The project is highly complex and information is included in the Stormwater Report that explains why it is not possible to submit the Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan with the application. A Construction Period Pollution Prevention and Erosion and Sedimentation Control has ***not*** been included in the Stormwater Report but will be submitted ***before*** land disturbance begins.

☐ The project is ***not*** covered by a NPDES Construction General Permit.

☐ The project is covered by a NPDES Construction General Permit and a copy of the SWPPP is in the Stormwater Report.

☒ The project is covered by a NPDES Construction General Permit but no SWPPP been submitted. The SWPPP will be submitted BEFORE land disturbance begins.

Standard 9: Operation and Maintenance Plan

☐ The Post Construction Operation and Maintenance Plan is included in the Stormwater Report and includes the following information:

- ☐ Name of the stormwater management system owners; N/A - no permanent BMPs are proposed
- ☐ Party responsible for operation and maintenance;
- ☐ Schedule for implementation of routine and non-routine maintenance tasks;
- ☐ Plan showing the location of all stormwater BMPs maintenance access areas;
- ☐ Description and delineation of public safety features;
- ☐ Estimated operation and maintenance budget; and
- ☐ Operation and Maintenance Log Form.

☐ The responsible party is ***not*** the owner of the parcel where the BMP is located and the Stormwater Report includes the following submissions:

- ☐ A copy of the legal instrument (deed, homeowner's association, utility trust or other legal entity) that establishes the terms of and legal responsibility for the operation and maintenance of the project site stormwater BMPs;
- ☐ A plan and easement deed that allows site access for the legal entity to operate and maintain BMP functions.

Standard 10: Prohibition of Illicit Discharges Project involves installation of new sewer pipe and no discharges will be connected to the pipe

☐ The Long-Term Pollution Prevention Plan includes measures to prevent illicit discharges;

☒ An Illicit Discharge Compliance Statement is attached;

☐ NO Illicit Discharge Compliance Statement is attached but will be submitted ***prior to*** the discharge of any stormwater to post-construction BMPs.

State Highway Access Permit

This Page Intentionally Left Blank.

5-2022-0639

PERMIT - ORLEANS
Utility: Capital Improvements - Sewer - Amendment

Subject to all terms, conditions, and restrictions printed or written below, permission is hereby granted to **ORLEANS ADMINISTRATION**, Tom Daley, 19 School Road, Orleans, MA 02653 to enter upon State Highway in the Town of **ORLEANS** on Route 28, locally known as South Orleans Road, for the purpose of installing approximately 65 linear feet of 8" (inch) sewer main, within the State Highway Layout (SHLO).

A 17.5' (foot) southerly and 17.0' (foot) northerly x 8' (foot) trench parallel to Finlay Road, a 30' (foot) and 31.2' (foot) x 8' (foot) trench continuing diagonally and southerly across South Orleans Road, a 12' (foot) x 12' (foot) trench over a manhole and an 8.1' (foot) and 7.3' (foot) x 8.0' (foot) trench will be made adjacent to one another across the intersection of South Orleans Road, Finlay Road and Pond Road in the State Highway Layout (SHLO) to install the proposed sewer main between approximate Stations 24+00 and 25+00.

An 8" (inch) sewer force main will be installed via an open cut trench across Route 28 at the intersection of Pond Road/Finlay Road. The installation will enter the SHLO from Pond Road and diagonally cross the northbound lane of Route 28 to a proposed manhole to be installed in the center of the southbound lane of Route 28. From the new manhole the installation will continue in a westerly direction to exit the SHLO on Finlay Road.

Prior to any work being done the Grantee must contact the District 5 Permits section to arrange a site visit to discuss the extent of the final pavement restoration work.

All work, including the traffic management plan, is to be done as described herein and as shown on the approved plans entitled "Plan and Profile Sewer Finlay Road" as drafted by AECCOM Technical Services, Inc., 9 Jonathan Bourne Drive Pocasset, MA 02559, tel.: (978) 905-2100, and dated October 2022.

THIS PERMIT IS BEING ISSUED FOR WORK WITHIN THE SHLO ONLY. AUTHORIZATION TO PERFORM ASSOCIATED WORK OUTSIDE OF SHLO MUST BE GRANTED BY IMPACTED PROPERTY OWNERS.

PLEASE BE ADVISED THAT IF ANY SETTLEMENT IS ENCOUNTERED ON THE ROADWAY DUE TO THIS WORK, THE GRANTEE WILL BE RESPONSIBLE TO PERFORM REPAIR OF THE SETTLED AREA PLUS MILLING AND OVERLAYING THE ENTIRE PAVEMENT CURB TO CURB (LENGTH TO BE DETERMINED AT THE DISCRETION OF THE DEPARTMENT).

The Grantee(s) shall assume all liabilities and expenses associated with any changes in design, labor, materials, etc. for the project in its entirety, to bring said project into compliance with the approved plans, and the terms and conditions set forth by MassDOT, Highway Division.

District 5, 1000 County Street Taunton, MA 02780
Tel: (857) 368-5000, FAX: (508) 880-6102
www.mass.gov/orgs/highway-division

States of Emergencies and Executive Orders

In addition to the conditions and restrictions herein contained, the Grantee is responsible for complying with any relevant Executive Orders or States of Emergencies that may be issued by the Governor's Office while this permit is active. The Governor may declare a State of Emergency in the event or imminent threat of natural or man-made disasters. A State of Emergency can cover a specific municipality, multiple communities, or the entire Commonwealth.
Detailed Information on States of Emergencies and Executive Orders can be found on the Mass.GOV website.
https://www.mass.gov/service-details/state-of-emergency-infomation and
https://www.mass.gov/massachusettsexecutive-orders

Prior to any work being done within the State Highway Layout, the Grantee(s) must upload/submit a Work Request in State Highway Access Permit System (SHAPS) to obtain approval for the proposed work schedule. Said form to be completed/uploaded can be found under the Forms and Sample Submission Documents tab and is entitled "Work Request Form D1 - D5". One (1) of these forms must be uploaded by the close of business every Thursday for the entire duration of the project in order to request approval for the following week's work schedule.

The Grantee(s) must adhere to 520 CMR 14.00: Excavation and Trench Safety as promulgated by the Department of Public Safety in conjunction with the Division of Occupational Safety pursuant to authority granted by M.G.L. c. 82a §1. If not already approved, a Trench Permit Rider must be completed and uploaded to SHAPS before any trench work is performed under this Permit.

The Grantee(s) shall be responsible for all litter and debris generated from their property during the work as described herein and/or from all prospective residents, visitors or patrons of all existing or proposed facilities mentioned herein. This responsibility shall remain in effect for the entirety of all current or future owners of said property. The Grantee(s) shall perform routine inspections and upkeep within the State Highway Layout. If conditions warrant an individual to enter in or within the proximity of a travelled way, the Grantee(s) shall assume all liability and responsibility for the removal of all litter and debris or the hiring of an appropriate party to perform such duties. Significant work within the travelled way may require a police detail. In consideration to all abutters, the Grantee(s) must take notice to the drifting of debris and the removal thereof. If it is found that this requirement is not being fulfilled in a satisfactory manner, MassDOT, Highway Division may decide to clean the area at the Grantee's expense.

PAVEMENT REPAIR

THE PAVEMENT REPAIR WILL REQUIRE MILLING AND OVERLAYING WITH 2" (INCHES) OF SURFACE COURSE A MINIMUM OF 1' (FOOT) ON EITHER SIDE OF THE TRENCH. THE PERMANENT REPAIR OF THE TRENCH, INCLUDING THE MILLING AND OVERLAYING, MUST BE DONE AFTER COMPLETION OF THE 90-DAY SETTLEMENT PERIOD AS DESCRIBED IN THIS PERMIT.

FINAL PAVEMENT REPAIR JOINTS MUST BE SQUARE AND PERPENDICULAR TO THE DIRECTION OF TRAVEL.

The permanent trench repair shall be done as indicated below. Please note that the final trench repair must include a minimum of 7" (inches) of Hot Mix Asphalt or match the existing thickness of the Hot Mix Asphalt for the roadway, whichever is larger.

District 5, 1000 County Street Taunton, MA 02780
Tel: (857) 368-5000, FAX: (508) 880-6102
www.mass.gov/orgs/highway-division

1. 8" (inches) of gravel plus 4" (inches) Dense Graded Crushed Stone (DGCS) over it.
2. 3" (inch) Intermediate or Base Course
3. 2" (inch) Intermediate Course
4. 2" (inch) Surface Course
5. Asphalt emulsion tack coat (RS-1H) must be placed between each course.
6. All vertical edges must be coated with hot poured joint sealer.
7. All damaged pavement markings shall be restriped in kind.

All openings in paved surfaces must be backfilled and paved with a temporary patch consisting of 3” (inches) of hot mix asphalt at the end of every workday. Exposed gravel will not be permitted within the State Highway Layout.

All pavement compositions must meet MassDOT's latest Standards and Specifications for Highways and Bridges.

PLEASE BE ADVISED THAT MASSDOT, DISTRICT 5 RESERVES THE RIGHT TO REQUEST ADDITIONAL REPAIR IF THE REPAIR AREA IS FOUND TO BE LARGER THAN ANTICIPATED.

CONTROLLED DENSITY FILL (CDF) WAIVER

At the written request of the Grantee(s) and approval from MassDOT, Highway Division, CDF is NOT required on this project for trenches greater than 48" (inches) in depth. The Grantee(s) shall perform the work for conventional backfill methods as follows:

1. All methods used to determine and verify the proper compaction of backfill shall be in accordance with AASHTO Standard Specifications of Density of Soil and Soil-Aggregate In-Place by Nuclear Methods (Shallow Depth) (Designation T238-86 Method B - Direct Transmission shall be used to determine in-place density) and Moisture Content of Soil and Soil-Aggregate In-Place by Nuclear Methods (Shallow Depth) (Designation T239-91). Backfill material shall be in accordance with MassDOT, Highway Division Standard Specifications, Section 150.64, Subsection C.

All methods and work shall be performed by a technician on location certified in "soils" by the New England Transportation Technician Certification Program (NETTCP). All data and results shall be submitted to the appropriate District Highway Director for its review and acceptance.

Soil compaction needs to be performed every 6” (inches). Nuclear Gauge Density Testing shall be performed every 1' (foot) of depth and at least twice a week. Proctor/Sieve Analysis testing shall be performed once a week per source of material.

2. A Performance Bond in the (approximate) amount of **$50,000.00** is required by the Grantee(s) to warranty the work described in this waiver. The Performance Bond must be submitted before any work commences on State Property. The life of the Performance Bond shall continue for three (3) additional years from the date MassDOT, Highway Division signs off on the permit.

The Performance Bond shall be in a form satisfactory to MassDOT, Highway Division, furnished by a surety company incorporated pursuant to M.G.L. chapter 175, section 105 or authorized to do business in the Commonwealth under M.G.L. Chapter 175, section 106 and satisfactory to the awarding authority. The name of the agency or agent writing these bonds shall be identified within the bond.

3. The Completion of Work Form shall be electronically uploaded, via the State Highway Access Permit System (SHAPS), as soon as possible after the completion of the physical work to begin the sign-off process. MassDOT, Highway Division, will hold the Permit on file for a period of not less than three (3) years.

4. The Grantee(s) shall assume full responsibility for the structural integrity of any trench described in this Permit. This responsibility shall remain in place for a period of three (3) years after the completion of work which time starts with MassDOT, Highway Division, receiving the Completion of Work Form.

The Grantee(s) shall immediately respond to trench maintenance requests by the District Highway Director. The Grantee(s) must respond within two (2) working days for non-emergency situations. Non-response within the specified time will result in the required maintenance work being done by MassDOT, Highway Division, with all expenses charged to the Grantee(s).

5. Supplying, positioning, adjusting, and re-positioning of all required signs and traffic warning devices shall be the responsibility of the Grantee(s). All signs and devices shall be in accordance with the current Manual on Uniform Traffic Control Devices. The number and location of all signs and devices shall be as deemed necessary by the District Highway Director for the safe and efficient performance of the work and safety of the travelling public.
Care must be exercised so as not to disturb any existing State Highway Drainage or Traffic Duct/wiring Systems or any underground structures that exist. If said system is disturbed, it shall be restored immediately to its original condition. All expenses for restoring conditions shall be the responsibility of the Grantee(s).

6. Uniformed Police Officers or Certified Flaggers shall be provided and compensated by the Grantee(s) and shall be in attendance at all times until completion of the physical work.

WORK WITHIN THE HARDENED SURFACE WITH CDF WAIVER APPROVED

The pavement shall be saw-cut in neat, true lines along the length of the trench. The trench shall then be excavated, the utility installed, and backfilled. The backfill material shall consist of gravel or other suitable material conforming to MassDOT Specifications throughout, to a compacted depth of three inches below the existing surface.

The material shall be selected from excavation free from large lumps, clods, or rock placed between the pipe and the walls of the trench in layers not exceeding 6" (inches) in depth and thoroughly compacted. Each layer, if dry, shall be moistened and then compacted by rolling or by tamping with mechanical rammers. Special care shall be taken to thoroughly compact the fill under the haunches of the pipe or conduit. This method of filling and compacting shall be continued until the material is level with the top of the pipe or conduit. The remainder of the filling shall consist of suitable material placed in successive layers not more than 6" (inches) in depth. The top layer shall be thoroughly compacted to within 3" (inches) of the existing surface.

The trench will then be patched temporarily with a minimum of 3" (inches) of Surface Course placed in one layer to the finished grade of the roadway surface. Be advised that a temporary patch with a minimum of 4" (inches) of Surface Course is required on high traffic volume roadways.

In the cases where the trench needs to include the repair of the entire travel lane/paved shoulder/curb-to-curb, the Grantee may patch the temporary trench with a minimum of 7" (inches) of Hot Mix Asphalt pavement or match existing thickness of this for the roadway, whichever is larger. Pavement composition must meet MassDOT's latest standards. Then after the 90-day settlement period (SOP HMD-75-03-1-000), the Grantee will have to mill 2" (inches) of the existing pavement and overlay the travel lane/paved shoulder/curb-to-curb with two 2" (inches) of Surface Course.

If required, steel plates may be utilized for the safety of overnight motorists. However, steel plates create a slippery surface and should only be used when necessary. The plates may need to be recessed to the finished grade of the roadway as directed by the Engineer. No plates may be left over the weekend. Therefore, the Grantee(s) shall schedule the work accordingly.

Temporary patches shall remain in place for ninety (90) days before being replaced with permanent patch or until in the Engineer's judgment that final compaction and settlement of the trench area has taken place.

District 5, 1000 County Street Taunton, MA 02780
Tel: (857) 368-5000, FAX: (508) 880-6102
www.mass.gov/orgs/highway-division

The Grantee(s) must then excavate the temporary patching and material to a depth of 7" (inches) below the existing surface and replace with the permanent patch which shall consist of 3" (inches) of Intermediate or Base Course, 2" (inches) of Intermediate Course, and 2" (inches) of Surface Course.

All abutting edges of the existing pavement shall be coated with hot poured joint sealer immediately prior to the placement of the permanent patch.

DRAINAGE IMPACTS

Note that existing drainage lines are not located/marked out by Dig-Safe, therefore, care should be taken during excavation operations to ensure that drainage components located within the limit(s) of work are not impacted during work to be performed under this Permit. The Grantee(s) may send a request for drainage plans in anticipation of the work to the Highway Maintenance Section at (857) 368-5240. Requests should be sent a minimum of five (5) business days ahead of the proposed work. Be advised that if additional information is needed, the Grantee(s) will be required to perform survey work of the drainage structures to identify the location of the drainage components.

If the work under this Permit includes the installation or relocation of drainage structures or work alters the existing State drainage system, the Grantee(s) shall be responsible to clean the drainage system, including any other structure/drainage line/outfall within the project limits to ensure the drainage system works adequately.

The Grantee(s) shall be responsible for any damage that occurs to said drainage components as a result of the work. Should any damage(s) occur, the Grantee(s) must immediately contact the Highway Maintenance Section.

TIME RESTRICTIONS AND NOTIFICATIONS

DUE TO HEAVY SUMMER TRAFFIC, NO WORK SHALL BE PERFORMED ON THIS PROJECT BETWEEN MEMORIAL DAY WEEKEND AND LABOR DAY WEEKEND WITHOUT PRIOR APPROVAL FROM THE DISTRICT HIGHWAY DIRECTOR.

Special attention shall be given when performing work that will impact MassDOT, Highway Division, snow and ice operations.

No work shall be performed in the hardened surface of the roadway between November 15th and April 1st of any year without prior written approval from the District Highway Director.

No pavement shall be laid between November 15th and April 1st of any year without prior written approval from the District Highway Director.

No work shall be performed on this project on Saturdays, Sundays, and Holidays, or on the Friday after a Thursday Holiday. Work is also restricted on the day before and the day after a long Holiday weekend without prior written approval by the District Highway Director.

No equipment, trucks, etc., shall occupy any part of the travelled way except between the hours of **9:00 a.m. and 3:00 p.m., Monday - Friday**. In no case will operations exceed the specified hours. This includes the placement of traffic control devices, equipment, or anything that restricts the flow of traffic through the construction zone. Any change in work hours will require prior written approval by the District Highway Director. The 12-minute rule will remain in effect for the duration of the permit.

All other work, off the pavement on this project is restricted to a normal 8-hour day, Monday - Friday, with the prime Contractor and all subcontractors working on the same shift. Any change in work hours will require prior written approval by the District Highway Director.

GENERAL TRAFFIC MANAGEMENT AND SAFETY REQUIREMENTS

If required by MassDOT, Highway Division District 5, variable message boards (VMBs) shall be utilized as part of the approved traffic management plan under this Permit which must be properly secured with regards to hacking and unauthorized tampering prevention. The Grantee(s) shall adhere to all appropriate security specifications and take all necessary precautions to mitigate the risk of the boards being hacked. All VMBs shall be stored in a secured area and shall have a lockable, weatherproof enclosure for the operator interface, removable local keyboards which shall be removed whenever possible, and a password protected controller with local administrative passwords changed on a regular basis.

When any portion of the roadway will be blocked with equipment to facilitate the proposed work, the Grantee(s) will be required to adhere to the attached Traffic Management Plan (TMP) or submit a proposed TMP to MassDOT, Highway Division, to be reviewed and approved by the District Traffic Maintenance Engineer prior to working within or impacting the roadway. The plan must include information relating to proper signing, traffic control device placement and police details.
It is imperative to maintain two-way traffic at all times and these operations are managed so that motorists travel "delay" is minimized. At any time during the operation when a traffic delay of over twelve (12) minutes occurs and the situation is worsening, the Resident Engineer, Contractor, or Police Detail will begin to suspend operations.

Continuously increasing "delays" of over twelve (12) minutes are not to be permitted.

If traffic must be "stopped", the duration shall not be more than five (5) minutes.

Uniformed State/Local Police Officer(s) and their official vehicle(s) may be necessary to provide protection for those installing and removing all temporary traffic warning signs and devices and to perform all traffic management as required.

The Grantee(s) will monitor the flow of traffic during peak traffic volumes and if necessary, shall suspend all operations. Work will resume at the discretion of the Police detail officer and/or to the satisfaction of the supervising MassDOT, Highway Division, Engineer.

In the event of inclement weather or dense fog, which lessens the visibility of advance warning signs, vehicles and workers, the Grantee(s) will suspend all operations so as not to interfere with the safety of the motoring public and the operations of work. In the event of snow or icing conditions, all vehicles and equipment must be removed from the roadway and/or shoulder area so as not to interfere with Snow and Ice Operations.

The Grantee(s) shall provide safe and ready means of access and egress to all public and private roads and drives 24 hours per day. Every effort must be made as not to interfere with or inconvenience all abutters throughout the duration of this project.

Signs and traffic control devices are required for advance notice of the work and within the work area

The Grantee(s) or Applicant will supply all required signs and traffic warning devices and shall be in accordance with the Massachusetts Manual on Uniform Traffic Control Devices. The number and location of all signs and devices shall be as deemed necessary by the Engineer for the safe and efficient performance of the work and the safety of the travelling public.

All warning devices shall be subject to removal, replacement, and/or repositioning by the applicant as often as deemed necessary by the Engineer.

District 5, 1000 County Street Taunton, MA 02780
Tel: (857) 368-5000, FAX: (508) 880-6102
www.mass.gov/orgs/highway-division

Cones or non-reflectorized warning devices shall not be left in operating position on the highway when the daytime operations have ceased. If it becomes necessary for MassDOT, Highway Division, to remove the construction warning devices or their appurtenances from the project due to negligence by the applicant, all costs for this work will be charged to the Grantee(s).

All vehicles, except passenger's cars, which are assigned to the permitted project, and which operate on the site at speeds of 25 MPH or less, shall have an official SLOW-MOVING VEHICLE emblem displayed. All vehicles and equipment on this project must be equipped with back-up alarms.

All personnel who are working on the travelled way or breakdown lanes shall wear approved safety vests and hard hats.

GENERAL CONDITIONS AND APPROVED PROCEDURES

The Grantee(s) must contact the "Dig Safe" Center at 811 to obtain a "Dig Safe" number prior to starting the proposed excavation for the purpose of identifying the location of underground utilities.

IF THE PROPOSED WORK FALLS WITHIN THE AREA OF A SIGNALIZED INTERSECTION, the Grantee(s) must contact the District Traffic Maintenance Engineer at (857) 368-5261 at least two (2) weeks prior to the commencement of said work to locate the existing traffic signal conduit/detectors and to coordinate this work so as not to disturb the traffic signals. The Grantee(s) shall provide the District Traffic Maintenance Engineer with the Permit number, the approximate Stations where the work will take place, and the limits of the work. The Grantee(s) will be responsible for marking the limits of the work in the field so that MassDOT, Highway Division, can mark the locations of all existing traffic signal conduit/detectors within those limits. The Grantee(s) will be responsible to repair/replace all damaged items and will be billed for any cost incurred to restore normal operation to MassDOT, Highway Division, signal equipment to the satisfaction of the Engineer.

Unless otherwise stated, no hardened surface of the State Highway may be disturbed.

When an opening in the roadway is required and permitted herein, the opening must be as small as possible to perform the proposed work.

If the integrity of any existing sidewalks, catch basins, manholes or any other underground structures or equipment is compromised, the Grantee(s) will reconstruct and/or replace all items according to MassDOT, Highway Division, Standards at the cost of the Grantee(s) and to the satisfaction of the Engineer.

The Grantee(s) must not disturb or remove any MassDOT, Highway Division, bound(s) (MHB) associated with this project. If so disturbed or missing, the bound(s) must be reset/replaced by a Registered Land Surveyor. All procedures and materials must be in compliance with Massachusetts Design and Construction Standards. A copy of the paid bill must be submitted to this office upon completion of said work.

All traffic safety lines if disturbed shall be replaced in kind.

DRAINAGE AND UTILITY CASTINGS

“The use of risers to adjust drainage and utility structures will not be allowed. All adjustment work done to existing or new drainage structures shall conform to Section 220 of MassDOT, Highway Division, Standard Specifications and according to Plates 201.3.0 and 2029.0 o MassDOT, Highway Division, Construction Standards.”

ENVIRONMENTAL LIABILITY AND COMPLIANCE

The Grantee(s) assumes all risk associated with any environmental condition within the subject property and shall be solely responsible for all costs associated with evaluating, assessing, and remediating, in accordance with all applicable laws, any environmental contamination (1) discovered during Grantee's work or activities under this Permit to the extent such evaluation, assessment or remediation is required for Grantee's work, or (2) resulting from the Grantee's work or activities under this Permit. The Grantee(s) shall notify MassDOT, Highway Division, of any such assessment and remediation activities.

The Grantee(s) is hereby held solely responsible for obtaining and maintaining any and all environmental compliance permits required by local, state, and federal laws and regulations when regular or emergency work is proposed within, or in close proximity to, any wetland area. These environmental compliance requirements include, but are not limited to, a Negative Determination of Applicability or Order of Conditions from the local Conservation Commission, a Water Quality Certificate from the Department of Environmental Protection, and a Programmatic General Permit from the U.S. Army Corps of Engineers. The Grantee(s) shall forward to MassDOT, Highway Division, a copy of each such environmental compliance permit.

CLOSING CONDITIONS

ALL OF SAID WORK SHALL COMPLY WITH THE TERMS AND CONDITIONS HEREIN, AND MUST BE DONE AS DIRECTED BY AND TO THE SATISFACTION OF THE ENGINEER

All work done under this contract shall be in conformance with the Massachusetts Highway Department "Standard Specifications for Highways and Bridges" 2022 Edition and any subsequent "Supplemental Specifications". All construction shall conform to the June 2017 edition of the Massachusetts Department of Transportation, Highway Division "Construction Standard Details (English Edition)"; the latest Manual on Uniform Traffic Control Devices with Massachusetts Amendments; the latest edition to the following: the 1996 Construction and Traffic Standard Details (as related to Traffic Standard details only); the 1990 Standard Drawings for Traffic Signs and Supports; the 1968 Standard Drawings for Traffic Signals and Highway Lighting; the latest edition of American Standard for Nursery Stock; the Plans and these Special Provisions. These publications can be access from the SHAPS dashboard of from the following link: https://www.mass.gov/lists/miscellaneous-publications#miscellaneous-publications

The Grantee(s) shall indemnify and save harmless the Commonwealth and MassDOT, Highway Division, against all suits, claims or liability of every name and nature arising at the time out of or in consequence of the acts of the Grantee(s) in the performance of the work covered by this Permit and/or failure to comply with the terms and conditions of this Permit whether by themselves or their employees or subcontractors.

It is noted that the Grantee(s) will be responsible for future corrective actions resulting from defective work under the subject permit. Any damage to roadway and/or shoulder as a result of the permitted work is the Grantee's responsibility and shall be repaired at his/her expense.

THE GRANTEE(S) SHALL SUBMIT A COMPLETION OF WORK FORM, BY REQUESTING A SIGN–OFF USUING THE ACTION LINK IN THE SHAPS DASHBOARD, WHEN THE WORK REQUIRED UNDER THIS PERMIT HAS BEEN COMPLETED IN ORDER FOR A FINAL INSPECTION TO BE PERFORMED BY MASSDOT, HIGHWAY DIVISION. THE LIABILITY ASSUMED UNDER THIS PERMIT WILL CONTINUE UNTIL THE WORK HAS BEEN SIGNED OFF AS COMPLETE.

A COPY OF THIS PERMIT MUST BE ON THE JOB SITE AT ALL TIMES FOR INSPECTION. FAILURE TO HAVE THIS PERMIT AVAILABLE AT THE SITE WILL RESULT IN SUSPENSION OF THE RIGHTS GRANTED BY THE PERMIT.

District 5, 1000 County Street Taunton, MA 02780
Tel: (857) 368-5000, FAX: (508) 880-6102
www.mass.gov/orgs/highway-division

"FOLLOWING CONDITIONS APPLY TO PERMITS"
Conditions Relating Particularly to Permits for the Laying of Pipes, Conduits, etc.

After any pipes, conduits, drains or other underground structures are laid, or any excavation is made in the roadway, the trenches or openings shall be properly backfilled with suitable material, the backfilling shall be thoroughly tamped, and the surface of the road over said structures shall be left even with the adjoining ground. If the work is done in cold weather no frozen material shall be used for backfilling.

Wherever the hardened surface of the roadway, gutters, or any part of the surface of the highway is disturbed it shall be replaced in as good condition as before it was disturbed, and if new materials are required, they shall correspond with those already in place on the road.

Where service pipes are to cross the highway, the connections shall be made without disturbing the hardened surface of the roadway, by driving the pipes under the roadway, or the service pipes shall be carried under and across the road in a larger pipe, unless otherwise ordered by the Director.

The Grantee shall maintain the surface of the roadway over said structures as long as MassDOT may deem necessary, until all signs of the trenches shall have been eliminated.

CONDITIONS RELATING PARTICULARLY TO PERMITS FOR THE ERECTION OF POLES, WORKS AND OVERHEAD STRUCTURES, AND THE CUTTING AND TRIMMING OF TREES

In the erection of pole lines, unless otherwise herein provided, no trees located within the limits of the State Highway shall be cut or trimmed. No guy wires shall be attached to trees without a special Permit from MassDOT, and in no event shall they be so attached as to girdle the trees or in any way interfere with their growth. The wires shall be so protected at all time and places that they shall not interfere with or injure the trees either inside or outside the location of the highway.

Where the cutting or trimming of trees is authorized by this Permit, only such cutting, and trimming shall be done as may be designated by the Director.

In the construction or reconstruction of pole lines no guy wires shall be erected nearer to the surface of the ground than 6' (feet); provided, however, that the owners of such lines may maintain such guy wires at a lower elevation than 6' (feet) from the ground until such time as MassDOT shall notify them to remove said wires or to the elevation first stated.

In order to protect the trees through which any wires may pass, said wires shall be insulated and such other tree guards used as may be directed by the Director.

Where high tension wires are erected under this Permit, they shall be so located that, under conditions of maximum severity as regards a coating of ice or snow, there shall be a space of at least 8' (feet) between such high-tension wires and other wires.

The Grantee shall, within sixty (60) days from the date of completion of the work, file in the office of MassDOT a plan showing the location of each pole erected in accordance with the Permit, said plan to be of such size and in such form as MassDOT may direct.

GENERAL AND ADDITONAL CONDITIONS

Whenever the word "MassDOT" is used herein it shall mean the Massachusetts Department of Transportation of the Commonwealth of Massachusetts.

District 5, 1000 County Street Taunton, MA 02780
Tel: (857) 368-5000, FAX: (508) 880-6102
www.mass.gov/orgs/highway-division

Whenever the word "Director" is used herein it shall mean the District Highway Director or other authorized representative of MassDOT.

Whenever the word "Grantee" is used herein it shall mean the person or persons, corporation or municipality to whom this Permit is granted, or their legal representatives.

During the progress of the work all structures underground and above ground shall be properly protected from damage or injury; such barriers shall be erected and maintained as may be necessary for the protection of the traveling public; the same shall be properly lighted at night; and the Grantee shall be responsible for the damages to persons or property due to or resulting from any work done under this Permit.

Except as herein authorized, no excavation shall be made, or obstacle placed within the limits of the State highways in such a manner as to interfere unnecessarily with the travel over said road.

If any grading of sidewalk work done under this Permit interferes with the drainage of the State highway in any way, such catch basins and outlets shall be constructed as may be necessary, in the opinion of the Director, to take proper care of such drainage.

Wherever the hardened surface of the roadway is disturbed and the Director may consider it necessary or advisable to do so, said surface will be restored by the employees of MassDOT, at such time as MassDOT may direct, and the expense thereof shall be borne by the Grantee, who shall purchase and deliver on the road the materials necessary for said work if and when directed by the Director. All payments to the supplier and to laborers, inspectors, etc., employed by MassDOT for or on account of the work herein contemplated shall be made by said Grantee forthwith on receipt of written orders, pay rolls, or vouchers approved by MassDOT.

IF THE GRANTEE DOES ANY WORK CONTRARY TO THE ORDERS OF THE DIRECTOR, AND, AFTER DUE NOTICE, FAILS TO CORRECT SUCH WORK OR TO REMOVE STRUCTURES OR MATERIALS ORDERED TO BE REMOVED, OR FAILS TO COMPLETE WITHIN THE SPECIFIED TIME THE WORK AUTHORIZED BY THIS PERMIT, MASSDOT MAY, WITH OR WITHOUT NOTICE, CORRECT OR COMPLETE SUCH WORK IN WHOLE OR IN PART, OR REMOVE SUCH STRUCTURES OR MATERIALS, AND THE GRANTEE SHALL REIMBURSE MASSDOT FOR ANY EXPENSE INCURRED IN CORRECTING AND/OR COMPLETING THE WORK OR REMOVING THE STRUCTURES OR MATERIALS.

ALL OF THE WORK HEREIN CONTEMPLATED SHALL BE DONE UNDER THE SUPERVISION AND TO THE SATISFACTION OF THE MASSACHUSETTS DEPARTMENT OF TRANSPORTATION, AND THE ENTIRE EXPENSE THEREOF SHALL BE BORNE BY THE GRANTEE.

On the completion of the work herein contemplated all rubbish and debris shall be removed and the roadway and roadsides shall be left neat and presentable and satisfactory to the Director.

MassDOT hereby reserves the right to order the change of location or the removal of any structure or structures authorized by this Permit at any time, said change or removal to be made by and at the expense of the Grantee or its / their successors or assigns.

This Permit may be modified or revoked at any time by MassDOT without rendering said MassDOT or the Commonwealth of Massachusetts liable in any way.

The Grantee shall pay the salary, subsistence, and travel expenses of any inspector appointed by MassDOT to supervise the work herein contemplated.

All of the above conditions shall be applicable to the work herein authorized, unless the same are inconsistent with the conditions on the face of the Permit, in which case the conditions written or printed on the face of the Permit shall apply.

The acceptance of this Permit or the doing of any work thereunder shall constitute an agreement by the Grantee to comply with all of the conditions and restrictions printed or written herein.

COMMONWEALTH OF MASSACHUSETTS

BARNSTABLE, SS.

TOWN OF ORLEANS
OFFICE OF THE SELECT BOARD

ORDER OF TAKING

At a regularly scheduled meeting of the Select Board of the Town of Orleans, a municipal corporation located in the County of Barnstable, Commonwealth of Massachusetts (the "Town") held on the 24th day of August, 2022, it was voted and ordered as follows:

The Select Board of the Town of Orleans, duly elected, qualified, and acting pursuant to the provisions of G.L. c. 79, G.L. c. 83, §1 and §3, and any and every other power and authority as hereto in any way enabling, does hereby take on behalf of the Town, permanent easements in, on, under and across the parcels of land in Orleans, known as Linden Lane, Packet Landing, Uncle Vick's Way, Larboard Lane, Karen Way, Natural Drive, Windy Hill Lane, Bayberry Way, High Tide Lane, Cedar Way, Pond View Road, Grist Road, Lake Farm Lane, Cole Place, Manito Road, Cheney Road, Loomis Lane, Nauset Farms Way, Reverend Treat Road, Whistle Berry Lane, Gesner Road, a certain 20 foot Way on Main Street, Lucy's Lane, and Baxter Lane (collectively, the "Easement Premises"), and described more particularly in Exhibit A, attached hereto and incorporated herein, for the purpose of constructing, inspecting, maintaining, operating, improving, repairing, renewing, replacing and abandoning in place (a) a sewer system and any and all structures and facilities related thereto, including, without limitation, manholes, lines, mains, pipes, conduits, pump stations and such other structures, facilities and/or appurtenances as may be necessary or convenient to establish a public sewerage system, including, without limitation, for the purpose of extending and/or connecting, regardless of origin, to other land, (b) stormwater drain or drains, drainage swales, detention or retention basins, and any manhole, pipes, catch basins, conduits, culverts, channels, and such other structures, facilities and/or appurtenances as may be necessary or convenient for the proper drainage of stormwater, including, without limitation, for the purpose of extending and/or connecting drainage facilities, regardless of origin, to other land, and (c) water mains, pipes, shut-offs, service boxes and such other equipment including any works, facilities and appurtenances associated therewith, including, without limitation, for the purpose of extending and/or connecting water facilities, regardless of origin, to other land; and, further, to take any and all actions as may be necessary or incidental to accomplish the foregoing purposes.

The Town shall have the right to enter upon and pass over the Easement Premises from time to time, by foot, vehicle, or heavy equipment, for any and all purposes stated herein and uses necessary or incidental thereto, including, without limitation, using and temporarily storing, as needed, construction equipment, materials or other incidental items within the Easement Premises for the purposes set forth herein. All sewer, drainage and water facilities installed by the Town shall be and remain the property of the Town.

NOT AN OFFICIAL COPY

No permanent or temporary buildings, structures, and/or objects shall be constructed, installed, maintained and/or placed upon the Easement Premises that may interfere with the rights hereby taken.

Trees, shrubs and stone walls located within the Easement Premises are also taken hereby and shrubs and stone walls may be relocated within the easement area. Other structures so located are not taken and shall be removed or may be relocated within the Easement Premises whenever their removal or relocation shall be required for the purposes for which the easements are taken.

The Town is not hereby taking any interest in existing easements, if any affecting the Easement Premises that do not interfere with the use of the premises for the purposes for which the easements are taken, and is not taking any structures located within the Easement Premises pursuant to any such existing easements but such structures may be relocated.

The land affected by the herein taking are owned or supposedly owned by the owners listed in Exhibit B attached hereto and incorporated within. If in any instance the name of any owner is not correctly stated in Exhibit B, it is understood that in such instance the land referred to is owned by an owner or owners unknown to us.

We have determined that no persons will sustain damages in their property by reason of the herein taking, all in accordance with the provisions of G.L. c.79, §6, as amended, and accordingly award no damages for this taking.

Betterments are to be assessed in accordance with applicable statutes and bylaws.

PROJECT NOTIFICATION FORM

Project Name: *Meetinghouse Pond Area Wastewater Collection System (MPAWCS)*

Location / Address: *Meetinghouse Pond Area*

City / Town: *Orleans, Massachusetts, MA*

Project Proponent

Name: *Town of Orleans*

Address: *c/o Thomas Parece, PE, AECOM, 9 Jonathan Bourne Drive*

City/Town/Zip/Telephone: *Pocasset, MA 02559*

After review of MHC files and the materials you submitted, it has been determined that this project is unlikely to affect significant historic or archaeological resources.
RC. 70581
11/16/21
Date
Jonathan K. Patton
Archaeological Preservation Planner
Massachusetts Historical Commission

Agency license or funding for the project (list all licenses, permits, approvals, grants or other entitlements being sought from state and federal agencies).

Agency Name:	*Type of License or funding (specify)*
Orleans DPW&NR	*Roadway Opening Permit*
Orleans Conservation Commission	*Wetlands Notice of Intent/Order of Conditions **
Massachusetts Historical Commission	*Certificate of Appropriateness*
MassDOT	*Roadway Opening Permit*
MassDEP	*Water Quality Permit*
MassDEP	*Plan and Specification Approval*
Massachusetts Natural Heritage	*Conservation Permit**
U.S. Army Corps of Engineers	*Programmatic General Permit **
U.S. EPA	*NPDES Permit for construction dewatering permit **
U.S. EPA	*NPDES Construction Genmeral Permit*

Project Description (narrative):

Utility Construction of a Sanitary Sewer Collection System in the Meetinghouse Pond Area of Orleans, MA to provide service to about 486 properties.
Construction will include the following:

- *About 15,750 Linear Feet of 8-inch through 12-inch PVC Gravity Sewer*
- *About 20,750 Linear Feet of 1.5 through 3-inch Low Pressure Sewer*
- *1 Submersible Pumping Station*
- *About 7,500 Linear Feet of 8-inch PVC Force Main*

The sewers will primarily be constructed within the previously disturbed roadway rights of way.

APPENDIX A (continued)

Does the project include demolition? If so, specify nature of demolition and describe the building(s) which are proposed for demolition. *No.*

Does the project include rehabilitation of any existing building? If so, specify nature of rehabilitation and describe the building(s) which are proposed for rehabilitation. *No.*

Does the project include new construction? If so, describe (attach plans and elevations if necessary).

Yes. The project includes sewer system improvements including the construction of three pump stations

To the best of your knowledge, are any historic or archaeological properties known to exist within the project's area of potential impact? *Yes.* **If so, specify.**

There are two historic districts with 53 historic properties listed within the MPAWCS, one of which is listed in the National Register of Historic Places (ORL.188 – Universalist Society Meetinghouse at 3 River Road). Another ten aboveground resourcers outside the district are located adjacent to proposed sewer lines.

There are 16 previously recorded pre-contact archaeological sites within one half mile of the MPAWCS project area. There is one post-contact archaeological site within one half mile of the MPAWCS project area. Only one of the 17 previously recorded sites (19-BR-209) falls along a proposed MPAWCS line. Other than its location at the northern-most part of Frostfish Cove (Meetinghouse Pond), little is known about this site (MHC site files).

What is the total acreage of the project area?

Woodland	acres	Productive Resources:	
Wetland	acres	Agriculture	acres
Floodplain	acres	Forestry	acres
Open Space	acres	Mining	acres
Developed	acres	Total Project Acreage 7.5	acres

What is the acreage of the proposed new construction? 7.5 acres

What is the present land use of the project area? *Residential and light commercial development*

Please attach a copy of the section of the USGS quadrangle map which clearly marks the project location.
See attached.

Re: Meetinghouse Pond Area Wastewater Collection System
Orleans, Massachusetts
PAL #3316.02

Dear Ms. Simon:

Enclosed please find a Project Notification Form (PNF) for the above-referenced project, along with maps and a due diligence review report for your review and comment. The Town of Orleans is proposing to construct new sewer lines and a pump station in the Meetinghouse Pond Area. AECOM, on behalf of the Town of Orleans, has retained PAL to assist with cultural resource issues.

If you have any questions or need further information, please do not hesitate to contact Deborah C. Cox, President, or me, at your convenience.

Sincerely,

A. Peter Mair, II
Senior Archaeologist

Memorandum
Meetinghouse Pond Area Wastewater Collection System Project
Orleans, Massachusetts

Cultural Resource Evaluation

September 29, 2021

Submitted to:

PAL Project #3316.02

AECOM
9 Jonathan Bourne Drive
Pocasset, MA 02559

In response to a request from AECOM, on behalf of the Town of Orleans, The Public Archaeology Laboratory, Inc. (PAL) has completed a cultural resources evaluation as part of the Meetinghouse Pond Area Wastewater Collection System Project (MPAWCS or the Project) in Orleans, Massachusetts (Figure 1).

The goal of the archaeological sensitivity assessment was to collect updated information about previously identified archaeological resources, document previous disturbance and existing conditions, and produce a detailed archaeological sensitivity assessment of the project areas. The assessment also includes recommendations on the need for and scope of additional archaeological investigations, if necessary. The survey will be designed to address Massachusetts Historical Commission (MHC) review and comment on the project, and to provide information necessary to facilitate project review under Section 106 of the National Historic Preservation Act of 1966 (as amended) (36 CFR 800) and M.G. L. Chapter 9, Sections 26-27c (950 CMR 70-71).

The cultural resources review included the collection of information about known cultural resources within the project's area of potential effect (APE), including historic and archaeological resources in the Massachusetts Cultural Resource Inventory System (MACRIS), and an assessment of existing conditions within the project area. The purpose of the work was to assemble information about previously documented historical resources within and near the project area and provide recommendations about significant archaeological sites that may be affected by the project. PAL compiled information about previously documented cultural resources and assessed the sensitivity of the project area for the potential to contain previously unrecorded archaeological sites.

This memorandum summarizes the results of the cultural resources evaluation and recommendations for archaeological monitoring during project construction work. The sensitivity assessment included background research and a walkover/drive-over field assessment of the project area.

Figure 1. Location of the Meetinghouse Area Wastewater Collection System Project on the Orleans USGS topographic quadrangle, 7.5 minute series.

Project Setting

The Project will include construction of sewer lines and one pump station in the Meetinghouse Pond area of Orleans. (Figure 2). The project area is primarily residential, with some small pockets of light commercial land-use. Major roads include Pond Road, Monument Road, Main Street, River Road, Great Oak Road, Beach Road, and Barley Neck Road. Many of the side streets off these main roads are private lanes. The topography of the project area is relatively flat to gently rolling with evidence of numerous small depressions that most likely are remnant kettle holes. Crystal Lake and Meetinghouse Pond lie to the south and several small ponds and wetland areas are present at the eastern end of the project area in the vicinity of Cole Place, Dermott Way and Mill Road. Soils in the project area are primarily well to excessively well drained Carver, Deerfield, Carver Hinesburg, Eastchop, Nantucket, and Plymouth coarse loamy sands. Interspersed among these soils are pockets of poorly drained Freetown and Swansea muck, Freetown coarse sand and Ipswich-Pawcatuck-Matunuck complex (USDA 1993).

Area of Potential Effect (APE) and Study Area

The Project's Area of Potential Effects (APE) is defined as the geographic area or areas within which an undertaking may directly or indirectly cause alterations in the character or use of historic properties, if any such properties exist." A historic property is defined as "any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the National Register of Historic Places (National Register) maintained by the Secretary of the Interior" (36 CFR § 800.16(l)). The APE is defined based on the potential for effect, which may differ for aboveground resources (historic structures and landscapes) and subsurface resources (archaeological sites). The APE for archaeological sites is any areas of ground disturbances that may occur during constructing the proposed MPAWCS, including construction and staging areas.

The study area established for the purposes of the identification effort was broadly defined to provide information about the types of resources located within the vicinity of the Project. For archaeological resources, the study area encompassed one-half mile band around the Project. For historic architectural properties the study area was confined to abutting properties along the proposed routes of the Project (Figure 3). PAL compiled information about previously documented historic properties within the APE and Study Area and reviewed available information about project area conditions to provide recommendations regarding known and potential archaeological sites and historic aboveground properties that may be affected by the project.

Results of the Inventory File Review

The MHC site files list dozens of historic architectural properties and archaeological sites within the vicinity of the MPAWCS project area (Figure 3). The resources were identified through a search of the MHC's MACRIS.

Figure 2. Proposed Collection System Layout, Meetinghouse Pond Area Wastewater Collection System, Orleans, MA.

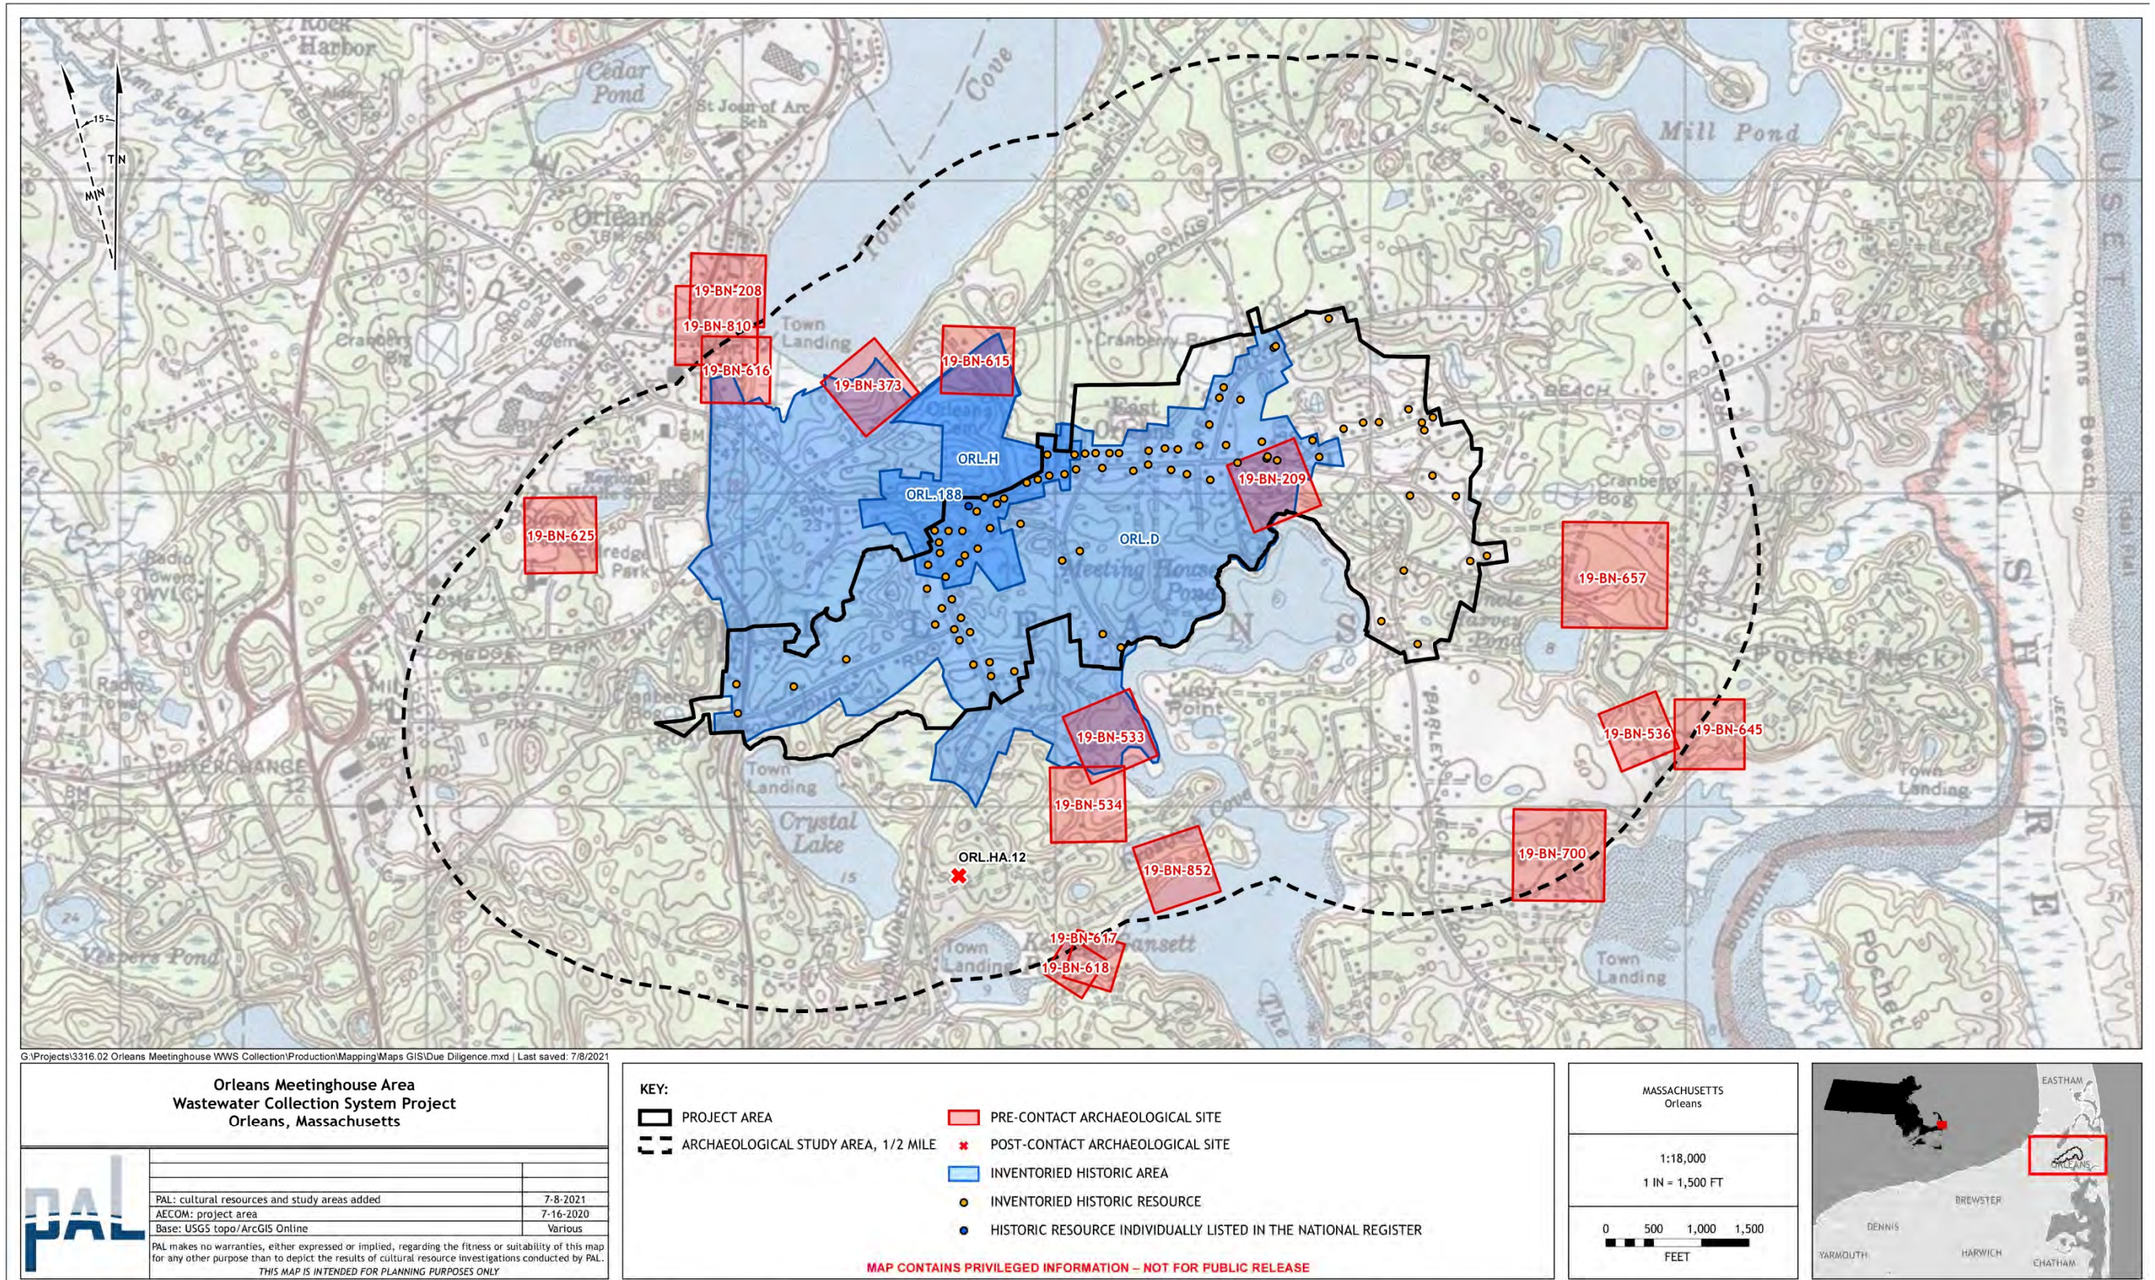

Figure 3. Recorded archaeological sites within a half-mile and inventoried historic aboveground resources within the Meetinghouse Area Wastewater Collection System Project Area on the Orleans, Massachusetts USGS topographic quadrangle, 7.5 minute series.

Architectural and Historic Resources

The MPAWCS encompasses portions of the Main Street, East Area (ORL.D) and the Orleans Village Area (ORL.H) (see Figure 3). The Main Street, East Area (ORL.D) covers over 100 acres and consists of residential, commercial, and civic structures. There are over 90 above ground resources within the district, 53 aboveground resources listed within the district are located on roads where sewer installation is proposed (Table 1; Figure 3). The Orleans Village Area (ORL.H) is an irregular shaped, 65-acre, densely developed, mixed-use area within the Main Street East Area (ORL.D). It consists of 34 buildings. One resource, Universalist Society Meetinghouse (ORL.188) on River Road, is listed in the National Register of Historic Places. Three war memorials (ORL.912, ORL.913, and ORL.914) fall within OMAWCS. Another 10 aboveground resources outside of the district are located adjacent to proposed sewer lines.

Archaeological Resources

Background research was conducted to assist with the archaeological sensitivity assessment and to develop predictive statements for the types of archaeological resources that may be present within the MPAWCS area. Background research for the project was accessed through the Orleans Historical Society's online archives, a review of MHC's cultural resource database, literature review, and a review of PAL's collection of resources from conducting extensive work on Cape Cod. Several sources of information in PAL's database relative to environmental and pre- and post-contact historic contexts for Orleans and Cape Cod were reviewed for information on known and expected archaeological resources (PAL 2016; Banister and Herbster 2015; Doucette 2017, 2018; Gillis and Herbster 2013; Herbster and Heitert 2011; Waller and Leveillee 2011). Cultural resource inventory files maintained at the MHC were also reviewed for updated information on known historic and archaeological resources in proximity to the project area (MHC 1984, 1987; Decima 1994; Decima et al. 1992; Edens 1995; Edens et al. 1995). Primary and secondary histories and historical maps and atlases were examined to assess changes in land use, to locate any documented structures, and to trace the development of transportation networks (an important variable in the location of post-contact archaeological sites). Town and regional histories, and historical maps and atlases were consulted to locate possible sites dating to the post-contact period within and close to the project area (Walker 1880, 1905, 1910; Walling 1857). Taken together, information from these various sources was used to arrive at a preliminary assessment of the archaeological sensitivity of the project area.

There are 16 Native American pre-contact archaeological sites recorded with MHC within one half mile of the MPAWCS area (see Figure 3; Table 2). There is one post-contact archaeological site (Keziah Lane [ORL.HA.12]) recorded within one half mile of the proposed project area. Only one of the 17 previously recorded sites (19-BR-209) falls along a proposed MPAWCS line. Other than its

location at the northern-most part of Frostfish Cove (Meetinghouse Pond), little is known about this site (MHC site files).

Table 2. Pre-Contact Archaeological Sites Recorded within One-Half Mile of the MPAWCS Project Area.

Site Name	MHC Site #	Temporal Period	Site Type
19-BN-208	Peter Hunts Site	Woodland	
19-BN-209			
19-BN-373	Fisk Farm Site		
19-BN-533	Rattle	Late Archaic	
19-BN-534	Henson		
19-BN-536	Lane Site	Late Archaic Early Woodland	Flake scatter
19-BN-615	Cemetery Site	Late Archaic	
19-BN-616	Estlin Site	Late Archaic Transitional Archaic	
19-BN-617		Late Woodland	Shell Midden

19-BN-657	Krusen/Rainey Site	Middle & Late Woodland	Shell Midden
19-BN-700	Briar Springs Road Site	Late Woodland/ Contact	Burial Site. Shell Midden
19-BN-810	Franz Site	Late Woodland/ Contact	Burial/Habitation Site, Shell Midden
19-BN-852	Kent's Point	Late Archaic Middle & Late Woodland	Habitation Site

*Site recorded within the project area.

Geotechnical Data and Soil Boring Logs

Information on belowground disturbance within the project area, including geotechnical data and soil boring logs, was also reviewed to help refine the sensitivity (Figure 4). Logs from a total of 184 borings showed profiles of coarse sands and silt beneath existing pavement.

Field Review

A walkover/drive-over field assessment of the MPAWCS project area was conducted to examine and document the existing physical condition of the project area, to assess the integrity of the ground surface, to collect data about the current environmental setting, and to look for any surface indications of archaeological sites. During the field assessment all roads that will be impacted by the proposed sewer line construction as well as the proposed pump station location were reviewed. Most of the project's impact areas are located within and below paved roads (Photographs 1 & 2). Exceptions to

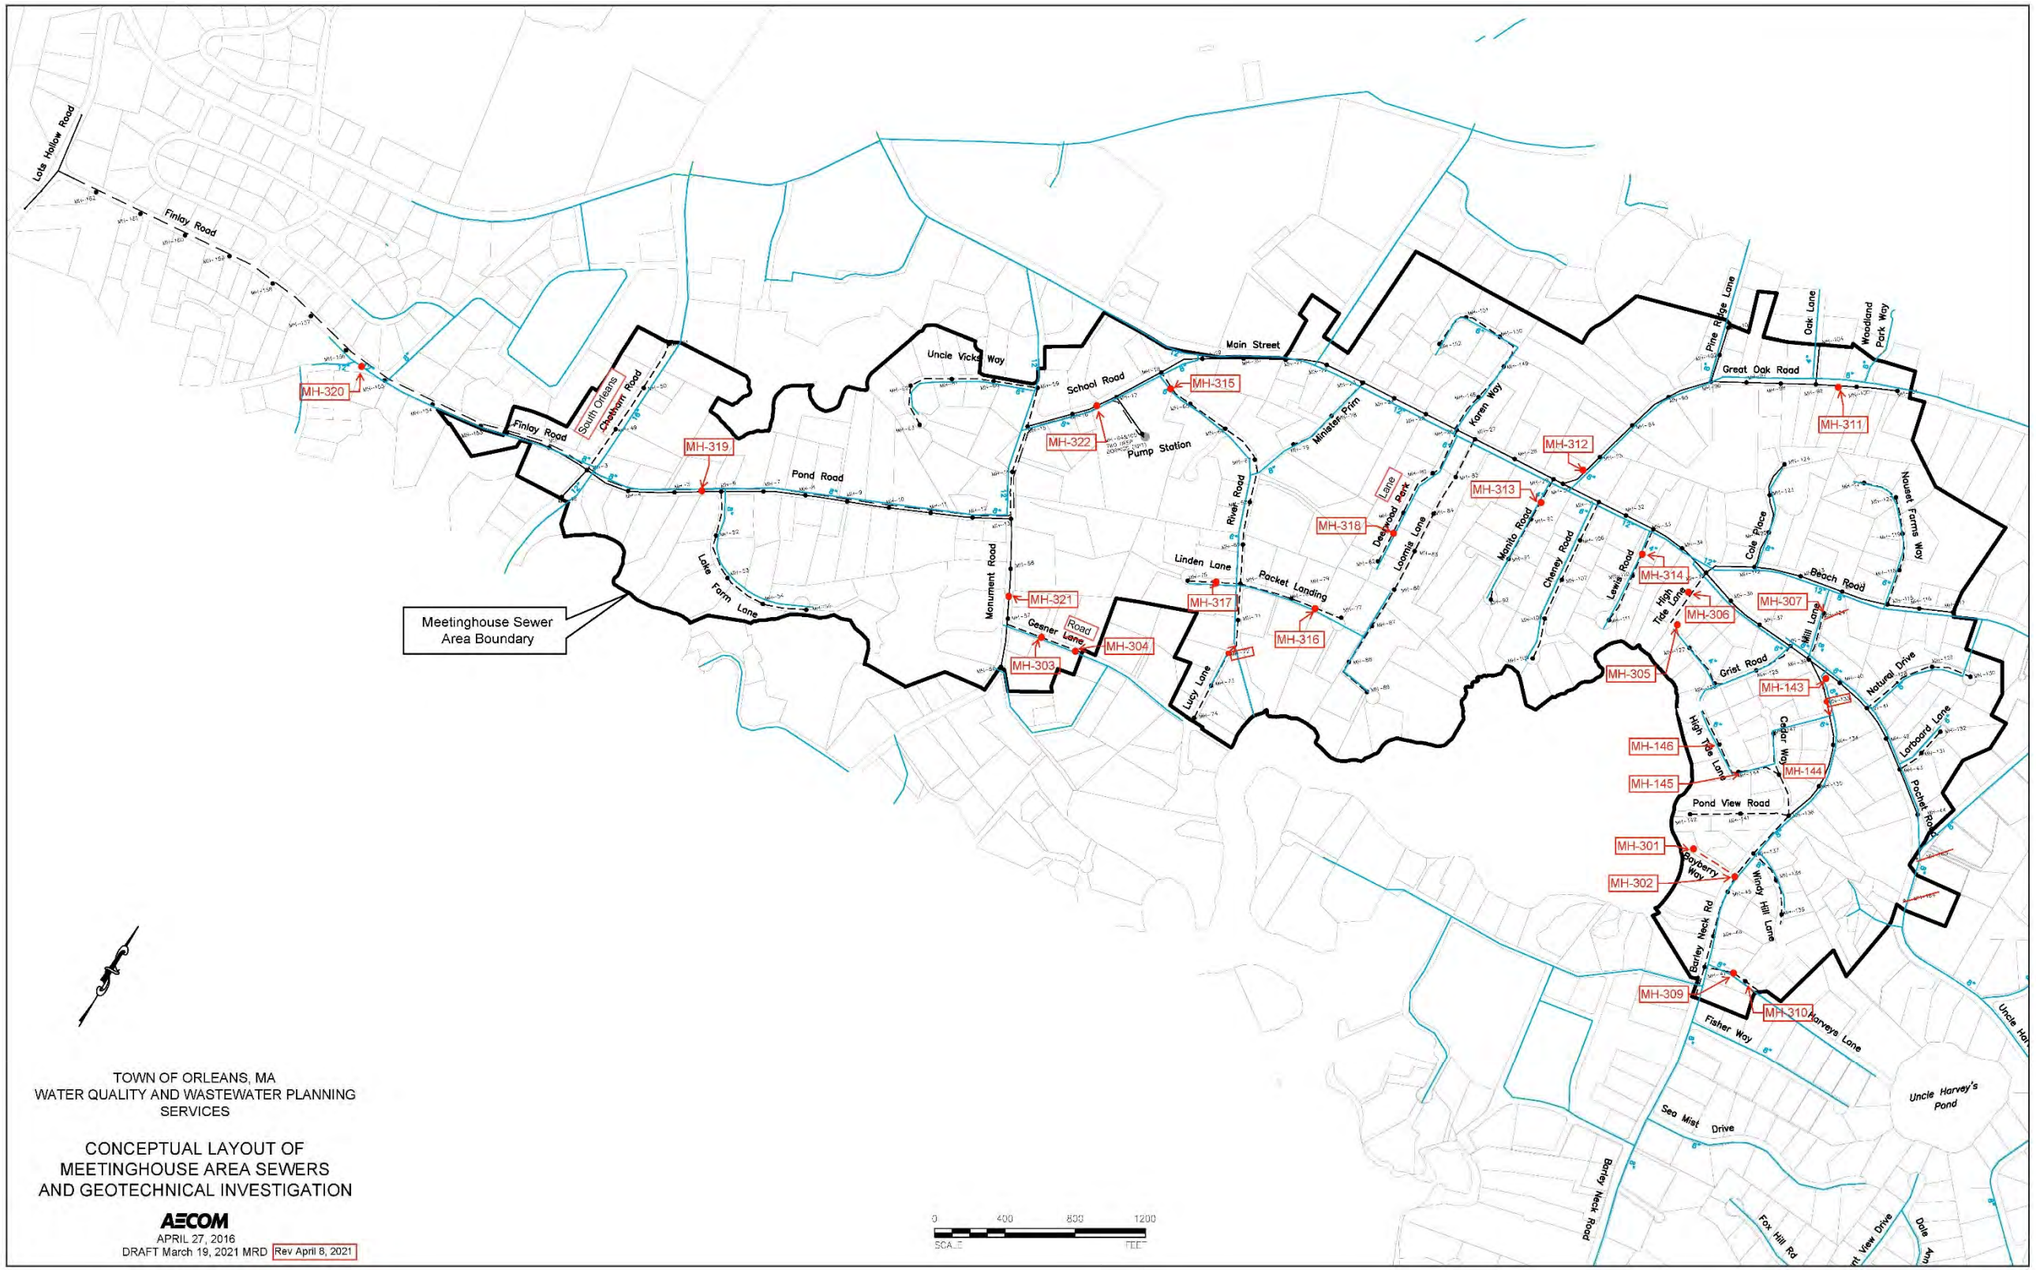

Figure 4. Location of soil borings for geotechnical investigation, Meetinghouse Pond Area Wastewater Collection System, Orleans, MA.

this include, Minister Prim Way, Loomis Lane, Cole Place, portions of Nauset Farm Way, and Uncle Vicks Way (broken pavement) (Photograph 3 & 4). The majority of roads have utilities, including water mains that range from 3 inches to 16 inches in diameter, gas lines, and stormwater drainage.

Photograph 1. Main Street approaching Lewis Lane, view looking west.

Photograph 2. Linden Lane, view looking west.

Photograph 3. Cedar Way, View looking north.

Photograph 4. Loomis Lane, view looking south.

No evidence of archaeological sites was observed on the ground surface during the field assessment. Areas of disturbance, such as sand pits or quarries, or areas of recognizable grading, were not visible during the field assessment to suggest that the soils beneath the roads have been displaced, however, it is likely that utilities in the Orleans Meetinghouse area, and landscaping and utilities in the new residential areas has resulted in some disturbance.

Archaeological Sensitivity

Results of the inventory file review and field assessment were used to develop a sensitivity ranking and predictive statements concerning the potential for the presence of Native American and EuroAmerican cultural resources. Native American archaeological sensitivity was determined by assessing key environmental attributes, the presence of documented cultural resources in and adjacent to the project area, and the degree of disturbance (Table 3). Key environmental attributes are proximity to fresh or salt water, well-drained soils, and level topography. EuroAmerican archaeological sensitivity is determined by assessing information collected during the background research and walkover. Numerous large-scale surveys have determined that historic EuroAmerican sites are not directly correlated with specific environmental variables and that documentary information is not always accurate. As a result, documentary research used in conjunction with an evaluation of the physical condition of a project area and the presence of visible sites is the most useful approach to determining the sensitivity of a project area.

Table 3. Archaeological Sensitivity Ranking.

Presence of Sites		Proximity to Favorable Cultural/Environmental Characteristics			Degree of Disturbance			Sensitivity Ranking
Known	Unknown	< 150 m	≥ 150 ≤ 500 m	> 500 m	None/Minimal	Moderate	Extensive	
•		•			•			High
•		•				•		High
•		•					•	Low
•			•		•			High
•			•			•		High
•			•				•	Low
•				•	•			High
•				•		•		High
•				•			•	Low
	•	•			•			High
	•	•				•		Moderate
	•	•					•	Low
	•		•		•			Moderate
	•		•			•		Moderate
	•		•				•	Low
	•			•	•			Moderate
	•			•		•		Low
	•			•			•	Low

The information collected during the field review was used to refine the preliminary sensitivity assessment of the project area and to stratify the MPAWCS project impact areas into zones of high/moderate or low archaeological sensitivity (Table 4, Figure 5). Overall, portions of the MPAWCS project area are archaeologically sensitive for Native American sites dating to the Pre-Contact, Contact, and early Post-Contact periods (ca. 8000 to 300 B.P.) (see Figure 5). The majority of the monitoring is confined to streets in the eastern limits of the project area because of sandy, well-drained soils adjacent to the shoreline and freshwater wetlands, former kettle holes, and by the presence of a previously recorded archaeological site. Archaeological evidence of pre-contact period Native American activity could include subsistence-related features such as hearths, food storage/disposal pits, living areas including post molds, lithic workshops, and diagnostic chipped and ground stone tool assemblages. Expected pre-contact site types would include base camps, or logistic field camps and foraging locations in proximity to these topographic features where seasonally available (waterfowl, fish) resources could be assured. There is also the potential for burial sites.

The EuroAmerican post-contact archaeological sensitivity for land use is moderate to low. While many of the side streets are of more recent origin, the sewer lines run through some of the earliest roadways in Orleans: Pond Road, Monument Road, School Street, Main Street, River Road, Great Oak Road, Beach Road, Barley Neck Road. However, much of Orleans consisted of pasture and agricultural land up until residential development began in the mid-twentieth century.

Recommendations

Because construction in these linear utility line areas will occur under and within paved and active roadways, where hand-testing is not possible, PAL recommends archaeological monitoring of construction in the high sensitivity areas. The archaeological monitoring will be conducted under an archaeological permit issued by the State Archaeologist's office at the MHC and in compliance with M.G.L. c. 9, ss. 26-27 C (950 CMR 70). In addition, PAL recommends coordinating with the Mashpee Wampanoag and Wampanoag Tribe of Gay Head/Aquinnah (WTGH/A) Tribal Historic Preservation Officers (THPOs) regarding the proposed project schedule, so that a tribal cultural resource monitor can be present during the fieldwork portion of the project. The THPOs will also be consulted for information that may assist with the archaeological investigations. Informant interviews may also be conducted to gather more information about reported sites and/or cultural resources in the project vicinity.

The goal of the archaeological monitoring will be to ensure that if any significant archaeological resources, including human remains and/or burials, are exposed during the construction activities that they are treated appropriately in accordance with the Massachusetts Unmarked Burial Law (M.G.L. c. 7 s. 38A; c. 9, ss. 26A & 27C; c. 38, s. 6; and c. 114, s. 17, as amended by Chapter 659 of the Acts of 1983, Chapter 386 of the Acts of 1989, and Chapter 140 of the Acts 2003). The monitoring will involve the close visual examination of exposed subsoils to identify any potential archaeological deposits and/or human remains that may be located within construction impact areas. Having a representative from the Mashpee Wampanoag Tribe and/or WTGH/A on-site, as well as an experienced archaeologist, during the construction process to determine the significance of a soil anomaly or artifact/s immediately will enable the project proponent to move forward and avoid work stoppage situations.

Table 4. Summary of roadway conditions, recommendations for archaeological monitoring.

Street	Condition	Utilities	Sensitivity	Monitor
Finlay Road	Paved	X	Low	No
Chatham Road	Paved	X	Low	No
Pond Road	Paved	X	Low	No
Lake Farm Lane	Paved	X	Low	No
Monument Road	Paved	X	Low	No

Grist Road	**Paved**	**X**	**High**	**Yes**
Barley Neck Road	**Paved**	**X**	**High**	**Yes**
Cedar Way	**Unpaved**	**X**	**High**	**Yes**
Pond View Road	**Unpaved**		**High**	**Yes**
Windy Hill Lane	**Paved**	**X**	**High**	**Yes**
Bayberry Way	**Unpaved**		**High**	**Yes**
Harveys Lane	**Paved**	**X**	**High**	**Yes**
Great Oak Road	Paved	X	Low	No
Pine Ridge Lane	**Paved**	**X**	**High**	**Yes**
Oak Lane	Paved	X	Low	No
Beach Road	Paved	X	Low	No
Cole Place	**Unpaved**	**X**	**High**	**Yes**
Nauset Farms Way	**Paved**	**X**	**Moderate**	**Yes**
Mill Lane	**Paved**	**X**	**Moderate**	**Yes**
Pochet Road	**Paved**	**X**	**Moderate**	**Yes**
Natural Drive	**Paved**	**X**	**Moderate**	**Yes**
Larboard Lane	Paved	X	Low	No
Pump Station	**Unpaved**		**High**	**Yes**

Because potentially significant pre- and/or post-contact archaeological deposits could be present beneath the existing roadways and/or other paved areas that have been assigned low archaeological sensitivity, **PAL also recommends that the proponent develop a Post-Review Discoveries Plan, or, an Unanticipated Discoveries Plan (UDP), to formalize procedures guiding the discovery of any significant cultural resources and/or evidence of human remains during construction.** The Plan will be developed in consultation with the MHC, and in accordance with the Unmarked Burial Law, and would be designed to limit construction work stoppages by providing cultural resource training to construction personnel and streamlining notification and action plans for unanticipated discoveries, such as burials.

Exceptions:

A. Policy Memorandum No. CG-9 Pipe Testing.

1. Under this Contract only seventy-five (75) percent of the price bid per linear foot of pipeline shall be paid for upon its installation, the balance shall be withheld until such time as pipeline has been successfully tested and accepted by the Owner and the site(s) has been fully restored. This percentage is exclusive of normal Contract retainage.

B. Policy Memorandum No. CG-10 Change Orders

1. Paragraph B., item (5.), delete the number 20% and insert the number 15%.
2. Paragraph B., item (6.), delete the number 7-1/2% and insert the number 5%.

C. Policy Memorandum No. CG-14 Payment for Rock Excavation

1. Under this Contract, Rock and/or Boulder Excavation shall be paid as defined in SECTION 01025, MEASUREMENT AND PAYMENT.

COMMONWEALTH OF MASSACHUSETTS

EXECUTIVE OFFICE OF ENVIRONMENTAL AFFAIRS

DEPARTMENT OF ENVIRONMENTAL PROTECTION

ONE WINTER STREET, BOSTON, MA 02108 617-292-5500

DEPARTMENT OF ENVIRONMENTAL PROTECTION

BUREAU OF RESOURCE PROTECTION

DIVISION OF MUNICIPAL SERVICES POLICIES

The Division of Municipal Services (DMS) has established the following policies for all Division financially-assisted projects.

POLICY MEMORANDUM NO. CG-1 EASEMENTS AND RIGHTS OF WAY

Prior to the approval of financial assistance for construction, the owner shall obtain and shall thereafter retain, a fee simple or such estate or interest in the site of construction and rights of access as will assure undisturbed use and possession for the purpose of construction and operation for the estimated life of the project. The Division may refuse to approve financial assistance until it has received from the owner sufficient assurances that such interests have been obtained. Unless the Division otherwise notifies the owner, the certificate (under pains and penalties of perjury) of the owner's legal representative shall constitute such sufficient assurance.

Additional cost which result from interruptions of construction or extensions of contract time caused by the owner's failure to obtain the necessary interests in land shall be ineligible for financial assistance, and all such additional costs shall be borne by the owner.

POLICY MEMORANDUM NO. CG-2 PERMITS

The owner shall be responsible for identifying and obtaining all federal, state, local and railroad permits required by the nature and location of construction, including but not limited to building construction permits and permits for street and highway cuts and openings, and all such permits shall be listed in a separate permits section of the contract documents. To the extent possible, such permits shall be obtained by the owner prior to the solicitation of bids for construction, and copies of all permits so obtained shall be included in the said permits section. The status of the application for each permit, including the permit conditions, and costs, not obtained prior to the solicitation of bids shall also be indicated in the contract documents permits section. The Division may refuse to approve financial assistance for construction unless and until it has received from the owner sufficient assurances that all necessary permits have been or will be obtained prior to the commencement of construction.

The contractor shall be responsible for obtaining all permits required of his equipment, work force, or particular operations (such as blasting) in the performance of the contract and not otherwise specified in the two preceding paragraphs as to be obtained by the owner. These permit fees shall be paid by the contractor.

The owner shall be responsible for the payment of all other permit fees required by the construction.

The following permits shall not be eligible for financial participation by the Department of Environmental Protection (DEP).

- Permits and insurance for construction in railroads' rights of way;
- Building permits;
- Permits for opening public streets and other public or municipal rights of way;
- Permits for the use of explosives;
- Permits for the disposal of waste materials; and
- Permits and fees for connecting to municipal utilities.

Permits required by extraordinary circumstances and not specifically excluded from eligibility above may be eligible for DEP participation. For such permits to be so eligible, the owner or his representative must notify the DEP project engineer in advance of obtaining such permit and receive from the engineer specific agreement that such permit will be eligible for DEP participation. Eligibility for such participation will not be made retroactively.

Additional costs which result from interruptions of construction or extensions of contract time resulting from the owner's or the contractor's failure to obtain the necessary permits may be ineligible for participation.

POLICY MEMORANDUM NO. CG-3 FIELD CONTROLS

The Owner shall be responsible for indicating on the contract drawings all easement limits and all property and other control lines for locating the principal component parts of the work together with those elevations and bench marks used in the design of the work, all hereinafter referred to as "field controls". Where easement and property limits have not previously been established in the field, the owner shall be responsible for establishment of such limits. From the information provided by the Owner, unless otherwise specified, the Contractor shall develop and make all layouts required for construction, such as slope stakes, batter boards, stakes for pipe locations and other working points, lines, elevations and cut sheets.

Whenever he has reason to believe that an error exists or whenever he is otherwise unable to locate the field controls, the contractor shall promptly notify the owner and the owner's engineer of such error with appropriate documentation.

POLICY MEMORANDUM NO. CG-4 RECORD DRAWINGS

The Owner shall be responsible for the preparation of all record drawings required by this contract. This responsibility may be delegated to the Owner's representative. The responsibility for preparation of record drawings shall not be delegated or transferred to the contractor. They may use the contractor's and sub-contractor's certified AS BUILT drawings along with their own marked up set in the preparation of the Record Drawings.

Division approved contract drawings shall be revised upon completion of the contract to reflect any changes made and/or final quantities, as appropriate.

POLICY MEMORANDUM NO. CG-5 PLAN SCALE

Unless otherwise approved in advance by the Division, the horizontal scale for construction plans for non-structural facilities shall be 1" = 40'. A larger horizontal scale shall be used where appropriate to show sufficient detail to construct the project. The vertical scale for construction plans for non-structural facilities shall be 1" = 4'. Based on the best information available at the time of their preparation, the location of underground utilities and support structures for overhead utilities shall be shown on the plans.

Unless otherwise exempted in advance by the Division, construction plans shall be updated whenever the date of the advertisement for bids for the construction of such facilities is more than one year after the date of approval by the Division or EPA; and in the case of approval by both such agencies, the later approval date shall be used in determining the need for update.

The consulting engineer shall receive adequate compensation for updating plans and specifications, and such additional cost shall be eligible for assistance to the extent not otherwise prohibited by USEPA and Division regulations and program guidance.

All revision, or review without need for revision, shall be noted and dated on the plans prior to advertisement of the project for bid.

POLICY MEMORANDUM NO. CG-6 BORINGS LOGS

All soil borings shall be taken as close as practicable to the construction line, and the location of all such borings shall be clearly indicated on the contract drawings. The plan view shall show the location and boring number of each boring. The profile view shall show the location, elevation, and depth of each soil boring, the location of each change in soil stratum, the groundwater level, and the average of blow counts at each five foot interval. As a minimum, boring logs to be submitted with the plans and specifications shall show the name of the company taking the borings, the soil classification, the number of blows per foot of penetration, the groundwater elevation, and the date on which the borings were taken.

As part of the submission of plans and specification for approval, the owner's representative shall include written justification for the lesser frequency and depth of borings where their interval is more than approximately 300' or their depth is less than 50% below depth of pipe invert.

POLICY MEMORANDUM NO. CG-7 BREAKDOWN OF BID ITEMS

The following items shall, where applicable, be listed separately in the bid documents.

1. Mobilization

2. Pavement

a. Municipal
i. temporary
ii. permanent

b. State
i. temporary
ii. permanent

3. Concrete cradle or encasement (to be identified where applicable)

4. Rock-Excavation

5. Wood or steel sheeting left in place

6. Excavation of unsuitable materials below grade

7. Select and/or borrow material

8. Dewatering

9. Special Dewatering (coffer dam)

Mobilization costs are the costs of initiating the contract, exclusive of the cost of materials. Payment for mobilization shall be a lump sum at the price bid for this item in the proposal and shall be payable when the contractor is operational on the site. For purposes of this policy, "operational" shall mean the substantial commencement of work on site.

The lump sum price bid for mobilization shall not exceed five per centum (5%) of the total amount of the bid.

POLICY MEMORANDUM NO. CG-8 PAVEMENT

All roads and trenches therein shall be refilled and repaved in accordance with specifications provided by the owner in the contract documents. Please note that this policy may be excludable on Federally assisted projects where bid alternative items may be required (i.e. trench width vs. full width pavement). You are advised to seek project specific clarification.

Loan eligibility shall be limited to the following:

A. Where the depth of the pipe invert is 0 to 8', the maximum pavement widths which shall be eligible for financial assistance are as follows:

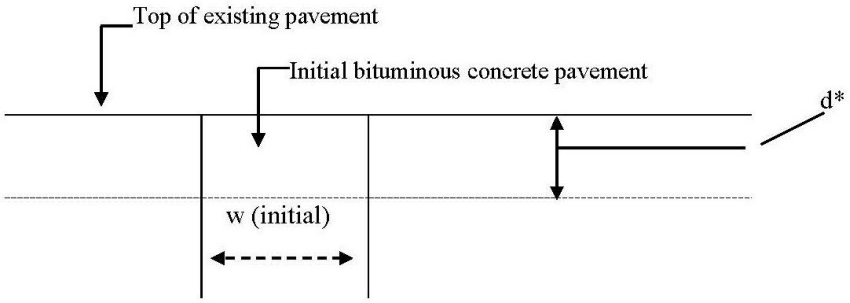
Nominal Pipe Diameter	Maximum Eligible Widths	
	Initial Pavement	Permanent Trench
0-24"	6'-6"	8'-6"

Where the nominal pipe diameter is greater than 24" the maximum eligible width for Initial re-paving shall be the nominal diameter of the pipe plus four (4) feet, and for permanent trench re-paving the maximum eligible width shall be the nominal pipe diameter plus six (6) feet.

B. For each additional four (4) feet (or fraction thereof) of pipe invert depth, add three feet to the eligible width limits stated in paragraph A.

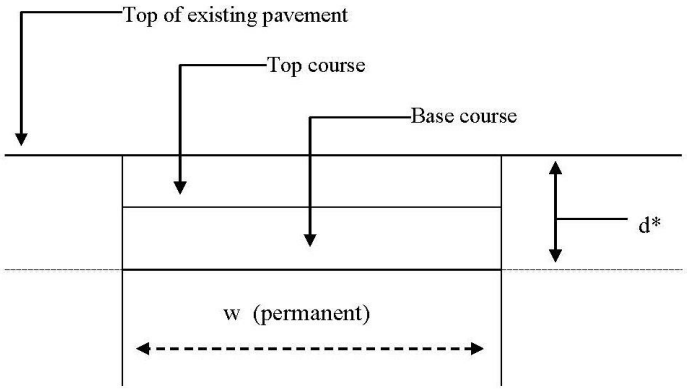
At the design phase of a project the owner has the option to elect either Initial Pavement with Option I (Permanent Trench replacement) or Initial with Option II (curb to curb over initial)

Initial Pavement



d*= depth of existing pavement to a maximum of 3 inches (see general notes #3)
w = maximum eligible Initial pavement width as described in paragraphs "A" & "B" on page DEP-DMS-CG's-P4.

OPTION I Permanent Trench Pavement

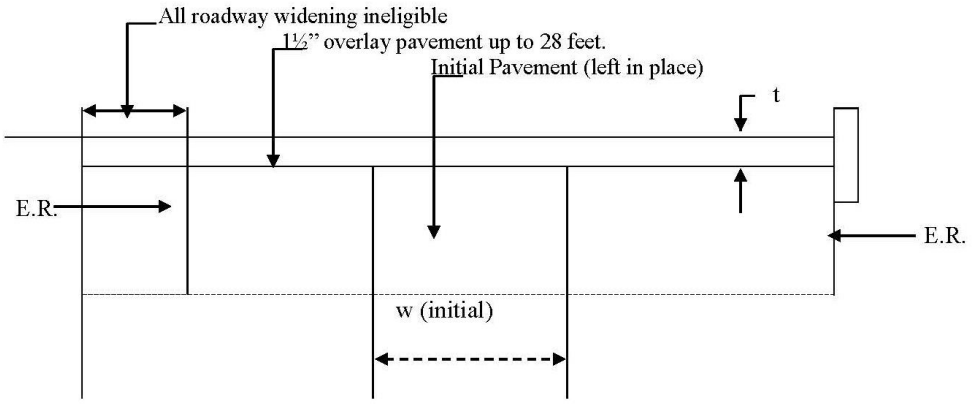


d*= depth of existing pavement trench to a maximum of 3 inches (see general notes #3)
w = maximum eligible permanent pavement width as described in paragraphs "A" & "B". equals initial width plus 2 feet and includes:

- Cutting edges for the permanent trench
- Removal of initial patch plus two feet of existing pavement
- Fine grading/compacting gravel
- Placement of Permanent Trench pavement in two courses.

POLICY

OPTION II Curb to Curb Pavement (overlay pavement for roadways up to 28 feet)



E.R.= edge of existing paved roadway
t = one and one half inch (1½") overlay of bituminous concrete pavement

GENERAL NOTES:

1. Repavement of settled areas and crown restoration within the trench limits shall be the responsibility of the contractor.
2. Leveling outside the trench limits shall be the responsibility of the owner.
3. Sewer trench re-fill and pavement re-paving on public ways under the jurisdiction of the Massachusetts Department of Public Works, the Metropolitan District Commission, or other such agency shall be in accordance with permit(s) issued therefor by that Department or Commission, as the case may be.
4. The Division will consider requests for increase in the participating pay limits defined in paragraphs A and B, when such increases are, in the Division's opinion, reasonable. Such requests should be documented in writing and submitted to the Division in a timely manner.
5. Projects which deviate from the above options are required to seek Division review and approval.

MEMORANDUM NO. CG-9 PIPE TESTING

Monthly payment estimates shall be prepared in accordance with contract documents. All pipe shall be tested in accordance with the contract documents and sound engineering practice. If, after 60 days following submission of a monthly payment estimate for pipe items, the pipe for which payment is requested has not been successfully tested, the owner may withhold up to 10% of the amount requested for such pipe items until the pipe has been so tested. However, in the case of a major (pipe diameter 24 inches or greater) interceptor pipe installation, sums retained by the owner pursuant to this policy memorandum shall not exceed two per centum (2%) of the costs of such pipe items.

POLICY MEMORANDUM NO. CG-10 CHANGE ORDERS

Executed change orders submitted to the Division for review and processing for financial assistance must be prepared on the attached Change Order Forms (CG-10, Attachment 1, pages A-1 & A-2) with a duplicate copy, calculation sheet(s) (CG-10, Attachment 2), and all other supporting documentation necessary for evaluation. Failure to comply with these instructions will result in delays in processing the change order and/or limited financial assistance.

M.G.L. c.44, s.31C requires that the auditor, accountant, or other municipal officer having similar duties must certify that adequate funding in an amount sufficient to cover the total cost of the change order has been made. Change orders will not be processed or approved until this certification is made on the face of the Change Order Form (CG-10 Attachment 1).

Payment of Change Orders:

Payment of all change orders shall be in accordance with the relevant provisions of Massachusetts General laws, Chapter 30, Section 39G for non-building construction and Section 39K for building construction.

Payment of change orders shall be made in accordance with one of the following three methods:

A. Existing unit prices as set forth in the contract; or

B. Agreed upon lump sum or unit prices; or

C. Time and materials

A. Payment for work for which there is a unit price in the contract:

Where the contract contains a unit price for work and the Engineer orders a change for work of the same kind as other work contained in the contract and is performed under similar physical conditions, the contractor may accept full and final payment at the contract unit price(s) for the acceptable quantities.

B. Payment for work or materials for which no price is contained in the contract:

If the Engineer directs, the contractor shall submit promptly in writing to the Engineer and offer to do the required work on a lump sum or unit price basis, as specified by the Engineer. The stated price, either lump sum or unit price, shall be divided so as to show that it is the sum of:

(1) The estimated cost of labor, plus

(2) Direct Labor Cost, plus

(3) Material and Freight Costs, plus

(4) Equipment Costs, plus

(5) An amount not to exceed 20% of the sum of items (1) through (4) for overhead and profit, plus (if applicable),

(6) In the case of work done by a subcontractor and amount not to exceed 7 ½ %, for the general contractor of the sum of items (1) through (4) for his overhead and profit, less, if applicable,

(7) Credits for work deleted from the contract.

C. Payment for work on a time and materials basis:

Unless an agreed lump sum and/or unit price is obtained from above and is so stated in the change price, the contractor shall accept as full payment for which no other agreement is contained in contract, and amount equal to:

(1) The estimated cost of Labor, plus

(2) Direct Labor Cost, plus

(3) Material and Freight Costs, plus

(4) Equipment Costs, plus

(5) An amount not to exceed 20% of the sum of items (1) through (4) for overhead and profit, plus (if applicable),

(6) In the case of work done by a subcontractor and amount not to exceed 7 ½ %, for the general contractor of the sum of items (1) through (4) for his overhead and profit, less, if applicable,

(7) Credits for work deleted from the contract.

Explanation of items (1) through (7) as outlined in "B" and "C":

(1) Labor – Only those workers employed on the project who are doing the extra work, including the foreman in charge, are allowable. General foremen, superintendents, or other supervisory personnel are considered to be included in the overhead markup as provided in items (5) and/or (6). Hourly labor rates in excess of those as listed in the contract wage rates (Federal or State, whichever applies require documentation. As a minimum, an explanation and the appropriate copy of the certified payroll are required.

(2) Direct Labor Costs - These costs are limited to those which are required in the contract document. Coverage in excess of the contract provisions, secured by the contractor/subcontractor(s) at his option, are ineligible for financial assistance. The following list of typical direct labor charges is provided for your assistance and is in no way intended to be complete or all encompassing:

- Workman's Compensation
- Federal/State: Social Security Tax and Unemployment Tax;
- Health, Welfare and Pension Benefits; (this cost is included in the wage rates appearing in the Mass. Wage Rates of the contract specifications)
- Liability Insurance: Bodily Injury; Excess Umbrella; Property damage; Public Liability
- Blasters Insurance
- Builders Risk Insurance
- Experience Modification Insurance
- Surcharges

If applied to any required direct labor costs.

Following award and prior to execution of a construction contract, the contractor and filed sub-bidders (where applicable) shall submit for review by the owner, documentation to establish the Direct Labor Cost percentage(s) (Direct Labor markup percentage(s)).

The documented direct labor markup for this contract may be adjusted on an annual basis as measured from the date the contract is executed. The contract agreement will provide for the establishment of the Direct Labor Cost percentage.

(3) Material and Freight – Only those materials required as a result of the change order and reasonable freight charges for delivery of same are allowable.

(4) Equipment – Only the equipment required as a result of the change order is allowable. Equipment rental rates shall be governed by the current Nielson/Dataquest Rental Rate bluebook for Construction Equipment (the "Bluebook"). In determining the rental rate the following shall apply:

(a) For equipment already on the project – the monthly prorated rental rate by the hourly use shall be applicable;

(b) For equipment not on the project the daily rate, the weekly rate, or monthly rate will prevail, whichever will prove to be most cost effective. Small tools and manual equipment are examples of costs not allowable under this item. These costs are considered to be included in the overhead markup as provided in items (5) and/or (6)

(1 month (normal use) = 176 hours)

(5) & (6) Overhead and Profit – All other costs not previously mentioned are considered to be included in this item, be it for the general contractor or subcontractor(s).

(7) Credits – Work deleted, material and equipment removed from the contractor, stored and/or returned shall be credited to the cost of the change order, less costs.

The Contractor shall furnish itemized statements of the cost of the work ordered and shall give the Engineer access to all accounts, bills and vouchers relating thereto; and unless the Contractor shall furnish such itemized statements, and access to all accounts, bills and vouchers, he shall not be entitled to payment for any items of extra work for which such information is sought by the Engineer. Deviations from any of the above will be reviewed for financial assistance on a case-by-case basis.

The change order will be prepared in such manner as to clearly separate Eligible and Ineligible Costs.

Attachment 2 - Page B-1

CALCULATION SHEET

(1)	Labor			
	Foreman	10 hrs @ $10.00/hr.	$ 100.00	
	Engineer	10 hrs @ 8.50/hr	85.00	
	Operator	10 hrs @ 9.50/hr	95.00	
	Laborers	24 hrs @ 7.00/hr	168.00	$448.00
(2)	Direct Labor Cost (use the agreed upon Direct Labor Cost)			
	* (30)% of $448			
	* (Used for example purposes only)			134.00
(3)	Materials & Freight			
	150 l.f. of 12" pipe @ $2.00/l.f.		$ 300.00	
	15 v.f. precast SMH		1,700.00	
	Freight (slip # _____ Enclosed)		25.00	2,025.00
(4)	Equipment			
	1 Backhoe 10 hrs @ $80.00/hr		$ 800.00	
	1 Truck-crane 10 hrs @ $100.00/hr		1,000.00	
				1,800.00
	Total (Items 1 through 4)			4,407.00
(5)	20% markup for Overhead, Profit			
	20% of $4,407			881.00
(6)	5% markup for general contractor (if subcontractor is involved)			
	5% of $4,407			220.00
(7)	Credits (deductibles)			-323.00
			Total Cost $	4,965.00

Reminder: Provide support documentation as necessary i.e. vouchers, correspondence, Calculation, photographs, reports……

POLICY MEMORANDUM NO. CG-11 UTILITY RELOCATION

The construction of treatment facilities, sewers, pumping station, force mains and appurtenant work can cause the relocation of utilities. Costly relocation can sometimes be minimized by early communication and cooperation of the representatives of the municipality (owner) and the utilities.

Every possible effort should be made by the owner and each utility to establish the location of existing utilities in the vicinity of the proposed construction. The owner or its consulting engineer should make every reasonable effort to design the proposed construction so that relocation of existing utilities is minimized whenever possible. If the proposed construction is in an area of many existing utilities or in an otherwise critical area, the utilities are encouraged to mark the location of their existing utilities at the site during the design phase of the project.

During the design phase of the project, the municipality should provide timely notice to all utilities known or thought to have facilities in or proximate to the site of such future construction.

POLICY MEMORANDUM NO. CG-12 REFUNDABLE DEPOSITS FOR PLANS AND SPECIFICATIONS

For each set of project plans and specifications provided, the owner may require a deposit in form of cash or other appropriate security, in an amount sufficient to cover the costs of production of such plans and specifications.

Upon return of the plans and specifications to the owner within a reasonable time and in good condition, such deposit shall be refunded.

Actual mailing costs, if any, shall be borne by the party requesting such plans and specifications.

POLICY MEMORANDUM NO. CG-13 BID OPENING PROCEDURES

As a minimum, bid documents shall be reviewed/inspected for conformance to the following bid opening procedure in the order presented below. Failure to comply with any of these steps shall render the bid non-responsive and upon determination of such non-responsiveness, such bid shall be rejected immediately, set aside, and shall receive no further consideration.

Bid Opening Procedure

Step #1. Timeliness – The bid must be filed at the place and within the time specified therefore in the invitation to bid, and no bid shall be accepted after such time. The time at which a bid is filed should be time/date stamped or otherwise prominently noted on the bid;

Step #2. Bid Security – Properly executed bid security, in the amount and terms specified in the invitation to bid (equal to 5% of Base Bid or Highest Possible Amount considering all alternatives) shall be placed in a seal envelope and attached to the outside of the envelope containing the bid at the time of its submission;

A. Bid Bond

The Bid bond must be dated On or Before the Bid Date;
Issued by a Bonding Company Licensed in Massachusetts;
Accompanied by a Current Power of Attorney;
Signed by Surety;

B. Check

The Check must be a Certified, Cashiers or Bank Treasurer's;
Dated On or Before the Bid Date;

Step #3. Bid Signature – The bid and all accompanying documents so required shall be signed by the bidder or its authorized representative before submission;

Step #4. Addenda – All addenda shall be sent certified mail, return receipt requested, by the owner to all individuals and organizations which have received plans and specifications and shall be mailed not later than five days prior to the date established for submission of bids. All bidders shall include with their bids written acknowledgement of receipt of all addenda, which acknowledgement may be on a form provided therefore by the owner.

Alternates – Any Alternates shall be acknowledged.

Step #5. Written Dollar Amounts – The total dollar amount of each bid shall be read, and the three lowest bids shall be selected for further consideration. The remaining bids shall then be set aside. The three apparent low bids shall be read to determine whether the unit price for each line item of each bid has been written therein in words. If it has not, such bid shall be rejected and shall receive no further consideration. Bid amounts shall be consistent (words vs. numbers) and if words and numbers differ, the words govern**.** This procedure shall then be repeated with the next apparent low bid until three are acceptable which have all the unit prices written in words, at which time the lowest bid shall be announced as the apparent low bidder, and the bid opening procedure shall be closed.

The Division recommends that this policy memorandum be included in all contract specifications and that the owner's evaluator(s) use the attached form (CG-13 Attachment #1) for bid opening procedures.

The Contractor's Bid Opening Checklist also attached hereto, is for use by each contractor to assure that his bid conforms with this policy memorandum. It is recommended that the checklist (CG-13 Attachment #2) be included in information for bidders, or at the end of the bid proposal, or in some other prominent part of the bid specifications

DEP/DMS Attachment #2

POLICY MEMORANDUM NO. CG-14 PAYMENT FOR ROCK EXCAVATION

There shall be in the contract documents a separate pay item for rock excavation. For such purposes, "rock" shall mean igneous, sedimentary, metamorphic, and conglomerate rock, which for excavation must be drilled, blasted, broken, or ripped by power tools. Boulders and concrete structures one cubic yard or greater, however removed, are included within this definition of rock for payment purposes. At the option of the owner or his representative a separate pay item for boulders, concrete structures, or concrete road base may be used.

Depth From Ground Surface To Invert Pipe	Pay Width (Nominal Pipe Diameter)	
	0-24"	Over 24"
* 0 – 12'	5'0"	D+3'0"
* Over 12' – 20'	7'0"	D+5'

Engineer's plans and specifications shall establish pay limits below pipe and structures.

- See CG-14 Attachment #1 (typical cross section)

Payment width for depths over twenty feet (20') shall be determined on a case-by-case basis consistent with the foregoing chart.

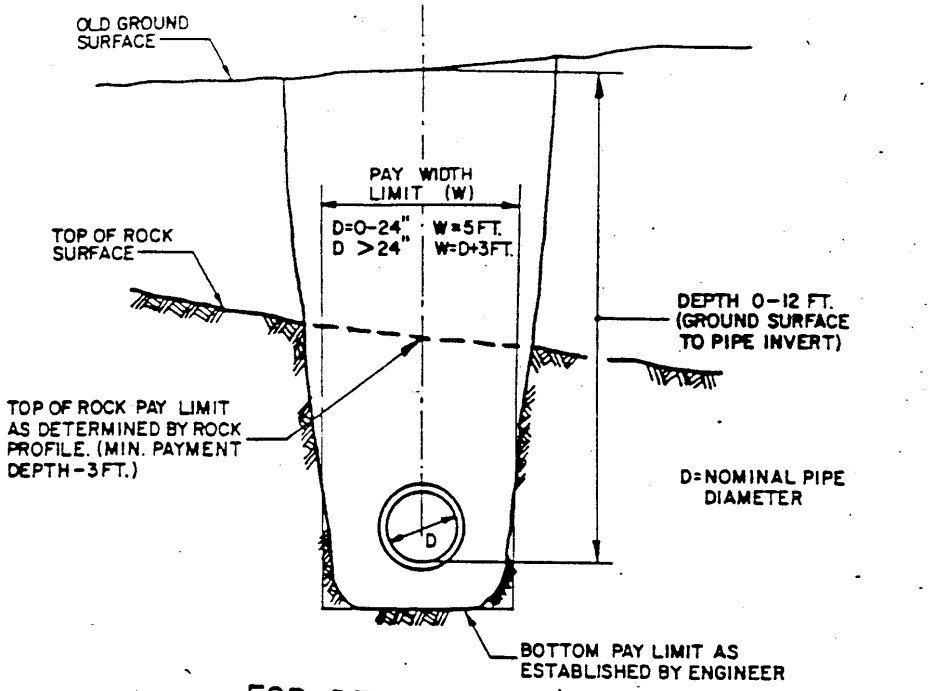
The pay limit for rock removal outside proposed manholes shall commence one foot (1') outside the widest dimension of the structure of shall be the maximum connecting trench width, whichever is greater.

Payment depth for rock which is encountered in a trench shall be no less than three feet (3') when removal can be accomplished only by drilling and blasting or by use of jack (air or hydraulic) hammers.

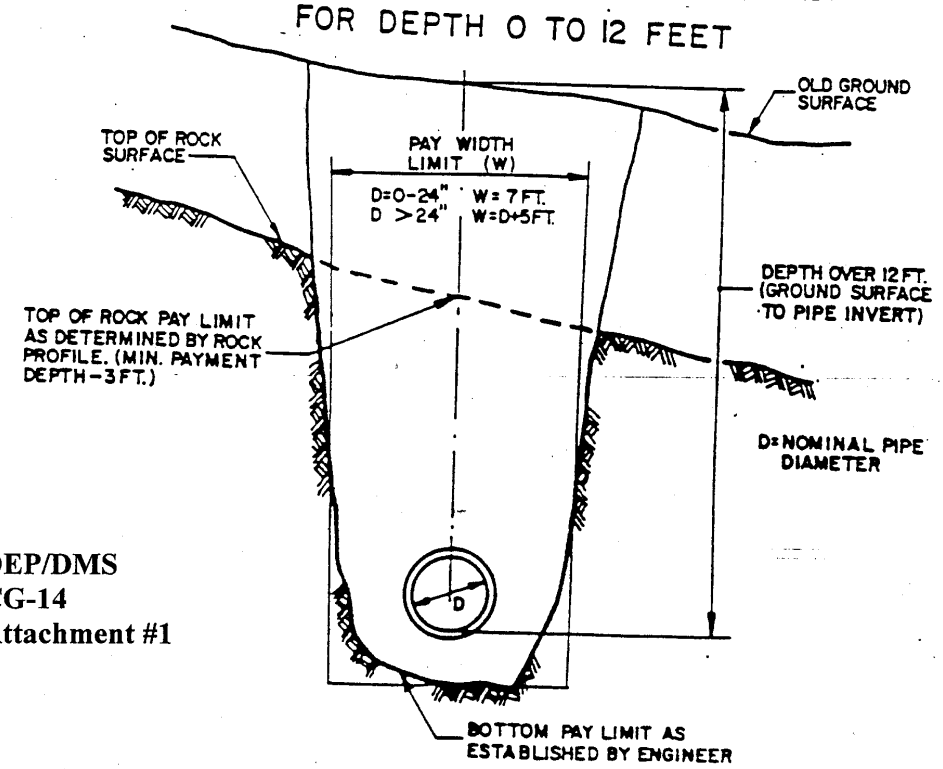
Payment for rock removed, using the same or equal equipment as utilized for normal trench excavation, shall be limited to the actual depth removed within the limits established by the contract documents.

Boulders encountered within the pay limits of excavation, whose volume is one cubic yard or greater, part of which extends outside said limits shall be paid in accordance with the actual volume excavated.

CG-14 ROCK EXCAVATION



FOR DEPTH 0 TO 12 FEET



FOR DEPTH OVER 12 FEET AND UP TO 20 FEET

DEP/DMS
CG-14
Attachment #1

POLICY MEMORANDUM NO. CG-15 TRAFFIC POLICE

The reasonable costs for police details required for traffic control on a construction project which receives financial assistance shall be considered as an eligible administrative cost. A police detail item shall not be included as a bid item in the contract documents.

"Police" as used in this memorandum includes local, county, capital, state, regular and auxiliary police.

Owner's Responsibility

It shall be the owner's responsibility to submit in writing the hourly rate of pay to be established for detailed traffic police and each change in rate during the course of the project. It is the owner's responsibility to arrange, document and pay for such police details. The owner or its representative shall meet with the police chief or other officer in charge of police detail duty to review contract needs. The owner shall maintain a daily record of the following:

a. Officer's name
b. Hours worked
c. Location of assignment
d. Hourly rate

POLICY MEMORANDUM NO. CG-16 DOCUMENTATION REQUIRED TO SUBSTANTIATE CONTRACT QUANTITIES

Unit	Documentation required
Acres (A)	Location, station, offset and calculations. Location = Street right-of-way, etc. Station = Point on Baseline; Offset = Distance left or right of Baseline
Cubic Yard (C.Y.)	Location, stations, widths, depths, calculations and Cross sections as necessary
Each (Ea.)	Location, station, and offset
Gallon (Gal.)	Location, stations, calculations (if appropriate) and delivery slips.
Hour (Hr.)	Hours and location.
Linear Feet (L.F.)	Location, stations, and offsets.
Month (Mo.)	Location, period of time and calculations if applicable.
1000 Foot Board Measure (MFBM)	Location, stations, offset, elevations, grade, and calculations. Attach invoices where applicable.
Pound (Lb.)	Locations, stations, and calculations (if applicable). Attach Delivery weight slips.

Square Feet (S.F.)	Locations, stations and calculations
Square Yard (S.Y.)	Locations, stations and calculations
Ton	Locations, stations and calculations (if applicable). Attach Delivery weight slips.
Vertical Feet (V.F.)	Locations, stations, elevations, and offsets.

Notes:

1. All of the above, that apply must be submitted with a final payment request or change order as applicable.
2. Where in place measurement is not possible or practical, delivery slips may be used to substantiate quantities.
3. Change orders – See CG-10 in which some of the above may be applicable in justifying materials, equipment and labor.
4. When necessary, itemized quantities must be separated into eligible and non-eligible units with separate calculations to justify eligible costs.
5. Overruns and underruns of any specific item shall be explained with an appropriate sentence or paragraph.
6. On all quantities, units of payment shall be maintained at the project site and shall be updated daily so that upon field inspection by the C.O.E., EPA or DMS, the quantities paid to date can be substantiated.
7. In the case of unforeseen conditions, photos should be submitted with the applicable item in addition to the recommended documentation.
8. Documentation of units of payment shall be clearly legible and cross referenced to the applicable sheets of the record drawings.
9. For record drawings policy, please see CG-4.

DMS Policies 1 through 16 Approved By: Division of Municipal Services

DWS POLICY 88-02
DEPARTMENT OF ENVIRONMENTAL PROTECTION
POLICY FOR REVIEW OF SEWER LINE/WATER SUPPLY PROTECTION

The Department of Environmental Protection seeks to protect existing and potential water supplies from the potentially negative effects of leaking sewer lines through the adoption of a Department policy on this subject.

The following restrictions will apply to new sewer construction statewide:

Gravel Packed Wells

~ Within the 400 foot radius protective distance around gravel packed wells, all sewer lines and appurtenances are prohibited, unless they are necessary to eliminate existing and/or potential sources of pollution to the well.

Tubular Wells

~ Within the 250 foot radius protective distance around tubular wells, all sewer lines and appurtenances are prohibited, unless they are necessary to eliminate existing and/or potential sources of pollution to the well.

Gravel Packed and Tubular Wells

~ Within a minimum radius of 2,640 feet or unless otherwise documented by an appropriate study specifically defining the area of influence and approved by the Division of Water Supply, all sewer lines and appurtenances will be designed and constructed for maximum water tightness.

- Force Mains or Pressure Sewers: shall be tested at 150% above maximum operating pressure or 150 p.s.i. whichever is greater. Testing shall conform to the requirements of the American Water works Association (AWWA) standard c 600.

- Gravity Sewers: shall be tested by approved methods which will achieve test results for infiltration or exfiltration of less than 100 gallons/inch diameter/mile/24 hours.

- Manholes: shall be installed with watertight covers with locking or bolted and gasketed assembles. Testing for infiltration/exfiltration shall conform to the same standards as the maximum allowed for pipes in the manhole as required for gravity sewers, indicated above.

- Satisfactory test results for Force Mains, Manholes and Gravity Sewers shall be performed prior to the expiration of the contractor's one year guarantee period.

- All pumping stations within this zone shall have standby power high water alarms telemetered to an appropriated location that is manned at all times. An emergency contingency plan must be developed by the owner and approved by the BRP.

- A minimum of Class B bedding as defined by WPCF-MOP9 must be used for all piping.

- Service connections (laterals and house connections) shall be rigidly inspected by the appropriate municipal official. Certified inspection reports shall be submitted to the BRP.

Bedrock Wells

The above requirements are the same for bedrock wells, with the Department reserving the right to require more stringent controls on a case-by-case basis.

Surface Water Supplies

~ Within 100 feet of all surface water supplies and tributaries all sewer lines and appurtenances are prohibited except as required to cross tributaries or to eliminate existing or potential pollution to the water supply. In the latter case, watertight construction methods shall be use.

~ Tributary stream crossings shall employ watertight construction methods of sewer lines and manholes. Watertight construction must extend 100 feet to either side of the stream.

~ Within 1,000 feet of surface water supplies and tributaries, all pumping stations shall have standby power and high-water alarms telemetered to an appropriate location that is manned at all times. An emergency contingency plan must be developed by the owner of the wastewater treatment facility and submitted to the BRP for approval.

~ Beyond 1,000 feet and within the watershed of surface water supplies the Department may in specific circumstances after review, require additional controls.

Potential Public Water Supplies

The above requirements also apply to potential public water supplies.

Baseline Date Requirements

Two (2) copies of an appropriately scaled map(s) shall be submitted to the Department which details the proposed sewers and/or appurtenances and also includes the following:

(1) the location of all nearby existing or potential surface water supplies, tributaries thereto, and watershed boundaries;

(2) the location of existing and potential public and municipal potable groundwater supply wells.

The Department reserves the right to impose more restrictive measures than those contained in this policy as deemed appropriate.

Definitions

○ Appurtenances – all attachments to sewer lines necessary for the transport and operation and maintenance of sewer lines, including manholes, pumping station, siphons, etc.

○ Area of influence – that area of an aquifer which contributes water to a well under the most severe recharge and pumping condition that can be realistically anticipated (i.e. pumping at the safe yield of the well for 180 days without any natural recharge occurring). It is bounded by the groundwater divides which result from pumping the well and by the contact of the edge of the aquifer with less permeable materials such as till and bedrock. At some locations, streams and lakes may form recharge boundaries.

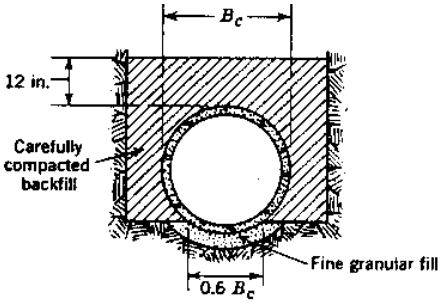
○ Potential public water supply – areas designated by communities for water supply purposes where land has been set aside and Department approved pump tests conducted and surface water supplies as defined below.

○ Surface Water Supply – Waters classified as Class A by the DWPC.

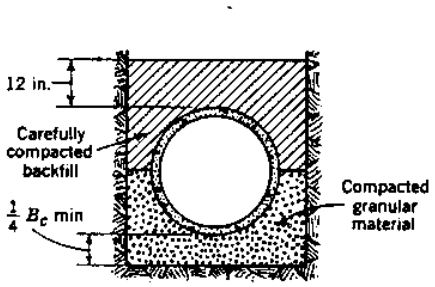
○ Public Water Supply Systems – as defined in 310 CMR 22.02 (DEP Drinking Water Regulations).

○ Class B Bedding – as defined in WPCF Manual of Practice No. 9.

APPROVED: (Signature on File)



Shaped bottom with tamped backfill, load factor 1.9



Compacted granular bedding, load factor 1.9

Class B---First-Class Bedding – Class B bedding may be achieved by either of two construction methods:

a. Shaped Bottom with Tamped Backfill. The bottom of the trench excavation shall be shaped to conform to a cylindrical surface with a radius at least 2 in. (5 cm) greater than the radius to the outside of the pipe and with a width sufficient to allow six-tenths of the width of the pipe barrel to be bedded in fine granular fill placed in the shaped excavation. Carefully compacted backfill shall be placed at the sides of the pipe to a thickness of at least 12 in. (30 cm) above the top of the pipe. Shaped trench bottoms are difficult to achieve under current construction conditions.

b. Compacted Granular Bedding with Tamped Backfill. The pipe shall be bedded in compacted granular material placed on a flat trench bottom. The granular bedding shall have a minimum thickness of one-fourth the outside pipe diameter and shall extend halfway up the pipe barrel at the sides. The remainder of the side fills and a minimum depth of 12 in. (30 cm) over the top of the pipe shall be filled with carefully compacted material.

END OF DOCUMENT

This Page Intentionally Left Blank.

SECTION 00902

PROJECT SIGN

PART 1 - GENERAL

1.01 - SCOPE

A. The work of this section includes furnishing all labor, equipment, tools and materials, and performing all operations in connection with furnishing, erecting, maintaining and removal / legal disposal of the Project Sign as specified herein.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

B. The Contractor shall include the cost for two signs as specified herein.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Submittals required under this section include, but are not limited to the following:

1. Drawing showing layout Project Sign.
2. Scope of supply of all materials and hardware.

1.05 - PRODUCT HANDLING

A. All materials and equipment shall be shipped, stored, handled and installed to not degrade the quality of the Project Sign.

1.06 - DESIGN CRITERIA

A. The Contractor shall erect a sign at the project site identifying the project information as specified herein.

B. The specifications call attention to certain features but do not purport to cover all details entering into the construction of the equipment.

PART 2 - PRODUCTS

2.01 - SUBMITTAL PROCEDURES

A. Panel

1. Material: APA rated A-B grade – Exterior
2. Dimensions: 4-feet x 8-feet x ¾-inch

B. Posts

1. Material: Pressure Treated
2. Dimensions: 4-inch x 4-inch x 12-feet

C. Hardware shall be 5/16-inch Type 304 stainless steel nuts, washers and bolts

D. Finish

1. Front side (background) shall consist of at least three coats of white outdoor enamel paint.
2. Rear side shall be painted with one coat of white outdoor enamel paint.
3. Lettering shall be 4-inch high and either Helvetica or Arial Font and shall be painted with two coats of black outdoor enamel paint.

PART 3 - EXECUTION

3.01 - VERIFICATION OF CONDITIONS

A. Before the start of the work of this Section, verify that the project is ready for this work.

B. Verify that field measurements are as shown on approved shop drawings.

C. Notify subcontractors involved or affected by this work and coordinate the work with them.

3.02 – INSTALLATION, MAINTENANCE AND REMOVAL

A. Installation

1. The sign shall be erected within 14 days after shop drawing approval and prior to the start of any construction.
2. The Project Sign shall be installed at a location identified in the field with the Engineer.
3. The Project Sign shall be installed level with the top of the sign 8 feet above natural ground and installed vertically to a minimum depth of 3-feet below natural ground.
4. Install with four nuts and bolts per post with one washer front and back.

B. Maintenance

1. The Contractor shall maintain the Project Sign throughout the direction of construction.
2. The Contractor shall repair, repaint, and/or replace the Project Sign as required to ensure that the sign

C. Removal

1. The sign shall be removed and legally dispose of within 14 days of substantial completion.
2. The location shall be restored in accordance with SECTION 02485, LOAMING AND SEEDING.

3.03 – CONTRACT CLOSEOUT

A. Provide in accordance with SECTION 01700, CONTRACT CLOSEOUT.

CERTIFICATE OF SUBSTANTIAL COMPLETION

Project Name:	Meetinghouse Pond Area Collection System and Pumping Station Contract No. 2022-01 and SRF No. 7150
Agreement Date:	
Owner:	Town of Orleans, MA, 19 School Road, Orleans, MA 02653
Completion Date:	
Contractor:	
Contract For:	

This Certificate of Substantial Completion applies to all Work under the Contract Documents or to the following specified parts thereof:

To:

From:

The Work to which this Certificate applies has been inspected by authorized representatives of Owner, Contractor, and Engineer, and that Work is hereby declared to be substantially complete in accordance with the Contract Documents on

Date of Substantial Completion:

A tentative list of items to be completed or corrected is attached hereto. This list may not be all-inclusive, and the failure to include an item in it does not alter the responsibility of Contractor to complete all the Work in accordance with the Contract Documents. The items in the tentative list shall be completed or corrected by Contractor within 30 calendar days of the above date of Substantial Completion.

The responsibilities between Owner and Contractor for security, operation, safety, maintenance, heat, utilities, insurance and warranties shall be as follows:

Owner:

1. _____
2. _____
3. _____
4. _____
5. _____

Contractor:

1. _____
2. _____
3. _____
4. _____
5. _____

The following documents are attached to and made a part of this Certificate:

1. _____
2. _____
3. _____
4. _____
5. _____

This certificate does not constitute an acceptance of Work not in accordance with the Contract Documents nor is it a release of Contractor's obligation to complete the Work in accordance with the Contract Documents.

SECTION 01020

ALLOWANCES

PART 1 - GENERAL 1
1.01 - SCOPE 1
1.02 - MEASUREMENT AND PAYMENT 1
1.03 - DEFINITIONS 1
1.04 - SUBMITTALS – Not Used 2
1.05 - ALLOWANCES FOR PRODUCTS 2
1.06 - SELECTION OF PRODUCTS UNDER ALLOWANCES 2
1.07 - ADJUSTMENT OF COSTS 3
PART 2 - PRODUCTS - Not Used 4
PART 3 - EXECUTION - Not Used 4

PART 1 - GENERAL

1.01 - SCOPE

A. Include all costs related to the scheduled allowances in the applicable bid item of DOCUMENT 00300, BID FORM. Allowance amounts listed herein have been estimated. Actual paid invoice amounts shall be used for reimbursement purposes.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

B. Include in the Contract Price, scheduled allowances included under the applicable Bid Item of DOCUMENT 00300, BID FORM specified in the respective specification sections and listed below:

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.

7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS – Not Used

1.05 - ALLOWANCES FOR PRODUCTS

A. The amount of each allowance unless otherwise specified in SECTION 01025, MEASUREMENT AND PAYMENT:
   1. The cost of the product for service.
   2. Applicable taxes.

B. In addition to the amount of each allowance, include, except as specified herein, in the Contract Sum the Contractor's costs for:
   1. Handling at the site, including unloading, uncrating, and storage.
   2. Protection from the elements and from damage.
   3. Labor for installation and finishing, except where labor is specified to be a part of the Allowance.
   4. Other expenses required to complete the installation.
   5. Contractor's and Subcontractor's overhead and profit.

C. The scheduled allowances are as follows:

SCHEDULED ALLOWANCES

Item Number	Description	Amount	Bid Item
General			
1	Miscellaneous Restoration of Municipal Roadways	$100,000	15J.
2	Dense Graded Gravel Roadways	$50,000	15L.
3	Traffic Markings	$100,000	15N.
4	Removal and Relaying and/or Replacement of Existing Gas Mains and Services	$100,000	16C.
5	Removal and Relaying and/or Replacement of Existing Miscellaneous Utilities	$100,000	16D.
Wastewater Treatment Facility			
6	SCADA System Integrator	$20,000	22A.
7	SBR Transfer Pump	$90,000	22B.
8	SBR Blower	$90,000	22C.
9	SBR Aeration Grids	$40,000	22D.
10	Variable Frequency Drives	$150,000	22E.

Item Number	Description	Amount	Bid Item
Pumping Station No. 04			
11	Submersible Pumps	$135,000	23B.
12	Variable Frequency Drives	$150,000	23C.
13	Odor Control System	$40,000	23D.
14	Standby Diesel Engine Drive Generator	$150,000	23E.
15	Davit Crane	$10,000	23F.
16	Electric Company Connection/Service Fee	$50,000	23G.
17	Telephone Company Connection/Service Fee	$10,000	23H.
18	Planting Operations	$20,000	23I.

1.06 - SELECTION OF PRODUCTS UNDER ALLOWANCES

A. Engineer's duties are as follows:

1. Make selection in consultation with the Owner and obtain Owner's written decision, designating:

a. Product, model and finish.

b. Accessories and attachments.

c. Cost to the Contractor, delivered to the Project Site or installed, as applicable.

2. Transmit Owner's decision to the Contractor.

3. Prepare Change Orders.

B. Contractor's duties are as follows:

1. Obtain proposals from suppliers and installers when requested by the Engineer.

2. Make appropriate recommendations for consideration by the Engineer.

3. Notify the Engineer promptly of:

a. Any reasonable objections the Contractor may have against any supplier, or party under consideration for installation.

b. Any effect on the construction schedule anticipated by selections under consideration.

1.07 - ADJUSTMENT OF COSTS

A. Should the net cost be more or less than the specified amount of the allowance, the Contract Price shall be adjusted accordingly by Change Order.

1. The amount of the Change Order will recognize any changes in handling costs at the Project Site, labor, installation costs, overhead, profit and other expenses caused by the selection under the allowance.

B. Submit any claims for anticipated additional costs at the Project Site, or other expenses caused by the selection under the allowance, prior to execution of the Work.

C. Submit documentation or actual additional costs at the Project Site, or other expenses caused by the selection under the allowance, within 60 days after completion of execution of the Work.

D. Failure to submit claims within the designated time will constitute a waiver of claims for additional costs.

E. At Contract closeout, reflect all approved changes in Contract Price in the final statement of accounting.

PART 2 - PRODUCTS – Not Used 20
PART 3 – EXECUTION – Not Used 20

PART 1 - GENERAL

1.01 - SCOPE

A. The purpose of this section is to define the basis of measurement and payment for each of the unit price or lump sum items listed in DOCUMENT 00410, FORM OF GENERAL BID. If no quantity or bid item appears in DOCUMENT 00410, FORM OF GENERAL BID for any of the following described items, no Work of that description is anticipated on the project.

B. The Contractor shall become acquainted with all Work associated with each Payment Item and shall have no claim for additional compensation due to unfamiliarity with the Work required to complete each Item in accordance with the Contract Documents.

C. No payment will be made for any item of Work until all documentation required by the Contract Documents has been reviewed and approved by the Engineer. No payment will be made for additional materials that are not installed on the Project. The Owner reserves the right to withhold the fair market value for work not completed in addition to the retainage on work completed. Unbalanced bid items will specifically be subject to review and to this potential withholding from periodic payment applications.

D. American Iron and Steel (AIS) certifications for all applicable materials must be included with the product shop drawing or the submittal will be rejected. Certification requires a project specific letter that certifies the manufacturing process and foundry location of the subject products and/or materials. There will be no payment for items that do not have approved AIS certification.

1.02 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.

2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.

3. "Provide" shall mean furnish and install.

4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.

5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.

6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.

7. "Exposed" shall mean not concealed as defined above.

8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.

9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.03 - PAYMENT ITEMS

A. SRF Eligible Items

Item	Description
1	Mobilization/Demobilization
2	Sewer Pipelines and Associated Fittings
3	Precast Concrete Manholes and Structures
4	Manhole Frames, Covers and Grates
5	Interior Manhole Drop Connections
6	Chimneys
7	Miscellaneous Cement Concrete
8	Rock and/or Boulder Excavation
9	Replacement of Unsuitable Material
10	Experimental Excavation
11	Fill for Embankments – Not Used
12	Sheeting and/or Shoring Ordered Left in Place – Not Used
13	Soil Compaction Tests
14	Road Gravel
15	Pavement Restoration
16	Remove and Relay or Replace Existing Utilities
17	Uniformed Traffic Police Officers
18	Engineer's Field Office
19	Environmental Protection
20	Dewatering
21	Temporary By-Pass Pumping – Not Used
22	Proprietary Equipment Allowances
23	Pumping Station

C. SRF Ineligible Bid Items

Item	Description
B-1	Replacement of Water Services
B-2	Baxter Lane and Lucy's Lane Water Main
B-3	Water Quality Improvements

1.04 - BASIS OF MEASUREMENT AND PAYMENT – SRF ELIGIBLE ITEMS

ITEM 1 - MOBILIZATION/DEMOBILIZATION

A. General. The price bid under this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include transporting, mobilization, demobilization, utility connection fees, permits, licenses, bonds, insurance and all other incidental Work relative thereto.

B. Measurement. Measurement for mobilization/demobilization shall be made based on the lump sum amount bid as approved by the Engineer.

C. Payment. Payment for mobilization/demobilization listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the lump sum price bid under this Bid Item. The amount of this lump sum shall not exceed five (5) percent of the Contract amount, excluding Item 1, and no payment shall be made in excess of this amount. An amount of seventy-five (75) percent of the amount bid under Item 1 (exclusive of normal Contract retainage) will be made when the Contractor has mobilized to the Project site(s) and is ready to start construction. The remaining twenty-five (25) percent (exclusive of normal Contract retainage) will be made following demobilization from the Project site(s) following final completion and acceptance of the work by the Owner.

ITEM 2 - SEWER PIPELINES AND ASSOCIATED FITTINGS

A. General. The prices bid under each division of this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include: transportation, handling and dispersal of materials; clearing and grubbing; saw cutting and removal of existing bituminous and cement concrete or reinforced cement concrete pavement; excavation (excluding that which is specified to be paid for under a separate Bid Item); backfill above trench grade including all bedding materials (excluding material used to replace unsuitable material, controlled density fill and road gravel); removal and legal disposal of all existing utility lines not being relaid (including pipes, services, manholes and appurtenances); removal and legal disposal of existing utility materials (as required); compacting trenches (excluding soil compaction tests specified to be paid for separately); sheeting and shoring not ordered left in place; loaming and seeding; landscaping; removing and resetting curbing, property markers, signs and mail boxes; connections to existing pipeline(s) and services; dust control including mechanical sweeping; all permanent and temporary fittings, caps, plugs, restraints and the like; two-way sewer lateral cleanout; service check valves, low pressure sewer corporation stop, low pressure sewer service lateral and curb box, traffic control devices, flushing and testing; dewatering of trenches; polyethylene encasement; cleaning and television inspection of sewer lines, daily cleanup; restoration of all areas disturbed by the Contractor's operations; all Work as specified in DIVISION 1 – GENERAL REQUIREMENTS (excluding Environmental Protection specified to be paid for under a separate Bid Item); and all other incidental Work relative thereto.

B. Measurement. Measurement for furnishing and installing pipelines and associated fittings shall be as follows:

1. The length of pipe and fittings (pipeline), to be paid for shall be the horizontal measured length of pipeline in place from centerline of manhole to centerline of manhole. Measurement shall be by the linear foot with no deductions made for manholes, fittings or valves. The measurement for depth of gravity sewers shall be made vertically from the existing ground surface above the pipeline to the invert of the sewer.

2. The length of pipe and fittings to be paid for shall be the measured length of pipeline in place. Measurement shall be by the linear foot with no deductions made for fittings or valves.

3. Measurement for service connections shall be by the linear foot with no deductions made for fittings or valves.

    a. Measurement for sewer service connections shall be the horizontal measured length of pipeline in place from the face of the wye, tee or chimney to the terminus of the service pipeline.

    b. Measurement shall be as stated above with a minimum payment of five (5) linear feet.

4. Measurement for wyes, blow offs, air vents (manual or automatic), service connections and the like shall be per each installation, as approved by the Engineer.

C. Payment. Payment for furnishing and installing pipelines and associated fittings of the various types, diameters and depths listed in DOCUMENT 00410, FORM OF GENERAL BID, shall be made at the unit prices bid under the applicable divisions of this Bid Item.

1. Only eighty-five (85) percent of the price bid per linear foot of pipeline shall be paid for upon its installation, the balance shall be withheld until such time as pipeline(s) have been successfully flushed and tested (as required), accepted by the Owner for incorporation into the existing pipeline system and the site(s) has been fully restored. This percentage is exclusive of normal Contract retainage.

2. An additional five (5) percent shall be withheld until such time as the complete system has been cleaned and televised with records accepted by the Owner. This percentage is exclusive of normal Contract retainage.

3. The Contractor shall provide water for flushing and testing (as applicable) for each section of pipeline (transmission main and force main only) installed. Water utilizing the Owner's water system may be available, however, the Owner does not guarantee that its water supply will be available at any time during the duration of the Project. If available, water required for testing, puddling and/or jetting of trenches shall be provided by the Owner at no cost to the Contractor. All water shall be metered and the use of backflow prevention device(s) shall be required as approved by the Owner.

4. Payment for furnishing and installing fittings, restraints, solid sleeves, flexible couplings, transition couplings and the like shall be made under and included in the prices bid per linear foot.

5. Payment for service connections including fittings and/or valves shall be made at the unit price bid per linear foot.

6. Payment for sewer service wyes shall be made at the unit price bid for each approved installation. Payment will be made without regard to size.

ITEM 3 - PRECAST CONCRETE MANHOLES AND STRUCTURES

A. General. The prices bid under each division of this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include excavation, installation, steel reinforced copolymer polypropylene plastic steps, lifting rings, sealing materials in horizontal joints, pipe penetrations, dampproofing, invert, electrical and mechanical equipment, valves and fittings, external manhole encapsulation system, backfill, mancatchers on manholes over twenty (20) feet in depth, removal and legal disposal of existing structures to be replaced, as specified and/or shown on the Contract Drawings and all other incidental Work relative thereto.

B. Measurement. Measurement for furnishing and installing precast concrete manholes shall be as follows:

1. For sewer and drain manholes, measurement for depth shall be from the top of frame to the lowest invert in the manhole, as approved by the Engineer.

2. For air release and flushing/drain manholes, measurement shall be per each installation, regardless of depth, as approved by the Engineer.

3. For sump drain manholes and catch basins, measurement shall be from the top of frame to the lowest invert or sump in the structure, as approved by the Engineer.

4. For leaching catch basins measurement shall be from the top of frame to the lowest invert or sump in the structure, as approved by the Engineer.

C. Payment. Payment for furnishing and installing precast concrete manholes listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit prices bid under the applicable divisions of this Bid Item.

1. Payment for air vacuum and air release valve and/or flushing drain manholes shall be per each approved installation.

2. Payment for leaching catch basins shall be per each approved installation.

3. Only eighty-five (85) percent of the price bid for each manhole shall be paid for upon its installation, the balance shall be withheld until such time as the manhole has been successfully tested and accepted by the Owner. This percentage is exclusive of normal Contract retainage.

4. An additional ten (10) percent shall be withheld until such time as the invert, manhole steps, pig catchers, and mancatchers have been installed and accepted by the Owner. This percentage is exclusive of normal Contract retainage.

5. Only twenty (20) percent of the price bid for each:(a) Inline Flushing Manhole with Combination Air Valve; and (b) Terminal Flushing Manhole with Combination Air Valve manhole shall be paid for upon its installation, the balance shall be withheld until such time as the manhole has been successfully tested and accepted by the Owner. This percentage is exclusive of normal Contract re.

ITEM 4 - MANHOLE FRAMES, COVERS AND GRATES

A. General. The prices bid under each division of Item 4 shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include setting frames, covers and grates to existing grade initially and resetting frames, covers and grates to final grade prior to final pavement restoration and all other incidental Work relative thereto.

B. Measurement. Measurement for furnishing and installing manhole frames, covers and grates shall be per each installation as approved by the Engineer.

C. Payment. Payment for furnishing and installing manhole frames, covers and grates of the various types and sizes listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit prices bid per each under the applicable divisions of Item 4.

ITEM 5 – INTERIOR MANHOLE DROP CONNECTIONS

A. General. The prices bid under Item 5 shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include excavation, assembly, drop piping, fittings, hardware, and all other incidental Work relative thereto.

B. Measurement. Measurement for furnishing and installing interior manhole drop connections shall be from the invert of the manhole to the top of the drop connection.

C. Payment. Payment for furnishing and installing interior manhole drop connections listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit price bid per vertical foot under Item 5.

ITEM 6 - CHIMNEYS

A. General. The price bid under Item 6 shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include excavation, vertical piping, wye fittings, caps, concrete encasement, and all other incidental Work relative thereto.

B. Measurement. Measurement for chimneys shall be from the top of the chimney to the top of the wye fitting for each installation as approved by the Engineer.

C. Payment. Payment for chimneys listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit price bid under Item 6.

ITEM 7 - MISCELLANEOUS CEMENT CONCRETE

A. General. The price bid under this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, including thrust blocks, support for utilities, pipe encasements, and the like and any other incidental Work relative thereto.

B. Measurement. Measurement of miscellaneous cement concrete shall be the actual cubic yardage placed as approved by the Engineer.

C. Payment. Payment for miscellaneous cement concrete listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit price bid per cubic yard under this Bid Item.

1. Payment for concrete used for manhole bases, joints and inverts, for setting frames and covers, for manhole drop connections and for chimneys shall be included as specified under the applicable Bid Item.

ITEM 8 - ROCK AND/OR BOULDER EXCAVATION

A. General. The price bid under Item 8 shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified which shall include excavation, use of drilling and blasting (if allowed); hydraulic hammers; hydraulic splitters; and/or drilling and expansion cement/grout. pre-blast survey(s), permit(s) and license(s), vibration monitoring, removal and legal disposal of rock and/or boulders, furnishing and placing replacement material, backfilling and compaction, and any other incidental Work relative thereto. The Contractor shall assume that Rock and/or Boulders may occur anytime throughout the Project Area and that the unanticipated discovery of Rock and/or Boulders is not a basis for a change in conditions.

B. Measurement. Measurement of rock and/or boulder excavation shall be made based on the volume removed and replaced as approved by the Engineer computed as follows:

1. Only boulders greater than one (1) cubic yard in volume, defined by the Engineer shall be measured and paid for under this Bid Item. Measurement shall be based on the length, width and depth of boulders excavated within the trench limits.

2. Rock in pipe trenches shall be measured from its surface to a point six (6) inches below the invert of the pipe and as follows:

   a. For pipe twenty-four (24) inches or less in diameter a width of five (5) feet for depths twelve (12) feet or less and a width of seven (7) feet for depths greater than twelve (12) feet.

   b. For pipe greater than twenty-four (24) inches in diameter a width of three (3) feet plus the inside diameter of the pipe for depths of twelve (12) feet or less and a width of five (5) feet plus the inside diameter of the pipe for depths greater than twelve (12) feet.

3. Rock or boulders encountered in other excavations, which are to be paid for separately, shall be measured from its surface to a point six (6) inches below the base of structure and to a width of one (1) foot outside the face of the structure.

4. Where more than one (1) pipe is installed in the same trench, payment shall be made on the basis of a common trench with the maximum trench width of seven (7) feet.

C. Payment. Payment for rock and/or boulder excavation listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit price bid per cubic yard under this Bid Item.

1. No additional payment will be made for frost removal or for any other materials encountered in the excavations, no matter how stiff or compact of consistency, even if drilling and blasting (if allowed); hydraulic hammers; hydraulic splitters; and/or drilling and expansion cement/grout is required for removal. Soft or disintegrated rock that can be removed without the use of drilling and blasting (if allowed); hydraulic hammers; hydraulic splitters; and/or drilling and expansion cement/grout shall not be paid for under this Bid Item.

2. No additional payment will be made for rock and/or boulder excavation where existing utilities are removed and relaid to facilitate the Work within the trench limits defined hereinbefore.

3. Masonry or concrete structures encountered during the course of constructing the Work, which require drilling and blasting (if allowed); hydraulic hammers; hydraulic splitters; and/or drilling and expansion cement/grout for removal, shall be paid for subject to the limits and conditions described herein.

4. No payment will be made for excavation of rock and/or boulders beyond the specified limits.

The unit price for rock and/or boulder excavation shall be a minimum of $80 per cubic yard which shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified using drilling and blasting (if allowed); hydraulic hammers; hydraulic splitters; and/or drilling and expansion cement/grout.

ITEM 9 - REPLACEMENT OF UNSUITABLE MATERIAL

A. General. The prices bid under each division of this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified which shall include excavation, sheeting or shoring not ordered left in place, dewatering, removal and legal disposal of unsuitable materials, filter cloth, furnishing and placing replacement materials, transportation, backfilling, compaction and any other incidental Work relative thereto.

B. Measurement. Measurement for replacement of unsuitable material above and below trench grade and/or subgrade shall be made based on the volume removed and replaced as approved by the Engineer and as follows:

1. Unsuitable material below trench grade shall be measured from a point six (6) inches below the invert of pipe to the bottom of the excavation and as follows:

a. For pipe twenty-four (24) inches or less in diameter a width of five (5) feet for depths twelve (12) feet or less and a width of seven (7) feet for depths greater than twelve (12) feet.

b. For pipe greater than twenty-four (24) inches in diameter a width of three (3) feet plus the inside diameter of the pipe for depths of twelve (12) feet or less and a width of five (5) feet plus the inside diameter of the pipe for depths greater than twelve (12) feet.

2. Unsuitable material above trench grade shall be measured from a point one (1) foot plus the thickness of permanent pavement thickness below the existing pavement surface or from a point six (6) inches below the existing unpaved surface to a point one (1) foot above the pipe and as follows:

a. For pipe twenty-four (24) inches or less in diameter a width of five (5) feet for depths twelve (12) feet or less and a width of seven (7) feet for depths greater than twelve (12) feet.

b. For pipe greater than twenty-four (24) inches in diameter a width of three (3) feet plus the inside diameter of the pipe for depths of twelve (12) feet or less and a width of five (5) feet plus the inside diameter of the pipe for depths greater than twelve (12) feet.

3. Unsuitable material below precast concrete manholes shall be measured from a point six (6) inches below the base of the manhole to the bottom of the excavation and to a width of two (2) feet plus the outside diameter of the manhole.

4. Unsuitable material below foundations for structures shall be measured from the bottom of foundation varying in width on a forty-five (45) degree angle down from the bottom of foundation to a depth approved by the Engineer.

C. Payment. Payment for replacement of unsuitable material above and below trench grade and/or subgrade listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit price bid per cubic yard under the applicable division of this Bid Item.

1. No payment will be made for replacement of unsuitable material above trench grade when suitable excess excavated material is available from other excavations made under this Project.

2. Bedding material placed from a point six (6) inches below the invert of pipe, to a point one (1) foot above the top of the pipe shall be included for payment under the applicable pipe laying Bid Item.

3. When more than one (1) pipe is installed in the same trench, payment will be based on a common trench with a minimum width of seven (7) feet.

4. No payment will be made for unsuitable material replaced beyond the limits approved by the Engineer.

ITEM 10 - EXPERIMENTAL EXCAVATION

A. General. The price bid under this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include notification of utility owners, machine and/or hand excavation to locate utilities, backfill, compaction, maintaining utility marking locations, repair to utilities damaged while performing experimental excavations, temporary bituminous concrete patch, furnishing assistance to the Engineer and all other incidental Work relative thereto.

B. Measurement. Measurement of experimental excavation shall be made based on the volume excavated and backfilled as approved by the Engineer.

C. Payment. Payment for experimental excavation listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit price bid per cubic yard under this Bid Item. No payment will be made for any cost associated with damages caused to existing utilities made during the performance of experimental excavation operations.

ITEM 11 - FILL FOR EMBANKMENTS – Not Used

ITEM 12 - SHEETING AND/OR SHORING ORDERED LEFT IN PLACE – Not Used

ITEM 13 - SOIL COMPACTION TESTS

A. General. The price bid under this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include excavation, sampling, sieve analysis, laboratory and field testing, backfill, compaction and any other incidental Work relative thereto.

B. Measurement. Measurement of compaction testing shall be per each test as approved by the Engineer.

C. Payment. Payment for soils compaction tests listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit price bid per each under this Bid Item.

1. For the purpose of payment, a test shall include, but not be limited to, exploratory excavation, laboratory analysis (sieve analysis and modified proctor), field testing (density test), backfill and compaction of excavations.

2. No payment will be made for any test that fails to meet the specified compaction requirements.

ITEM 14 - ROAD GRAVEL

A. General. The price bid under this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include transportation, preparation of sub-grade, placement, grading, compaction and any other incidental Work relative thereto.

B. Measurement. Measurement of road gravel as a subbase for permanent resurfacing shall be based on the approved volume furnished and placed as approved by the Engineer computed as follows:

1. The length of main trench shall be defined as the length of roadway surface disturbed by the pipeline Work. The length of service trench shall be defined as the length of roadway surface disturbed by the service line Work less three (3) feet from the centerline of the main sewer or water pipeline trench.

2. The width of main or service trench shall be defined as follows:

   a. For pipe twenty-four (24) inches or less in diameter a width of five (5) feet for depths of twelve (12) feet or less and a width of seven (7) feet for depths greater than twelve (12) feet.

   b. For pipe greater than twenty-four (24) inches in diameter a width of three (3) feet plus the inside diameter of the pipe for depths of twelve (12) feet or less and a width of five (5) feet plus the inside diameter of the pipe for depths greater than twelve (12) feet.

3. The width for manholes shall be measured from a width of two (2) feet plus the outside diameter of the manhole.

4. When more than one (1) pipe is installed in the same trench, payment will be based on a common trench with a maximum width of seven (7) feet.

5. The thickness of road gravel in local roadways shall be twelve (12) inches, unless otherwise specified or approved by the Engineer.

6. The thickness of road gravel in State Roadways shall be equal to the thickness of the existing undisturbed road gravel adjacent to the trench.

7. No payment will be made for road gravel course material when suitable excess excavated material is available from other excavations made under this Project.

C. Payment. Payment for furnishing and placing road gravel material listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit price bid per cubic yard under this Bid Item.

ITEM 15 - PAVEMENT RESTORATION

A. General. The prices bid under each division of this Bid Item shall be considered as fair compensation for all labor, equipment, tools, and materials necessary to complete the Work as specified, which shall include, preparation of subgrade, cutting and recutting of bituminous and cement concrete pavement, full width pavement removal, reshaping of the roadway surface, reshaping, loaming and seeding of roadway shoulders, furnishing and placing bituminous concrete dense graded gravel, furnishing and placing bituminous concrete (temporary and permanent), maintenance and protection of roadway surfaces, repainting of traffic control lines/wording, resetting of structures and utility boxes, milling of bituminous concrete surfaces, replacement of pavement markings (temporary and permanent), replacement of vehicle loop detectors, repair to roadways used as detours, and all other Work incidental thereto and all other Work incidental thereto.

B. Measurement. Measurement for pavement restoration shall be as follows:

1. Bituminous Concrete Trench Pavement in State Roadways

    a. Measurement for Temporary Bituminous Concrete Trench Pavement in State Roadways shall be based on the horizontal measured length of main line trench defined as the length of roadway disturbed by the main line Work from centerline of manhole to centerline of manhole. Measurement shall be by the linear foot with no deductions made for manholes, fittings or valves.

    b. Measurement for Permanent Bituminous Concrete Trench Pavement in State Roadways shall be based on the horizontal measured length of service trench defined as the length of roadway surface disturbed by the service line Work less three (3) feet from the centerline of the main sewer or water pipeline trench. Measurement shall be by the linear foot with no deductions made for fittings or valves.

    c. Measurement for Permanent Bituminous Concrete Trench Pavement in State Roadway for trenches with more than one (1) pipe laid in the same trench shall be treated as a common trench, unless otherwise approved by the Engineer.

2. Bituminous Concrete Trench Pavement

    a. Measurement for Permanent Bituminous Concrete Trench Pavement shall be based on the horizontal measured length of main line trench defined as the length of roadway disturbed by the main line Work from centerline of manhole to centerline of manhole. Measurement shall be by the linear foot with no deductions made for manholes, fittings or valves.

    b. Measurement for Permanent Bituminous Concrete Trench Pavement shall be based on the horizontal measured length of service trench defined as the length of roadway surface disturbed by the service line Work less three (3) feet from the centerline of the main sewer or water pipeline trench. Measurement shall be by the linear foot with no deductions made for fittings or valves.

    c. Measurement for Permanent Bituminous Concrete Trench Pavement for trenches with more than one (1) pipe laid in the same trench shall be treated as a common trench, unless otherwise approved by the Engineer.

    d. Measurement for Temporary Bituminous Concrete Trench Pavement shall be as described for Permanent Bituminous Concrete Trench Pavement.

3. Permanent Bituminous Concrete Full Width Overlay Pavement. Measurement for Bituminous Concrete Full Width Overlay Pavement with or without milling will be made based on either (a) Certified weight slips delivered daily to the Engineer or (b) the actual length and width of roadway overlaid as approved by the Engineer.

4. Miscellaneous Restoration of Municipal Roadways. The methods of measurement shall be based on the completed installation of the Allowance items, as specified, based on the schedule of values approved by the Owner.

5. Dense Graded Gravel

    a. Measurement for dense graded gravel shall be defined as the length of roadway surface disturbed by the width of the roadway. Measurement shall be by the linear foot with no deductions made for manholes, fittings or valves.

    b. Measurement for Permanent Bituminous Concrete Trench Pavement for trenches with more than one (1) pipe laid in the same trench shall be treated as a common trench, unless otherwise approved by the Engineer.

6. Miscellaneous Bituminous Concrete. Measurement for Miscellaneous Bituminous Concrete placed where directed by the Engineer shall be by the ton based on certified weight slips delivered daily to the Engineer.

7. Replacement of Vehicle Loop Detectors. Measurement for Replacement of Vehicle Loop Detectors shall be based on each location replaced as approved by the Engineer and MassDOT. Each location paid for shall be for the vehicle loop detector replaced following Permanent Bituminous Concrete Trench Pavement and replaced following Permanent Bituminous Concrete Full Width Overlay Pavement.

8. Repainting of Traffic Markings. Refer to SECTION 01020, ALLOWANCES.

9. Tracer Wire. Measurement for Tracer Wire installed as specified shall be by the linear foot

10. Payment limits for pavement restoration specified above supersede the MassDEP Policy Memorandum CG-8.

C. Payment. Payment for pavement restoration listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made under the applicable divisions of this Bid Item.

1. Temporary Bituminous Concrete Trench Pavement – Payment for Temporary Bituminous Concrete Trench Pavement whether placed by machine or by hand listed in DOCUMENT 00410, FORM OF GENERAL BID will be made at the unit price bid per linear foot under the applicable divisions of this Bid Item.

2. Permanent Bituminous Concrete Trench Pavement. Payment for Permanent Bituminous Concrete Trench Pavement whether placed by machine or by hand listed in DOCUMENT 00410, FORM OF GENERAL BID will be made at the unit price bid per linear foot or per ton under the applicable divisions of this Bid Item.

3. Permanent Bituminous Concrete Full Width Pavement. Payment for Permanent Bituminous Concrete Full Width Pavement including milling, if applicable, listed in DOCUMENT 00410, FORM OF GENERAL BID will be made at the unit price bid per ton under the applicable divisions of this Bid Item.

    a. The factor of 0.055 tons per square yard per inch of thickness shall be used for weight-volume conversions for bituminous concrete.

    b. Certified weight slips for all bituminous concrete delivered to the site(s) and certified volume slips for all controlled density fill delivered to the site(s) shall be submitted to the Engineer on a daily basis.

    c. Payment for furnishing and placing permanent bituminous concrete pavement shall be made at the unit price bid per ton computed using one of the following methods:

        1) Method 1 (Measured in Place): The Engineer shall multiply the pavement area by the specified pavement thickness by the factor to obtain the tonnage of bituminous concrete.

        2) Method 2 (Delivered): Certified weight slips shall be used. Any bituminous concrete placed outside the payment limits, unless approved by the Engineer, shall be deducted (using Method 1) from the total tonnage obtained from the certified weight slips.

        3) Payment for furnishing and placing temporary and permanent bituminous concrete will be made based on the number of tons obtained using either Method 1 or Method 2, whichever is less.

4. Miscellaneous Bituminous Concrete. Payment for Miscellaneous Bituminous Concrete whether placed by machine or by hand, for leveling of existing roadways, driveway aprons, sidewalks, repairs to roadways used for detours, and other areas outside the trench limits listed in DOCUMENT 00410, FORM OF GENERAL BID will be made at the unit price bid per ton.

5. Tracer Wire. Payment for installation of tracer wire shall be at the unit price bid per linear foot.

6. The following utility allowance(s) shall be included in the applicable subdivision of this Bid Item:
   a. Miscellaneous Restoration of Municipal Roadways – Refer to SECTION 01020, ALLOWANCES
   b. Dense Graded Gravel Roadways – Refer to SECTION 01020, ALLOWANCES
   c. Repainting of Traffic Markings – Refer to SECTION 01020, ALLOWANCES.
7. Price Adjustment - Liquid Asphalt, Diesel, Gasoline and Portland Cement
   a. The intent of this provision is to insure adequate and fair compensation for unpredictable and fluctuating costs which, from time to time, occur in the prices of Liquid Asphalt, Diesel Fuel, Gasoline and Portland Cement. The price adjustment provisions are made part of the Contract to assure more realistic bidding and encourage competition. Price Adjustments will be based on the variance in price, for the material component only, between the Base Price and the Period Price. They shall not include transportation or other charges. Price Adjustments will occur on a monthly basis for Liquid Asphalt and at the end of the Project for Diesel Fuel, Gasoline and Portland Cement.
   b. Base Price - The Base Price of liquid asphalt on a project is a fixed price determined by the MassDOT at the time of the bid using the same method as the determination of the Period Price detailed below. The Base Price shall be used in all bids.

      The February 2023 base prices are as follows: liquid asphalt at $665.00 per ton and Portland cement at $181.15. The January 2023 base prices are as follows: diesel fuel at $3.830 per gallon and gasoline at $2.767 per gallon. MassDOT posts the Price Adjustments on their Highway Division's website at https://www.mass.gov/service-details/massdot-current-contract-price-adjustments under the following link sequences: (1) Doing Business With Us; (2) Construction; and (3) Price Adjustments.

      1. Hot Mix Asphalt
         a) Period Price - The Period Price is the price of liquid asphalt for each monthly period as determined by the MassDOT using the average selling price per standard ton of PG64-28 paving grade (primary binder classification) asphalt, FOB manufacturer's terminal, as listed under the "East Coast Market - New England, Boston, Massachusetts area" section of the Poten & Partners, Inc. "Asphalt Weekly Monitor". This average selling price is listed in the issue having a publication date of the second Friday of the month and will be posted as the Period Price for that month. The MassDOT will post this Period Price on its website at http://www.mhd.state.ma.us/ within two (2) business days following its receipt of the relevant issue of the "Asphalt Weekly Monitor". Poten and Partners has granted the MassDOT the right to publish this specific asphalt price information sourced from the Asphalt Weekly Monitor. This method of period price determination was formerly called the New Asphalt Period Price Method. Separate website postings using both the New Asphalt Period Price Method and the Old Asphalt Period Price Method were discontinued after June 2013.
         b) Price Adjustment Determination, Calculation and Payment - Price Adjustments, as herein provided, either upwards or downwards, will be made after the work has been performed using the monthly period price for the month during which the work was performed. Price Adjustments will be paid only if the variance from the Base Price is 5 percent or more for a monthly period. The complete adjustment will be paid in all cases with no deduction of the 5 percent from either upward or downward adjustments. The Price Adjustment applies only to the actual virgin liquid asphalt content in the mixture placed on the job in accordance with the Standard Specifications for Highways and Bridges, Division III, Section M3.11.03. No adjustment will be paid for work done beyond the completion date. Price Adjustments for a positive price adjustment (a payment) and a negative price adjustment (a deduction) will be calculated using the following equation:
         c) Price Adjustment = Tons of HMA Placed x Liquid Asphalt Content % x RAP Factor x (Period Price - Base Price).

2. Diesel Fuel` and Gasoline

   a) Price period - The Period Price will be the average of prices charged to the State, including State Tax for the bulk purchases made during each month.

   b) Price Adjustment Determination, Calculation and Payment - Price Adjustments, as herein provided, either upwards or downwards, will be made after the work has been performed using the monthly period price for the month during which the work was performed. This adjustment will be based on fuel usage factors for various items of work developed by the Highway Research Board in Circular 158, dated July 1974. These factors will be multiplied by the quantities of work done in each item during each monthly period and further multiplied by the variance in price from the Base Price to the Period Price. The Base Price of Diesel Fuel and Gasoline will be the price as indicated in the Department's web site (www.MassDOT.state.ma.us) for the month in which the contract was bid, which includes State Tax. This adjustment will be affected only if the variance from the Base Price is 5 percent or more for a monthly period. The complete adjustment will be paid in all cases with no deduction of the 5 percent from either upward or downward adjustments. Any adjustment (increase or decrease) to estimated quantities made to each item at the time of final payment will have the fuel price adjustment figured at the average period price for the entire term of the project for the difference of quantity. No adjustment will be paid for work done beyond the completion date. The fuel price adjustment will apply only to the following items of work at the fuel factors shown:

SRF Eligible Bid Item Covered	Diesel Fuel	Gasoline
2. Sewer Pipelines and Associated Fittings	X	X
3. Precast Concrete Manholes and Structures	X	X
8. Rock and/or Boulder Excavation	X	X
9. Replacement of Unsuitable Material	X	X
10. Experimental Excavation	X	X
14. Road Gravel	X	X
15. Pavement Restoration	X	Does Not Apply

8. No additional payment will be made beyond the payment limits noted or for maintenance or repair of trenches.

9. Payment for joint sealant and/or tack coat shall be included under the applicable division of this Bid Item for bituminous concrete Work.

10. Payment for adjusting frames and covers, valve boxes and all other castings prior to placement of permanent bituminous concrete pavement shall be included under the applicable division of this Bid Item for bituminous concrete Work.

11. Payment for reshaping of roadways and/or road shoulders, roadway reclamation, regrading and compaction of roadway base course materials and or providing leveling course over settled trenches shall be included under the applicable division of this Bid Item for bituminous concrete Work.

ITEM 16 - REMOVE AND RELAY OR REPLACE EXISTING UTILITIES

A. General. The prices bid under each division of this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified which shall include transportation, handling and dispersal of materials, removal and legal disposal of excess materials, furnishing and installation of new replacement materials (including but not limited to pipe and accessories, couplings, fittings, manholes and catch basins), excavation (excluding that which is specified to be paid for separately), backfill above trench grade including all bedding materials (excluding material used to replace unsuitable material and road gravel), compacting trenches, sheeting and shoring not ordered left in place, testing (excluding soil compaction tests specified to be paid for separately), daily cleanup, restoration of all areas disturbed by the Contractor's operations that are not included for payment under another Bid Item, and all other incidental Work relative thereto.

B. Measurement. Measurement for removal and relaying or replacing existing utilities shall be as follows:

1. Measurement for the removal and relaying or replacement of existing water, sewer, storm drain, and/or gas pipelines and appurtenances, within the allowable trench width only, will be made by multiplying the inside diameter of the relaid or replaced pipeline by the length of relaid or replaced pipeline. For measurement purposes, the allowable trench width will be defined as follows:

   a. For pipe twenty-four (24) inches or less in diameter a width of five (5) feet for depths twelve (12) feet or less and a width of seven (7) feet for depths greater than twelve (12) feet.

   b. For pipe greater than twenty-four (24) inches in diameter a width of three (3) feet plus the inside diameter of the pipe for depths of twelve (12) feet or less and a width of five (5) feet plus the inside diameter of the pipe for depths greater than twelve (12) feet.

2. Measurement for removal and resetting or replacement of manholes and catch basins will be made by multiplying the inside diameter of the manhole or catch basins by its height.

C. Payment. Payment for the removal and relaying or replacement of existing water, sewer, storm drain and/or gas pipelines and appurtenances listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the unit prices bid per inch-foot under the applicable divisions of this Bid Item.

1. Payment will only be made for the removal and relaying or replacement of existing water, sewer, storm drain and/or gas pipelines and appurtenances when (1) such utilities are removed and relaid or replaced as a result of conflicts in elevation with the grade of the new pipelines or (2) the length of such existing utilities within the allowable trench width that cross above the new pipeline is greater than two and one-half (2.5) times the width of the allowable trench limit or (3) such utilities lie completely within the allowable trench width and the existing utility invert is a minimum of two (2) feet above the crown of the new pipeline as approved by the Engineer.

2. Payment for removal and resetting or replacement of manholes and catch basins shall include resetting frames and covers or grates.

3. No payment will be made for the removal and relaying or replacement of utilities which lie either partially or completely beyond the allowable trench width.

4. Payment for the removal and relaying or replacement of miscellaneous utilities shall be made at the unit price bid under this item. Payment for planting materials shall be made based on the actual charges paid by the Contractor. An amount of 100 percent of each paid invoice (no retainage) will be made to the Contractor based on paid invoice receipts.

5. No payment will be made for the removal and relaying or replacement of utilities other water, sewer, storm drain, and/or gas pipelines and appurtenances which are damage due to the contractor’s means and methods of construction.

6. The following utility allowance(s) shall be included in the applicable subdivision of this Bid Item:

   a. Removal and Relaying and/or Replacement of Existing Gas Main and Services. Refer to SECTION 01020, ALLOWANCES.

   b. Removal and Relaying and/or Replacement of Existing Miscellaneous Utilities. Refer to SECTION 01020, ALLOWANCES.

ITEM 17 - UNIFORMED TRAFFIC POLICE OFFICERS

A. General. Payment for the services of uniformed police officers shall be made at the prevailing rates of pay for special duty details in effect at the time of services, for each permanent, special or reserve officer and for graduated rank. Uniformed police officers shall be paid directly by the Owner. The Contractor is responsible for coordination of the police details.

1. Uniformed police officers used for special duty details are paid a four (4) hour minimum.

2. If arrangements have been made for uniformed police officers and inclement weather or other factors prohibit Work, the Contractor must contact the Police Department not later than two (2) hours before the scheduled start time on the day of Work to cancel the police detail.

3. If the Contractor fails to notify the Police Department of the cancellation of a scheduled detail, then it assumes all costs for the (4) hour minimum.

B. Measurement. Not Applicable

C. Payment. Not Applicable

ITEM 18 - ENGINEER'S FIELD OFFICE

A. General. The prices bid under each division of the Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to furnish, install maintain and remove the Engineer's Field Office as specified, including all other incidental Work relative thereto. The Engineer shall notify the Contractor when the Engineer’s Field Office is to be removed from the site.

B. Measurement. Measurement for furnishing, installing, maintaining and removing the Engineer's Field Office shall be as follows:

1. Measurement for payment for furnishing, installing and subsequent removal of the Engineer's Field Office shall be for one (1) complete and acceptable unit as approved by the Engineer.

2. Measurement for payment for maintaining the Engineer's Field Office shall be per week as approved by the Engineer.

C. Payment. Payment for furnishing, installing, maintaining and subsequent removal of the Engineer's Field Office listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the lump sum and unit prices bid under the applicable divisions of this Bid Item.

1. Payment for furnishing, installing and removal of the Engineer’s Field Office shall be made at the lump sum price bid under the applicable division of the Bid Item. The lump sum price bid shall include transporting, mobilization, demobilization, utility connection fees, permits, licenses, insurance, and all other labor, materials, and equipment required to furnish the Engineer's Field Office as specified. An amount of seventy-five (75) percent of the amount bid (exclusive of normal contract retainage) will be made when the Engineer’s Field Office is ready for occupancy and use on the Project. The remaining twenty-five (25) percent (exclusive of normal contract retainage) will be made following the removal of the Engineer’s Field Office from the Project.

2. Payment for maintaining the Engineer’s Field Office shall be made at the unit price bid per week under the applicable division of this Bid Item. Maintaining the Engineer's Field Office shall include all maintenance, rental fees, utility charges, sanitary fees, equipment rental charges, and all other costs related to the weekly operation of the Engineer’s Field Office. Payment will be made for those periods of time that the Engineer has directed the Contractor to provide the Engineer’s Field Office. No payment will be made for the Engineer’s Field Office that was not requested by the Engineer, or that remained on the Project after the Engineer notified the Contractor to remove it.

3. The Owner reserves the right to delete from the Work any or all divisions of this Bid Item without penalty.

4. No payment shall be made once the Contractor’s time for completion has been reached.

ITEM 19 - ENVIRONMENTAL PROTECTION

A. General. The prices bid under each division of this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include furnishing, installing, maintaining and removing sedimentation control barriers and structures and all other incidental Work relative thereto.

B. Measurement. Measurement for Environmental Protection shall be as follows:

1. Measurement for furnishing, placing, maintaining, and removal of sedimentation barriers shall be per linear foot of measured length of in-place barrier as approved by the Engineer.

2. Measurement for furnishing, placing, maintaining, and removal of sedimentation control structures shall be per each as approved by the Engineer.

C. Payment. Payment for Environmental Protection listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made under the applicable divisions of this Bid Item as follows:

1. Payment for sedimentation control barriers shall be made at the unit price bid per linear foot.

2. Payment for sedimentation control structures shall be made of the unit price bid per each approved installation.

3. No additional payment will be made for maintaining or replacing sedimentation barriers or control structures during the course of the Work.

ITEM 20 - DEWATERING

A. General. The price bid under this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified which shall include Work performed by the Contractor, Contractor's Subcontractor(s) or Consultants, design, permits, installation, operation, maintenance and removal of the dewatering system (including but not limited to pumps, well points, header pipes and approved discharge point preparation and restoration), legal disposal of all water discharged during the operation of the dewatering system, restoration of all areas disturbed by the Contractor's operations and all other incidental Work relative thereto. The Contractor shall engage a Commonwealth of Massachusetts Registered Professional Engineer with experience in the design of dewatering systems consisting of only well points in order to pre-drain the area prior to excavation below the groundwater level

B. Measurement. Measurement for dewatering shall be by the linear foot of pipe trench dewatered as approved by the Engineer.

C. Payment. Payment for dewatering listed in DOCUMENT 00410, FORM OF GENERAL BID shall be made at the linear foot price bid under this Bid Item and as follows:

1. Payment will be made for well point dewatering systems utilized to dewater the trench excavation.

2. No payment will be made for other type of dewatering systems including dewatering systems utilized within the limit of the trench excavation.

ITEM 21 - TEMPORARY BY-PASS PUMPING – Not Used

ITEM 22 - PROPRIETARY EQUIPMENT ALLOWANCES

A. General. Allowances specified in SECTION 01020, ALLOWANCES as being part of the Wastewater Treatment Facility shall be included under this Bid Item.

B. Measurement. The methods of measurement shall be based on the completed installation of the Allowance items, as specified, based on the schedule of values approved by the Owner.

C. Payment. Allowances specified in SECTION 01020, ALLOWANCES as being part of the Wastewater Treatment Facility shall be included under this Bid Item. Payment for the allowances under Item 22 which are listed in SECTION 01020, ALLOWANCES shall be based upon the actual time and materials or Lump Sum as approved by the Owner. If the actual costs exceed the allowance, the difference will be paid by the Owner. Should the actual cost be less than the allowance, the Owner will retain the difference. Refer to SECTION 01020, ALLOWANCES.

ITEM 23 - PUMPING STATION

A. General. The prices bid under each division of the Bid Item shall be considered as fair compensation for all labor, equipment, tools, and materials necessary to complete the Work, as specified, located within the limit of Work shown for the construction of Pumping Station 4 shown on the Contract Drawings. This shall include all Work performed by the Contractor, Subcontractor(s) or Contractor's Consultant(s) for the construction of a complete pumping station including but not limited to, wetwell, valve vault, piping, values, flow measurement device, odor control system, control pedestal, emergency generator, planting operations, restoration, utility company coordination/fees, start-up and testing, and all other incidental Work relative thereto.

In addition to the above, the Work shall include the following:

1. Pumping Station No. 4
    a. Coordination of Work to maintain continuous operation of the existing sanitary system, pumping stations and treatment facility and leaching field.
    b. Upon completion and acceptance by the Owner of the new collection system, demolish and legally dispose of the existing on-site sewage disposal system.
    c. Connection of existing sanitary service into the new collection system upon acceptance by the Owner of the new collection system.

B. Measurement

1. Measurement for each pumping station constructed shall be made based on a percentage of the total lump sum amount bid under each subdivision of this Bid Item, as approved by the Engineer.
2. Measurement for utility charge allowance(s) shall be based on the actual paid invoices by the Contractor to each utility company and/or nursery. The following utility and nursey allowance(s) shall be included in the applicable subdivision of this Bid Item:
    a. Submersible Pumps. Refer to SECTION 01020, ALLOWANCES
    b. Variable Frequency Drives. Refer to SECTION 01020, ALLOWANCES
    c. Odor Control System. Refer to SECTION 01020, ALLOWANCES
    d. Standby Diesel Engine Drive Generator. Refer to SECTION 01020, ALLOWANCES
    e. Davit Crane. Refer to SECTION 01020, ALLOWANCES
    f. Electric Company Connection/Service Fee. Refer to SECTION 01020, ALLOWANCES
    g. Telephone Company Connection/Service Fee. Refer to SECTION 01020, ALLOWANCES
    h. Planting Operations. Refer to SECTION 01020, ALLOWANCES

C. Payment.

1. Payment for each pumping station constructed listed in DOCUMENT 00410, FORM FOR GENERAL BID shall be made at the lump sum price bid under each subdivision of this Bid Item. Payment for each pumping station constructed shall be made as follows: An amount of 60 percent of applicable division of this Bid Item (exclusive of normal contract retainage) shall be made when each pumping station is completely constructed which includes all site and utilities Work. The remaining 40 percent (exclusive of normal contract retainage) shall be made following acceptance of each pumping station by the Owner, including startup and testing, training of Owner personnel, delivery and approval of Operation and Maintenance Manual(s) and receipt by Owner of all specified spare parts.
2. Payment for submersible pumps, variable frequency drives, odor control system, standby diesel engine drive generator, and davit crane shall be based upon the actual time and materials or Lump Sum as approved by the Owner. If the actual costs exceed the allowance, the difference will be paid by the Owner. Should the actual cost be less than the allowance, the Owner will retain the difference.

3. Payment for utility company charges shall be made based on the actual charges paid to each utility by the Contractor. An amount of 100 percent of each paid invoice (no retainage and not markup) will be made to the Contractor based on paid invoice receipts.

4. Payment for planting operations charges shall be made based on the actual charges paid to each landscaper and/or nursery by the Contractor. An amount of 100 percent of each paid invoice (no retainage and not markup) will be made to the Contractor based on paid invoice receipts.

5. No other payment Item will be used for compensation of Work performed within the limit of work line shown on the Contract Drawings for each pump station.

ITEM 24 – REPLACEMENT OF WATER SERVICES

A. General. The prices bid under each division of this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include, but not limited to, transportation. handling and dispersal of materials; cutting and removal of existing bituminous and cement concrete or reinforced cement concrete pavement; excavation, backfill above trench grade including all bedding materials (controlled density fill and road gravel); removal and legal disposal of all existing water services and appurtenances being replaced; compacting trenches; sheeting and shoring not ordered left in place; loaming and seeding; landscaping; removing and resetting curbing, property markers, signs and mail boxes; connections to existing water pipeline(s) and services; dust control including mechanical sweeping; all permanent and temporary fittings, caps, plugs, restraints and the like; traffic control devices; flushing/cleaning of services; testing (pressure, leakage, bacteriological, compaction, etc.); dewatering of trenches; daily cleanup; restoration of all areas disturbed by the Contractor's operations; all Work as specified in DIVISION 1 – GENERAL REQUIREMENTS; and all other incidental Work relative thereto.

B. Measurement. Measurement for replacement of water services and associated fittings and valves shall be as follows:

1. Measurement shall be the horizontal measured length of water service in place from the face of the corporation to the terminus of the water service at the property line.

2. Measurement shall be as stated above with a minimum payment of five (5) linear feet.

3. Measurement for the following divisions of this Bid Item shall be in accordance with the measurement descriptions under ITEM 15 – PAVEMENT RESTORATION:

   a. Road Gravel Material

   b. Temporary Bituminous Concrete Trench Pavement

   c. Permanent Bituminous Concrete Trench Pavement

4. No other measurement Item will be used for compensation of Work performed under this Bid Item.

C. Payment. Payment for replacement of water services and associated fittings listed in DOCUMENT 00410, FORM OF GENERAL BID, shall be made at the unit prices bid under the applicable divisions of this Bid Item.

1. Payment for water services shall be made at the unit price bid per linear foot.

2. Payment for the following divisions of this Bid Item shall be in accordance with the payment descriptions under ITEM 15 – PAVEMENT RESTORATION:

   a. Road Gravel Material

   b. Temporary Bituminous Concrete Trench Pavement

   c. Permanent Bituminous Concrete Trench Pavement

3. No other payment Item will be used for compensation of Work performed under this Bid Item.

ITEM 25 – REPLACEMENT OF BAXTER LANE AND LUCY'S LANE WATER MAINS

A. General. The prices bid under each division of this Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, which shall include, but not be limited to, transportation. handling and dispersal of materials; cutting and removal of existing bituminous and cement concrete or reinforced cement concrete pavement; excavation, backfill above trench grade including all bedding materials (controlled density fill and road gravel); removal and legal disposal of all existing water mains, water services, fire hydrants, gate valves, etc. being replaced (including pipes, services, and appurtenances); temporary water polyethylene wrap; reconnecting existing fire hydrants; compacting trenches; sheeting and shoring not ordered left in place; loaming and seeding; landscaping; removing and resetting curbing, property markers, signs and mail boxes; connections to existing water pipeline(s) and services; dust control including mechanical sweeping; all permanent and temporary fittings, caps, plugs, restraints and the like; traffic control devices; flushing/cleaning of water mains; testing (pressure, leakage, bacteriological, compaction, etc.); dewatering of trenches; polyethylene encasement; daily cleanup; restoration of all areas disturbed by the Contractor's operations; all Work as specified in DIVISION 1 – GENERAL REQUIREMENTS; and all other incidental Work relative thereto.

B. Measurement. Measurement for furnishing and installing water mains and associated fittings, water services fire hydrants and valves shall be as follows:

1. The length of water mains to be paid for shall be the horizontal measured length of pipeline in place (e.g., connection to existing water main to remain to connection to existing water main to remain). Measurement shall be by the linear foot with no deductions made for fittings or valves.
2. Measurement for water services shall be by the linear foot.
    a. Measurement for water services shall be the horizontal measured length of pipeline in place from the face of the corporation to the terminus of the water service at the property line.
    b. Measurement shall be as stated above with a minimum payment of five (5) linear feet.
3. The number of valves to be paid under the appropriate subdivisions of this Bid Item and shall be equal to the actual number installed.
4. The number of hydrants to be paid under the appropriate subdivisions of this Bid Item and shall be equal to the actual number installed.
5. Measurement for the following divisions of this Bid Item shall be in accordance with the measurement descriptions under ITEM 15 – PAVEMENT RESTORATION:
    a. Road Gravel Material
    b. Temporary Bituminous Concrete Trench Pavement
    c. Permanent Bituminous Concrete Trench Pavement
6. No other measurement Item will be used for compensation of Work performed under this Bid Item.

C. Payment. Payment for furnishing and installing water mains and associated fittings and water services of the various types, diameters and depths listed in DOCUMENT 00410, FORM OF GENERAL BID, shall be made at the unit prices bid under the applicable divisions of this Bid Item.

1. Only eighty-five (85) percent of the price bid per linear foot of water main shall be paid for upon its installation, the balance shall be withheld until such time as water main(s) have been successfully flushed and tested (as required), accepted by the Owner for incorporation into the existing water system and the site(s) has been fully restored. This percentage is exclusive of normal Contract retainage.
2. Payment for water services shall be made at the unit price bid per linear foot.
3. Payment for valves will be paid under the appropriate subdivisions of this Bid Item and shall be equal to the actual number installed.
4. Payment for fire hydrants will be paid under the appropriate subdivisions of this Bid Item and shall be equal to the actual number installed.

5. Payment for the following divisions of this Bid Item shall be in accordance with the payment descriptions under the ITEM 15 – PAVEMENT RESTORATION:
    a. Road Gravel Material
    b. Temporary Bituminous Concrete Trench Pavement
    c. Permanent Bituminous Concrete Trench Pavement
6. The Contractor shall provide water for flushing and testing (as applicable) for each section of water main installed. Water utilizing the Owner's water system may be available, however, the Owner does not guarantee that its water supply will be available at any time during the duration of the Project. If available, water required for testing, puddling and/or jetting of trenches shall be provided by the Owner at no cost to the Contractor. All water shall be metered and the use of backflow prevention device(s) shall be required as approved by the Owner.
7. No other payment Item will be used for compensation of Work performed under this Bid Item.

ITEM 26 – WATER QUALITY IMPROVEMENTS

A. General. The lump sum price bid under each division of the Bid Item shall be considered as fair compensation for all labor, equipment, tools and materials necessary to complete the Work as specified, including work performed by the Contractor, Subcontractor, or Contractor's Consultants, necessary to complete the Work as specified, which shall include: transportation. handling and dispersal of materials; cutting and removal of existing bituminous and cement concrete or reinforced cement concrete pavement; excavation, backfill above trench grade including all bedding materials (controlled density fill and road gravel); removal and legal disposal of all excess materials; pipes and fittings; compacting trenches; sheeting and shoring not ordered left in place; removal and relaying/replacement of existing water main; loaming and seeding; landscaping; removing and resetting curbing, property markers, signs and mail boxes; temporary pavement restoration; dust control including mechanical sweeping; traffic control devices; flushing/cleaning of pipe and structures; dewatering of trenches; daily cleanup; restoration of all areas disturbed by the Contractor's operations; all Work as specified in DIVISION 1 – GENERAL REQUIREMENTS; and all other incidental Work relative thereto.

B. Measurement. Measurement for Water Quality Improvements shall made based on a percentage of the total lump sum amount bid under each subdivision of this Bid Item, as approved by the Engineer.

C. Payment. Payment for the Water Quality Improvements listed in DOCUMENT 00410, FORM FOR GENERAL BID shall be made at the lump sum price bid under each subdivision of this Bid Item.
    1. The Lump Sum price bid under this item shall include the removal of 10 cubic feet of rock and/or boulders located within the excavation.
    2. No other payment Item will be used for compensation of Work performed under this Bid Item.

PAYMENT PROCEDURES

PART 1 – GENERAL 1
1.01 - FORMAT 1
1.02 - SUBMITTAL PROCEDURES 1
1.03 - APPLICATIONS FOR PAYMENT 2
1.04 - INVOICES 2
1.05 - SUBSTANTIATING DATA 2
1.06 - PAYMENT PROCEDURES 2
PART 2 – PRODUCTS – Not Used 3
PART 3 – EXECUTION – Not Used 3

PART 1 – GENERAL

1.01 - FORMAT

A. Form of General Bid, submitted by the Successful Bidder, as modified by any executed Change Order, will be the basis of all payments to the Contractor. The Engineer may require further breakdown of certain lump sum items to be included as deemed necessary by the Engineer. The Form of General Bid will serve as the basis for progress payments and will be incorporated into a form of Application for Payment as specified herein.

B. Contractor shall submit two Applications for Payment and invoices, covering the Work, less retainage, as specified in the Agreement, performed in each calendar month, for each month for the duration of the Work.

C. Contractor shall submit to the Engineer an Application for Payment on the specified form, provided by the Engineer in Microsoft Excel format, and attach a separate invoice, for the Work completed in the calendar month covered by that Application for Payment. Contractor shall submit each Application for Payment using AECOM Form S702 – Application and Certification for Payment, and AECOM Form S703 – Continuation Sheet, attached to this Specification. The Form of General Bid shall form the basis for Form S703.

D. The Engineer shall return, without review, any invoice not accompanied by completed S702 and S703 forms.

1.02 - SUBMITTAL PROCEDURES

A. Contractor shall submit original Application for Payment and invoice, and one copy of each, to the Engineer's Work Order Representative for review.

B. Once invoice is approved by Engineer, Contractor shall submit invoice to Owner per the requirements in the Agreement.

C. Contractor shall submit invoices at intervals not less than 30 days. Contractor shall submit an invoice for each month no later than the invoice closing date of the following month as set by the Engineer.

D. Contractor shall prepare a final Application for Payment and invoice as specified in Specifications SECTION 01700, CONTRACT CLOSEOUT.

1.03 - APPLICATIONS FOR PAYMENT

A. An Application for Payment form is attached with this Specification. A completed copy of the attached AECOM Forms S702 and S703 shall accompany each invoice.

B. Applications for Payment shall be executed and certified by signature of authorized officer of Contractor in the space indicated on Form S702.

C. Contractor shall list original Work Order amount, and each authorized Change Order and Work Change Directive, listing Change Order or Work Change Directive number and dollar amount.

D. Retainage in the amount of 5 percent shall be withheld as specified in the Agreement. This retainage shall be itemized on the Form S702 and Form S703 form.

E. Fair market value for work not completed shall be withheld as specified in the Agreement. This fair market value shall be itemized on the Form S702 and Form S703 form

1.04 - INVOICES

A. Each invoice shall be accompanied by the specified Application for Payment form and shall show the following:

1. The date of the Contract Documents.
2. Purchase Order Number.
3. Purchase Order Date.
4. A description of the Work performed (the description of the Work shall document site location, Project code number, and detail the actual Work performed and completed).

B. Invoices that include previously approved Work performed on a Time and Materials (T&M) or Cost Plus (CP) basis shall be supported with copies of daily time sheets, and Contractor shall attach photocopies of receipts for all materials and expenses claimed as T&M or CP Work. Lack of complete documentation for T&M or CP Work will be just cause for refusal by the Engineer to certify payment for such claimed costs, pending submittal of required documentation. All documentation shall be submitted and approved prior to invoice submittal. Contractor shall submit backup copies of all required paperwork that was previously submitted as a part of a daily or weekly submittal.

C. Each invoice shall be accompanied by Certified Payroll for the entire period of the invoice.

1.05 - SUBSTANTIATING DATA

A. The Engineer may request substantiating data for any claimed payment. When the Engineer requires substantiating data, Contractor shall submit within 30 days data justifying quantities of Work and dollar amounts in question. The Engineer may conditionally approve any claimed payment pending submittal of acceptable substantiating data. Unsubstantiated claims for payment will result in withholding of the unsubstantiated amounts from subsequent payment claims.

B. Contractor shall submit one copy of substantiating data with cover letter for each request for substantiating data. Each submittal of substantiating data shall show Application for Payment number, date and pay item by number and description.

1.06 - PAYMENT PROCEDURES

A. For unit price bid items, the product of the actual measured quantities suitably installed and accepted and the unit prices from the accepted bid proposal constitutes the extended total for payment. The extended total is the unit price times the quantity indicated. An adjustment of the unit price bid for an item in the proposal will only be considered if the actual quantity furnished and installed is greater than 25 percent above or below the estimated quantity. Said adjustment will only be applicable to that measured quantity which is 25 percent above or below the estimated quantity. For Lump Sum items suitability installed and completed the lump sum amount listed in the accepted bid proposal constitutes the total for payment.

B. Progress Payments; Retainage. OWNER shall make progress payments on account of the Contract Price on the basis of CONTRACTOR's Applications for Payment as recommended by ENGINEER, and in accordance with the applicable Massachusetts General Law during construction. All such payments will be measured by the schedule of values established in

C. Article 14.01 of the General Conditions (and in the case of Unit Price Work based on the number of units completed) or, in the event there is no schedule of values, as provided in the General Requirements.

D. Progress payments will be made in an amount equal to 95 percent of Work completed (with the balance being retainage) but, in each case, less the aggregate of payments previously made and less such amounts as ENGINEER shall determine, or OWNER may withhold, in accordance with the General Conditions.

E. Final Payment. Upon final completion and acceptance of the Work in accordance with the General Conditions, OWNER shall pay the remainder of the Contract Price as recommended by ENGINEER.

PART 1 - GENERAL

1.01 - SCOPE

A. The Work of this section includes the furnishing of all labor, materials, tools and equipment required to perform Special Requirements as specified herein.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for Work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT and as follows:

1. All costs associated with locating, maintaining location marks, excavation, refilling, compaction, repairing utilities broken due to the Contractor's operations, time delays relative to existing utilities and all other Work associated with utilities shall be included for payment under the applicable pipe laying item included in DOCUMENT 00300, BID FORM.

2. All costs associated with the legal disposal of excess materials shall be borne by the Contractor.

3. No additional payment will be made for corrective work associated with furnishing and installing bedding materials for refill of excavations carried to grades lower than specified. If inadequate dewatering methods cause softening of subgrade areas then remove the unsuitable material and replaced with common fill and shall be borne by the Contractor.

4. No payment will be made for temporary shoring of trench walls utilizing trench boxes and/or steel plates. Where timber or steel sheeting is used and is not specified to be paid for separately and ordered left in place by the Engineer, the Contractor has the option of leaving it in or removing it after it has been cut off one (1) foot above the top of the pipe.

5. Pay all fees for permits associated with blasting operations. Unauthorized excavations in rock, or excavations made beyond or below the specified limits shall be refilled and compacted with common fill and shall be borne by the Contractor. Perform blasting operation(s) in such a manner that no existing utilities are disturbed. All damage to existing utilities or roadway surfaces outside the trench limits caused by the Work of the Contractor or its Subcontractor(s) shall be repaired and/or replaced immediately and shall be borne by the Contractor.

6. No additional payment will be made for the relocation and/or support of any obstruction encountered along the line of Work.

7. Testing, puddling and/or jetting of trenches utilizing the Owner's water system may be available, however the Owner does not guarantee that its water supply will be available at any time during the duration of the Project. Contractor is responsible for making all arrangements and gathering necessary permissions from the Owner's water district for use of water. Use of water shall be at the Contractor's expense. All necessary piping, hoses, fittings, and the like shall be provided by the Contractor and shall be borne by the Contractor. All water shall be metered and the use of backflow prevention device(s) shall be required as approved by the Owner.

8. Provide detailed plan(s) to the Owner and/or appropriate governing body for all proposed detours and/or partial roadway closings made necessary by the Work. Obtain written approval for all proposed detours and/or partial roadway closings prior to the start of Work. No payment will be made for Work performed in areas of the Project that require an approved traffic management plan until it has been secured. All work shall be in accordance with SECTION 01570, TRAFFIC MANAGEMENT AND MAINTENANCE.
9. All costs associated with repairing settlement of trenches shall be borne by the Contractor.
10. All costs associated with meeting the requirements of all environmental permits, state highway permits and the removal and/or reinstallation of existing utilities shall be borne by the Contractor and shall be included for payment under the applicable pipe laying item included in DOCUMENT 00300, BID FORM.
11. American Iron and Steel (AIS) certifications for all applicable materials must be included with the product shop drawing or the submittal will be rejected. Certification requires a project specific letter that certifies the manufacturing process and foundry location of the subject products and/or materials. There will be no payment for items that do not have approved AIS certification.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS

A. Submit to the Engineer for approval, shop drawings, certificates of compliance and/or catalog cuts for all items to be furnished under this Contract. All submittals shall be provided in accordance with DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Digital Videodisc Recording

1. Prior to the start of construction, video record, in color, the entire Project site(s) in the presence of the Engineer. Video recordings shall be in digital videodisc (DVD) format. Particular attention shall be made to the existing condition of roadway surfaces, curbing, berms, sidewalks, driveways, property bounds, landscaped areas, and any other items that might be affected by the Work.
2. Video recordings shall be of excellent quality including clear and concise audio descriptions of the existing site(s) conditions. A copy of the first Existing video recording shall be furnished to the Engineer, prior to the start of construction, in order to establish the requirement for visual and audio quality. Two (2) copies of all video recordings shall be provided to the Engineer. Any recordings furnished which, in the opinion of the Engineer, are of poor quality or incomplete, shall be redone at no additional cost to the Owner.

3. Video recordings shall be made by the Contractor in the presence of the Owner/Engineer.

4. No construction activities shall commence until the video recordings have been Existing, submitted to the Engineer and approved by the Engineer.

C. Health and Safety Plan

1. Prior to the start of construction, prepare and submit a site-specific Health and Safety Plan which includes consideration of all known and potential hazards at the site. Work may not proceed at the project site until the Contractor's Health and Safety Plan has been received by the Engineer.

2. Contractor shall be cognizant of the minimum standards set forth in OSHA 29 CMR 1910.120. The Health and Safety Plan shall include, but not be limited to the following:

a. Identification of Contractor's Site Safety Officer.

b. Identification of hazards and risks associated with the Project.

c. Contractor's standard operating procedures, including personnel training and field orientation.

d. Respiratory protection training requirements.

e. Levels of protection and selection of equipment procedures.

f. Type of medical surveillance program.

g. Personal of hygiene requirements and guidelines.

h. Zone delineation of the Project site.

i. Site security and entry control procedures.

j. Field monitoring of site contaminants.

k. Contingency and emergency procedures.

l. Listing of emergency contacts.

3. The personal protective equipment required to provide the appropriate level of dermal and respiratory protection shall be determined based on the results of continuous air monitoring performed by the Contractor and the standards set forth in the Contractor's Health and Safety Plan.

D. Utilize the Shop Drawing Transmittal Forms supplied by the Engineer for all required submittals.

1.05 - PRODUCT HANDLING

A. All materials and equipment shall be shipped, stored, handled and installed according to the manufacturer's written recommendations.

B. The materials and equipment shall be stored on a flat, clean, dry surface to prevent damage and shall be covered to prevent exposure to adverse conditions prior to installation.

1.06 - DESIGN CRITERIA

A. The materials specified are intended to be standard materials of demonstrated successful performance, as manufactured by reputable concerns. Materials shall be designed and manufactured in accordance with the highest standards of the industry and shall be installed in accordance with the manufacturer's written recommendations and the Contract Documents. The specifications call attention to certain features but do not purport to cover all details entering into the construction of the materials.

B. If stored for more than two weeks, the materials shall receive all maintenance considerations required by the manufacturer for proper storage of the materials.

1.07 - SPECIFICATIONS AND DRAWINGS

A. All Work shall conform to these specifications and the accompanying drawings entitled:

TOWN OF ORLEANS, MASSACHUSETTS
MEETINGHOUSE POND AREA COLLECTION SYSTEM AND PUMPING STATION
CONTRACT NO. 2022-01
SRF CONTRACT NO. 7150

Dated March 2023 consisting of 121 sheets, all made by the Engineer, on file with the Owner, and any changes, drawings, plans, and directions that may be furnished from time to time by the Engineer.

1.08 - PROGRESS OF WORK

A. Promptly start and continue actual construction Work under this Contract with the necessary equipment to properly execute and complete the Work in the specified time. No cessation of construction activities will be allowed without the written approval of the Owner.

B. Furnish to the Engineer a progress schedule for the Work prior to the start of construction.

C. Furnish to the Engineer a "two-week look ahead" that summarizes the anticipated construction activities. The "two-week look ahead" shall be provide to the Engineer on Thursday of every week throughout the duration of the Project.

1.09 - DETOURS AND ROAD ACCESSIBILITY

A. Contact the responsible heads of the MassDOT, Department of Public Works and Natural Resources, Fire Department, Police Department, and other appropriate governing bodies of the municipality having jurisdiction over all or part of the proposed Project, in order to obtain all necessary permits and determine the requirements of these governing bodies, with regards to traffic control.

B. There are no guarantees that total roadway closures will be permitted. Incorporate into the construction schedule the ability to maintain one (1) lane of traffic at all times during the execution of the Work and complete the Work within the Completion date. Where the roadway under construction is the only means of vehicular access to a particular area provide continual access to the area for residents and emergency vehicles.

C. Wherever detours are permitted, the size, construction and location of signs shall conform to local and state requirements and/or standards. Detour routes shall be adequately posted to assist the motorist to return to the normal route of travel for the duration of the Work and for a minimum of two (2) weeks prior to the start of construction in the areas of the Project affected by the Work.

D. Detours and road accessibility shall be in accordance with SECTION 01570, TRAFFIC MANAGEMENT AND MAINTENANCE and as shown of the drawings.

1.10 - CHANGE IN AMOUNT OF WORK

A. The Owner reserves the right to increase or decrease the amount of any item of the Work listed as may be found desirable or necessary during the carrying out of this Contract and the unit prices included in DOCUMENT 00300, BID FORM shall apply without change to such variation in the quantity of each of the Bid items to the extent provided by law.

B. Based on the actual work required, the increase or decrease in the quantity of any bid item of the Work included in DOCUMENT 00300, BID FORM shall apply without changes to the unit prices.

1.11 - SCOPE OF WORK AND SEQUENCE OF CONSTRUCTION

A. The Work to be done under this Contract consists of furnishing and installing wastewater infrastructure, water main replacement water service replacement and water quality improvements as specified and/or as shown on the Contract Drawings.

B. The scope of work includes constructing approximately 15,750 linear feet of 8-inch, 10-inch and 12-inch PVC gravity sewer and appurtenances, approximately 7,500 linear feet of 6-inch and 8-inch PVC force main and appurtenances, approximately 20,750 linear feet of 1.5-inch, 2-inch and 3-inch low pressure sewer and appurtenances and 1 Submersible Pumping Station and appurtenances all to provide wastewater service to the Meetinghouse Pond Area of Orleans, MA.

C. The Work of the Project shall be completed within 880 calendar days following execution of the Contract Document using not more than 529 working days via the following:

1. Preparation, Submittal and Approval of Shop Drawings and Permits

   a) Collection System, Water Main Replacement and Water Improvements – 45 calendar days; and

   b) Pumping Station – 90 calendar days.

   c) Wastewater Treatment Facility Equipment – 90 calendar days.

2. Construction

   a) Main Line (Gravity Sewers and Low-Pressure Sewers), Force Mains, Service Connections, Pumping Station and Appurtenances shall be Existing within 849 calendar days, using not more than 509 working days and working Mondays through Fridays, 8 hours per days and using a minimum of two main line crew, one service connection crew and one cleanup/restoration/paving crew.

   b) Final Roadway Paving and Restoration - 31 calendar days, using not more than 20 working days and working Mondays through Fridays, 8 hours per days and using a minimum of two paving crews and two cleanup/restoration/paving crews.

D. The Work requires the Contractor to utilize a minimum number of two main line crews, one service connection crew and one cleanup/restoration/paving crew all operating simultaneously. Each crew shall consist of all necessary labor, materials and equipment necessary to be self-sufficient. Failure to comply with this requirement will result in no payment for work performed.

E. Additional Construction Constraints

1. Winter Season Work

   a. The Winter Season is defined as October 15 through March 31.

   b. The Contractor is required to place Permanent Bituminous Concrete Trench Pavement each and every Friday. If Permanent Bituminous Concrete Pavement is not available, the Contractor shall place Hot Mix Pavement at no additional cost to the Owner and shall replace the Hot Mix Pavement once Permanent Bituminous Concrete Pavement is available.

   c. The Contractor is responsible for maintaining (e.g., snow plowing, regrading, etc.) the roadways throughout the winter season.

2. Summer Season Work

   a. The project involves work near roadways which are heavily traveled during the summer season (May 15 through September 15). Therefore, work is not allowed on the following roadways:

      - Barley Neck Road
      - Beach Road
      - Great Neck Road
      - Main Street
      - Monument Road
      - Pochet Road
      - Pond Road
      - River Road
      - School Road
      - South Orleans Road (Route 28)
      - Town Hall Parking Lot

   b. The Contractor is required to place Permanent Bituminous Concrete Trench Pavement each and every Friday.

3. Pond Road

   c. The scope of work shown of Drawing 04 C-104, Drawing 04 C-105 and Drawing 04 C-106 shall occur as soon as possible following the award of the contract.

4. Installation of the infrastructure (SMH G-05-08 to Pumping Station No. 4)

   a. Town Hall

      1) The Town Hall has only one entrance/exit which is located off School Road.

         a) The installation of the wastewater infrastructure (gravity sewer, force man, fittings and manholes) from SMH G-05-08 to SMH G-05-04 in the paved entrance/exit shall occur during period of time when the Town Hall is closed.

         b) The installation of the remaining wastewater infrastructure (Pumping Station Components, gravity sewer, force main, fittings, manholes, electrical, demolition, etc.) shall occur as to maximize access to the Town Hall.

      2) Maintain complete operation of the existing on-site wastewater disposal system during installation of the new wastewater infrastructure (pipe, fittings, manholes, pumping station and electrical system). Failure to comply with this requirement will result in a penalty of $5,000 per violation plus any fines imposed by the MassDEP.

      3) Demolition of the existing on-site wastewater system shall occur following written approval by the Engineer that the new wastewater infrastructure (collection system, pumping station, force main, etc.) is substantially complete and ready for service. Obtain a Demolition Permit from the Orleans' Board of Health.

Partial Demolition	**Complete Demolition**
(a) Pump existing structures and legally dispose of all contents; (b) Remove and legally disposal of Pumping System and associated controls and electrical system; (c) Puncture six three-inch diameter holes in bottom of all structures; (d) Plug existing pipes and conduits entering and exiting structures; (e) Demolish top the three-feet of all structures and legally dispose of all debris; and (f) Backfill and compact remaining voids with common fill.	(a) Pump existing structures and legally dispose of all contents; (b) Plug existing pipes entering and exiting structures; (c) Demolish entire structure and foundation and appurtenances and legally dispose of all debris; and (d) Backfill and compact excavations with common fill
• Septic Tank • Pump Chamber	• Distribution Boxes

      4) In addition to the above demolition the Contractor is responsible for the following additional Site Demolition and Site Restoration:

         1) Site Demolition

            • Electrical System: (a) Obtain a Demolition permit from the Orleans's Building Department; (b) Disconnect electrical wiring and control wiring at the Pump Chamber and Control Panel; (c) Remove and legally dispose of all above grade components of the Electrical System; and (d) Cut and legally disposal of and plug existing conduits at the Control Panel three feet below grade.

2) Site Restoration

- Trench Pavement: (a) Cut back each side of trenches by a minimum of 1-foot; (b) Furnish and place 2-inch permanent bituminous concrete trench width pavement (base course); and (c) Furnish and place 1-1/2-inch permanent bituminous concrete trench width pavement (top course).
- Loam and Seed: (a) Grade all disturbed grass areas; (b) Furnish and place 4-inches of loam; and (3) Hydroseed all loam areas.
- Landscaping: (a) Grade all disturbed landscaping areas; and (b) Furnish and place 2-inches of bark mulch.
- Electrical System: If disturbed by the Contractor, Remove and Relay and/or Replace the Existing Underground Electrical System located at the Town Hall. Payment will be made via Bid Item 16D - Removing and Relating/Replacing Miscellaneous Utilities.
- Irrigation System: If disturbed by the Contractor, Remove and Relay and/or Replace the Existing Underground Irrigation System located at the Town Hall. Payment will be made via Bid Item 16D - Removing and Relating/Replacing Miscellaneous Utilities.

It is the Contractor's responsibility to inform all personnel of these requirements, including their staff, subcontractors and suppliers. No exceptions shall be made. Failure to comply with these requirements will result in a penalty of $5,000 per violation.

b. Town Hall - The installation of the pump station control panel, emergency generator, conduits, etc. occurs as shown on the Contract Drawings. The Contractor is required to limit their activities to within the limits of work shown on the Contract Drawings. The Contractor is required to coordinate their activities with the Town Hall. It is the Contractor's responsibility to inform all personnel of these requirements, including their staff, subcontractors and suppliers. No exceptions shall be made. Failure to comply with these requirements will result in a penalty of $5,000 per violation. In addition, the Contractor will be fully responsible for any and all restoration required at no cost to the Owner.

5. Water Services

a. Installation of the wastewater infrastructure includes the crossing of existing water services. The contractor shall coordinate their activities with the Orleans Water Department.

b. Installation of the wastewater infrastructure work includes the replacement of existing water services as shown of the drawings. The contractor shall coordinate their activities with the Orleans Water Department. In addition, these replacement water services will cross existing brick sidewalks. Care shall be taken to minimize the number of bricks removed and to replace the existing brick following installation of the water services. Saw cutting and/or splitting of existing bricks is not allowed. Refer to SECTION 02503, PAVING, CURBING, SIDEWALKS AND ROADWAYS for additional requirements.

c. Water service information is summarized as follows:

6. Installation of the wastewater infrastructure work includes the installation of service laterals. These service laterals will cross existing brick sidewalks. Care shall be taken to minimize the number of bricks removed and to replace the existing brick following installation of the service laterals. Saw cutting and/or splitting of existing bricks is not allowed. Refer to SECTION 02503, PAVING, CURBING, SIDEWALKS AND ROADWAYS for additional requirements.

7. The intent of the Project is to backfill, compact and place Permanent Bituminous Concrete Trench Pavement on the trenches at the end of each and every Friday. In addition, the Contractor is required to make all roadways passable at the end of each and every workday utilizing utilized Millings and/or Compacted Gravel (at no additional cost to the Owner). However, in order to minimize the construction duration and complete the various project phases within the specified duration, the Contractor may use steel plates over the trenches on a limited basis pending approval by the Owner and MassDOT (if applicable). The use of steel plates is contingent upon meeting the following requirements:

   - Able to withstand H-20 traffic loading without any movement.
   - Not deviate more than 1/4 inch when measured with a 10-foot straight edge along the length of the plate.
   - Fabricated to meet ASTM A36 steel requirements.
   - Minimum of 12-inches overlap and/or tack welded together at each corner to reduce or eliminate vertical movement.

- Before steel plates are installed, the excavation shall be adequately shored to support the bridging and traffic loads.
- Edges properly secured and feathered with asphalt.
- Wedges or other non-asphaltic devices used for leveling as required to eliminate rocking of the plates.
- Compacted temporary asphalt used to fill all gaps between the plates and existing pavement surfaces.
- Edges of the steel plates are marked/painted to improve visibility.
- Roadway and trench wall conditions are constantly reevaluated to ensure safety.
- Minimum of 12-inches beyond the edges of the excavation.
- Plates countersunk due to uneven roadways.
- Plates should be coated with an anti-skid coating.
- Advance warning signs (i.e. Steel Plate Ahead, Bump Ahead, etc.) are installed.
- Written notification of Owner and MassDOT of plate locations.
- Conduct end of the day inspections and provide written notification to the Owner and MassDOT before leaving site.

8. The Work of the Project involves roadways that are heavily traveled. The following requirements shall be maintained during the Work of this Project. Incorporate these requirements into the Project Schedule.

   a. Complete all Work within each section of roadway (intersection to intersection) prior to proceeding to the next section or next roadway.

   b. No Work shall be started on the Project until a detailed Project Schedule and Engineered Traffic Management Plan has been submitted to and approved by the Engineer and MassDOT. In addition, during the construction of the Project update the Project Schedule weekly and inform the Engineer, Owner, MassDOT for work in the State Highway Layout, and all other applicable utilities or other entities affected by the Work in writing of changes to the approved Project Schedule.

   c. For additional requirements refer to SECTION 01570, TRAFFIC MANAGEMENT AND MAINTENANCE.

   d. The Contractor shall provide up to four Portable Changeable Message Signs to provide advance warning to motorists prior to entering the construction area in accordance with SECTION 01570, TRAFFIC MANAGEMENT AND MAINTENANCE. The locations of the Portable Changeable Message Signs shall be as determined by the MassDOT, the Owner and Engineer.

   e. Failure to comply with this requirement will result in no payment for work performed.

9. Roadway Restoration

   a. Permanent Surfacing of State Roadways

      (1) Prior to the start of construction, the Contractor and Contractor's paving subcontractor shall meet with MassDOT, the OWNER and the ENGINEER to review roadway restoration.

      (2) Temporary Trench Pavement - Furnish and place 3-inch permanent bituminous concrete trench width pavement (base course).

      (3) Permanent Trench Pavement - Cut back each side of trenches by a minimum of 1-foot. Furnish and place 9-inch permanent bituminous concrete trench width pavement (base course). Permanent trench pavement shall occur between 90 to 180 days after pipeline installation subject to MassDOT and OWNER approval.

      (4) Full Width Overlay – Not Used

      (5) Full Width Mill and Overlay – Not Used

b. Permanent Surfacing of Local Streets

(1) Prior to the start of construction, the Contractor and Contractor's paving subcontractor shall meet with the Owner and the Engineer to review roadway restoration.

(2) Temporary Trench Pavement - Furnish and place 1-1/2-inch permanent bituminous concrete trench width pavement (base course).

(3) Permanent Trench Pavement - Cut back each side of trenches by a minimum of 1-foot. Furnish and place 3-inch permanent bituminous concrete trench width pavement (base course). Permanent trench pavement shall occur between 90 to 180 days after pipeline installation subject to OWNER approval.

(4) Full Width Overlay - Furnish and place 1-1/2-inch permanent bituminous concrete full width pavement (top course). Overlay shall be placed the following construction season, allowing the trench to settle over a winter freeze thaw cycle and/or as approved by the OWNER.

(5) Full Width Mill and Overlay – Mill 2-inches and furnish and place a 2-inch permanent bituminous concrete full width pavement (top course). Overlay shall be placed the following construction season, allowing the trench to settle over a winter freeze thaw cycle and/or as approved by the OWNER.

(6) Mill and overlay shall occur following the completion of the permanent trench pavement subject to OWNER approval.

c. Dense Graded Gravel of Local Streets

(1) Prior to the start of construction, the Contractor shall meet with the Owner and the Engineer to review roadway restoration.

(2) Full Width Dense Graded Gravel - Furnish and place 12-inches of dense graded gravel. Dense Graded Gravel shall occur between 90 to 180 days after pipeline installation subject to OWNER approval.

d. Miscellaneous Restoration of Local Roadways

(1) Roadways located between and adjacent to the wastewater infrastructure shall be restored by similar methods of the adjacent roadway reconstruction.

e. Roadway Reconstruction Summary

F. For the protection of life and property all backfilling operations shall follow closely behind pipe laying. Ensure that no excavation is left open, unguarded, or water filled during any period of time when Work is not actually in progress. It is the purpose and intent that all excavations and backfill, including consolidation operations, and temporary surfacing within an area be accomplished expeditiously before proceeding to other Work areas.

G. The Owner reserves the right to schedule the Work at any location within the Project area. At the same time the Owner may schedule the suspension of Work at any location. Construction in seasonally heavily traveled roadways shall be avoided during the heavily traveled period.

H. The Work of this Contract may require existing utilities to be bypassed, removed and relaid. The Contractor shall pay for all costs associated with this Work at no additional cost to the Owner except as specified in SECTION 01025, MEASUREMENT AND PAYMENT.

I. The Owner has obtained various permits for this Project, which are included as DOCUMENT 00858, SPECIAL CONDITIONS – PERMITS AND LICENSES. Meet all requirements/conditions of these permits during the construction of this Project. All costs associated with this Work shall be borne by the Contractor and included in the prices bid under the applicable items of DOCUMENT 00300, BID FORM.

J. Cleanup/restoration of all disturbed areas shall be Existing each and every week or after a maximum of 500 linear feet of pipeline installation, throughout the duration of the Project. Cleanup/restoration consists of, but is not limited to, restoration of the area to preconstruction conditions, removal of all excess materials, removal of all pipe, fittings, manholes, removal of all construction equipment and materials, and removal of all construction debris. Failure to comply with this requirement may result in withholding the fair market value for the cleanup/restoration of all disturbed areas not Existing from monthly payment requests until this requirement has been met.

K. Pre-blasting of ledge is not allowed on this Project. No payment will be made for ledge removal on this Project in areas where pre-blasting has occurred.

L. All damage to existing utilities, roadways, and the like shall be repaired and/or replaced by the Contractor as approved by the utility company and shall be borne by the Contractor.

M. The control of dust shall be accomplished by the application of clean water. The Contractor is responsible for making all arrangements and gaining necessary permissions from the Owner to utilize the Owner's water system. However, the Owner does not guarantee that water will be available at any time during the duration of the Project. Water required for the control of dust shall be provided by the Contractor at no additional cost to the Owner. All necessary piping, hoses, fittings, and the like shall be provided by the Contractor and the costs shall be borne by the Contractor. All water shall be metered and the use of backflow prevention device(s) shall be required as approved by the Owner. The use of calcium chloride to control dust is not allowed.

N. Compaction of Trenches

1. The compaction of trenches shall be accomplished by puddling and/or jetting.

2. The Contractor is responsible for making all arrangements and gaining necessary permissions from the Owner to utilize the Owner's water system. However, the Owner does not guarantee that water will be available at any time during the duration of the Project. Water required for the puddling and/or jetting of trenches shall be paid for by the Contractor.

3. All necessary piping, hoses, fittings, and the like shall be provided by the Contractor and the costs shall be borne by the Contractor.

4. All water shall be metered and the use of backflow prevention device(s) shall be required as approved by the Owner.

5. The Metering Systems shall be used by the Contractor on this Project only, refurbished in accordance with the manufacturer's requirements, and shall be provided to the OWNER at the completion of the project.

O. Archaeological Sensitive Areas

1. This Project does not occur in Archaeological Sensitive Areas and therefore no experienced archaeologist is required to monitor construction activities based on available information. Should potentially significant archaeological deposits be discovered during the course of construction work shall immediately cease in that vicinity and the Contractor shall immediately notify the Engineer.

2. Because potentially significant pre- and/or post-contact archaeological deposits could be present beneath the existing roadways and/or other paved areas assigned as having low archaeological sensitivity, an Unanticipated Discoveries Plan (UDP) consistent with the Massachusetts Unmarked Burial Law will be implemented during construction to formalize procedures guiding the discovery of human remains and/or significant cultural resources. The UDP will be developed by the ENGINEER's Subconsultant in consultation with the Massachusetts Historical Commission (MHC), and in accordance with the MGL Chpt. 38, Sec. 6; Chpt 9, Sec. 26A and 27C; and Chpt 7, Sec. 38A; all as amended).

3. Cultural Resources Training

a. The ENGINEER's Subconsultant will prepare action plans for unanticipated discoveries, such as burials and conduct cultural resource training of personnel from the General Contractor and their Subcontractors/Subconsultants as well as personnel from the OWNER, Owners Project Manager and ENGINEER and their Subconsultants who will be monitoring all of the construction excavation.

b. The purpose of this training will be to provide an overview of the general cultural history of the Project area, so that personnel will be aware of the kinds of archaeological resources that may be encountered in the field. In addition, the training program will emphasize the exact procedures to be followed, as outlined in the UDP, regarding actions to be taken and notification required in the event of a significant site discovery, such as human remains, during construction.

c. Personnel from the General Contractor and their Subcontractors/Subconsultants are required to attend the Cultural Resources Training prior to any construction activities occurring in the identified areas. Failure to comply with this requirement will result in a penalty of $10,000 plus any fines and restoration costs required by federal, state and local authorities.

P. The testing of tanks and/or pipelines shall be accomplished by using clean water. The Contractor is responsible for making all arrangements and gaining necessary permissions from the Owner to utilize the Owner's water system. However, the Owner does not guarantee that water will be available at any time during the duration of the Project. Water required for the testing of tanks and/or pipelines shall be paid for by the Contractor. All necessary piping, hoses, fittings, and the like shall be provided by the Contractor and the costs shall be borne by the Contractor. All water shall be metered and the use of backflow prevention device(s) shall be required as approved by the Owner.

Q. Temporary paving, where applicable, is required to be placed whenever the Contractor ceases operations in an area for more than 12 hours or every day of the week, whichever comes first, throughout the duration of the Project and/or as directed by the Engineer. Include all costs associated with completing this Work under the applicable Bid item specified in SECTION 01025, MEASUREMENT AND PAYMENT. No payment will be made for temporary paving placed in areas not prepared in accordance with the Contract Documents. Failure to comply with this requirement may result in withholding the fair market value for temporary pavement not Existing from monthly payment requests until this requirement has been met.

R. Except for an emergency condition as approved by the Owner in writing, premium wages will not be paid for Work performed on Sunday, holiday or workdays longer than eight (8) hours. All costs incurred by the Owner caused by the Contractor's Work performed on Sunday, holiday or workdays longer than eight (8) hours shall be borne by the Contractor which will be deducted from monthly payment requests.

S. Manhole sections, pipe, fittings, frames and covers, and other material and/or equipment shall not be stockpiled along roadways. At the beginning and end of each workday, the Contractor shall transport all materials and/or equipment to and from an offsite temporary storage yard that they have legal access to on a daily basis. The Contractor shall secure use of space that they will use for the temporary storage yard.

T. The Contractor shall secure use of space that they have legal access to for the temporary buildings specified under SECTION 01500, TEMPORARY FACILITIES. The temporary buildings shall not be placed along the edge of roadways. The Contractor shall be responsible for clearing, grubbing, grading, providing of grading materials, permits, and full restoration of the temporary building location(s).

U. All equipment, material and supplies to be provided under this contract shall be American made.

V. No construction activity shall be allowed on the following dates and for the two working days prior to the following dates, unless otherwise approved by the owner:

- New Year's Day - January 1*
- Martin Luther King Jr. Day – Third Monday in January
- Presidents' Day - Third Monday in February
- Patriot's Day – Third Monday in April
- Memorial Day - Last Monday in May
- Juneteenth – June 19th*
- Independence Day - July 4*
- Labor Day - First Monday in September
- Columbus Day - Second Monday in October
- Veterans' Day - November 11*
- Thanksgiving Day - Fourth Thursday in November
- Christmas Day - December 25*

* If a holiday falls on a Saturday, the previous day is observed as the legal holiday; If a holiday falls on a Sunday, the day following is observed as the legal holiday.

All construction equipment and materials not incorporated in the Work to date shall be removed from the Work areas where construction activity is ceased. All excavations shall be backfilled and paved as specified and/or directed by the Engineer. Incorporate this requirement into the Project Schedule. Failure to comply with this requirement will result in no payment for work performed.

W. All shop drawings shall be approved by the ENGINEER prior to any on-site construction activities occurring. Failure to comply with this requirement will result in no payment for work performed.

X. Full mobilization by the Contractor shall occur, including manhole sections, pipe, fittings, frames and covers, and other material and/or equipment and all temporary facilities prior to any on-site construction activities occurring. Failure to comply with this requirement will result in no payment for work performed.

Y. The Town has standardized on the following equipment. Please refer to for the associated specification sections for details on each piece of equipment. See Volume II for the 2019-01 and 2019-02 proprietary equipment shop drawings

1. Wastewater Treatment Facility
    a. SBR Transfer Pump (SBR.TP-4): SECTION 11308 – RECESSED IMPELLER PUMPS AND APPURTENANCES
    b. SBR Blower (SBR.BLW-4): SECTION 11377 – ROTARY POSITIVE DISPLACEMENT BLOWERS
    c. SBR Aeration Grids (One Per SBR Tank): SECTION 11600 - SEQUENCING BATCH REACTORS
    d. Variable Frequency Drives (SBR.BLW-4 VFD and SBR.TP-4 VFD): SECTION 16260 - VARIABLE FREQUENCY DRIVES
2. Pumping Station No. 04
    a. Submersible Pumps (PS4.P-1, PS4.P-2 and PS4.P-3): SECTION 11306 – SUBMERSIBLE SOLIDS HANDLING PUMPS AND APPURTENANCES
    b. Standby Generator (Gen.04-1): SECTION 11398 – DIESEL ENGINE GENERATOR SET AND APPURTENANCES
    c. Davit Crane Flush Mounted Base: SECTION 14200 – HOISTING EQUIPMENT
    d. Odor Control System (PS4.OC-1): SECTION 15857 – ODOR CONTROL SYSTEMS
    e. Variable Frequency Drives (PS4.P-1 VFD, PS4.P-2 VFD and PS4.P-3 VFD): SECTION 16260 - VARIABLE FREQUENCY DRIVES

Z. It is the intent that all equipment be provided by the same manufacturers used at the existing three pumping stations, if available:

1. Pumping Station No. 4
    a. Magnetic Meter (FE 0405) - 13330A INSTRUMENTATION PRODUCT SHEETS, DATA SHEET 416.1 MAGNETIC FLOW METER SPECIFICATION
    b. Magnetic Meter Transmitters (FIT 0405) - 13330A INSTRUMENTATION PRODUCT SHEETS, DATA SHEET 416.1 MAGNETIC FLOW METER SPECIFICATION
    c. Level Float Switch (LSHH 0404, LSLL 0404) - 13330A INSTRUMENTATION PRODUCT SHEETS, DATA SHEET 853.1 LEVEL SWITCH (FLOAT TYPE) SPECIFICATION
    d. Level gauge Transducer (LE/LT 0404): 13330A INSTRUMENTATION PRODUCT SHEETS, DATA SHEET 873.1 SUBMERSIBLE WATER LEVEL SENSOR/TRANSMITTER SPECIFICATION
    e. Discharge Pressure Gauge (PI 0401, PI 0402) - 13330A INSTRUMENTATION PRODUCT SHEETS, DATA SHEET 1454.1 PRESSURE GAUGE SPECIFICATION
    f. Discharge Pressure Isolation Ring (6-inch) - 13330A INSTRUMENTATION PRODUCT SHEETS, DATA SHEET 1457.1 PRESSURE ISOLATOR RING SPECIFICATION
    g. Check valves - 15101 PROCESS VALVES AND APPURTENANCES
        (1) 6” Check valve: Valmatic 506CBFMI
    h. Plug valves - 15101 PROCESS VALVES AND APPURTENANCES

(2) 6” Plug Valve: Valmatic 5606F/5A08

(3) 4” Plug Valve: Valmatic 5804R/7A08

1.12 - EXISTING UTILITIES

A. The location and size of existing sewers, drains, culverts, water mains, gas mains, cables, service pipes, and other utilities shown on the Contract Drawings, were obtained from the results of surveys and existing records and are shown as approximate only, to guide the Bidders in the preparation of their Bid. The various utility companies will determine the location and depth of existing utilities by marking them out upon the ground and by experimental excavations by the Contractor prior to and as the Work progresses. The Contract Drawings do not show the exact location and depth of all utilities, nor do they show all utilities or the number of lines for each utility that may be encountered.

B. Assume that there are existing utility connections to each and every building or structure along the line of Work, whether they appear on the Contract Drawings or not. Notify the proper utility companies and obtain and preserve the marked location(s) of all existing utilities that may be encountered along the line of Work, until such time as such markings are no longer required.

C. Experimental trench excavations are to be made prior to commencing pipe laying operations. Excavate by hand as necessary in advance of the trenching equipment to determine the exact location and depth of each utility that may be encountered. Excavation equipment shall not be used within three (3) feet of the utility to be crossed. Continue to excavate by hand around these utilities after ascertaining their exact location and depth.

D. Experimental excavations shall be made at all existing potable water mains located within ten (10) feet of the proposed gravity sewer(s) and/or force mains prior to commencing trench excavations. Determine the exact location, materials of construction, size and elevation of these existing water main(s). The location and depth of the proposed gravity sewer(s) and/or force mains shown on the Contract Drawings shall be adjusted as approved by the ENGINEER, in order to maintain the required separation as specified herein, and to maintain a continuous upward or downward slope for force mains and to maintain the necessary line and grade for gravity sewers.

E. All utilities interfered with or damaged shall be replaced and/or repaired immediately. Carefully bed, tamp and fully consolidate refill material around and under all existing utilities encountered or crossed unless otherwise specified as approved by the Engineer.

F. Protection of all existing utilities in the vicinity of the Work and the assurance of uninterrupted service from existing utilities throughout construction is the responsibility of the Contractor.

G. In the event that the Contractor’s Work results in damages to existing utilities, provide all necessary materials, equipment and labor necessary to satisfactorily repair damaged utilities immediately at no cost to the Owner.

H. Notify the Water Utility 24 hours prior to connecting to and/or bypassing any existing water main, or as required by the utility. Do not operate any existing water system valves. All such operations shall be coordinated with and performed by Water Utility personnel.

1.13 - VISITS TO THE SITE(S)

A. Before submitting a Bid, visit the site(s) to examine existing conditions and become thoroughly acquainted with the effort required to perform the Work.

B. Study the Contract Documents and compare the same with the information gathered during examination of the site(s), as no extra compensation will be authorized for extra Work caused by unfamiliarity with the site(s) and/or Contract Documents or the conditions peculiar to this Project.

1.14 - DISPOSAL OF EXCESS MATERIAL

A. All pavement road base, surplus suitable material removed from the excavations, loam not required for re-use in the Work shall be legally disposed of by the Contractor.

B. Legally dispose of all unsuitable material removed as part of the Work.

1.15 - TECHNICAL SPECIFICATIONS

A. Where reference is made to ASTM, AWWA, AASHTO specifications or other associations, it is understood that the latest revisions as of the date of the Contract Documents shall apply.

1.16 - PERMITS, FEES AND BONDS

A. Obtain and comply with all required permits, pay all fees and provide all bonds necessary to complete the Work as specified. Be solely responsible for performing any necessary acts and providing any materials required in order to comply with any and all terms and conditions set forth in any permits and licenses.

B. Refer to DOCUMENT 00858, SPECIAL CONDITIONS - PERMITS AND LICENSES for all permits, which have been obtained for the Project. The Owner has not obtained all permits and licenses required for this Project. The Contractor shall obtain and pay for any other permits required to complete the Project including but not limited to Road Opening Permit, Blasting, and Phase II General Stormwater Permit for small construction projects.

1.17 - NOTIFICATION OF CONSTRUCTION

A. At least 5 business days prior to initiating excavation Work, notify the following entities, in writing, of where and when excavation(s) are scheduled.

1. Town of Orleans Department of Public Works and Natural Resources – (508) 240-3790
2. Town of Orleans Highway Department – (508) 240-3790
3. Town of Orleans Water Department – (508) 255-1200
4. Town of Orleans Fire and Rescue – (508) 255-0050
5. Town of Orleans Police Department - (508) 255-0117
6. Dig Safe – 811
7. MassDOT, District 5 Highway Division – (508) 824-6633
8. AECOM – (508)-237-7161

1.18 - BOUNDS AND PROPERTY MARKERS

A. Prior to initiating construction, engage an independent Registered Land Surveyor (in the State where the Project is located) to provide permanent reference points for all bounds and property markers along the line of the Work that may be disturbed during construction. Submit copies of all ties to the bounds and property markers to the Engineer prior to excavation at the site(s).

B. Any bounds or markers disturbed shall be replaced utilizing the services of a Professional Land Surveyor in the State where the Project is located. The cost of replacing markers disturbed by the Contractor's operations shall be at the Contractor's expense.

1.19 - TWENTY-FOUR HOUR EMERGENCY SERVICE

A. Maintain a 24-hour, 7-day a week telephone service. The Contractor’s emergency personnel and equipment shall be within 30 minutes travel time to the Project site(s) in order to handle emergency requirements such as, but not limited to, settled trenches, clogged drains, and rain damage and/or any other emergency situation relating to the Contractor’s Work. A list of the personnel and their telephone numbers, pager numbers, and cell phone numbers, shall be submitted to the Engineer, the Owner and to the local Police and Fire Departments.

B. This requirement shall apply for the duration of the Project and shall be updated as necessary. This list shall be submitted on the Contractor's letterhead and shall state that should an emergency arise during the implementation of the Project, these people are to be contacted. Submit this letter to the Engineer prior to initiating construction.

1.20 - UNIFORMED POLICE OFFICERS

A. Payment of uniformed police officers used for pedestrian and vehicle control on this Project are to be paid for directly by the Owner without any Contractor involvement other than the Contractor's input as to traffic control requirements and canceling of planned details.

B. Uniformed police officers are paid a four (4) hour minimum. If arrangements have been made for uniformed police officers and inclement weather or other factors prohibit Work, contact the Police Department no later than 5:30 a.m. of the day of scheduled Work to cancel the police detail.

C. Should the Contractor fail to notify the Police Department as required, the Contractor shall assume all costs for the four (4) hour minimum police details not canceled in time. Separate billings will be issued by the Police Department for non-canceled police details and the Contractor shall pay such bills on a monthly basis.

D. No uniformed private security forces shall be employed in this capacity without the express written approval of the Owner.

1.21 - HOURS OF OPERATION

A. The Contractor, including all subcontractors, materialmen, and all other relating to this Project, shall conform to the following Work schedule.

1. No outdoor activity on or adjacent to the site will be permitted before 7:00 a.m. or after 5:00 p.m., unless other arrangements are made with the Owner.

2. No outdoor activity shall take place on Saturdays, Sundays, legal holidays recognized by the Owner and the two days preceding legal holidays as noted in herein, except for emergency conditions, which, if practical, shall be reviewed and approved by the Owner.

1.22 - DISPOSAL OF DEBRIS

A. During the prosecution of the Work, maintain the Project site(s) and adjoining areas in a neat and orderly manner and eliminate the accumulation of construction debris. A rubbish container shall be kept at the Project site(s) at all times and be emptied as required to prevent odors and vermin.

B. Store and remove all debris from the Project site(s) and legally dispose of the debris in accordance with federal/state/local regulations. Should the Contractor neglect or refuse to maintain the Project site(s) free of accumulated debris, the Owner reserves the right to have the service performed by others and cost thereof deducted from monthly progress payment requests.

C. At the conclusion of the Work, remove and legally dispose of any surplus excavation, broken pavement, lumber, equipment, temporary structures, and any other refuse remaining from construction operations, and leave the entire Project site(s) of the Work in a neat and orderly condition.

1.23 - RECORD DRAWINGS

A. Throughout the course of completing the Work, continually maintain a set of record drawings that incorporate all approved changes made by the Contractor and all subcontractors to the Drawings included in the executed Contract between the Owner and the Contractor. Clearly and concisely mark up the individual Drawings and/or incorporate sketches that show approved changes made during the execution of the Work. Following completion of the Work, incorporate all approved changes electronically into one (1) complete set of record drawings. Record drawings shall be complete in every way and shall show the full extent of the executed Work. Special attention shall be given to concealed Work.

B. Change Orders, Addenda items and field changes shall be included where applicable. Additional specific requirements relative to record drawings may be called for in the individual sections of the Specifications. Submit a review copy to the Engineer for approval and make any revisions required by the Engineer in order to make the record drawings complete. After acceptance by the Engineer, deliver a full scale reproducible hard copy and a compact disk with Auto Cad files of the record drawings to the Engineer.

C. Tie cards (8 ½ inches by 11 inches) of all exterior buried utilities such as but not limited to piping, tubing, conduits, wye/tee connections, fittings, cleanouts, and valves, shall be fully dimensioned both horizontally and vertically, so that the exterior buried utilities can be located in the field. A minimum of three (3) ties shall be provided for each item requiring a tie. Submit the tie cards on a weekly basis or as directed by the Engineer. If, in the opinion of the Owner and/or Engineer, insufficient data is provided to properly locate the exterior buried utilities, uncover the buried utilities and perform the necessary measurements and provide updated tie cards at no additional cost to the Owner.

D. GPS coordinates of all exterior buried utilities such as but not limited to manholes, piping, tubing, conduits, wye/tee connections, fittings, cleanouts, and valves shall be fully dimensioned both horizontally and vertically, so that the exterior buried utilities can be located in the field. Submit the electronic information on a weekly basis or as directed by the Engineer. If, in the opinion of the Owner and/or Engineer, insufficient data is provided to properly locate the exterior buried utilities, uncover the buried utilities and perform the necessary measurements and provide updated tie electronic information at no additional cost to the Owner

E. An electronic copy of the Engineer's Auto Cad files shall be made available to the Contractor for the purpose of completing the required computer drafted record drawings.

1.24 - PHOTOGRAPHS OF THE PROJECT

A. Once a month employ the services of a professional photographer to take 48 digital color photographs of the Work in progress. View and orientation of the photographs shall be as determined by the Engineer in the field.

B. Proofs of the digital color photographs shall be submitted to the Engineer for final selection of up to 24 photographs. If 24 photographs cannot be selected from the 48 proofs taken, as determined by the Engineer, then the Contractor shall take an additional 48 photographs for review at no additional cost to the Owner. Formally submit the 24 photographs selected by the Engineer as 8 inch by 10 inch color glossy prints on a monthly basis.

C. In the event that insufficient progress has been made in the previous month to justify the total number of photographs specified above, the Owner reserves the right to have additional views taken in any succeeding month so that the total number will be equal to 24 times the number of months in the Contract period.

D. Each digital photograph shall be identified by a neatly typed index given the Project's name Contractor's name, the date taken, the subject, and the orientation (looking north, looking south, etc.).

E. At the completion of the Contract, all digital images shall become the property of the Owner and shall be delivered to the Owner. Any view not properly identified or otherwise not acceptable will not be counted in the total number of photographs required.

1.25 - INITIAL OPERATION OF NEW FACILITIES

A. Operation and maintenance manuals shall be submitted to the Engineer in accordance with DOCUMENT 00700, GENERAL CONDITIONS at least one (1) month prior to the scheduling of any manufacturers training.

B. Perform pressure and/or leakage testing of all pipelines, storage tanks and basins prior to prestart-up testing of all equipment and/or systems. Provide the initial filling of all pipelines, storage tanks and basins with potable water as necessary for start-up of individual systems throughout the facility.

C. Initial start-up of new equipment and/or systems shall not commence until all of the manufacturers services, checkout, and training have been Existing as approved by the Engineer.

D. Perform an 8 hour, or less if approved by the Engineer, prestart-up test of all individual equipment prior to incorporating equipment into their appropriate systems.

E. Perform an 8 hour, or less if approved by the Engineer, prestart-up test of all systems prior to conducting the performance test of the facility.

F. Provide all labor, power, chemicals, operations and maintenance from the initial start-up of the individual equipment and systems until the final performance test of the facility is accepted by the Owner as substantially complete at no additional cost to the Owner.

1.26 - CONTINUOUS OPERATING CRITERIA

A. Conduct operations in such a manner and sequence that shall neither result in a disruption of the amenities, nor interfere with the functional organization and workings of existing facilities.

B. Furnish, install and operate any piping, equipment and appurtenances necessary to provide the temporary services, facilities, and bypasses required during construction including, but not limited to, bypass pumping, flow barriers and diversions.

C. The Owner will operate and maintain all existing systems and equipment. Notify and coordinate with the Owner all temporary modifications to existing facilities operations required for construction within, or interfacing with, the existing facilities. Operate and maintain all proposed facilities until such time as the Owner accepts them.

D. A carefully planned and detailed construction schedule must be submitted to the Engineer for approval before any construction starts, showing the proposed sequences of operation and the methods to be used for maintaining continued operations of existing facilities.

E. Refer to SECTION 01500, TEMPORARY FACILITIES for additional requirements.

1.27 - SCHEDULE OF VALUES

A. Submit a schedule of values for use in preparing the monthly progress payments described in the DOCUMENT 00700, GENERAL CONDITIONS.

B. The schedule of values shall be prepared in conformance with the following format:

1. General Conditions
    a. Subheadings
2. All Structures
    a. Subheadings by specification division and section
3. General Site Work
    a. Subheadings by specification division and section
4. Unit Prices by Individual Items
5. Filed Sub-bid Categories, if applicable
    a. Subheadings by specification division and section
6. Change orders by individual items shall be added as approved by the Owner.

C. In addition to the above, each equipment line item in the schedule of values shall include the following breakdown:

1. Shop Drawings (10 percent of equipment value)
2. Equipment
3. Installation
4. Manufacturers' Checkout and Startup (2 percent of equipment value)
5. Equipment testing (10 percent of equipment value)
6. Manufacturers' Training of Owner Personnel (1 percent of equipment value)
7. Spare Parts (1 percent of equipment value)
8. Operation and Maintenance Manuals (1 percent of equipment value)

D. The schedule of values shall be submitted to the Engineer for review and approval at least 30 calendar days prior to the first progress payment request. The acceptable schedule of values shall be used for the duration of the Project.

1.28 - OPERATION AND MAINTENANCE MANUALS

A. Except as otherwise specified, four (4) copies of the Manuals shall be provided for each item of equipment, or system provided. Existing manuals shall be submitted to the Engineer no later than 60 days following approval of shop drawings.

B. All elements and components of the equipment or system shall be included in the Manuals.

1. The Manuals shall be customized including but not limited to all options, types, sizes, and configurations, shall be indicated, either as one (1) enclosure within the manuals listing them or by eliminating all incorrect references at each occurrence within a standard type of manual.

2. The Manuals shall contain a bill of materials which shall be a parts list detailing the part manufacturer and his catalog number of each equipment part. The Manuals shall include all necessary instructions for the operation, maintenance, repair, assembly, and disassembly of the equipment or system in accordance with the manufacturer's recommendations including troubleshooting charts and lubrication and maintenance schedules.
3. All drawings, plates, lists, schematics, and the like shall be included in the Manuals.
4. Any malfunction of, or damage to the equipment or system resulting from incomplete or incorrect instructions in the Manuals for the guarantee period specified elsewhere in this specification shall be repaired and/or replaced at no additional cost to the Owner.
5. The Manuals shall include a complete parts list, current parts price list, and recommended spare parts list.
6. Any and all capabilities for specified future modification; alteration or reconfiguration shall be completely indicated and described within the Manual.
7. The manuals shall contain the name, address, business telephone numbers and service telephone numbers for the manufacturer and its local distributor/representative.
8. Each Manual for each item of equipment or system shall be bound separately in a permanent binder.

C. The form entitled "Operation and Maintenance Manual Review checklist" shall be utilized and submitted for each specification section to insure completeness of the manual. The form is attached to the end of this section.

D. The Engineer has the right to reject the Manuals submitted as being unsatisfactory or to require the submittal of additional information. The new Manuals or additional information shall be submitted no later than 30 days following notification by the Engineer.

1.29 - MANUFACTURER'S SERVICES

A. Installation and Start-up

1. Make arrangements with each equipment supplier or manufacturer to furnish the services of a factory-trained service engineer who is specifically trained on the type of equipment being furnished for the sole purpose and use of the Owner and Engineer to assist during installation and start-up of all equipment and systems furnished by that supplier or manufacturer.
2. Minimum length of time specified for this service shall be exclusive of travel time and of correction of defects, testing, and training.
3. The manufacturer's engineer will verify, in writing, that the equipment has been installed and serviced so as to be acceptable to the equipment manufacturer in order that it will provide safe and efficient operation as intended by the Engineer and the manufacturer. The Engineer will provide a form entitled "Certification of Proper Equipment Installation" which is to be signed by the manufacturer’s representative and the Contractor’s representative for each piece of equipment.

B. Correction of Defects

1. Nothing specified herein shall provide relief of the responsibility of providing sufficient service to place all equipment or systems into satisfactory operation.
2. All time and materials needed to correct defective equipment shall be provided at no cost to the Owner.

C. Testing

1. Prior to testing, each equipment supplier or manufacturer shall furnish a written certification that the equipment is ready for operation. A copy of this certification shall be furnished to the Engineer.
2. Furnish the labor, tools, equipment, power, and clean water necessary to perform field-testing to determine that the supplied equipment including controls and alarms meets hydraulic, electric, mechanical and performance requirements. All tests shall be performed in the presence of the Engineer.

D. Training

1. Wherever called for in the Specifications, have each equipment supplier or manufacturer furnish the services of a fully qualified field service engineer to provide operator training in the complete operation and maintenance of all equipment furnished by that supplier or manufacturer.
2. The minimum length of time specified for this service shall be exclusive of travel time and shall follow and be exclusive of installation and start-up, correction of defects and testing.
3. Schedule training sessions in conjunction with and as approved by the Engineer. This training will be witnessed and verified by a representative appointed by the Engineer. The Engineer has the right to reject the training by the equipment supplier or manufacturer and to require additional training. The items addressed by the training session shall include, but not be limited to, system description, system operation, system disassembly and reassembly, lubrication, routine maintenance, corrective maintenance, use of operation and maintenance manual, system troubleshooting and ordering of spare parts.
4. The Engineer will provide a form entitled "Verification of Manufacturer's Equipment Training" which is to be signed by all parties at the completion of each training session.

1.30 - SPARE PARTS

A. Spare parts for all equipment shall be supplied to the Owner as specified. Spare parts shall be individually protected and packaged in a suitable container for long-term storage with the contents therein properly identified on the outside of the container.

B. The Engineer will provide a form entitled "Spare Parts Inventory" which is to be fully Existing and submitted to the Engineer for each piece of equipment requiring spare parts.

1.31 - SPECIALTY TOOLS

A. Any specialty tools required for the adjustment, operation and/or maintenance of any equipment included in the Work shall be furnished with the respective equipment.

1.32 - STATUTORY REQUIREMENTS IN GENERAL

A. Owner and Contractor recognize that other rights, duties, and obligations with respect to public construction contracts are also provided by statute, notwithstanding the fact that they may not be specifically enumerated herein. Accordingly, any provisions required by statute to be included in this contract shall be deemed to be so included as though fully set forth herein. However, compliance with a statute does not diminish the Contractor’s responsibilities hereunder.

B. Contractor shall keep fully informed of all existing and future State and Federal Laws and municipal ordinances and regulations in any manner affecting those engaged or employed in the Work, or the materials used or employed in the Work, or in any way affecting the conduct of the Work, and of all such orders and decrees of bodies or tribunals having any jurisdiction or authority over the same and of all provisions required by law to be made a part of this Contract, all of which provisions are hereby incorporated by reference and made a part thereof.

C. If any discrepancy or inconsistency is discovered in the Contract Documents for this Work in relation to any such law, ordinance, regulation, order or decree, report the same to the Engineer in writing. Contractor shall, at all times, observe and comply with, and cause all agents and employees to observe and comply with all such existing and future laws, ordinances, regulations, orders and decrees; and shall protect and indemnify the Owner and Engineer and all of its and their officers, agents, and servants against any claim or liability arising from or based on the violation of any such law, ordinance, regulation, order or decree, whether by itself or its employees or subcontractors.

D. All materials furnished and Work done shall comply with all State and Federal laws and regulations.

1.33 - RELATION OF SEWER MAINS TO WATER LINES

A. Horizontal Separation

1. Whenever possible, sewers should be laid at least 10 feet, horizontally, from any existing or proposed water mains.
2. Should local conditions prevent a lateral separation of 10 feet, a sewer may be laid closer than 10 feet to a water main if:

a) It is laid in a separate trench;

b) It is laid in the same trench with the water mains located at one side on a bench of undisturbed earth; and

c) In either case the elevation of the crown of the sewer is at least 18 inches below the invert of the water main.

B. Vertical Separation

1. Whenever sewers must cross under water mains, the sewer shall be laid at such elevation that the top of the sewer is at least 18 inches below the bottom of the water main. When the elevation of the sewer cannot be buried to meet the above requirement, the water main shall be relocated to provide this separation or reconstruction with slip-on or mechanical-joint cast-iron pipe, or prestressed concrete cylinder pipe for a distance of 10 feet on each side of the sewer. One full length of water main shall be centered over the sewer so that both joints will be as far from the sewer as possible.

2. When a sewer crosses above a water main, the following measures will be taken:

a) Both pipes will be encased in concrete for a distance of 10 feet on either side of the crossing; or

b) The sewer will be encased in concrete and the water main will be constructed of mechanical joint ductile iron pipe for a distance of 10 feet on either side of the crossing.

C. Special Conditions

1. When it is impossible to obtain proper horizontal and vertical separation as stipulated above, the water main shall be constructed of slip-on or mechanical-joint cast-iron pipe or prestressed concrete cylinder pipe and the sewer constructed of mechanical-joint cast-iron pipe and both services shall be pressure tested to assure water tightness.

1.34 - UTILITY COORDINATION

A. Contractor shall be responsible for contacting and coordinating with utility companies prior to commencing work in the area of utilities.

B. Special requirements may be necessary for work in the vicinity of some utilities and easements. Requirements may include, but are not limited to the following, surface marking of crossings and easements, temporary fencing, temporary pipe support, additional padding or steel plates for heavy equipment, and coordination with utility field personnel.

1.35 - EPA CONSTRUCTION GENERAL PERMIT

A. Construction activities associate with the project are anticipated to disturb one or more acres and as such would be regulated under the National Pollutant Discharge Elimination System (NPDES) stormwater program.

B. Construction stormwater discharges are permitted under the Construction General Permit (CGP) and requires compliance with permit requirements, such as the development of a Stormwater Pollution Prevention Plan (SWPPP). Contractor shall be responsible for preparing and submitting an EPA Notice or Intent (NOI) through the EPA's electronic NOI system (eNOI). A copy of the SWPPP shall be provided to the Owner and Engineer. Contractor shall be responsible for creating the required SWPPP, updating this document as necessary to reflect changes, implementing the SWPPP and performing the required inspections.

1.36 – VIBRATION MONITORING

A. The Contractor shall be aware of the Vibration Monitoring requirement at locations to be determined by the Engineer. Vibration monitoring to conform to the requirements as specified in SECTION 02160, EXCAVATION SUPPORT SYSTEMS.

1.37 – SPARE UNITS

A. Refer to technical specifications for delivery and ownership transfer of the third pump and associated VFD to be located at Pump Station No. 4 (PS4.P-3 and PS4.P-3-VFD).

PART 2 - PRODUCTS – Not Used

PART 3 - EXECUTION – Not Used

3.11- COOPERATION WITHIN THIS CONTRACT 4
3.12 - CLEANUP AND DISPOSAL OF EXCESS MATERIAL 4
3.13 - CONTRACT CLOSEOUT 5

PART 1 - GENERAL

1.01 - SCOPE

A. The Work of this section includes all labor, equipment, tools, and materials necessary for the implementation of the Control of Work during the construction of the facilities.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.

2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.

3. "Provide" shall mean furnish and install.

4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.

5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.

6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.

7. "Exposed" shall mean not concealed as defined above.

8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.

9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 – SUBMITTALS – Not Used

1.06 - DESIGN CRITERIA – Not Used

1.07 - REFERENCED STANDARDS – Not Used

PART 2 - PRODUCTS AND SERVICES – Not Used

PART 3 - EXECUTION

3.01 - FACILITY AND HOURS OF CONSTRUCTION

A. Furnish facility and equipment which will be efficient, appropriate, and large enough to secure a satisfactory quality of work and a rate of progress which will insure the completion of the work within the Contract Time. If at any time such facility appears to the Engineer to be inefficient, inappropriate, or insufficient for securing the quality of work required or for producing the rate of progress aforesaid, he may order the Contractor to increase the efficiency, change the character, or increase the facility equipment, and the Contractor shall conform to such order. Failure of the Engineer to give such order shall in no way relieve the Contractor of his obligations to secure the quality of the work and rate of progress required.

B. Normal construction activity shall take place in accordance with SECTION 01030, SPECIAL REQUIREMENTS. only between the hours of 7:00 a.m. to 5:00 p.m., excluding Saturdays, Sundays, and legal holidays. Work outside the above time periods will be permitted only on an emergency basis and only with the approval of the Owner.

3.02 - OCCUPYING PRIVATE LAND

A. The Contractor shall not (except after written consent from the proper parties) enter or occupy with men, tools, materials, or equipment any land outside the rights of way or property of the Owner.

B. A copy of the written consent shall be given to the Engineer.

3.03 - PIPE LOCATIONS

A. Exterior pipelines will be located substantially as indicated on the Drawings, but the right is reserved to the Owner, acting through the Engineer, to make such modifications in location as may be found desirable to avoid interference with existing structures or for other reasons. Where fittings, etc., are noted on the Drawings, such notation is for the Contractor's convenience and does not relieve him from laying and jointing different or additional items where required.

B. Small interior piping is indicated diagrammatically on the Drawings, and the exact location is to be determined in the field. Piping shall be arranged in a neat, compact, and workmanlike manner, with a minimum of crossing and interlacing, so as not to interfere with equipment or access ways, and, in general, without diagonal runs.

3.04 - DIMENSION OF EXISTING STRUCTURES

A. Where the dimensions and locations of existing structures are of importance in the installation or connection of any part of the Work, the Contractor shall verify such dimensions and locations in the field before the fabrication of any material or equipment which is dependent on the correctness of such information.

3.05 - OPEN EXCAVATIONS

A. Excavation shall be made and mantained in accrodance wth all federal, state and locateal rules and regualtinos includign OSHA.

B. All open excavations shall be adequately safeguarded by providing temporary barricades, fencing, caution signs, lights, and other means to prevent accidents to persons and damage to property. The Contractor shall, at his own expense, provide suitable and safe bridges and other crossings for accommodating travel by pedestrians and workmen. Bridges provided for access during construction shall be removed when no longer required. The length or size of excavation will be controlled by the particular surrounding conditions, but shall always be confined to the limits prescribed by the Engineer. If the excavation becomes a hazard, or if it excessively restricts traffic at any point, the Engineer may require special construction procedures such as limiting the length of the open trench, prohibiting stacking excavated material in the street, and requiring that the trench shall not remain open overnight.

C. The Contractor shall take precautions to prevent injury to the public due to open trenches. All trenches, excavated material, equipment, or other obstacles which could be dangerous to the public shall be well lighted at night.

3.06 - TEST PITS

A. Test pits for the purpose of locating underground pipeline or structures in advance of the construction shall be excavated and backfilled by the Contractor at the direction of the Engineer. Test pits shall be backfilled immediately after their purpose has been satisfied and the surface restored and maintained in a manner satisfactory to the Engineer.

3.07 - INTERFERENCE WITH AND PROTECTION OF STREETS

A. The Contractor shall not close or obstruct any portion of a street, road, or private way without obtaining permits therefor from the proper authorities. If any street, road or private way shall be rendered unsafe by the Contractor's operations, he shall make such repairs or provide such temporary ways or guards as shall be acceptable to the proper authorities.

B. Streets, roads, private ways, and walks not closed shall be maintained passable and safe by the Contractor, who shall assume and have full responsibility for the adequacy and safety of provisions made therefor.

C. The Contractor shall, at least 24 hours in advance, notify the Police and Fire Departments in writing, with a copy to the Engineer, if the closure of a street or road is necessary. The Contracotr shall cooperate with the Police Department in the establishment of alternate routes and shall provide adequate detour signs, plainly marked and well lighted, in order to minimize confusion.

3.08 - CARE AND PROTECTION OF PROPERTY

A. The Contractor shall be responsible for the preservation of all public and private property, and shall use every precaution necessary to prevent damage thereto. If any direct or indirect damage is done to public or private property by or on account of any act, omission, neglect, or misconduct in the execution of the work on the part of the Contractor, such property shall be restored by the Contractor, at his expense, to a condition similar or equal to that existing before the damage was done, or he shall make good the damage in other manner acceptable to the Engineer.

3.09 - PROTECTION AND RELOCATION OF EXISTING STRUCTURES AND UTILITIES

A. The Contractor shall assume full responsibility for the protection of all buildings, structures, and utilities, public or private, including poles, signs, services to buildings, utilities in the street, gas pipes, water pipes, hydrants, sewers, drains, and electric and telephone cables, whether or not they are shown on the Drawings. The Contractor shall carefully support and protect all such structures and utilities from injury of any kind. Any damage resulting from the Contractor's operations shall be repaired by him at his expense.

B. Assistance will be given the Contractor in determining the location of existing services. The Contractor, however, shall bear full responsibility for obtaining all locations of underground structures and utilities (including existing water services, drain lines, and sewers). Services to buildings shall be maintained, and all costs or charges resulting from damage thereto shall be paid by the Contractor.

C. Protection and temporary removal and replacement of existing utilities and structures as described in this Section shall be a part of the work under the Contract and all costs in connection therewith shall be included in the Total Price Bid in the Bid Form.

D. If, in the opinion of the Engineer, permanent relocation of a Owner’s utility is required, he may direct the Contractor, in writing, to perform the work. Work so ordered will be paid at the Contract unit prices, if applicable, or as extra work. If relocation of a privately owned utility is required, the Owner will notify the Utility to perform the work as expeditiously as possible. The Contractor shall fully cooperate with the Owner and Utility, and shall have no claim for delay due to such relocation. The Contractor shall notify all utility companies in writing at least 72 hours (excluding Saturdays, Sundays, and Legal holidays) before excavating in any public way. The Contractor shall coordinate the removal and replacement of traffic loops and signals, if required for the performance of the work, at no additional cost to the Owner.

3.10 - INSPECTION OF WORK AWAY FROM THE SITE

A. If work to be done away from the construction site is to be inspected on behalf of the Owner during its fabrication, manufacture, or testing, or before shipment, the Contractor shall give notice to the Engineer of the place and time where such fabrication, manufacture, testing, or shipping is to be done. Such notice shall be in writing and delivered to the Engineer in ample time so that the necessary arrangements for the inspection can be made.

3.11- COOPERATION WITHIN THIS CONTRACT

A. All firms or persons authorized to perform any work under this Contract shall cooperate with General Contractor and his Subcontractors or trades, and shall assist in incorporating the work of other trades where necessary or required.

B. Cutting and patching, drilling and fitting shall be carried out where required by the trade or subcontractor having jurisdiction, unless otherwise indicated herein or directed by the Engineer.

3.12 - CLEANUP AND DISPOSAL OF EXCESS MATERIAL

A. During the course of the work, the Contractor shall keep the site of his operations in as clean and as neat a condition as is possible. He shall dispose of all residue resulting from the construction work and, at the conclusion of the work, he shall remove and haul away any surplus excavation, broken pavement, lumber, equipment, temporary structures, and any other refuse remaining from the construction operations, and shall leave the entire site of the work in a neat and orderly condition.

B. In order to prevent environmental pollution arising from the construction activities related to the performance of this Contract, the Contractor and his subcontractors shall comply with all applicable Federal, State, and local laws, and regulations concerning waste material disposal, as well as the specific requirements stated in this Section and elsewhere in the Specifications.

C. The Contractor is advised that the disposal of excess excavated material in wetlands, stream corridors, and plains is strictly prohibited even if the permission of the property owner is obtained. Any violation of this restriction by the Contractor or any person employed by him, will be brought to the immediate attention of the responsible regulatory agencies, with a request that appropriate action be taken against the offending parties. Therefore, the Contractor will be required to remove the fill at his own expense and restore the area impacted.

3.13 - CONTRACT CLOSEOUT

A. Provide in accordance with SECTION 01700, CONTRACT CLOSEOUT.

END OF SECTION

SECTION 01050

FIELD ENGINEERING

PART 1 – GENERAL 1
1.01 - SCOPE 1
1.02 – MEASUREMENT AND PAYMENT 1
1.03 - DEFINITIONS 1
1.04 - SUBMTTALS 2
1.05 – PROJECT/SITE CONDITIONS 2
PART 2 – PRODUCTS – Not Used 3
PART 3 – EXECUTION 3
3.01 - EXAMINATION 3
3.02 - APPLICATION 3
3.03 – CONTRACT CLOSEOUT 3

PART 1 – GENERAL

1.01 - SCOPE

A. This work of this Section includes all labor, materials, tools, and equipment required for the providing Field Engineering as specified herein and/or as shown on the Contract Drawings including the following:

1. Examination of site and conditions of construction;
2. Establishment of lines, grades, and easements;
3. Connections to existing facilities; and
4. Restoration and protection of public and private property.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 – MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.

5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.

6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.

7. "Exposed" shall mean not concealed as defined above.

8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.

9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMTTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Submittals required under this section include, but are not limited to the following:

1. As-Built Drawings: The Contractor shall be responsible for maintaining two sets of redline "as-built locations and dimensions of work". The As-Built Drawings shall be submitted to the Owner at substantial completion of the project.

2. The Contractor shall submit copies of field records and record drawings each month with project invoices. Field data shall be updated each month as applicable.

1.05 – PROJECT/SITE CONDITIONS

A. Environmental Requirements

1. Unfavorable Construction Conditions

a. During unfavorable weather, wet ground, or other unsuitable construction conditions, confine operations to work which will not be affected adversely by such conditions.

b. No portion of Work shall be constructed under conditions which adversely affect quality or efficiency thereof, unless special means or precautions are taken to perform Work in manner acceptable to the Engineer.

B. Field Measurements

1. Lines and Grades

a. All Work shall be done to lines, grades, and elevations indicated on drawings or specified herein.

b. Basic vertical control points have been established or designated by the Engineer. Contractor shall be responsible for maintaining or subsequently replacing these controls to the satisfaction of the Engineer if these controls are disturbed. The Contractor shall be responsible for verifying all vertical control information that is used.

(1) Points shall be used as datum for work.

(2) Contractor shall be responsible for transferring all lines and grades from basic survey control points.

c. Contractor to perform all additional survey, layout, and measurement work.

(1) The Contractor shall provide survey work by a firm having successfully completed at least two projects of similar size and complexity within the last five years, and who shall employ experienced personnel and provide adequate supervision to satisfaction of the Engineer at all times when operations are in progress.

(2) Surveyor shall be a registered land surveyor in the location of the project.

d. Keep the Engineer informed, in writing, two weeks in advance, of times and places at which work is to be performed, so that horizontal and vertical control points may be established, and any checking deemed necessary by the Engineer may be performed.

e. Remove and reconstruct Work which is improperly located as determined by the Engineer and at no additional cost to the Owner.

2. Easements and Rights-of-Way

a. Easements and rights-of-way for utilities, if required, will be provided by the Owner.

b. Confine construction operations within limits indicated on drawings and/or within limits of easements or public ways.

c. Place construction tools, equipment, excavated materials, and pipeline materials and supplies, so as to cause least possible damage to property and interference with traffic.

PART 2 – PRODUCTS – Not Used

PART 3 – EXECUTION

3.01 - EXAMINATION

A. Examination of Site and Verification of Conditions

1. Before starting operations, examine site to become acquainted with conditions to be encountered.

2. Verify exact locations of sewers, water mains, gas mains, above or below ground electrical wires, other utilities, conduits and structures which may interfere with work.

3.02 - APPLICATION

A. Connections to Existing Facilities

1. Make connections to existing facilities as indicated on drawings or as specified.

2. Plan in advance all connections to existing facilities which are in service.

a. All equipment, materials, and labor shall be on hand at time of undertaking connections to existing facilities in service.

b. Work shall proceed continuously if necessary, to complete connections within the time designated by the Engineer.

3. Operation of valves or other appurtenances on existing utilities, when required, shall be performed by respective utility personnel unless otherwise noted. a. A tight shutdown of existing Owner's or Community valves is not guaranteed; Contractor shall control leakage past valves to satisfaction of the Owner and Engineer and at no additional cost to the Owner.

B. Restoration and Protection of Public and Private Property

1. Protect, shore, brace, support, and maintain all underground pipes, conduits, drains, and other underground construction uncovered or otherwise affected by construction operations.

2. Restore all public and private property including pavement, surfacing, curbs, walks, utility poles, guy wires, fences, and other surface structures affected by construction operations, together with all sod and landscaping to their original condition or better, whether within or outside easements.

3.03 – CONTRACT CLOSEOUT

A. Provide in accordance with SECTION 01700, CONTRACT CLOSEOUT

END OF SECTION

This Page Intentionally Left Blank.

SECTION 01090

REFERENCE STANDARDS

PART 1 - GENERAL 1
1.01 - QUALITY ASSURANCE 1
1.02 - SCHEDULE OF REFERENCES 1
PART 2 - PRODUCTS - Not Used 4
PART 3 - EXECUTION - Not Used 4

PART 1 - GENERAL

1.01 - QUALITY ASSURANCE

A. For products or workmanship specified by association, trade, or Federal Standards, comply with requirements of the standard, except when more rigid requirements are specified or are required by applicable codes.

B. Conform to reference standard by date of issue current on date for receiving bids unless otherwise specified in Product Sections.

C. Where reference is made to one of the above standards, the version in effect at the time of bid opening shall apply.

D. Should specified reference standards conflict with Contract Documents, request clarification from Engineer before proceeding.

3.06 - NOISE CONTROL 4
3.07 - CONTRACT CLOSEOUT 4

PART 1 - GENERAL

1.01 - SCOPE

A. Provide and compact bank-run gravel as indicated and specified.

B. The work covered by this Section consists of furnishing all labor materials and equipment and performing all work required for the prevention of environmental pollution in conformance with applicable laws and regulations, during and as the result of construction operations under this Contract. For the purpose of this Specification, environmental pollution is defined as the presence of chemical, physical, or biological elements or agents which adversely affect human health or welfare; unfavorably alter ecological balances of importance to human life; affect other species of importance to man; or degrade the utility of the environment for aesthetic and/or recreational purposes.

C. The control of environmental pollution requires consideration of air, water, and land, and involves management of noise and solid waste, as well as other pollutants.

D. Schedule and conduct all work in a manner that will minimize the erosion of soils in the area of the work. Provide erosion control measures such as diversion channels, sedimentation or filtration systems, berms, staked hay bales, seeding, mulching, or other special surface treatments as are required to prevent silting and muddying of streams, rivers, impoundments, lakes, etc. All erosion control measures shall be in place in an area prior to any construction activity in that area. Specific requirements for erosion and sedimentation controls are specified in SECTION 01568, EROSION CONTROL, SEDIMENTATION AND CONTAINMENT OF CONSTRUCTION MATERIALS.

E. These Specifications are intended to ensure that construction is achieved with a minimum of disturbance to the existing ecological balance between a water resource and its surroundings. These are general guidelines. It is the Contractor's responsibility to determine the specific construction techniques to meet these guidelines.

F. All phases of sedimentation and erosion control shall comply with and be subject to the approval of the Massachusetts Department of Environmental Protection and local Conservation Commission.

G. Schedule and conduct all work in a manner that will minimize the level of noise escaping the site, especially at night and on weekends.

H. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 – SUBMITTALS – Not Used

1.05 - PRODUCT HANDLING – Not Used

1.06 - DESIGN CRITERIA

A. Comply with all applicable Federal, State, and local laws and regulations concerning environmental pollution control and abatement.

B. The Engineer will notify the Contractor in writing of any non-compliance with the foregoing provisions or of any environmentally objectional acts and corrective action to be taken. State or local agencies responsible for verification of certain aspects of the environmental protection requirements shall notify the Contractor in writing, through the Engineer, of any non-compliance with State or local requirements. The Contractor shall, after receipt of such notice from the Engineer or from the regulatory agency through the Engineer, immediately take corrective action. Such notice, when delivered to the Contractor or his authorized representative at the site of the work, shall be deemed sufficient for the purpose. If the Contractor fails or refuses to comply promptly, the Owner may issue an order stopping all or part of the work until satisfactory corrective action has been taken. No part of the time lost due to any such stop orders shall be made the subject of a claim for extension of time or for excess costs or damages by the Contractor unless it is later determined that the Contractor was in compliance.

PART 2 - PRODUCTS – Not Used

PART 3 - EXECUTION

3.01 - IMPLEMENTATION

A. Prior to commencement of the work, meet with the Engineer to develop mutual understandings relative to compliance with this provision and administration of the environmental pollution control program.

B. Remove temporary environmental control features, when approved by the Engineer, and incorporate permanent control features into the project at the earliest practicable time.

3.02 - EROSION CONTROL

A. Provide positive means of erosion control such as shallow ditches around construction to carry off surface water. Erosion control measures such as siltation basins, hay check dams, mulching, jute netting, and other equivalent techniques shall be used as appropriate. Offsite surface water shall be diverted around the site to a downstream channel ahead of siltation barriers. Flow of surface water into excavated areas shall be prevented. Ditches around construction area shall also be used to carry away water resulting from dewatering of excavated areas. At the completion of the work, ditches shall be backfilled and the ground surface restored to original condition.

3.03 - PROTECTION OF STREAMS, WETLANDS, AND SURFACE WATER

A. Care shall be taken to prevent or reduce to a minimum any damage to any stream, drainage ditch, storm drain of sewer from pollution by debris, sediment, or other material, or from the manipulation of equipment and/or materials in or near such streams. Water that has been used for washing or processing, or that contains oils or sediments that will reduce the quality of the water in the stream, shall not be directly returned to the stream. Such water will be diverted through a settling basin or filter before being directed into the streams.

B. The Contractor shall not discharge water from dewatering operations directly into any live or intermittent stream, channel, wetlands, surface water, or any storm sewer. Water from dewatering operations shall be treated by filtration, settling basins, or other approved method to reduce the amount of sediment contained in the water to allowable levels.

C. All preventative measures shall be taken to avoid spillage of petroleum products and other pollutants. In the event of any spillage, prompt remedial action shall be taken in accordance with a contingency action drawing or plan approved by the Massachusetts Department of Environmental Protection. Contractor shall submit to copies of approved contingency drawings or plans to the Engineer.

D. Water being flushed from structures or pipelines after disinfection, with a Cl2 residue of 2 mg/l or greater, shall be treated with a dechlorination solution, in a method approved by the Engineer, prior to discharge.

3.04 - PROTECTION OF LAND RESOURCES

A. Land resources within the project boundaries and outside the limits of permanent work shall be restored to a condition, after completion of construction, that will appear to be natural and not detract from the appearance of the project. Confine all construction activities to areas shown on the Drawings.

B. Outside of areas requiring earthwork for the construction of the new facilities, the Contractor shall not deface, injure, or destroy trees or shrubs, nor remove or cut them without prior approval. No ropes, cables, or guys shall be fastened to or attached to any existing nearby trees for anchorage unless specifically authorized by the Engineer. Where such special emergency use is permitted, first wrap the trunk with a sufficient thickness of burlap or rags over which softwood cleats shall be tied before any rope, cable, or wire is placed. The Contractor shall in any event be responsible for any damage resulting from such use.

C. Where trees may possibly be defaced, bruised, injured, or otherwise damaged by the Contractor's equipment, dumping or other operations, protect such trees by placing boards, planks, or poles around them. Monuments and markers shall be protected similarly before beginning operations near them.

D. Any trees or other landscape feature scarred or damaged by the Contractor's equipment or operations shall be restored as nearly as possible to its original condition. The Engineer will decide what method of restoration shall be used and whether damaged trees shall be treated and healed or removed and disposed of.

E. All scars made on trees by equipment, construction operations, or by the removal of limbs larger than 1-in. in diameter shall be coated as soon as possible with an approved tree wound dressing. All trimming or pruning shall be performed in an approved manner by experienced workmen with saws or pruning shears. Tree trimming with axes will not be permitted.

F. Climbing ropes shall be used where necessary for safety. Trees that are to remain, either within or outside established clearing limits, that are subsequently damaged by the Contractor and are beyond saving in the opinion of the Engineer, shall be immediately removed and replaced.

G. The locations of the Contractor's storage, and other construction building, required temporarily in the performance of the work, shall be cleared portions of the job site or areas to be cleared as shown on the Drawings and shall require written approval of the Engineer and shall not be within wetlands or floodplains. The preservation of the landscape shall be an imperative consideration in the selection of all sites and in the construction of buildings. Drawings showing storage facilities shall be submitted for approval of the Engineer.

H. Remove all signs of temporary construction facilities such as haul roads, work areas, structures, foundations of temporary structures, stockpiles of excess of waste materials, or any other vestiges of construction as directed by the Engineer. It is anticipated that excavation, filling, and plowing of roadways will be required to restore the area to near natural conditions which will permit the growth of vegetation thereon. The disturbed areas shall be prepared and seeded as described in SECTION 01568, EROSION CONTROL, SEDIMENTATION AND CONTAINMENT OF CONSTRUCTION MATERIALS or as approved by the Engineer.

I. All debris and excess material will be disposed of outside wetland or floodplain areas in an environmentally sound manner.

3.05 - PROTECTION OF AIR QUALITY

A. Burning. The use of burning at the project site for the disposal of refuse and debris will not be permitted.

B. Dust Control. The Contractor will be required to maintain all excavations, embankments, stockpiles, access roads, plant sites, waste areas, borrow areas, and all other work areas within or without the project boundaries free from dust which could cause the standards for air pollution to be exceeded, and which would cause a hazard or nuisance to others.

C. An approved method of stabilization consisting of sprinkling or other similar methods will be permitted to control dust. The use of chlorides may be permitted with approval from the Engineer.

D. Sprinkling, to be approved, must be repeated at such intervals as to keep all parts of the disturbed area at least damp at all times, and the Contractor must have sufficient competent equipment on the job to accomplish this if sprinkling is used. Dust control shall be performed as the work proceeds and whenever a dust nuisance or hazard occurs, as determined by the Engineer.

3.05 - MAINTENANCE OF POLLUTION CONTROL FACILITIES DURING CONSTRUCTION

A. During the life of this Contract, maintain all facilities constructed for pollution control as long as the operations creating the particular pollutant are being carried out or until the material concerned has become stabilized to the extent that pollution is no longer being created.

3.06 - NOISE CONTROL

A. The Contractor shall make every effort to minimize noises caused by his operations. Equipment shall be equipped with silencers or mufflers designed to operate with the least possible noise in compliance with State and Federal (OSHA) regulations.

3.07 - CONTRACT CLOSEOUT

A. Provide in accordance with SECTION 01700, CONTRACT CLOSEOUT.

2.01 - ACCEPTABLE MOTOR MANUFACTURERS 4
2.02 - ELECTRIC MOTOR RATINGS 5
2.03 - MOTOR REQUIREMENTS 5
PART 3 - EXECUTION 8
3.01 - INSTALLATION 8
3.02 - TESTING 8
3.03 - CONTRACT CLOSEOUT 9

PART 1 - GENERAL

1.01 - SCOPE

A. The Work of this section includes all labor, materials, tools, and equipment required for the furnishing of all materials required to provide Low Voltage Electric Motors and Accessories as specified herein and/or as shown on the Contract Drawings.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

C. Unless otherwise specified, all electric motors furnished and installed by the Contractor shall conform to the requirements specified herein.

1. Motors rated at 460 V which are powered from Variable Frequency Drives shall be inverter duty rated as per NEMA-MG-1.

2. Motors shall be NEMA Premium Efficient as per NEMA-MG-1.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Submittals required under this section include, but are not limited to the following:

1. Descriptive literature and motor characteristics, including thermal limit curves and speed vs. torque curves. Provide thermal limit curves for motors 75 Hp and greater and all motor data.
2. A copy of this specification section with addenda and all referenced specification sections with addenda, with each paragraph check-marked to indicate specification compliance.
    a. Failure to include a copy of the marked-up specification sections will result in return of the entire submittal without further review and consideration until the marked-up specification are re-submitted with the entire package.
3. Submit motor data with the associated driven equipment submittals.
4. Shop drawings and descriptive data to include:
    a. Complete list of all motors to be furnished.
    b. Outlines, dimensions, weights, and wiring diagrams.
    c. Location of main and accessories boxes with size of conduit entrance.
    d. Efficiency and power factor at 1/2, 3/4 and full load.
    e. Bearing life data and grease requirements.
    f. Nameplate data.
    g. Prototype test data.
    h. Ground pad locations.
    i. Strip heaters KW and voltage ratings.
    j. Statement certifying that motor insulation system is compatible with output of VFD system provided under SECTION 16260, VARIABLE FREQUENCY DRIVES.
    k. Full load current
    l. Locked rotor current

m. Full load torque in lb.-ft.

n. Starting and breakdown torque in percent of full-load torque

o. Number and frequency of permissible starts under specified conditions

p. Horsepower versus current curves

q. Moment of inertia of rotor

r. The zero load, rated speed (with no load connected) kW and kvar input

s. The locked rotor KVA and power factor at rated voltage

t. Service factor

u. Descriptive bulletins or catalog cuts with full description of the insulation system

v. Manufacturer, type, size and rating of bearings

w. Motor thermal limit or damage curves

5. Submit certified copies of all factory shop test results.

6. Submit list of recommended spare parts and maintenance tools for each type of motor.

7. Provide manufacturer's printed installation instructions including anchoring details to meet earthquake requirements as specified and indicated on the structural drawings.

8. Performance Test Reports: Upon completion of installed system, submit in booklet form all field tests performed.

1.05 - PRODUCT HANDLING

A. Products shall be shipped, stored and handled in a manner consistent with the written recommendations of the manufacturer and as to not to degrade quality, serviceability or appearance. All products delivered to the project site shall be accompanied by test reports certifying that the pipe conforms to the ASTM specifications listed herein. Any unit found to be defective either before or after installation shall be removed from the project site and replaced with a sound unit.

B. If stored for more than two weeks, the materials shall receive all maintenance considerations required by the manufacturer for proper storage of the materials.

1.06 - DESIGN CRITERIA

A. The materials and equipment specified are intended to be standard materials and equipment of demonstrated successful performance, as manufactured by reputable concerns. Equipment shall be designed and constructed in accordance with the highest standards of the industry and shall be installed in accordance with the manufacturer's written recommendations and the Contract Documents. The specifications call attention to certain features but do not purport to cover all details entering into the construction of the equipment.

B. The design conditions and other pertinent requirements for the equipment are listed on the Contract Drawings.

1.07 - QUALITY ASSURANCE

A. Motors shall comply with the latest reference standards specified.

B. Routine tests shall be performed on representative motors less than 100 Hp in size and shall include the information described on NEMA MG1-12.54 Report of Test Form for Routine Tests on Induction Motors. Efficiency shall be determined in accordance with IEEE Publication No. 112, Method B. Power factor shall be measured on representative motors.

C. The Contractor shall obtain the pumps, motors, and appurtenances from the pump manufacturer, as a complete and integrated package to insure proper coordination and compatibility and operation of the system.

1. Where motors are driven by variable frequency drives (VFDs) the Contractor shall coordinate the variable frequency motor controllers with the pump and motor manufacturer and submit as part of the shop drawings a written statement signed by the Contractor, pump manufacturer, motor manufacturer and variable frequency motor controller manufacturer that the variable frequency motor controller manufacturer has received the required information from the pump and motor manufacturers and that all parties have reviewed the system and coordinated the equipment selection. Also include all motor data and information that has been used for the coordination.

2. Variable frequency drives shall be provided in accordance with Specification SECTION 16260, VARIABLE FREQUENCY DRIVES.

D. Provide equipment rated in accordance with the Area Classification Schedule on Contract Electrical drawing 00 E-601.

PART 2 - PRODUCTS

2.01 - ACCEPTABLE MOTOR MANUFACTURERS

A. Reliance Electric

B. Toshiba

C. U.S. Electric Motors

D. Or equal

2.02 - ELECTRIC MOTOR RATINGS

A. Voltage Ratings:

1. Unless otherwise specified, motors with ratings of 1/2 to 500 Hp shall be rated 460-volt (nameplate rating), three-phase, 60-Hertz; motors of 1/3 Hp or less to be rated 115-volt, single-phase, 60 Hertz.

B. The following specific motor requirements shall be identified in each equipment specification:

1. RPM.

2. Motor enclosure type.

2.03 - MOTOR REQUIREMENTS

A. Motor heaters shall be supplied on all motors located outdoors. Heaters shall be of the cartridge or flexible wrap around type installed within the motor enclosure adjacent to core iron. Heaters shall be rated for 120 volt, single phase with wattage. The heater wattage and voltage shall be embossed on the motor nameplate.

B. Every motor shall be of capacity to operate the driven equipment under all load and operating conditions without exceeding its rated nameplate current or power or its specified temperature limit at rated voltage. Each motor shall develop the necessary torque for its required service throughout its acceleration range at a voltage 10 percent below nameplate rating. Where indicated on the electrical drawings to be operated on a reduced voltage starter, the motor shall develop the necessary torque under the conditions imposed by the reduced voltage starting method.

C. The motor shall have capacity to operate the driven equipment as given in the equipment detail specifications. The motor shall not be required to deliver more than its rated nameplate horsepower, at unity (1.0) service factor, under any condition of mechanical or hydraulic loading.

D. Type of Motors

1. All motors shall be NEMA Design B or of a type having starting characteristics and ruggedness as may be necessary under the actual conditions of operation and, unless otherwise specified, shall be for full-voltage starting.

E. Insulation

1. All motors shall have Class B (fractional horse power only) and Class F insulation for all other size motors.

2. Insulation systems shall be manufacturer’s premium grade, resistant to attack by moisture, acids, alkalies and mechanical or thermal shock for 480 Volt motors. Provide a Class F insulation system for an ambient temperature motor operation of 0 to 40 degrees C at no more than 3300 feet above sea level for inverter duty motors. This temperature rise shall be met when motors are operated and controlled with the VFD(s). The motor insulation system shall have full capability to handle the common mode voltage conditions imposed by the VFD.

3. Motors shall have vacuum/pressure impregnated epoxy insulation for moisture resistance.

4. Insulation for inverter duty motor windings shall meet or exceed the Pulse Endurance Index for magnetic wire and shall not be injured when exposed to repeated pulse type waveforms, repetitive high voltage transients, switching frequency and rate of rise of the pulse. Class H insulation shall be used.

F. Enclosures

1. Motors shall have a steel or cast-iron frame and a cast iron or stamped steel conduit box, as specified below. Conduit box shall be split from top to bottom and shall be capable of being rotated to four positions. Synthetic rubber-like gaskets shall be provided between the frame and the conduit box and between the conduit box and its cover. Motor leads shall be sealed with a non-wicking, non-hygroscopic insulating material. A frame mounted pad with drilled and tapped hole, not less than 1/4-in. diameter, shall be provided inside the conduit box for motor frame grounding.

    a. Totally enclosed fan cooled: TEFC motors shall have a steel or cast-iron frame, cast iron end brackets, cast iron conduit box, 1.15 service factor at 40 degrees C, tapped drain holes (corrosion resistant plugs for frames 286T and smaller and automatic breather/drain devices for frames 324T and larger) and upgraded insulation by additional dips and bakes to increase moisture resistance.

    b. Totally enclosed non-ventilated: TENV motors shall include the same rating and accessories as specified for TEFC motors.

    c. Explosion proof motors shall comply with all requirements of Class I, Division 1, Group D, hazardous locations as defined by the National Electrical Code and with all other safety codes pertaining thereto.

    d. Motors in NEMA 4, NEMA 4X and classified areas shall be provided with severe duty rating. Motors shall be of the corrosion resistant type conforming to motors designated by the manufacturer as “Corro-Duty”, “Mill and Chemical”, “Custom Severe Duty”, or similar quality designation. Severe duty motors shall have a cast iron frame, cast iron end brackets, cast iron conduit box and 1.15 service factor at 40 degrees C and tapped drain holes (corrosion resistant plug for frames 286T and smaller and automatic breather/drain devices for frames 324T and larger).

G. Special Purpose Motors

1. Hermetically sealed air conditioning units, hoists, cranes and other devices complying with special safety codes shall be furnished with motors, control equipment, accessories and safety devices, in accordance with the manufacturer's standards and to be rated for the duty cycle as specified for the driven equipment. Service factor 1.15 above 3 hp.

2. Submersible motors shall be equipped with three thermal switches (one in each phase winding) connected to stop motor operation if the temperature exceeds 125 deg. C (255 deg. F). Also a leakage sensor for sensing water intrusion into the stator housing shall be provided.

3. Inverter duty rated: Motors for operation on variable frequency drives shall meet current power quality levels published in NEMA MG1, Part 31.

    a. Enclosures shall be equal to those furnished for severe duty or explosion proof motors. Motor shaft and bearings shall be insulated.

    b. Motors nameplate service factor shall be 1.0. Internal service factor shall be 1.15 that of the nameplate.

    c. Stator laminations shall be stagger-stacked and stamped from high grade electrical steel to minimize eddy-current losses and heat build-up caused by inverter induced harmonics. Rotors shall be configured to minimize skin-effect heating.

    d. Provide each variable frequency drive motor with an internal normally closed motor thermostat per phase wired in series

    e. Provide VFD driven motor shafts with grounding rings.

H. Auxiliary Devices

1. Single-phase motors requiring switching devices and auxiliary starting resistors, capacitors, or reactors shall be furnished as combination units with such auxiliaries either incorporated within the motor housings or housed in enclosures mounted upon the motor frames. Each combination unit shall be mounted upon a single base and to be provided with a single conduit box.

I. General Design of Motors

1. Motors shall comply with the latest NEMA Standards Publication No. MG1 for Motors and Generators, unless otherwise specified.
2. All polyphase non-explosion proof motors shall be provided with energy efficient operation and meet the requirements of MG1-12.53 a and b.
3. Motor windings shall be braced to withstand successfully the stresses resulting from the method of starting. The windings shall be treated thoroughly with an insulating compound that protects against moisture and slightly acid or alkaline conditions.
4. Bearings shall be of the self-lubricating type, provided so that there is proper alignment of rotor and shaft and to prevent leakage of lubricant.
    a. Bearings for open motors shall be of the sleeve or ball type, as specified under the respective items of mechanical equipment.
    b. Bearings for totally enclosed and explosion proof motors shall be of the ball type.
    c. Bearing L-10 fatigue life in hours at 100 percent load shall be 50,000.
    d. Bearing grease shall be of the 120 deg. C thermal capability type.
    e. Bearings for 50 HP and larger VFD driven motors shall be isolated type bearings.
5. Vertical motors shall be provided with thrust bearings for all thrusts to which they can be subjected in operation.
6. All three phase two speed motors shall be of the two-winding design.
7. All non-VFD driven three phase motors shall be provided with a 1.15 service factor.
8. Three phase motors shall be of cast iron construction including frame and end brackets.
9. Motor nameplates shall be Type 316 stainless steel.
10. Motor Terminal Boxes and Leads:
    a. Motors shall be furnished with oversize conduit terminal boxes to provide for making and housing the connections, and with flexible leads of sufficient length to extend for a distance of not less than 4 in. beyond the face of the box. Solderless lugs shall be furnished. Totally enclosed and explosion proof motors to have cast-iron terminal boxes.
    b. Leads for space heaters shall be brought out into an auxiliary, cast, conduit box on the motor side opposite to the main terminal box. Auxiliary box to have 1" threaded conduit openings and shall be so constructed that conduit entrance may be placed at top, bottom, or either side.
    c. A grounding terminal shall be provided in the main terminal box and a bronze grounding bolt to be furnished at the conduit side of the motor frame.
    d. For inverter rated motors, provide oversized terminal boxes with oversize conduit opening and oversized cable lugs for cables as indicated.

J. Motor Efficiencies

1. Three phase motors rated 1 Hp and larger shall be of the premium efficiency, "Design E", type per Table 12.1 of NEMA MG1 Part 12. Efficiency values shall be based on tests performed in accordance with IEEE Publication No. 112, Method B. Motors with horsepower or rpms not listed shall conform to comparable standards of construction and materials as those for listed motors.

K. Shop Painting

1. Unless otherwise specified, motors shall be given a shop application of paint filler or enamel sealer, a flat coat of undercoater for enamel, and two coats of enamel or, in lieu of this treatment, other corrosion-resistant treatment customary with the manufacturer.

L. Motor Data

1. The Contractor shall furnish five certified copies of characteristic curves of each motor furnished, except 115-volt motors. Curves shall be supplied as a part of the driven equipment submittal.

M. Motor Shop Tests

1. Motor shop tests shall be made in accordance with the IEEE Test Codes as specified in the NEMA MG1 Standards for Motors and Generators. NEMA report-of-test forms to be used in submitting test data.

2. Motor efficiency shall be determined by use of IEEE Standard 112 Test Method B, and by use of MGI-12.53 a and b.

3. For motors rated 100 hp and larger, complete tests of each motor furnished to be made and certified test data sheets to be submitted. Each motor shall be tested at rated voltage for: efficiency and power factor at 25, 50, 75, and 100 percent of it rated horsepower; for temperature rise, torque, no-load current, starting current, full load current, and dielectric strength; and for compliance with all specified performance requirements.

4. For induction motors 5 hp, up to 100 hp, copies of routine test reports of electrically duplicate motors shall be furnished.

5. For motors 3 hp or less, no test data need be furnished.

6. Where required by the load equipment specifications, provide testing support for shop testing at the equipment manufacturer's facility.

PART 3 - EXECUTION

3.01 - INSTALLATION

A. Verify heaters are energized when supplied on motors.

B. After motor installation but before connection to power wiring, test motor winding insulation.

C. After connection to power wiring, check for operating temperature, correct rotation, vibration, alignment and operating current drawn under load.

D. Submit all motor test results for review and record.

3.02 - TESTING

A. Inspect physical and mechanical condition.

B. Inspect for correct anchorage, mounting, grounding, connection, and lubrication.

C. Verify tightness of accessible bolted electrical connections by calibrated torque-wrench method in accordance with manufacturers published data.

D. Verify the absence of unusual mechanical or electrical noise or signs of overheating during initial test run.

E. Megger test motor winding insulation.

F. Provide testing in accordance with SECTION 16998, FIELD INSPECTION AND ACCEPTANCE TESTS.

3.03 - CONTRACT CLOSEOUT

A. Provide in accordance with SECTION 01700, CONTRACT CLOSEOUT.

END OF SECTION

This Page Intentionally Left Blank.

SECTION 01300

SUBMITTALS

PART 1 - GENERAL 1
1.01 - SCOPE 1
1.02 - MEASUREMENT AND PAYMENT 2
1.03 - DEFINITIONS 2
1.04 - SUBMITTALS 3
1.05 - SUBMITTAL ADMINISTRATIVE REQUIREMENTS 3
1.06 - CONSTRUCTION PHOTOGRAPHS 5
PART 2 - PRODUCTS 5
2.01 - SUBMITTAL PROCEDURES 5
2.02 - DELEGATED-DESIGN SERVICES 8
PART 3 - EXECUTION 8
3.01 - CONTRACTOR'S REVIEW 8
3.02 - ENGINEER’S ACTION 8
3.03 - DISTRIBUTION 10
3.04 - CERTIFICATE OF DESIGN 10
3.05 - CERTIFICATES OF COMPLIANCE 10
3.06 - SCHEDULES 10

PART 1 - GENERAL

1.01 - SCOPE

A. The work of this section specifies the general methods and requirements of submissions applicable to the following Work-related submittals:

1. Shop Drawings, Product Data and Samples.
2. Mock Ups.
3. Construction Photographs.
4. Contractor’s Responsibilities.
5. Submission Requirements.
6. Review of Shop Drawings, Product Data, Working Drawings and Samples.
7. Distribution.
8. General Procedures for Submittals.
9. Certificate of Design.
10. Certificates of Compliance.
11. Schedules.

B. American Iron and Steel (AIS) certifications for all applicable materials must be included with the product shop drawing or the submittal will be rejected. Certification requires a project specific letter that certifies the

manufacturing process and foundry location of the subject products and/or materials. There will be no payment for items that do not have approved AIS certification.

Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.

2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.

3. "Provide" shall mean furnish and install.

4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.

5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.

6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.

7. "Exposed" shall mean not concealed as defined above.

8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.

9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

10. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.

11. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.

12. Submittals: written and graphic information and physical samples that require Engineer’s responsive action. Action submittals are those submittals indicated in individual Specification sections as "action submittals."

13. File Transfer Protocol (FTP): Communications protocol that enables transfer of files to and from another computer over a network and that serves as the basis for standard Internet protocols. An FTP site is a portion of a network located outside of network firewalls within which internal and external users are able to access files.

14. Portable Document Format (PDF): An open standard file format licensed by Adobe Systems used for representing documents in a device-independent and display resolution-independent fixed-layout document format.

15. Shop drawings, as defined in the General Conditions, and as specified in individual Work Sections include, but are not necessarily limited to: custom-prepared data such as fabrication and erection/installation

(working) drawings of concrete reinforcement, structural details and piping layout, scheduled information, setting diagrams, actual shop work manufacturing instructions, custom templates, special wiring diagrams, coordination drawings, individual system or equipment inspection and test reports including performance curves and certifications as applicable to the Work

1.04 - SUBMITTALS

A. Shop drawings and brochures shall be submitted for all items to be furnished in accordance with the provisions of DOCUMENT 00700, GENERAL CONDITIONS and this Section.

B. Detailed submittal requirements are specified in the Technical Specifications sections.

C. Submittal Schedule: Submit a schedule of submittals, arranged in chronological order by dates required by construction schedule. Include time required for review, ordering, manufacturing, fabrication, and delivery when establishing dates. Include additional time required for making corrections or revisions to submittals noted by Engineer and additional time for handling and reviewing submittals required by those corrections.

1. Coordinate submittal schedule with list of Subcontractors, the schedule of values, and Contractor’s construction schedule.

2. Initial Submittal: Submit concurrently with startup construction schedule. Include submittals required during the first 60 days of construction. List those submittals required to maintain orderly progress of the Work and those required early because of long lead time for manufacture or fabrication.

3. Final Submittal: Submit concurrently with the first complete submittal of Contractor's construction schedule. Submit revised submittal schedule to reflect changes in current status and timing for submittals.

4. Format: Arrange the following information in a tabular format:

   a. Scheduled date for first submittal.

   b. Specification section number and title.

   c. Submittal category: Action; informational.

   d. Name of Subcontractor.

   e. Description of the Work covered.

   f. Scheduled date for Engineer’s final release or acceptance.

   g. Scheduled date of fabrication.

1.05 - SUBMITTAL ADMINISTRATIVE REQUIREMENTS

A. Engineer's Digital Data Files: Electronic digital data files of the Drawings will be provided by Engineer for Contractor's use in preparing Project Record Drawings.

1. Engineer will furnish Contractor one set of digital data drawing files of the Drawings for use in preparing Project record drawings.

2. Engineer makes no representations as to the accuracy or completeness of digital data drawing files as they relate to the Contract Drawings.

3. Digital Drawing Software Program: The Contract Drawings are available in AutoCad Civil 3D 2017 format.

4. Contractor shall execute a data licensing agreement in the form of Agreement form acceptable to the Engineer.

B. Coordination: Coordinate preparation and processing of submittals with performance of construction activities.

1. Coordinate each submittal with fabrication, purchasing, testing, delivery, other submittals, and related activities that require sequential activity.

2. Submit all submittal items required for each Specification section concurrently unless partial submittals for portions of the Work are indicated on accepted submittal schedule.

3. Submit action submittals and informational submittals required by the same Specification section as separate packages under separate transmittals.
4. Coordinate transmittal of different types of submittals for related parts of the Work so processing will not be delayed because of need to review submittals concurrently for coordination. Engineer reserves the right to withhold action on a submittal requiring coordination with other submittals until related submittals are received.

C. All shop drawings shall be submitted using the transmittal form furnished by the Engineer.

D. All shop drawings submitted by Subcontractors for approval shall be sent directly to the Contractor for checking. The Contractor shall be responsible for their submission at the proper time so as to prevent delays in delivery of materials.

E. Processing Time. Allow time for submittal review, including time for resubmittals, as follows. Time for review shall commence on Engineer's receipt of submittal. No extension of the Contract Time will be authorized because of failure to transmit submittals enough in advance of the Work to permit processing, including resubmittals.

1. Initial Review. Allow 15 working days for initial review of each submittal. Allow additional time if coordination with subsequent submittals is required. Engineer will advise Contractor when a submittal being processed must be delayed for coordination.
2. Intermediate Review. If intermediate submittal is necessary, process it in same manner as initial submittal.
3. Resubmittal Review. Allow 15 working days for review of each resubmittal.
4. Sequential Review. Where sequential review of submittals by Engineer's consultants, Owner, or other parties is indicated, allow 20 working days for initial review of each submittal.

F. Paper Submittals. Place a permanent label or title block on each submittal item for identification.

1. Indicate name of firm or entity that prepared each submittal on label or title block.
2. Provide a space approximately 6-inches by 8-inches on label or beside title block to record Contractor's review and approval markings and action taken by Engineer.
3. Number of submittals required:
    a. Shop Drawings: Unless otherwise stated in the respective Specifications sections, submit six (6) copies.
    b. Product Data: Unless otherwise stated in the respective Specifications submit six (6) copies.
    c. Samples: Submit the number stated in the respective Specification Sections.
4. Include the following information for processing and recording action taken:
    a. Project name.
    b. Date.
    c. Name of Engineer.
    d. Name of Contractor.
    e. Name of Subcontractor.
    f. Name of supplier.
    g. Name of manufacturer.

h. Submittal number or other unique identifier, including revision identifier. Engineer's Shop Drawing Transmittal Form includes spaces for the submittal number (e.g. 12) and the Specification section number (e.g., SECTION 09940, SHOP PAINTING). Submittal numbering shall be sequential. Resubmittals shall include an alphabetic suffix after the original submittal number (e.g. 12A).

i. Number and title of appropriate Specification section.

j. Drawing number and detail references, as appropriate.

5. Additional Paper Copies. Unless additional copies are required for final submittal, and unless Engineer observes noncompliance with provisions in the Contract Documents, initial submittal may serve as final submittal.

6. Transmittal for Paper Submittals. Assemble each submittal individually and appropriately for transmittal and handling. Transmit each submittal using a transmittal form to be supplied by the Engineer. Engineer will discard submittals received from sources other than Contractor.

G. Options. Identify options requiring selection by Engineer.

H. Deviations and Additional Information. On an attached separate sheet, prepared on Contractor's letterhead, record relevant information, requests for data, revisions other than those requested by Engineer on previous submittals, and deviations from requirements in the Contract Documents, including minor variations and limitations. Include same identification information as related submittal.

I. Resubmittals. Make resubmittals in same form and number of copies as initial submittal.

1. Note date and content of previous submittal.

2. Note date and content of revision in label or title block and clearly indicate extent of revision.

3. Resubmit submittals until they are marked with acceptance notation from Engineer's action stamp.

J. Distribution. Furnish copies of final submittals to manufacturers, subcontractors, suppliers, fabricators, installers, authorities having jurisdiction, and others as necessary for performance of construction activities.

K. Use for Construction. Retain complete copies of submittals on the Project Site. Use only final action submittals that are marked with acceptance notation from Engineer's action stamp.

1.06 - CONSTRUCTION PHOTOGRAPHS

A. The Contractor shall provide construction photographs in accordance with requirements specified in SECTION 01030, SPECIAL REQUIREMENTS.

PART 2 - PRODUCTS

2.01 - SUBMITTAL PROCEDURES

A. General Submittal Procedure Requirements. Prepare and submit submittals required by individual Specification sections. Types of submittals are indicated in individual Specification sections.

B. Product Data. Collect information into a single submittal for each element of construction and type of product or equipment.

1. If information must be specially prepared for submittal because standard published data are not suitable for use, submit as Shop Drawings, not as Product Data.

2. Mark each copy of each submittal to show which products and options are applicable.

3. Include the following information, as applicable:

a. Manufacturer's catalog cuts.

b. Manufacturer's product specifications.

c. Standard color charts.

d. Statement of compliance with specified referenced standards.

e. Testing by recognized testing agency.

f. Application of testing agency labels and seals.

g. Notation of coordination requirements.

h. Availability and delivery time information.

4. For equipment, include the following in addition to the above, as applicable:

a. Wiring diagrams showing factory-installed wiring.

b. Printed performance curves.

c. Operational range diagrams.

d. Clearances required to other construction, if not indicated on accompanying Shop Drawings.

5. Submit Product Data before or concurrent with Samples.

6. Submit Product Data in the following format. Six (6) paper copies of Product Data unless otherwise indicated. Engineer will return three (3) copies.

C. Shop Drawings. Prepare Project-specific information, drawn accurately to scale. Do not base Shop Drawings on reproductions of the Contract Documents or standard printed data, unless submittal based on Engineer's digital data drawing files is otherwise permitted.

1. Contractor shall submit certified shop and erection drawings of the proposed equipment in the capacity, size, and arrangement as indicated and specified.

a. Drawings shall include plan views, sectional views, title block, Tag Numbers, serial numbers, Parts List (identifying each component), dimensions, connection sizes and types and all details of all related items. In cases where certain information is proprietary and is omitted, provided a statement indicating that the information is proprietary and is being omitted.

b. Drawings shall be in conformance with all other requirements as specified in this Specification.

2. Preparation. Fully illustrate requirements in the Contract Documents. Include the following information, as applicable:

a. Identification of products.

b. Schedules.

c. Compliance with specified standards.

d. Notation of coordination requirements.

e. Notation of dimensions established by field measurement.

f. Relationship and attachment to adjoining construction clearly indicated.

g. Seal and signature of professional engineer if specified.

3. Sheet Size. Except for templates, patterns, and similar full-size drawings, submit Shop Drawings on sheets at least 8 ½ inches by 11 inches, but no larger than 24 inches by 36 inches.

4. Submit Shop Drawings in the following format. Submit Product Data in the following format. Six (6)paper copies of Product Data unless otherwise indicated. Engineer will return three (3) copies.

D. Samples. Submit Samples for review of kind, color, pattern, and texture for a check of these characteristics with other elements and for a comparison of these characteristics between submittal and actual component as delivered and installed.

1. Transmit Samples that contain multiple, related components such as accessories together in one (1) submittal package.
2. Identification: Attach label on unexposed side of Samples that includes the following:
    a. Generic description of Sample.
    b. Product name and name of manufacturer.
    c. Sample source.
    d. Number and title of applicable Specification Section.
    e. Specification paragraph number and generic name of each item.
3. Disposition: Maintain sets of accepted Samples at Project Site, available for quality-control comparisons throughout the course of construction activity. Sample sets may be used to determine final acceptance of construction associated with each set. Samples not incorporated into the Work, or otherwise designated as Owner's property, are the property of Contractor.
4. Samples for Initial Selection: Submit manufacturer's color charts consisting of units or sections of units showing the full range of colors, textures, and patterns available.
5. Samples for Verification: Submit full-size units or Samples of size indicated, prepared from same material to be used for the Work, cured and finished in manner specified, and physically identical with material or product proposed for use, and that show full range of color and texture variations expected. Samples include, but are not limited to, the following: partial sections of manufactured or fabricated components; small cuts or containers of materials; complete units of repetitively used materials; swatches showing color, texture, and pattern; color range sets; and components used for independent testing and inspection.
    a. Number of Samples: Submit two (2) sets of Samples. Engineer will retain one (1) sample set; remainder will be returned.
    b. Submit a single Sample where assembly details, workmanship, fabrication techniques, connections, operation, and other similar characteristics are to be demonstrated.
    c. If variation in color, pattern, texture, or other characteristic is inherent in material or product represented by a Sample, submit at least three (3) sets of paired units that show approximate limits of variations.

E. Test and Inspection Report Submittal. Comply with requirements specified in SECTION 01400, QUALITY ASSURANCE.

F. Welding Certificates. Prepare written certification that welding procedures and personnel comply with requirements in the Contract Documents. Submit record of Welding Procedure Specification and Procedure Qualification Record on AWS forms. Include names of firms and personnel certified.

G. Installer Certificates. Submit written statements on manufacturer's letterhead certifying that Installer complies with requirements in the Contract Documents and, where required, is authorized by manufacturer for this specific Project.

H. Manufacturer Certificates. Submit written statements on manufacturer's letterhead certifying that manufacturer complies with requirements in the Contract Documents. Include evidence of manufacturing experience where required.

I. Product Certificates. Submit written statements on manufacturer's letterhead certifying that product complies with requirements in the Contract Documents.

J. Material Certificates. Submit written statements on manufacturer's letterhead certifying that material complies with requirements in the Contract Documents.

K. Field Test Reports. Submit written reports indicating and interpreting results of field tests performed either during installation of product or after product is installed in its final location, for compliance with requirements in the Contract Documents.

2.02 - DELEGATED-DESIGN SERVICES

A. Performance and Design Criteria: Where professional design services or certifications by a design professional are specifically required of Contractor by the Contract Documents, provide products and systems complying with specific performance and design criteria indicated. If criteria indicated are not sufficient to perform services or certification required, submit a written request for additional information to Engineer.

B. Delegated-Design Services Certification: In addition to Shop Drawings, Product Data, and other required submittals, submit three (3) paper copies of certificate, signed and sealed by the responsible design professional, for each product and system specifically assigned to Contractor to be designed or certified by a design professional. Indicate that products and systems comply with performance and design criteria in the Contract Documents. Include list of codes, loads, and other factors used in performing these services.

PART 3 - EXECUTION

3.01 - CONTRACTOR'S REVIEW

A. Submittals: Review each submittal and check for coordination with other Work of the Contract and for compliance with the Contract Documents. Mark with approval stamp before submitting to Engineer.

B. Contractor review shall verify the following:

1. Field measurements
2. Field construction criteria
3. Catalog numbers and similar data
4. Conformance with the Specifications

C. If a shop drawing shows any deviation from the requirements of the Contract Documents, the Contractor shall make specific mention of the deviations in the Transmittal Form furnished by the Engineer and provide a description of the deviations in a letter attached to the submittal.

D. The review and approval of shop drawings, samples or product data by the Engineer shall not relieve the Contractor from his responsibility with regard to the fulfillment of the terms of the Contract. All risks of error and omission are assumed by the Contractor and the Engineer will not have responsibility therefor.

E. No portion of the Work requiring a shop drawing, sample, or product data shall be started nor shall any materials be fabricated or installed prior to the approval or qualified approval of such item. Fabrication performed, materials purchased or on-site construction accomplished which does not conform to accepted shop drawings and data shall be at the Contractor's risk. The Owner and Engineer will not be liable for any expense or delay due to corrections or remedies required to accomplish conformity.

F. Approval Stamp: Stamp each submittal with a uniform, approval stamp. Include Project name and location, submittal number, Specification Section title and number, name of reviewer, date of Contractor's approval, and statement certifying that submittal has been reviewed, checked, and approved for compliance with the Contract Documents.

3.02 - ENGINEER’S ACTION

A. The Engineer's review is for general conformance with the design concept and contract documents. Markings or comments shall not be construed as relieving the Contractor from compliance with the Contract Drawings and Specifications or from departures therefrom. The Contractor remains responsible for details and accuracy, for coordinating the Work with all other associated work and trades, for selecting fabrication processes, for techniques of assembly, and for performing work in a safe manner.

B. The review of shop drawings, data, and samples will be general. They shall not be construed:

1. As permitting any departure from the Contract requirements;

2. As relieving the Contractor of responsibility for any errors, including details, dimensions, and materials; or

3. As approving departures from details furnished by the Engineer, except as otherwise provided herein.

C. If the shop drawings, data or samples as submitted describe variations and show a departure from the Contract requirements which the Engineer finds to be in the interest of the Owner and to be so minor as not to involve a change in Contract Price or time for performance, the Engineer may return the reviewed drawings without noting an exception.

D. Three (3) (maximum) copies of shop drawings or product data will be returned to the Contractor via First Class United States Postal Service. Samples will not be returned.

E. Submittals will be returned to the Contractor under one of the action codes indicated below and defined on the transmittal form furnished by the Engineer.

1. Marking: No Exception Taken.

a. When submittals are marked as “No Exception Taken,” Work covered by submittal may proceed provided it complies with Contract Documents. Acceptance of Work depends on that compliance.

2. Marking: Make Corrections Noted.

a. When submittals are marked as “Make Corrections Noted,” Work covered by submittal may proceed provided it complies with Engineer’s notations or corrections on submittal and with Contract Documents. Acceptance of Work depends on that compliance. Resubmittal not required.

3. Marking: Amend and Resubmit.

a. When submittals are marked as “Amend and Resubmit,” do not proceed with Work covered by submittal. Do not permit Work covered by submittals to be used at Project Site or elsewhere where Work is in progress.

b. Revise submittal or prepare new submittal in accordance with Engineer's notations in accordance with resubmittal requirements of this section. Resubmit without delay. Repeat if required to obtain different action marking.

4. Marking: Rejected; See Remarks.

a. When submittals are marked as “Rejected; See Remarks,” do not proceed with Work covered by submittal. Work covered by submittal does not comply with Contract Documents.

b. Prepare new submittal for different material or equipment supplier or different product line or material of same supplier complying with Contract Documents.

5. Marking: For Information Only.

a. When submittals are marked as “For Information Only,” the Engineer will review the submittal but take no action.

b. It will be recorded as “For Information Only”. Work covered by this submittal may proceed provided it complies with the Contract Documents.

6. Marking: Not Required for Review.

a. When submittals are marked as “Not Required for Review,” the Engineer has not reviewed the submittal and it is being returned.

b. Work covered by this submittal may proceed provided it complies with the Contract Documents.

F. Resubmittals will be handled in the same manner as first submittals. On resubmittals the Contractor shall direct specific attention, in writing, on the letter of transmittal and on resubmitted shop drawings by use of revision triangles or other similar methods, to revisions other than the corrections requested by the Engineer, on previous submissions. Any such revisions which are not clearly identified shall be made at the risk of the Contractor. The Contractor shall make corrections to any Work done because of this type revision that is not in accordance to the Contract Documents as may be required by the Engineer.

G. Partial submittals may not be reviewed. The Engineer will be the only judge as to the completeness of a submittal. Submittals not complete will be returned to the Contractor, and will be considered "Rejected" until resubmitted. The Engineer may at his option provide a list or mark the submittal directing the Contractor to the areas that are incomplete.

H. If the Contractor considers any correction indicated on the shop drawings to constitute a change to the Contract Documents, the Contractor shall give written notice thereof to the Engineer within five working days after the date of the Engineer's review of the shop drawing and prior to the release for manufacture.

I. When the shop drawings have been completed to the satisfaction of the Engineer, the Contractor shall carry out the construction in accordance therewith and shall make no further changes therein except upon written instructions from the Engineer.

3.03 - DISTRIBUTION

A. Distribute reproductions of accepted shop drawings and copies of accepted product data and samples, where required, to the Project Site file and elsewhere as directed by the Engineer. Number of copies shall be as directed by the Engineer but shall not exceed six (6).

3.04 - CERTIFICATE OF DESIGN

A. If specifically specified in other sections of these Specifications, the Contractor shall submit the applicable Certificate of Design for each item required, and in the form attached to this Section, completely filled in and signed and sealed by a registered professional engineer.

3.05 - CERTIFICATES OF COMPLIANCE

A. Certificates of Compliance as specified in the specifications shall include and mean certificates, manufacturer's certificates, certifications, certified copies, letters of certification and certificate of materials.

B. The Contractor shall be responsible for providing Certificates of Compliance as specified in the technical specifications. Certificates are required for demonstrating proof of compliance with specification requirements and shall be executed in six (6) copies unless otherwise specified. Each certificate shall be signed by an official authorized to certify on behalf of the manufacturing company and shall contain the name and address of the Supplier, the project name and location, and the quantity and date or dates of shipment or delivery to which the certificates apply. Copies of laboratory test reports submitted with certificates shall contain the name and address of the testing laboratory and the date or dates of the tests to which the report applies. Certification shall not be construed as relieving the Supplier from furnishing satisfactory material, if after tests are performed on selected samples, the material is found not to meet the specific requirements.

3.06 - SCHEDULES

A. Provide all schedules as specified.

B. Progress Payments shall be subject to meeting the Schedule Requirements of this section (Refer to Table 01300-1). No progress payment identified in Table 01300-1 over the limits identified will be made until the milestones set in this table are satisfied.

Table 01300-1

Section Number	Section Name	Submittal	Schedule Requirement/ Payment Milestone
01311	Construction Progress Schedule	Project schedule is submitted and reaches no exceptions taken status.	Prior to Mobilization to the Project Site
01300	Submittals	Shop drawings are submitted and reach no exceptions taken status.	Prior to 75% payment of Mobilization/Demobilization.
01030	Special Requirements	Record documentation is submitted and reaches no exceptions taken status.	Prior to 95% payment.
01311	Construction Progress Schedule	Punch list is completed and corrected.	Prior to 95% payment.

SECTION 01310

MISCELLANEOUS TESTING AND SOIL DATA

PART - GENERAL 1
1.01 - SCOPE 1
1.02 - MEASUREMENT AND PAYMENT 1
1.03 - DEFINITIONS 1
1.04 - SUBMITTALS 2
1.05 - PRODUCT HANDLING – Not Used 2
1.06 - DESIGN CRITERIA 2
PART 2 - PRODUCTS - Not Used 2
PART 3 - EXECUTION - Not Used 2

PART - GENERAL

1.01 - SCOPE

A. The Work of this section includes the furnishing of all labor, materials, tools and equipment required to perform miscellaneous testing as required in the Contract Documents and/or as directed by the Engineer.

B. Existing testing and subsurface soil data, if available, is included in this section.

C. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

B. In addition to the above, measurement and payment shall be in accordance to the following:

1. Payment for testing shall be as specified under the applicable Payment Items included under SECTION 01025, MEASUREMENT AND PAYMENT.

2. Pay all up front costs associated with additional testing. If the testing proves the Work is defective or materials are unsatisfactory then correct all defective Work at no cost to the Owner. If the testing proves the Work and/or materials are satisfactory, then the Owner will pay for costs associated with additional testing.

3. Where the technical section of the Specifications required that a piece of equipment be tested at the manufacturer's facility or at the site, the cost of such tests shall be included in the price of the equipment.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.

2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.

3. "Provide" shall mean furnish and install.

4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Submittals shall include shop drawings including at least the following:

1. Additional Testing.

1.05 - PRODUCT HANDLING – Not Used

1.06 - DESIGN CRITERIA

A. Subsurface soil data, if included in the Contract Documents, is for general information only. The information pertains to the subsoil conditions in the vicinity of the Work and is given to assist in properly evaluating the amount and character of the Work required hereunder. Such data is represented as being the best factual information available.

1. The Owner and Engineer assume no responsibility for the accuracy thereof or for any conclusions that might draw therefrom.
2. It is understood and agreed that, by careful examination, you have satisfied yourself as to the nature and location of the Work, have examined such logs of test borings and/or records made of underground exploration as may be available, understand the character of equipment and facilities needed for the prosecution of the Work, the general and local conditions, and all other matters which could in any way affect the Work under this Contract.
3. Jar samples, if available, may be examined during normal business hours, at the Owner’s office.

PART 2 - PRODUCTS - Not Used

PART 3 - EXECUTION - Not Used

GEOTECHNICAL DATA REPORT

Town of Orleans
Pumping Station No.4
Orleans, Massachusetts

June 2022

AECOM Project No.: 60652634

1.1 PROJECT DESCRIPTION

AECOM is providing engineering services for the design phase associated with the installation of a Pump Station behind Orleans Town Hall that will service a hybrid wastewater collection system. The hybrid system consists of 15,570 linear feet of gravity sewer, 20,750 linear feet of low-pressure sewer, and 7,500 linear feet of force mains.

1.2 PURPOSE OF REPORT

The purpose of this Geotechnical Data Report (GDR) is to provide supporting data for the design services associated with the construction of the Pump Station behind Orleans Town Hall. The proposed Pump Station will service the wastewater collection system in the Meetinghouse Pond area. The data was collected during a subsurface investigation that involved the drilling of test borings, the installation of a groundwater monitoring well, and the laboratory testing of selected soil samples.

1.3 SUBSURFACE INVESTIGATION

The subsurface investigation was performed from May 2 to May 5, 2022 and consisted of the drilling of a total of three (3) test borings. The test borings ranged in depth from 30.0 to 90.0 feet approximately and were drilled by Desmond Well Drilling Inc., based in Orleans, MA.

1.3.1 Drilling and Sampling

Utility locating efforts were implemented prior to the start of borehole drilling. These efforts included Call Before You Dig mark-out and vacuum to 6 feet below the existing ground surface in selected boring locations.

Test borings were typically drilled using 4.25”- I.D. hollow stem augers as noted on the boring logs. Standard penetration test (SPT) split-spoon soil sampling was typically conducted at 5-foot intervals. The SPT soil samples were logged by an AECOM representative in accordance with ASTM D2488.

The as-drilled boring location plan is provided in Attachment 1. The test boring logs from the current subsurface investigation program are provided in Attachment 2.

1.3.2 Groundwater Levels

Groundwater levels at each boring location were estimated at the time of drilling and were recorded on the boring logs. In addition, boring PS4-MW was completed as a groundwater monitoring well and subsequent readings were made on May 05, 2022. The readings are shown in Table 1 below. The groundwater monitoring well installation log is provided in Attachment 3.

Table 1- Summary of Monitoring well readings, (Depth in feet)

Monitoring Well ID	Readings at the time of drilling	Readings on May 5, 2022
PS4-MW	16’	15’

1.3.3 Laboratory Testing

A laboratory testing program was performed to determine the engineering properties of the soil samples collected in the field. Representative soil samples were selected and tested for Sieve Analyses and Hydrometer Analyses. The soil samples were tested by GeoTesting Express in Acton, Massachusetts.

A summary of the soil laboratory testing designation is provided in Table 2. The detailed laboratory test results are provided in Attachment 4.

Table 2: Summary of soil laboratory testing

Boring ID	Sample ID	Depth (ft)	Sieve Analyses (ASTM D6913)	Hydrometer Analyses (ASTM D7928)
PS4-1	SS2	8-10	**X**	
PS4-1	SS4	18-20	**X**	
PS4-1	SS5	23-25	**X**	**X**
PS4-1	SS6	28-30	**X**	
PS4-1	SS16	78-80	**X**	**X**
PS4-2	SS1	6-8	**X**	
PS4-2	SS3	13-15	**X**	**X**
PS4-2	SS6	28-30	**X**	

1.4 REPORT LIMITATIONS

Subsurface conditions may vary beyond a borehole’s location and conditions at and beyond a borehole may change over time as a result of construction activity. Groundwater levels will fluctuate with precipitation, season, construction activities, run-off controls, and other factors. As a result, water levels during construction may vary from those observed during the investigation program.

Classification

ASTM N/A

AASHTO Silty Gravel and Sand (A-2-4 (0))

Sample/Test Description

Sand/Gravel Particle Shape : ANGULAR

Sand/Gravel Hardness : HARD

Client:	AECOM				
Project:	Orleans Pump Sta. 4				
Location:	Orleans, MA			Project No:	GTX-315460
Boring ID:	PS4-2	Sample Type:	jar	Tested By:	ckg
Sample ID:	SS3	Test Date:	05/19/22	Checked By:	bfs
Depth :	13-15	Test Id:	668134		
Test Comment:	---				
Visual Description:	Moist, light brown silty sand				
Sample Comment:	---

SECTION 01311

CONSTRUCTION PROGRESS SCHEDULES

PART 1 - GENERAL 1
1.01 - SCOPE 1
1.02 - MEASUREMENT AND PAYMENT 1
1.03 - DEFINITIONS 1
1.04 - SUBMITTALS 3
1.05 – PRODUCT HANDLING – Not Used 3
1.06 – DESIGN CRITERIA – Not Used 3
1.07 - QUALITY ASSURANCE 3
1.08 - COORDINATION 3
PART 2 - PRODUCTS 3
2.01 - CONTRACTOR'S CONSTRUCTION SCHEDULE, GENERAL 3
2.02 - STARTUP CONSTRUCTION SCHEDULE 4
2.03 - CONTRACTOR'S CONSTRUCTION SCHEDULE (GANTT CHART) 5
2.04 - REPORTS 5
2.05 - SPECIAL REPORTS 5
PART 3 - EXECUTION 5
3.01 - CONTRACTOR'S CONSTRUCTION SCHEDULE 5

PART 1 - GENERAL

1.01 - SCOPE

A. The work covered by this section of the specifications includes furnishing all labor, equipment, tools, and materials, and in performing all operations in connection with developing and updating construction progress schedules.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the Work described in this section shall be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

B. No payment shall be made for any work on this project unless these requirements have been met.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.

2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.

3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

C. Activity: A discrete part of a project that can be identified for planning, scheduling, monitoring, and controlling the construction project. Activities included in a construction schedule consume time and resources.
   1. Critical Activity: An activity on the critical path that must start and finish on the planned early start and finish times.
   2. Predecessor Activity: An activity that precedes another activity in the network.
   3. Successor Activity: An activity that follows another activity in the network.

D. Cost Loading: The allocation of the schedule of values for the completion of an activity as scheduled. The sum of costs for all activities must equal the total Contract Sum unless otherwise accepted by Engineer.

E. CPM: Critical path method, which is a method of planning and scheduling a construction project where activities are arranged based on activity relationships. Network calculations determine when activities can be performed and the critical path of Project.

F. Critical Path: The longest connected chain of interdependent activities through the network schedule that establishes the minimum overall Project duration and contains no float.

G. Event: The starting or ending point of an activity.

H. Float: The measure of leeway in starting and completing an activity.
   1. Float time is not for the exclusive use or benefit of either Owner or Contractor, but is a jointly owned, expiring Project resource available to both parties as needed to meet schedule milestones and Contract completion date.
   2. Free float is the amount of time an activity can be delayed without adversely affecting the early start of the successor activity.
   3. Total float is the measure of leeway in starting or completing an activity without adversely affecting the planned Project completion date.

I. Resource Loading: The allocation of manpower and equipment necessary for the completion of an activity as scheduled.

1.04 - SUBMITTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Construction Progress Schedules includes administrative and procedural requirements for documenting the progress of construction during performance of the Work and shall include at least the following:

1. Startup construction schedule. Within 15 days after execution of the Agreement, submit preliminary schedule indicating planned operations during first 60 days. Include cost of activities expected to be completed before submission and acceptance of the complete schedule.

2. Contractor's construction schedule. Initial schedule, of size required to display entire schedule for entire construction period.

3. Monthly construction schedule updating reports. Submit with Applications for Payment.

4. Daily construction reports. Submit weekly.

5. Material location reports.

6. Site condition reports. Submit at time of discovery of differing conditions

7. Special reports. Submit at time of unusual event

1.05 – PRODUCT HANDLING – Not Used

1.06 – DESIGN CRITERIA – Not Used

1.07 - QUALITY ASSURANCE

A. Comply with the requirements specified in SECTION 01400, QUALITY ASSURANCE.

1.08 - COORDINATION

A. Coordinate preparation and processing of schedules and reports with performance of construction activities and with scheduling and reporting of separate contractors.

B. Coordinate Contractor's construction schedule with the schedule of values, submittal schedule, progress reports, payment requests, and other required schedules and reports.

1. Secure time commitments for performing critical elements of the Work from entities involved.

2. Coordinate each construction activity in the network with other activities and schedule them in proper sequence.

PART 2 - PRODUCTS

2.01 - CONTRACTOR'S CONSTRUCTION SCHEDULE, GENERAL

A. Time Frame: Extend schedule from date established for the Notice to Proceed to date of final completion.

1. Contract completion date shall not be changed by submission of a schedule that shows an early completion date, unless specifically authorized by Change Order.

B. Activities: Treat each story or separate area as a separate numbered activity for each main element of the Work. Comply with the following:

1. Activity Duration: Define activities so no activity is longer than 20 working days, unless specifically allowed by Engineer.

2. Procurement Activities: Include procurement process activities for the following long lead items and major items, requiring a cycle of more than 60 days, as separate activities in schedule. Procurement cycle activities include, but are not limited to, submittals, acceptance, purchasing, fabrication, and delivery.

3. Submittal Review Time: Include review and resubmittal times indicated in DIVISION 1 - GENERAL REQUIREMENTS, SECTION 01300, SUBMITTALS in schedule. Coordinate submittal review times in Contractor's construction schedule with submittal schedule.

4. Startup and Testing Time: Include no fewer than 45 days for startup and testing.

5. Substantial Completion: Indicate completion in advance of date established for Substantial Completion and allow time for Engineer's administrative procedures necessary for certification of Substantial Completion.

6. Punch List and Final Completion: Include not more than 30 days for completion of punch list items and final completion.

C. Constraints: Include constraints and work restrictions indicated in the Contract Documents and as follows in schedule and show how the sequence of the Work is affected.

1. Work Restrictions: Show the effect of the following items on the schedule:

a. Limitations of continued occupancies.

b. Uninterruptible services.

c. Partial occupancy before Substantial Completion.

d. Use of premises restrictions.

e. Seasonal variations.

2. Construction Areas: Identify each major area of construction for each major portion of the Work. Indicate where each construction activity within a major area must be sequenced or integrated with other construction activities to provide for the following:

a. Structural completion.

b. Completion of mechanical installation.

c. Completion of electrical installation.

d. Substantial Completion.

D. Milestones: Include milestones indicated in the Contract Documents in schedule, including, but not limited to, the Notice to Proceed, Substantial Completion, and final completion

E. Upcoming Work Summary: Prepare summary report indicating activities scheduled to occur or commence prior to submittal of next schedule update. Summarize the following issues:

1. Unresolved issues.

2. Unanswered Requests for Information.

3. Rejected or unreturned submittals.

4. Notations on returned submittals.

5. Pending modifications affecting the Work and Contract Time.

F. Recovery Schedule: When periodic update indicates the Work is 10 or more working days behind the current accepted schedule, submit a separate recovery schedule indicating means by which Contractor intends to regain compliance with the schedule. Indicate changes to working hours, working days, crew sizes, and equipment required to achieve compliance, as well as the date by which recovery will be accomplished.

G. Computer Scheduling Software: Prepare schedules using current version of a program that has been developed specifically to manage construction schedules.

2.02 - STARTUP CONSTRUCTION SCHEDULE

A. Bar-Chart Schedule: Submit startup, horizontal, bar-chart-type construction schedule within 15 days of date of execution.

B. Preparation: Indicate each significant construction activity separately. Identify first workday of each week with a continuous vertical line. Outline significant construction activities for first 60 days of construction. Include skeleton diagram for the remainder of the Work and a cash requirement prediction based on indicated activities.

2.03 - CONTRACTOR'S CONSTRUCTION SCHEDULE (GANTT CHART)

A. Gantt-Chart Schedule: Submit a comprehensive, fully developed, horizontal, Gantt-chart-type, Contractor's construction schedule within 30 days of date established for the Notice to Proceed. Base schedule on the startup construction schedule and additional information received since the start of Project.

B. Preparation: Indicate each significant construction activity separately. Identify first workday of each week with a continuous vertical line. For construction activities that require three months or longer to complete, indicate an estimated completion percentage in 10 percent increments within time bar.

2.04 - REPORTS

A. Site Condition Reports: Immediately on discovery of a difference between site conditions and the Contract Documents, prepare and submit a detailed report. Submit with a Request for Information. Include a detailed description of the differing conditions, together with recommendations for changing the Contract Documents.

2.05 - SPECIAL REPORTS

A. Reporting Unusual Events: When an event of an unusual and significant nature occurs at Project site, whether or not related directly to the Work, prepare and submit a special report. List chain of events, persons participating, response by Contractor's personnel, evaluation of results or effects, and similar pertinent information. Advise Owner in advance when these events are known or predictable. Submit special reports directly to Owner within one day(s) of an occurrence. Distribute copies of report to parties affected by the occurrence.

B. Weekly Look Ahead Schedule – The Contractor shall prepare and submit a Weekly Look Ahead Schedule for all crews on the Thursday prior to the next week. Failure to comply with this requirement will result in no payment for work performed.

PART 3 - EXECUTION

3.01 - CONTRACTOR'S CONSTRUCTION SCHEDULE

A. Contractor's Construction Schedule Updating: At monthly intervals, update schedule to reflect actual construction progress and activities. Issue schedule one week before each regularly scheduled progress meeting.

1. Revise schedule immediately after each meeting or other activity where revisions have been recognized or made. Issue updated schedule concurrently with the report of each such meeting.

2. Include a report with updated schedule that indicates every change, including, but not limited to, changes in logic, durations, actual starts and finishes, and activity durations.

3. As the Work progresses, indicate final completion percentage for each activity.

B. Distribution: Distribute copies of accepted schedule to Engineer, Owner, separate contractors, testing and inspecting agencies, and other parties identified by Contractor with a need-to-know schedule responsibility.

1. Post copies in Project meeting rooms and temporary field offices.

2. When revisions are made, distribute updated schedules to the same parties and post in the same locations. Delete parties from distribution when they have completed their assigned portion of the Work and are no longer involved in performance of construction activities.

PART 1 - GENERAL

1.01 - SCOPE

A. The Work of this section includes preparation and implementation of the Quality Assurance Program.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Submittals required under this section include, but are not limited to the following:

1. Within 20 days after receipt of the Notice to Proceed, the Contractor shall submit to the Owner, for review and comment, a draft of the Contractor's CQC program.
2. Prior to commencement of the work but not later than 60 days after the Notice to Proceed, the Contractor shall submit to the Owner for review the following:
    a. The CQC program.
    b. An inspection and test index identifying all required inspections and tests to be performed under the Contract Documents and the CQC program.
    c. Those implementing procedures required for quality control of Work scheduled to be performed within 180 days after receipt of the Notice to Proceed together with a schedule of Contractor procedures for the balance of Work activities.
    d. A list of all quality records that are to be developed and turned over to the Owner as a result of implementing the quality control program and procedures.

3. The Contractor shall submit any revisions or changes to the CQC program or implementing procedures previously submitted to and reviewed by the Owner.
4. Resumes of the QC Manager and Resident inspection personnel shall be submitted and reviewed prior to their commencement of work.
5. Prior to Subcontractors' and suppliers' commencement of work for which their own quality control (SQC) program will be implemented, the Contractor shall review, approve and submit to the Owner for review the SQC program and the resumes of the SQC Manager and Resident inspection personnel to be used.
6. During performance of Contract Work, the Contractor shall submit the following to the Owner for information and as a condition of payment:
    a. Monthly quality control reports as specified herein.
    b. Copies of inspection and test results.
    c. Manufacturer representative reports (in duplicate) within 10 days of each field visit as specified herein including final reports which certify that equipment or systems have been satisfactorily installed and are functioning correctly. If the duration of field visits are greater than one week, the Contractor shall submit weekly reports.

1.05 - PRODUCT HANDLING – Not Used

1.06 - DESIGN CRITERIA – Not Used

1.07 - REFERENCED STANDARDS

A. The Contractor shall indicate any instance where specified reference standards conflict with Contract Documents and request clarification from Owner before proceeding.

B. Where reference is made to one of the above standards, the version in effect at the time of bid opening shall apply.

1.08 - QUALITY CONTROL AND CONTROL OF WORK

A. The Contractor shall control the quality of Work including work of its Subcontractors and suppliers. The Contractor shall develop and maintain a quality control program which complies with the requirements of this Section. The Contractor Quality Control (CQC) program shall explain the Contractor's approach to on-site quality control, off-site quality control, the CQC organization, documentation of quality control activities, and provide all other information necessary to demonstrate to the Owner that the Contractor and its Subcontractors and suppliers will provide quality control services that comply with the Contract Documents. The CQC program shall identify the Contractor's individuals responsible for the execution of the program and identify those Subcontractors/suppliers working to the CQC program and those working to their own Subcontractor/Supplier Quality Control (SQC) program. The Quality Control programs shall apply to the control of quality throughout all areas of contract performance including the procurement, identification, stocking, and issue of material; the entire process of construction; and the installation and testing of equipment.

B. Overall administration of the CQC program shall be vested in an element of the Contractor's organization, hereinafter referred to as the QC Organization, under a QC Manager who has clear access to senior level offsite home office management and to Subcontractors' officers responsible for the execution of the SQC Program. The QC Manager shall manage and administer the CQC program. The QC Manager shall be assigned full time to the Project for the duration of the Contract, shall be on-site at all times and shall have no other duties in the company. The Contractor shall perform the work covered by this Section with a QC Manager having five (5) years of experience, all in the last ten (10) years, in quality control management of resident inspection personnel performing quality control inspection on construction Projects, and with a staff of resident inspection personnel each having three (3) years of experience, all in the last ten (10) years, in quality control inspection on construction Projects. The staff of resident inspection personnel shall inspect the Work in process for completeness and acceptance including multi shift Work and multi operations occurring concurrently. The size and composition of the resident inspection staff may vary as the job progresses but at all times it shall be compatible with the level of effort and capability required by the Contract and construction schedule.

C. The QC Organization shall consistently maintain quality requirements and shall be independent from that portion of the Contractor's organization responsible for production.

D. Written quality control inspection and test procedures shall be used for all operations. These procedures shall contain instructions for performing the required inspection or test, contain the accept/reject criteria for each inspection or test activity (i.e., applicable drawing, specification section, industry code or standard), shall establish the frequency for performing the inspection or test, and shall provide for recording the results of inspections and tests on checklists. These procedures shall be available at all locations where inspections and tests are to be performed. Payment will not be processed until these procedures are submitted to and reviewed by the Owner.

E. The Contractor's procurement documents shall require subcontractors and supplies to implement their own (SQC) program or require them to implement the CQC Program. Copies of the Contractor's procurement documents shall be provided to the Owner in accordance with the requirements specified herein. The Contractor shall comply fully with manufacturers' instructions, including completing each step-in sequence. Should manufacturers' instructions conflict with Contract Documents, the Contractor shall request clarification from the Owner before proceeding.

F. Work to be done away from the construction site is subject to inspection by the Owner during its fabrication, manufacture, testing, or before shipment. The Contractor shall give notice to the Owner of the place and time where such fabrication, manufacture, testing, or shipping is to be done. Such notice shall be in writing and delivered to the Owner in accordance with SECTION 01680, PHYSICAL CHECKOUT, SHOP, FIELD AND FUNCTIONAL TESTING so that the necessary arrangements for inspections and witnessing of shop tests can be made. The Owner has the right but not the responsibility to perform inspection or to witness tests. The Owner's right to perform inspection or to witness tests does not relieve the Contractor of its obligation to comply with the requirements of the Contract Documents.

G. The Owner has the right to perform inspections, witness tests, or otherwise monitor or assess the Work and activities. The Owner's right to perform inspections, witness tests, or monitor or assess the Work and activities does not relieve the Contractor of its obligation to comply with the requirements of the Contract Documents nor does it imply completion of the work.

H. Procedures shall be established for controlling the identification, inspection status, handling, and storage of raw and fabricated material. These controls shall be maintained from the time of receipt of the material until delivery to the Owner, in order to protect the material from damage, deterioration, loss or substitution.
The Contractor shall maintain control over construction and installation processes to assure compliance with specified requirements. In-process and final inspection and testing of construction shall be performed in accordance with written implementing quality control inspection and test procedures to assure that contract requirements have been met. The results of in-process and final inspections shall be recorded on inspection checklists developed by the Contractor and reviewed by the Owner.

I. The CQC and SQC programs are subject to periodic audit by the Owner to assure compliance with the Contract Documents. However, audit by the Owner does not relieve the Contractor of the requirements for the CQC and SQC programs.

J. Monthly quality control reports shall be submitted as specified herein and shall address: status of the Contractor quality control program including procedure development, status of Subcontractor/supplier quality control programs and procedures, number of inspections and tests performed during the month, unsatisfactory and nonconforming items identified as well as those that remain open or were closed during the month, and any other quality problems experienced.

1.09 - QUALITY ASSURANCE/CONTROL OF SUBCONTRACTORS/SUPPLIERS

A. The Contractor shall be responsible for controlling the quality of Work performed by its Subcontractors and suppliers. Unless Subcontractors and suppliers implement their own quality control (SQC) program, approved by the Contractor and reviewed by the Owner, the Contractor shall instruct the Subcontractor or supplier to implement the CQC program on all Work performed and the Contractor shall perform the Quality Control inspections of the Subcontractor's or supplier's Work and activities at their facilities. The CQC program shall list all Subcontractors and suppliers and identify which quality program, CQC or SQC, they are to implement.

1.10 - OWNER FURNISHED TESTING AND INSPECTION SERVICES

A. The Contractor shall furnish a construction schedule and a minimum of 48-hour notice of readiness for testing and inspection of the work. The Owner shall determine the exact time and location of field sampling and testing, and may require such additional sampling and testing as necessary to determine that materials and equipment conform with data previously furnished by Contractor and with the Contract Documents.

B. The Contractor shall schedule the work to permit adequate time for testing and re-testing should test results not conform to the contract documents. Lack of testing or inspection which is attributable to insufficient notice by the Contractor or failure of the Contractor to cooperate, will be cause for rejection of the work.

C. The Contractor shall deliver materials in sufficient quantities to the Owner testing agency as may be required. Laboratory testing shall be performed within a reasonable time, consistent with the specified standards.

D. The Contractor shall furnish material samples and cooperate in the field sampling and testing activities. The Contractor shall furnish personnel, facilities and access to assist in the sampling and testing activities.

1.11 - CONTRACTOR'S ON-SITE QUALITY CONTROL TESTING AND INSPECTION

A. The Contractor shall perform inspections, tests, and other services required by the Contract Documents, the CQC programs, and in accordance with all applicable laws, codes, rules, and regulations and document the results on checklists as specified herein.

B. The Contractor shall provide 48 hour notice to the Owner so that the Owner may witness Contractor’s on-site inspections and tests. The Owner's witnessing of inspections and tests does not relieve the Contractor of its obligation to comply with the requirements of the Contract Documents.

C. The Contractor shall develop an inspection and test index identifying all required inspections and tests as indicated in the Contract Documents and the CQC program. This index shall be submitted to the Owner for review and be included as part of the CQC program. The Contractor shall provide the original inspection and test results upon completion to the Owner witnessing the inspection or test.

1.12 - OWNER QUALITY CONTROL ACTION ITEMS

A. The Contractor shall promptly undertake appropriate action, at no additional cost to the Owner, to respond and correct any unsatisfactory, nonconforming, or otherwise deficient conditions reported to the Contractor by the Owner. These conditions may be identified as a result of Owner inspections, audits or surveillances.

1.13 - MANUFACTURERS' FIELD INSTALLATION SERVICES AND REPORTS

A. When specified in the Contract Documents, the Contractor shall require material or product suppliers and manufacturers to provide qualified staff personnel to observe site conditions, conditions of surfaces and installation, quality of workmanship, start-up of equipment, (test, adjust, and balance of equipment) and to provide instructions for installation.

B. The Contractor shall report to the Owner in writing any observations and site decisions or instructions given by the manufacturer’s representatives to the Contractor that are supplemental or contrary to manufacturers' written instructions.

C. The Contractor shall submit manufacturer representative reports (in duplicate) within 10 days of each field visit, to the Owner for review. If the durations of field visits are greater than one week, the Contractor shall submit weekly reports. Final report shall certify that the equipment or systems have been satisfactorily installed and are functioning correctly.

PART 2 - PRODUCTS AND SERVICES – Not Used

PART 3 - EXECUTION

3.01 - GENERAL

A. Inspections and tests shall be made by the Contractor and the appropriate documentation produced as each element of Work is executed.

3.02 - CONTRACT CLOSEOUT

A. Provide in accordance with SECTION 01700, CONTRACT CLOSEOUT.

END OF TEXT

SEE ATTACHMENT A – ELEMENTS OF A QUALITY CONTROL PROGRAM

ATTACHMENT A - ELEMENTS OF A QUALITY CONTROL PROGRAM

A-1 - INTRODUCTION

A. The Quality Control Program is the basic quality document for the construction of a Project, and it identifies quality program commitments. The Quality Control Program assigns responsibilities, authority levels, and interface requirements for activities, which affect quality. Activities which affect quality are those activities which affect the features and characteristics important to the equality of an item, such as soil compaction, concrete curing, etc. The Quality Control Program serves as the basis for Quality Control Procedures, which contain the administrative and implementation requirements for quality control activities.

B. A Quality Control Program must address the following program topics/elements as they relate to the equipment, material or service being furnished:

1. Organization
2. Quality Assurance Program
3. Design Control
4. Control of Procurement Documents
5. Instruction and Procedures
6. Control of Documents
7. Control of Material, Equipment, and Services
8. Survey/Field Coordination
9. Control of Special Processes
10. Inspection and Tests
11. Unsatisfactory/Nonconformance Control
12. Quality Control Records
13. Surveillance and Audits
14. Attachments:
    a. Inspection Report
    b. Nonconformance Report
    c. List of Procedures
    d. List of Subcontractors and Suppliers and applicable QC program
    e. List of inspections and tests
    f. List of QA Records

A-2 - ORGANIZATION

A. This section the QC program must:

1. Specify that the responsibility for the program is retained and exercised by the Contractor.
2. Describe how responsibility is exercised for the overall program including oversight, and how the Contractor evaluates the performance of work by the delegated organization.
3. Describe lines of communication between the contractor/suppliers to assure quality control program direction.

4. Contain organization charts clearly identifying all on-site and off-site organizations which function under the cognizance of the quality control program (such as design, engineering, procurement construction, subcontractors, suppliers, etc.), lines of responsibility and a description of the size of the quality control organization including the inspection staff.
5. Describe the delegation of contract work and the quality control responsibility for the quality control program and which:
    a. Is at the same or higher organizational level as the highest line manager responsible for contract activities affecting quality.
    b. Has communications with other senior management positions.
    c. Has responsibility for approval of QC Manual(s).
    d. Has no other duties or responsibilities.
    e. Has access to senior level management to identify quality problems; initiate, recommend or provide solutions to problems; and verify implementation of solutions.
6. Require that verification of conformance to established requirements is accomplished by individuals or groups within the QC organization who do not have direct responsibility for performance of the work being verified and are independent from that portion of the contractor's organization responsible for production.
7. Assure that QC personnel are sufficiently free from direct pressures due to cost/schedule, and have the responsibility delineated in writing to stop unsatisfactory work and control further processing, delivery, or installation of nonconforming material.
8. Document and make mandatory the corporate level policies regarding the implementation of the QC program.

A-3 - QUALITY CONTROL PROGRAM

A. This element of the program must:
1. Describe the scope of the QC program applicability.
2. Establish provisions to assure that quality-affecting procedures required to implement the QC program are consistent with QC program commitments and corporate policy and are properly documented, controlled, and made mandatory through signature of the responsible official.
3. Provide for the submittal of quality affecting procedures to the Authority for review with documented agreement of acceptance prior to initiation of activities affected by the program and procedure.
4. Address how management regularly assesses the scope, status, adequacy and compliance of the QC program to the contract requirements.
5. Establish requirements for training such that:
    a. Personnel performing quality-affecting activities are instructed as to the purpose, scope and implementation of the quality control program and procedures.
    b. Personnel verifying activities affecting quality are trained and qualified in the principals, techniques, and requirements of the activity being performed.
    c. Documentation of training and qualification including the subject, content of the training, attendees, and date of attendance is maintained.

A-4 - CONTRACTOR DESIGN CONTROL

A. This element of the program must:

1. Describe the scope of design control, if any, including Contractor's design activities associated with the preparation and review of design documents including the correct translation from the contract documents.

2. Define the organizational responsibilities for preparing, reviewing, approving and verifying design documents.

3. Establish internal and external design interface controls, procedures, and lines of communication among participating design organizations and across technical disciplines.

A-5 - PROCUREMENT DOCUMENT CONTROL

A. This element of the program must:

1. Require that procurement documents are reviewed to determine that quality requirements are correctly stated, inspective and controllable; and there are adequate acceptance and rejection criteria.

2. Require that procurement documents, to the extent necessary, require suppliers and subcontractors to provide an acceptable quality control program.

3. Assure that procurement documents identify applicable technical, administrative and reporting requirements; drawings, specifications; codes and industrial standards; test and inspection requirements; and special process instructions that must be complied with by suppliers.

4. Require procurement documents to indicate that the work is subject to inspection by the Contractor and others on behalf of the Authority during its fabrication, manufacture, testing, or before shipment.

A-6 - INSTRUCTION AND PROCEDURES

A. This element of the program must:

1. Describe organizational responsibilities for assuring that activities affecting quality are prescribed by documented instructions and procedures and that the activities are accomplished through implementation of these documents.

2. Require that instructions and procedures be developed that include quantitative (such as dimensions, tolerances, and operating limits) and qualitative (such as workmanship samples) acceptance criteria for determining that important activities have been satisfactorily accomplished.

3. List, as an attachment, all quality administrative and quality-affecting procedures developed or to be developed to implement the program.

A-7 - DOCUMENT CONTROL

A. This element of the program must:

1. Describe the scope of the document control program and identify the types of documents to be controlled. Controlled documents shall include:

a. Design documents (e.g., calculations, drawings, specifications, analyses).

b. Instructions and procedures for such activities as fabrication, construction, modification, installation, test and inspections.

c. As-built documents.

d. Quality control manuals and quality-affecting procedures.

2. Establish procedures for:

    a. Assurance that changes to documents are reviewed and approved by the same organizations that performed the initial review and approval.

    b. Assurance that the documents are available at the location where the activity will be performed and obsolete documents are removed.

A-8 - CONTROL OF MATERIAL, EQUIPMENT AND SERVICES:

A. This element of the program must:

1. Describe the organizational responsibilities for the procurement of material, equipment and services including the interface between the design, procurement and QC organizations.

2. Describe requirements for verification of subcontractors' and suppliers' activities during fabrication, inspection, testing and shipment of materials, equipment and components by the QC organization in accordance with written procedures to assure conformance to the procurement document.

3. List, as an attachment, all subcontractors and suppliers to be utilized on the project and indicate whose QC program will be implemented on the work.

4. Require receiving inspection by the QC organization to assure:

    a. Material, equipment and components are identified and conform to the procurement document requirements.

    b. That the supplier furnished the documentation required by the Contract and procurement documents and that the documentation identifies the purchased item and the specific procurement requirements (e.g., codes, standards, and specifications) met the item.

5. Describe the measures for the control and identification of materials, equipment, parts, and components to preclude the use of incorrect or defective items. When Contract Documents require to be traceable in order to show locations, heat numbers, chemical analysis, physical properties or other inspection/test results for materials used, the Program must:

    a. Establish procedures to assure that identification is maintained either on the material item or on records traceable to the material/item.

    b. Require that correct identification of material items is verified and documented prior to release for fabrication, assembly, shipment and installation.

    c. Require identification to be traceable to the appropriate drawings; specifications; purchase/manufacturing/inspection documents; and physical/chemical test reports.

6. Describe the control of the handling and storage of material, equipment, and components to assure that they are protected from damage, deterioration, loss or substitution and installed in accordance with the design drawings.

A-9 - SURVEY/FIELD COORDINATION

A. This element of the Program must:

1. Describe the organizational responsibilities for the control of survey accuracy and integrity.

2. Establish a procedure for surveying which addresses:

    a. Verification of the continuing accuracy and integrity of both horizontal and vertical surveys.

    b. Establish control traverse, baseline and benchmarks.

    c. Performance of survey checks of detailed layout of the work and accuracy of preparations for field installations as work progresses.

    d. Verify dimensional location and tolerances of completed work.

3. Require preparation of as-built plans.

A-10 - CONTROL OF SPECIAL PROCESSES

A. This element of the Program must:

1. Contain a listing of those processes that are controlled as special processes.
2. Describe the organizational responsibilities including those of the QC organization for qualification of the special process, equipment, and personnel, in accordance with the applicable codes, standards, QC procedures and specifications.
3. Establish requirements for performance of the special process using qualified procedures, equipment and personnel, including documentation of the results.
4. Establish requirements for retention of qualification records of procedures, equipment and personnel associated with special processes.

A-11 - INSPECTION AND TESTS

A. This element of the Program must:

1. Describe the scope of the inspection and test program and the organizational responsibilities for performing inspection and tests.
2. Require that individuals performing inspections and tests be independent of those who performed or directly supervised the activity being inspected.
3. Establish and document the qualification requirements for inspectors, including Non-Destructive Testing (NDT) personnel, and test personnel.
4. Establish procedures for calibration (technique and frequency), maintenance, and control of measuring and test equipment (instruments, tools, gages, fixtures, etc.) used in acceptance measurement, inspection and testing. The Program/Procedures must:
    a. Require the identification and be able to trace Measuring and Test equipment to the calibration test data.
    b. Specify intervals of calibration based on the required accuracy, purpose, usage or other conditions affecting the measurement.
    c. Require calibration against standards that have a higher degree of accuracy then the Equipment being calibrated to assure that the Equipment being calibrated will be within required tolerance.
    d. Require reference and calibration standards to be traceable to nationally recognized Standards.
5. Require preparation of inspection and test procedures, instructions, or checklists which require:
    a. Identification of characteristics and activities to be inspected or tested.
    b. Describe the method for performing tests or inspections.
    c. Acceptance and rejection criteria.
    d. Prerequisites such as calibrated measuring and test equipment and instrumentation.
    e. Method of recording or documenting inspection and test results and data.
6. Determine acceptability of inspection results or test data and results.

A-12 - UNSATISFACTORY/NONCONFORMANCE CONTROL

A. This element of the Program must:

1. Establish procedures for identification, documentation, segregation, review, disposition and notification to affected organizations of unsatisfactory and nonconforming materials, parts, components, and services, if disposition is other than to scrap.

2. Require re-inspection of items reworked, repaired or replaced to determine compliance with contract documents or approved engineering dispositions.

3. Require nonconformances or unsatisfactory conditions to be corrected or resolved prior to the initiation of pre-operational tests on the item.

A-13 - QUALITY CONTROL RECORDS

A. This element of the Program must:

1. Describe the scope of the QC Records including a list of the record types, which will be generated as a result of implementing the program. QC records include results of reviews, assessments, inspections, tests, audits and surveillances; material analysis; monitoring of work performance; qualification of personnel, procedures and equipment; and other documentation such as drawings, specifications, procurement documents, calibrations procedures and reports, nonconformance reports and corrective action reports.

2. Identify the organizational responsibilities for the implementation and retention activities related to QC records including turnover to the Authority.

A-14 - SURVEILLANCE AND AUDITS

A. This element of the Program must:

1. Require an audit of the QC program on an annual basis by personnel having no direct responsibilities for the area being audited.

2. Establish requirements and procedures describing the audit and surveillance programs which includes:

a. Performance of audits and surveillances to pre-established written procedures or checklists by trained personnel having no direct responsibilities in the areas being evaluated.

b. Analysis of data.

c. Issuance of reports to appropriate management for action, review and assessment.

d. Tracking of deficient areas until satisfactory resolution.

e. Re-audit of deficient areas to verify correction and closure.

A-15 – SUBMITTALS

A. Submit the following:

1. Inspection Report

2. Nonconformance Report

3. List of Procedures

4. List of Subcontractors and Suppliers and applicable QC program

5. List of QA Records

3.10 - SHELTER AND PROTECTION OF MATERIALS 5
3.11 - BRACING, SHORING AND SHEETING 5

PART 1 - GENERAL

1.01 - SCOPE

A. The work of this section includes the furnishing of all labor, tools, equipment and materials, performing all operations necessary to provide temporary facilities as specified herein and as directed by the Engineer.

B. The materials covered by this specification are intended to be standard materials of proven ability as manufactured by reputable concerns. Materials shall be designed and constructed in accordance with the best practice of the industry and shall be installed in accordance with the manufacturer's recommendations. The specifications call attention to certain features but do not purport to cover all details entering into the construction of the materials.

C. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the Work described in this section shall be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.

2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.

3. "Provide" shall mean furnish and install.

4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.

5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.

6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.

7. "Exposed" shall mean not concealed as defined above.

8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.

9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS – Not Used

1.05 - PRODUCT HANDLING

A. All materials and equipment shall be shipped, stored, handled and installed according to the manufacturer’s written recommendations.

B. The materials and equipment shall be stored on a flat, clean, dry surface to prevent damage and shall be covered to prevent exposure to adverse conditions prior to installation.

1.06 - DESIGN CRITERIA

A. The materials specified are intended to be standard materials of demonstrated successful performance, as manufactured by reputable concerns. Materials shall be designed and manufactured in accordance with the highest standards of the industry and shall be installed in accordance with the manufacturer's written recommendations and the Contract Documents. The specifications call attention to certain features but do not purport to cover all details entering into the construction of the materials.

B. If stored for more than two weeks, the materials shall receive all maintenance considerations required by the manufacturer for proper storage of the materials.

PART 2 - PRODUCTS

2.01 - TEMPORARY BUILDINGS

A. Furnish temporary offices, storage and fabrication facilities as required and obtain all necessary applicable permits and/or approvals required for their use. Such buildings shall be located as required and as to not interfere with the work of the project and shall be completely removed at the completion of the work.

B. Engineer's Field Office

1. Provide at the start of the work and for the duration of the project, unless otherwise directed, a field office for the use of the Engineer. The office shall be of approximately 500 square feet divided into three rooms plus a lavatory with hot and cold running water and a closet. Legally dispose of sanitary wastes. The office and rooms shall be constructed in a manner, and of materials, satisfactory to the Engineer. Office shall be weathertight with a minimum of six windows and two exterior doors. The office shall be adequately lighted for detailed working conditions, heated and air conditioned during the appropriate seasons (each room to be individually controlled). Thoroughly clean and mop the trailer on a weekly basis and shall restock all paper products such as but not limited to cups, towels, toilet paper, office copy paper, printer paper and plastic liners for waste baskets.

   a. The rooms shall be designated Room "A", Room "B" and Room “C” and of the approximate sizes: Room "A" - 100 square feet, Room "B" - 300 square feet and Room “C” – 100 square feet. Separate entrances shall be provided to each Room.

   b. Furniture, furnishings and equipment subject to approval of the Engineer, shall be provided in the designated rooms as follows:

      (1) Room "A"

      1 - Executive desk

      2 - Executive chairs

      1 - Bookcase (6' high x 3' wide)

      1 - 4 drawer steel files (locking, legal size)

      1 - Waste basket

      1 - Cordless telephone (with hands free speaker and speed dialing)

      1 - Telephone answering machine with recorder

      1 - Dell All-In-One Printer 962 or equal.

      (2) Room "B"

      3 - Tables (2'-6 x 6'-0)

      1 - Plan table (3’-0” x 4’-0”)

      1 - Plan rack (mobile stand and handling clamps by rack manufacture)

      2 - 4 drawer steel files (locking, legal size)

      12 - Folding metal chairs

      1 - Water Cooler/Heater with up to ten 5-gallon supply containers furnished per month for the duration of the contract

      1 - 18 cubic foot refrigerator

      1 - Small microwave oven

      1 – Black and White and Color copy machine, self-feeding, with 8-1/2" x 11" and 11" x 17" printing capability, enlargement/reduction capability and scanning capability; provide cartridges, toner, paper, etc., for the project duration

      1 – Wi-Fi service (commercial grade with wireless router)

      1 - Push broom and dust pan

      1 - First aid kit

      1 - Fire extinguisher

      1 - Waste basket

1 - Canon Power Shot ELPH 180 - digital camera or equal

(3) Room "C"

1 - Executive desk

2 - Executive chairs

1 - Bookcase (6' high x 3' wide)

1 - 4 drawer steel files (locking, legal size)

1 - Waste basket

1 - Cordless telephone (with hands free speaker and speed dialing)

3. The Engineer's Field Office shall be located at the work site where it will not interfere with the construction work. Space shall be provided with crushed stone base for at least three vehicles adjacent to the office for the exclusive use of the Engineer and visitors. Remove snow, mud, and control dust in the parking area adjacent to the office.

2.02 - TEMPORARY OPERATIONS

A. General

1. The Contractor shall conduct operations in such a manner and sequence that shall neither result in a disruption of the amenities, nor interfere with the functional organization and workings of existing infrastructure.

2. The Contractor is required to provide all temporary facilities required to maintain the operation of the existing infrastructure.

3. The Contractor shall prepare a carefully planned and detailed construction schedule showing the proposed sequences of operation and the methods to be used for maintaining continued operations of existing infrastructure. No payment will be made until the carefully planned and detailed construction schedule has been developed by the Contractor and approved by the Owner and the Engineer. The following provides the minimum requirements to be addressed by the Contractor while preparing the construction schedule. It should be noted that the following is not intended to be all inclusive.

B. In order to maintain continuous operations during construction (if applicable), the Contractor is required to furnish, install, maintain and remove all necessary temporary by-pass systems. The Contractor shall fully maintain the temporary by-pass systems at all times. The temporary by-pass systems shall include, but is not limited to, piping, valves, flow control devices, electrical connections, and power supply, if necessary. The temporary by-pass equipment shall remain in operation and be fully maintained by the Contractor until the applicable equipment or system has been approved by the Engineer and approved by the Owner.

PART 3 - EXECUTION

3.01 - TELEPHONE SERVICES

A. Provide separate temporary telephone services in the field offices for use by the Contractor, subcontractors and the Engineer up to the time of final acceptance of the project.

B. The Engineer's Field Office shall be provided with one telephone line.

3.02 - WATER

A. Make connections to the nearest municipal water supply and use this supply for construction purposes. Any portions, which are to become a part of the permanent system, shall conform to the applicable sections of these specifications.

B. Furnish, maintain and subsequently provide the water meters and backflow preventers at each location. Furnish all extensions required. Provide drinking water, satisfactorily cooled.

3.03 - ELECTRICITY

A. Arrange for, furnish and maintain all expenses for all electricity required for proper lighting, the use of power tools, for temporary heat for construction operations and for field offices up to the time of final acceptance of the project.

B. Furnish all wiring, fixtures, lamps and other accessories required for his or his subcontractors' work, and for proper lighting, the use of power tools and for temporary heat for construction operations up to the time of final acceptance. Power shall be obtained directly from power company lines or from portable, gasoline driven generator sets.

3.04 - SANITARY CONVENIENCES

A. Provide sanitary conveniences for the duration of the project for the use of all persons employed on the project, including all other contractors and subcontractors.

B. Sanitary conveniences shall be properly screened from public observation, provided in sufficient numbers, and in such manner and at such points as shall be approved by the Engineer and/or Owner. The contents shall be removed and legally disposed of at a frequency acceptable to the public health agency having jurisdiction or as required.

3.05 - PROJECT SIGNS

A. Contractor shall provide Project Sign(s) in accordance with SECTION 00902, PROJECT SIGN.

3.06 - BARRICADES AND GUARD LIGHTS

A. Barricades, signs, fences and similar safety and warning devices shall be provided as required, in order to insure the protection of employees and others concerned with their duties and presence on the premises at the project site.

B. Provide and maintain guard lights at all barricades, obstructions in plant ways, and at all trenches and pits adjacent to traveled ways.

3.07 - TEMPORARY HEAT

A. During the months of October through April, provide heat, fuel and services necessary to protect all of the work and materials against injury from dampness and cold and to maintain temperature above 55 degrees F in all enclosed portions of the project. Provide temporary heating devices, electrical power, adequate and proper fuel, fire enclosures, and the like, as required for the work of all trades, and shall have watchmen constantly in attendance when fires are burning. Only Underwriters' Laboratory approved equipment shall be used. Open salamanders will not be allowed.

B. The permanent heating system may be used for temporary heat prior to the occupancy of the buildings by the Owner, or as otherwise approved by the Engineer, however, the use of permanent equipment for temporary heat purposes shall not affect the guarantee period stated elsewhere in these specifications. Operate and maintain the heating system (including fuel) and the equipment used for temporary heat until final completion of the project, and repair and replace all items damaged during temporary use. Clean all of the permanent heating equipment if it is used for temporary heat before turning the system over to the Owner.

3.08 - TEMPORARY CLOSURES

A. Temporary doors and closures for all openings shall be furnished and installed to keep out inclement weather and intruders until the permanent units are installed. Any loss or damage caused by failure to comply with the above provisions shall be replaced and/or repaired at no additional cost to the Owner.

3.09 - SCAFFOLDING

A. Furnish, erect, maintain in a safe condition and remove all scaffolding required for the execution of the work not specified as being furnished under other sections herein.

B. Neither the Engineer nor the Owner will act as an arbitrator on questions of whether the Contractor or any of his subcontractors shall furnish or remove scaffolding required for any portion of the work.

3.10 - SHELTER AND PROTECTION OF MATERIALS

A. Provide adequate storage facilities for all materials required for the work. The facilities shall be enclosed, heated and provided with moisture control, as required to provide adequate protection and shall be satisfactory to the Engineer.

3.11 - BRACING, SHORING AND SHEETING

A. Provide all bracing, shoring and sheeting as required for safety and for the proper execution of work. Unless otherwise ordered by the Engineer, all bracing, shoring, and sheeting shall be removed when work is completed.

3.05 - CONTRACT CLOSEOUT 7

PART 1 - GENERAL

1.01 - SCOPE

A. The work under this section includes furnishing all engineering, materials, labor, and equipment required for traffic management and maintenance on state highways and/or municipal roadways within the limits of construction under this contract.

B. All practices and traffic control devices shall conform to the relevant provisions of the Manual on Uniform Traffic Control Devices, latest edition and State of Massachusetts Department of Transportation (hereinafter called State) Standard Specifications for Road and Bridge Construction.

C. Develop a traffic management plan to be reviewed and approved by the Owner, state, local, and/or jurisdictional agencies as appropriate. The traffic management plan shall meet with standard practices of the above references, requirements of this specification, and special requirements required by the project.

D. Furnish adequate notice to police and fire departments, public transportation authorities, and school departments/districts of the proposed traffic maintenance plan including, but not limited to, detours, lane closures, and alternate routes.

E. Furnish, erect and maintain traffic control devices, as required by the traffic maintenance plan. Provide traffic control devices including lights, markings, barricades, warning signs, and all other safety precautions necessary to protect streets, sidewalks, access to adjoining property, and the traveling public within the area of the construction. Reference is made to the drawings for general guidelines for typical traffic control devices and their placements. These are intended as a guide only, and do not necessarily include all possible warning devices, control devices, or police details, which may be required by the project.

F. Remove, replace and/or reposition all traffic control devices, as necessary.

G. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the Work described in this section shall be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT and as follows:

1. Any traffic control devices provided under this section which are lost, stolen, destroyed or deemed unacceptable while in use on the project, shall be immediately replaced at no additional cost to the Owner.

2. Uniformed Police Officers shall be paid for in accordance with SECTION 01025, MEASUREMENT AND PAYMENT.

3. Payment for work under this Item shall include, but not be limited to, supplying drums, signs, Type III barricades, arrow boards, message boards, removing and replacing damaged traffic control devices, moving and removing drums during non-work hours, providing steel plates as required, and moving traffic control devices to provide uninterrupted abutter access.

4. No payment shall be made for any work on this project until a Traffic Management Plan has been developed, submitted and approved by the Owner and/or Engineer.

B. The Contractor is responsible to obtain and provide a surety bond in the amount of $250,000 to cover the work located within the MassDOT Roadway identified as South Orleans Road (Route 28).

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.

2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.

3. "Provide" shall mean furnish and install.

4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.

5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.

6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.

7. "Exposed" shall mean not concealed as defined above.

8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.

9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Submittals required under this section include, but are not limited to the following:

1. Traffic Management Plan.

2. Written Approval of the Traffic Management Plan from the Owner's Safety Officer/Municipalities' Safety Officer.

1.05 - SPECIAL REQUIREMENTS

A. Notify the Owner, state, local, and/or jurisdictional agencies well in advance of commencing construction. Arrange all detours, partial road closures, and alternate traffic patterns. Inform emergency departments on the daily status of project roadways.

B. Arrange for the services of uniformed police officers, as required to protect and facilitate the flow of vehicular and pedestrian traffic through the construction work zone.

C. During winter months, remove snow and prevent ice conditions within active construction work zones, and assist local or state agencies in clearing roads used as detour routes to facilitate uninterrupted movement of traffic.

D. No Work shall be started on the Project until a detailed Project Schedule and Engineered Traffic Management Plan has been submitted to and approved by the Engineer and MassDOT. In addition, during the construction of the Project update the Project Schedule weekly and inform the Engineer, Owner, MassDOT for work in the State Highway Layout, and all other applicable utilities or other entities affected by the Work in writing of changes to the approved Project Schedule.

PART 2 - PRODUCTS

2.01 - SAFETY CONTROLS AND SIGNING FOR CONSTRUCTION OPERATIONS

A. All signs, barricades and drums shall have reflective sheeting, in accordance with the Manual on Uniform Traffic Control Devices, latest edition and State of Massachusetts Department of Transportation Standard Specifications for Road and Bridge Construction.

B. The Contractor shall use sandbags or provide other suitable means to weigh down Portable Breakaway Barricades to minimize the disturbance of barricades by vandals.

C. Furnish, erect and maintain throughout the construction period warning and directional signs.

D. All traffic control devices not conforming in type, composition, and size to the standards specified herein shall not be used under this contract.

E. Each day, remove or cover all erected signs not consistent with the use of the roadway.

2.02 - FLAGS FOR ADVANCE WARNING SIGNS

A. Standard orange or red-orange flags (16 inch by 16-inch minimum) shall be mounted on all advance work area signs. Flags shall not interfere with a clear view of the sign face.

2.03 - TEMPORARY PRECAST CONCRETE BARRIER

A. Temporary Precast Concrete Barriers shall conform the State Standard Specifications.

B. Furnish, set up, move, maintain, and remove Temporary Precast Concrete Barriers, when positive traffic barriers are needed for traffic control and safety in construction zones.

C. Each run or bay of Temporary Precast Concrete Barrier units shall be installed and fastened together to form a continuous chain, in accordance with the requirements of the state or local agencies having jurisdiction.

2.04 - PORTABLE BREAKAWAY BARRICADE TYPE III

A. Portable Breakaway Barricades shall be a 4-foot unit and conform to the latest edition of the State Construction Standards, as shown on the drawings and any additional requirements of this specification.

B. Reflectorized sheeting shall conform to the State Standard Specifications. Alternating 6-inch-wide stripes shall be orange and white and shall slope downward at 45 degrees toward the end by which traffic is to pass. Pipe shall be Polyvinyl Chloride (PVC) pressure rated SDR 26 conforming to ASTM D2241. Fittings may be PVC conforming to ASTM D2665 or Acrylonitrile Butadiene Styrene (ABS) conforming to ASTM D2661 (Drainage Waste and Vent).

C. Furnish, set up, move, maintain (in good and serviceable condition), and remove Portable Breakaway Barricades as required by the performance of this work or as may be required by jurisdictional authorities, at no additional cost to the Owner.

2.05 - PORTABLE BARRIER FENCE

A. Construction of Portable Barrier Fences shall be as shown on the drawings. Include the necessary signs, reflectors, and all incidental equipment in order to provide the portable barrier fence, complete in place.

2.06 - REFLECTORIZED DRUMS

A. Reflectorized drums shall conform to the State Standard Specification and shall be as shown on the drawings. Other drum-type products providing equivalent target value and stability, and accepted by the State, may be used.

B. Drums shall be used in the protection of driveways, utility structures, and pedestrian control and safety throughout the construction period.

C. Warning lights shall conform to the State Standard Specifications. Drums shall be maintained in a satisfactory manner including the removal of dirt or road film that may cause a reduction in reflective efficiency.

D. The Contractor shall furnish, set up, move, maintain (in good and serviceable condition), and remove reflectorized drums with or without warning lights as required by the performance of his work or as directed by jurisdictional authorities, at no additional cost to the Owner.

2.07 - ADVANCED WARNING ARROW PANELS

A. Advance Warning Arrow Panels shall consist of a black background panel meeting the requirements of the State Standard Specifications. Each Special Lighting Unit shall automatically provide for a minimum of 50 percent dimming from their rated lamp voltage at night. The flashing rate of the lamps shall not be less than 25 nor more than 40 flashes per minute. The arrow panels shall have the capability of the following mode selections: (1) left or right flashing or sequential arrows; and (2) double flashing arrows.

B. Minimum height should be seven feet above the roadway to the bottom of the panel.

2.08 - PORTABLE CHANGEABLE MESSAGE SIGNS

A. The Contractor shall provide portable changeable message signs to provide advance warning to motorists prior to entering the construction area. The portable changeable message signs shall be available for immediate use throughout the duration of the project and be positioned in accordance with the Temporary Traffic Control Plan and/or at the direction of the Engineer. If the unit is found to be defective in any way it shall be replaced immediately at the Contractor's expense.

B. The portable changeable message signs display shall be full matrix LED signs utilizing 18-inch high characters on a display of 3 rows of characters with a minimum of 8 characters per line. The variable message signs shall have an encryption feature that provides data security.

C. Portable changeable message signs shall be Sunray 480 as manufactured by National Sign Incorporated, or equal.

2.09 - TEMPORARY PAVEMENT MARKINGS AND RAISED PAVEMENT MARKERS

A. Paints, tapes, and glass beads used for temporary pavement markings shall conform to the State Standard Specifications. The colors of the marking materials shall be white, yellow or black.

B. Raised pavement markers shall conform to the State Standard Specifications.

2.10 - PEDESTRIAN BARRICADE

A. Pedestrian Barricade shall be ADA Compliant, no trip hazard for pedestrians that meets or exceeds ADA Guidelines and Manual on Uniform Traffic Control Devices Standards.

B. Pedestrian Barricade shall be:

1. Approximately 38-inches high, 43-inches long and 16-inch wide.
2. Modular system can be shaped to any layout.
3. Stable in windy conditions.
4. Quick and easy to install without the use of supporting devices such as sandbags or water barrels.
5. Orange with retroreflective sheeting.
6. Anti-tamper linking system difficult for unauthorized personnel to dismantle when linked.

C. Pedestrian Barricade shall be Plasticade, Des Plaines, IL or approved equal.

D. Contractor shall provide 100 sections of Pedestrian Barricade to be used during construction.

PART 3 - EXECUTION

3.01 - PERFORMANCE

A. Furnish, erect and maintain suitable barriers, barricades, signs, markings, drums and all other traffic control devices necessary to protect all roadways, which are partially obstructed or closed to vehicular or pedestrian traffic, as a result of this project.

B. The Owner reserves the right to suspend work, if inadequate traffic control devices are provided to control and protect both vehicular and pedestrian traffic.

C. Completely backfill all trenches at the end of each workday and/or when work is suspended for indefinite periods. In addition, install temporary trench patch each and every Friday or the last day of the work week, whichever comes first.

D. All damage to the work, pedestrians and/or public/private property due to failure to place or maintain adequate warning or directional signs or other traffic control devices shall be corrected and/or replaced at no additional cost to the Owner.

E. Furnish, supply, maintain and remove temporary white and/or yellow reflectorized and/or black non-reflectorized pavement markings, as required by the performance of his work or as directed by jurisdictional authorities, at no additional cost to the Owner. For the purpose of this specification, temporary markings shall mean markings with an effective marking period of 90-days.

F. Remove existing pavement markings as required by the performance of his work or as directed by jurisdictional authorities, at no additional cost to the Owner. Pavement marking removal methods shall not cause damage to the pavement or cause significant change in its texture. Any damage to the pavement or surfacing caused by pavement marking removal shall be satisfactorily repaired, at no additional cost to the Owner.

G. Provide all necessary temporary pavement markings, and/or temporary raised pavement markers following the completion of each week's operation, change in detour routing or prior to opening the roadway to traffic. Make all necessary arrangements for this work, as required. Continually replace the temporary pavement markings until the final pavement markings have been provided on the final pavement.

H. Transport and relocate any or all signs, barriers, barricades, or other safety devices as specified herein, as required or directed during the project. No additional payment will be provided for relocating and removing traffic control devices.

3.02 - TRAFFIC MANAGEMENT PLAN

A. The hours of operation shall be limited as required by permitting agencies and/or as required by the municipality.

B. $L = S \times W$ for speeds of 45 mph or more and/or $L = W \times S / 60$ for speeds of 40 or less where:

1. L = minimum length of taper
2. S = numerical value of posted speed limit prior to work or 85th percentile speed
3. W = width of offset

C. The maximum spacing between channelizing devices in a taper should be approximately equal in feet to the speed limit.

D. The maximum spacing between channelizing devices should be approximately equal in feet to two times the speed limit.

E. Channelizing devices are to be extended to a point where they are visible to approaching traffic.

F. Warning lights (steady burn Type C) should be used to mark channelizing devices at night as needed.

G. Pavement markings no longer applicable which could create confusion shall be removed. Temporary pavement markings shall be used as necessary and shall be in place prior to work completed each night.

H. Signs and sign supports shall meet criteria in NCHRP 350. No signs shall be attached to drums or cones. All signs shall be attached to independent supports.

I. Exact location of signs shall be approved by the engineer. Distances may be adjusted slightly to meet with field conditions.

J. All traffic control signs shall be completely covered or removed at the end of each work day or when otherwise not in effect.

K. Advisory speed at site to be determined by the municipality prior to the start of construction.

L. As required by the local safety officer, police details shall be used to direct traffic around a work area if traffic must be temporarily stopped or rerouted to allow for movement of work vehicles or other equipment.

M. As required by the local safety officer, in low volume traffic roadways, if the entire work area is visible from one station, a single police officer may be used. A single officer shall be stationed on the shoulder opposite the obstruction or work place or in a position where good visibility and traffic control can be maintained at all times.

N. As required by the local safety officer, in areas of heavy traffic volume or critical work areas, 2 or more police officers shall be used. Where 2 or more police officers are required, all police officers must be in communication with each other and should be clearly visible to the traffic which is being controlled.

O. Flood lights should be provided to mark police detail stations at night as needed.

P. Operation of traffic signal controls at intersections should be coordinated with local authorities.

Q. The contractor shall square off full width of roadway (10:1 slope) at the end of each work day, where applicable.

R. At the end of the work day the contractor shall ensure that safe access/egress of all driveways, entrances and exits are maintained during night time and on weekends.

S. If detour plans which use local roadways are required, they must be approved by engineer in writing prior to commencing work.

3.03 - PORTABLE CHANGEABLE MESSAGE SIGNS

A. Portable changeable message signs shall be positioned in accordance with the traffic control plan and/or at the direction of the Engineer. The portable changeable message signs shall be visible from a minimum distance of 900 feet with a viewing angle of no less than 30 degrees. The Contractor shall take appropriate measures as needed within the roadway layout to provide the required minimum sight distance. The Contractor shall be responsible for the maintenance of each device and appurtenance.

B. The Contractor shall be responsible for all maintenance associated with all portable changeable message signs. This includes, but is not limited to knockdowns, power outages, equipment malfunctions, temporary modifications to support the traffic control plan during construction and any other incidents within the project limits.

3.04 - PEDESTRIAN BARRICADE

A. Pedestrian barricades shall be installed to protect pedestrians at locations within the Project areas.

B. Pedestrian barricades shall be unassembled and reassembled, as necessary, throughout the duration of construction.

C. The Pedestrian Barricades shall remain the property of the OWNER upon completion of the Project. Following construction activities, the Contractor shall clean the Pedestrian Barricade and replace sections damaged during construction.

3.05 - CONTRACT CLOSEOUT

A. Provide in accordance with SECTION 01700, CONTRACT CLOSEOUT.

END OF SECTION

This Page Intentionally Left Blank.

PART 1 - GENERAL

1.01 - SCOPE

A. Section includes administrative and procedural requirements for selection of products for use in Project; product delivery, storage, and handling; manufacturers' standard warranties on products; special warranties; and comparable products including:

1. Definitions.
2. Submittals.
3. Spare parts.
4. Quality assurance.
5. Delivery, storage and handling.
6. Warranty.
7. Products.
8. Substitution and “Or Equal” items.
9. Reuse of existing material.
10. Owner Furnished Products.
11. Manufacturer’s instructions.
12. Special tools.
13. Lubrication.
14. Nameplates.
15. Loads and seismic forces.
16. General material and equipment requirements.
17. Materials and Equipment.
18. Field Quality Control; Installation, and Instructional.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.

6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

C. Products: Items obtained for incorporating into the Work, whether purchased for Project or taken from previously purchased stock. The term "product" includes the terms "material," "equipment," "system," and terms of similar intent.

1. Named Products: Items identified by manufacturer's product name, including make or model number or other designation shown or listed in manufacturer's published product literature, that is current as of date of the Contract Documents.
2. New Products: Items that have not previously been incorporated into another project or facility. Products salvaged or recycled from other projects are not considered new products.
3. Comparable Product: Product that is demonstrated and accepted through submittal process to have the indicated qualities related to type, function, dimension, in-service performance, physical properties, appearance, and other characteristics that equal or exceed those of specified product.

1.04 - SUBMITTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT C-700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Comparable Product Requests: Submit request for consideration of each comparable product. Identify product or fabrication or installation method to be replaced. Include Specification section number and title and Drawing numbers and titles.

1. Include data to indicate compliance with the requirements specified in "Comparable Products" Article.
2. Engineer’s Action: If necessary, Engineer will request additional information or documentation for evaluation within one week of receipt of a comparable product request. Engineer will notify Contractor of acceptance or rejection of proposed comparable product request within 15 days of receipt of request, or seven days of receipt of additional information or documentation, whichever is later. Use product specified if Engineer does not issue a decision on use of a comparable product request within time allocated.

1.05 - PRODUCT HANDLING

A. Comply with the requirements of SECTION 01610, DELIVERY, STORAGE AND HANDLING.

B. Contractor shall arrange deliveries of materials and equipment in accordance with construction Progress Schedule, coordinate to avoid conflict with Work and conditions at Project site.

C. Provide equipment and personnel to handle materials and equipment by methods recommended by manufacturer to prevent soiling or damage to materials or equipment, or their packaging.

D. Deliver, store, and handle products using means and methods that will prevent damage, deterioration, and loss, including theft and vandalism. Comply with manufacturer's written instructions.

E. Owner assumes no responsibility for damage or loss due to storage of materials and equipment.

F. Interior Storage:

1. Store with seals and labels intact and legible.
2. Store materials and equipment subject to damage by elements in weathertight enclosures.
3. Maintain temperature and humidity within ranges required by manufacturer’s instructions.

G. Exterior Storage:

1. Store fabricated materials and equipment above ground, on blocking or skids, to prevent soiling or staining. Cover materials and equipment subject to deterioration with impervious sheet coverings. Provide ventilation to avoid condensation.

2. Store loose granular materials in well drained area on solid surfaces to prevent mixing with foreign matter.

3. Store materials such as pipe, reinforcing steel, structural steel, and equipment on pallets or racks, off ground.

H. Inspection and Maintenance:

1. Arrange storage to provide easy access for inspection, maintenance, and inventory.

2. Make periodic inspections of stored materials and equipment to ensure materials and equipment maintained under specified conditions are free from damage or deterioration, and coverings are in-place and in condition to provide required protection.

3. Perform maintenance on stored material and equipment in accordance with manufacturer's written instructions and in presence of Owner or Engineer.

a. Notify Engineer 24 hrs before performance of maintenance.

b. Submit report of completed maintenance and condition of coverings to Engineer with each Application for Payment.

c. Failure to perform maintenance, to notify Engineer of intent to perform maintenance or to submit maintenance report may result in rejection of material or equipment.

I. Contractor shall assume responsibility for protection of completed construction and repair and restore damage to completed Work equal to original condition.

J. Wheeling of loads over finished floors, with or without plank protection, is not permitted in anything except rubber tired wheelbarrows, buggies, trucks or dollies. This applies to finished floors and exposed concrete floors, as well as those covered with composition tile or other applied surfacing.

K. Where structural concrete is also finished surface, avoid marking or damaging surface.

1.06 - DESIGN CRITERIA – Not Used

1.07 - QUALITY ASSURANCE

A. Comply with the requirements specified in SECTION 01400, QUALITY ASSURANCE.

B. Compatibility of Options: If Contractor is given option of selecting between two or more products for use on Project, select product compatible with products previously selected, even if previously selected products were also options.

1.08 - REFERENCED STANDARDS

A. American Society of Mechanical Engineers (ASME):

1. B1.1: Unified Inch Screw Threads (UN and UNR Thread Form)

B. American Society for Testing and Materials International (ASTM):

1. A123/A123M: Standard Specification for Zinc (Hot-Dip Galvanized) Coatings on Iron and Steel Products

2. A325/A325M: Standard Specification for Structural Bolts, Steel, Heat Treated, 120/105 ksi Minimum Tensile Strength

C. Where reference is made to one of the above standards, the version in effect at the time of bid opening shall apply.

1.09 - SPARE PARTS

A. Provide spare parts for Products as specified in the individual technical Specification sections.

B. Pack spare parts to protect them during storage. Tag spare parts and containers to clearly identify them in accordance with Contractor's parts numbering system as reviewed by Engineer. All parts shall be cross-referenced to their applicable the Specification section.

1.10 - WARRANTY

A. Warranties specified in other Specification sections shall be in addition to, and run concurrent with, other warranties required by the Contract Documents. Manufacturer's disclaimers and limitations on product warranties do not relieve Contractor of obligations under requirements of the Contract Documents.

1. Manufacturer's Warranty: Written warranty furnished by individual manufacturer for a particular product and specifically endorsed by manufacturer to Owner.

2. Special Warranty: Written warranty required by the Contract Documents to provide specific rights for Owner.

B. Special Warranties: Prepare a written document that contains appropriate terms and identification, ready for execution.

1. Manufacturer's Standard Form: Modified to include Project-specific information and properly executed.

2. Specified Form: When specified forms are included with the Specifications, prepare a written document using indicated form properly executed.

3. See other Sections for specific content requirements and particular requirements for submitting special warranties.

C. Submittal Time: Comply with requirements in SECTION 01700, CONTRACT CLOSEOUT

1.11 - PRODUCTS

A. Furnish products of qualified manufacturers suitable for intended use. Furnish products of each type by single manufacturer unless specified otherwise.

B. Do not use materials and equipment removed from existing premises, except as specifically permitted by Contract Documents.

C. Furnish interchangeable components from same manufacturer for components being replaced.

1.12 - ACCEPTANCE OF MATERIALS

A. Unless otherwise specified, only new materials and equipment shall be incorporated in the Work. All materials and equipment furnished by Contractor shall be subject to the inspection and acceptance of Engineer. No material shall be delivered to the Project site without prior acceptance of the Engineer.

B. As specified in SECTION 01300, SUBMITTALS, Contractor shall submit to Engineer, data relating to materials and equipment he proposes to furnish for the work. Such data shall be in sufficient detail to enable the Engineer to identify the particular product and to form an opinion as to its conformity to the specifications.

C. Facilities and labor for handling and inspection of all materials and equipment shall be furnished by Contractor. If the Engineer requires, either prior to beginning or during the progress of the Work, Contractor shall submit additional samples or materials for such special tests as may be necessary to demonstrate that they conform to the Specifications. Such samples shall be furnished, stored, packed, and shipped at Contractor's expense. Except as otherwise noted, Owner will make arrangements for and pay for the tests.

D. Any delay of acceptance resulting from Contractor's failure to submit samples or data promptly shall not be used as a basis of a claim against Owner or Engineer.

E. In order to demonstrate the proficiency of workmen or to facilitate the choice among several textures, types, finishes, and surfaces, Contractor shall provide such samples of workmanship or finish as may be required.

F. The materials and equipment used on the Work shall correspond to the accepted samples or other data.

1.13 - REUSE OF EXISTING MATERIAL

A. Except as specifically indicated or specified, do not use materials and equipment removed from existing structure(s) in new Work.

B. For material and equipment specifically indicated or specified to be reused in Work:

1. Use special care in removal, handling, storage, and reinstallation to ensure proper function in completed Work.

2. Contractor shall arrange and pay for transportation, storage, and handling of products which require off-site storage, restoration or renovation.

3. Off-site storage areas and buildings shall conform to requirements of this Specification section.

1.14 - OWNER-FURNISHED PRODUCTS – Not Used

1.15 - MANUFACTURER'S INSTRUCTIONS

A. Installation of equipment and materials shall comply with manufacturer's instructions. Obtain and distribute printed copies of such instructions to parties involved in installation, including two (2) copies to Engineer.

1. Maintain one (1) set of complete instructions at the Project site during installation and until completion of Work.

B. Handle, store, install, connect, clean, condition, and adjust materials and equipment in accordance with manufacturer's written instructions and in conformance with the Specifications.

1. If Project site conditions or specified requirements conflict with manufacturer's instructions, consult Engineer for further instructions. Do not proceed with Work without written instructions.

1.16 - SPECIAL TOOLS

A. For each type of equipment furnished, Contractor shall provide a complete set of all special tools (including grease guns or other lubricating devices) which may be necessary for the adjustment, operation, maintenance, and disassembly of such equipment. Tools shall be high-grade, smooth, forged, alloy, tool steel. Grease guns shall be lever type.

B. Special tools are considered to be those tools which because of their limited use are not normally available, but which are necessary for the particular equipment.

C. Pack items to protect them during storage. Tag items and containers to clearly identify them in accordance with Contractor's part system, as reviewed by Engineer. Cross reference all items to their applicable Specification section.

D. Special tools shall be delivered at the same time as the equipment to which they pertain. Contractor shall properly store and safeguard such special tools until completion of the Work, at which time they shall be delivered to Owner.

E. Contractor shall furnish and erect one (1) or more steel wall cases with flat key locks and clips or hooks to hold each tool in arrangement.

1.17 - LUBRICATION

A. Where lubrication is required for proper operation of equipment, incorporate necessary and proper provisions in equipment in accordance with manufacturer's requirements. Where possible, lubrication shall be automated and positive.

B. Where oil is used, reservoir shall be of sufficient capacity to supply unit for 24 hr period.

C. Provide adequate and, as far as practicable, automatic means of lubrication for working parts. Arrange lubrication grease nipples, grease boxes and other lubrication devices so that they are readily accessible for routing greasing using grease nipples and Type 316 stainless steel or copper tubing extensions where required. Secure nipples and tubing to the equipment at appropriate locations. Indicate on the working drawings submitted, the types of lubricants to be used. Use grease nipples of a consistent type, Alemite button head type or equivalent. Provide grease gun(s) of the appropriate size(s) and pressure(s).

D. Provide a one (1) year supply of all lubricants necessary for the routine, daily operation of the equipment. All lubricants to be readily available to the Owner. Provide a complete schedule of all the lubricant including the manufacturer name, type, name and local address and phone number of where each lubricant can be purchased for each piece of equipment.

1.18 - NAMEPLATES

A. With the exceptions mentioned below, each piece of equipment shall be provided with a nameplate of non-corrodible metal, securely fastened in place and clearly and permanently inscribed with the manufacturer's name, model or type designation, serial number, principal rated capacities, electrical or other power characteristics, and similar information.

B. This requirement shall not apply to standard, manually operated hydrants or to gate, globe, check and plug valves.

1.19 - LOADS AND SEISMIC FORCES

A. Provide anchorage and supports for products, including equipment, assemblies, and pipe, designed to resist the following loads and seismic forces.

1. Horizontal forces: 100 percent of dead and live loads acting in any direction in the horizontal plane applied to the center of gravity of the load.

2. Vertical forces: 50 percent of the dead and live load, acting either upward or downward applied at the center of gravity of the load.

3. Cantilevered anchorages/supports: 100 percent of the dead and live loads acting in any direction applied at the center of gravity of the load.

B. Seismic force determination: Maximum dead and live loads conditions while operating.

C. Products, including equipment and assemblies, in normal submerged condition operation: analysis of seismic forces in both submerged/dry condition.

D. Above ground tanks, their supports and anchorages: Design fabricate and install to comply with the seismic requirements of applicable codes.

E. Analysis of loads and seismic force: Performed by a registered structural professional Engineer in the Commonwealth of Massachusetts with experience in this type of work.

F. Furnish copies of all analyses with the submittals for equipment, assemblies, and pipe.

1.20 - GENERAL MATERIAL AND EQUIPMENT REQUIREMENTS

A. The requirements of this Paragraph shall constitute the standards for the material and equipment specified herein. Should these requirements conflict with the Supplier’s recommendations or in any way be less stringent than the Supplier’s requirements, they shall be superseded by the Supplier’s requirements.

B. Bolts, Anchor Rods and Nuts:

1. All necessary bolts, anchor rods, nuts, washers, plates and bolt sleeves shall be furnished by the contractor in accordance herewith. Anchor rods shall have suitable washers and hexagonal nuts.

2. All anchor rods, nuts, washers, plates, and bolt sleeves shall be galvanized unless otherwise indicated or specified.

3. Unless otherwise specified, stud, tap, and machine bolts, and nuts shall conform to the requirements of ASTM Standard Specification for Carbon Steel Externally and Internally Threaded Standard Fasteners, Designation A325. Hexagonal nuts of the same quality of metal as the bolts shall be used. All threads shall be clean cut and shall conform to ANSI Standard B1.1 for Unified Inch Screw Threads (UN and UNR Thread Form).

4. Bolts, anchor rods, nuts, and washers, specified to be galvanized, shall be zinc coated, after being threaded, by the hot-dip process in conformity with the ASTM Standard Specification for Zinc (Hot-Galvanized) Coatings on Products Fabricated from Rolled, Pressed, and Forged Steel Shapes, Plates, Bars, and Strip, Designation A123, or the ASTM Standard Specifications for Zinc Coating (Hot Dip) on Iron and Steel Hardware, Designation A153, as is appropriate.

5. Bolts, anchor rods, nuts, and washers specified to be stainless steel shall be Type 316 stainless steel.

6. Anchor rods shall be set accurately. They shall be carefully held in suitable templates of acceptable design. Where indicated on the Drawings, specified, or required, anchor bolts shall be provided with square plates at least 4 in. by 4 in. by 3/8 in. or shall have square heads and washers and set in the concrete forms with suitable pipe sleeves, or both. If anchor are set after the concrete has been placed, all necessary drilling and grouting or caulking shall be done by Contractor and care shall be taken not to damage the structure or finish by cracking, chipping, spalling, or otherwise during the drilling and caulking.

C. Grease Fittings:

1. Provide extension fittings and tubing on all grease fittings that are installed in an inaccessible location. The extension is to be located so that equipment can be lubricated from the operating level without the use of ladders, staging or shutting down the equipment. Tubing: 316 stainless steel.

D. Concrete Inserts For Hangers:

1. Concrete inserts for hangers shall be designed to support safely, in the concrete that is used, the maximum load that can be imposed by the hangers used in the inserts. Inserts for hangers shall be of a type which will permit adjustment of the hangers both horizontally (in one plane) and vertically and locking of the hanger head or nut. All inserts shall be galvanized by the hot-dip process in conformity with the ASTM Standard Specification for Zinc (Hot-Galvanized) Coatings on Products Fabricated from Rolled, Pressed, and Forged Steel Shapes, Plates, Bars, and Strip, Designation A123, or the ASTM Standard Specifications for Zinc Coating (Hot Dip) on Iron and Steel Hardware, Designation A153, as is appropriate.

E. Equipment Foundations, Installation and Grouting:

1. Contractor shall furnish the necessary materials and construct suitable concrete foundations for all equipment installed by him, even though such foundations may not be indicated on the Drawings. The tops of foundations shall be at such elevations as will permit grouting as specified below.

2. All such equipment shall be installed by skilled mechanics and in accordance with the instructions of the manufacturer.

3. In setting pumps, motors, and other items of equipment customarily grouted, Contractor shall make an allowance of at least 1-inch for grout under the equipment bases. Shims used to level and adjust the bases shall be steel. Shims may be left embedded in the grout, in which case they shall be installed neatly and so as to be as inconspicuous as possible in the completed work. Unless otherwise permitted, all grout shall be a suitable non-metallic, non-shrink grout.

4. Grout shall be mixed and placed in accordance with the recommendations of the manufacturer. Where practicable, the grout shall be placed through the grout holes in the base and worked outward and under the edges of the base and across the rough top of the concrete foundation to a peripheral form so constructed as to provide a suitable chamfer around the top edge of the finished foundation.

5. Where such procedure is impracticable, the method of placing grout shall be as accepted byEngineer. After the grout has hardened sufficiently, all forms, hoppers, and excess grout shall be removed, and all exposed grout surfaces shall be patched in an accepted manner and given a burlap-rubbed finish.

F. Equipment Drive Guards:

1. All equipment driven by open shafts, belts, chains, or gears shall be provided with acceptable all-metal guards enclosing the drive mechanism. Guards shall be constructed of galvanized sheet steel (12 gage minimum) or galvanized woven wire or expanded metal set in a frame of galvanized steel members. Guards shall be secured in position by steel braces or straps which will permit easy removal for servicing the equipment. Guards shall conform in all respects to all applicable safety codes and regulations.

2. Provide pivoting access covers for shaft speed measurements.

G. Sleeves:

1. Unless otherwise indicated on the Drawings, or specified, form openings for the passage of pipes, conduits, and circular ducts through floors and walls using sleeves of standard weight, galvanized-steel pipe. Provide sleeves of ample diameter to pass the pipe and its insulation, if any, and to permit expansion as may occur. Provide sleeves that are flush at the walls and at the bottom of slabs and project 4-inches above the finish floor surface. Threaded nipples shall not be used as sleeves.

2. Sleeves in exterior walls below ground or in walls that have liquids on one or both sides, shall have a 2-inch annular fin of 1/8-inch plated welded with a continuous weld completely around the sleeve at mid-length. Galvanize sleeves after the fins are attached.

3. Sleeves shall be set accurately before the concrete is placed or shall be built in accurately as the masonry is being built.

H. Protection Against Electrolysis:

1. Where dissimilar metals are used in conjuction with each other, provide insulation between adjoining surfaces to eliminate direct contact and any resultant electrolysis. Provide bituminous insulation, heavy bituminous coatings, nonmettalic separators or washers, impregnated felt, or other means to provide insulation.

PART 2 - PRODUCTS AND SERVICES

2.01 - MATERIALS AND EQUIPMENT

A. Material and Equipment Incorporated into Work:

1. Conform to applicable specifications and standards.

2. Comply with size, make, type, and quality specified or as accepted by Submittal.

B. Manufactured and Fabricated Materials and Equipment:

1. Design, fabricate, and assemble in accordance with engineering and shop practices standard with industry.

2. Manufacture like parts of duplicate units to standard sizes and gauges, to be interchangeable.

3. Two (2) or more items of same kind shall be identical, by same manufacturer.

4. Material and equipment shall be suitable for service conditions.

5. Equipment capabilities, sizes, and dimensions shown or specified shall be adhered to, unless variations are specifically accepted, in writing.

6. Equipment shall be adapted to best economy in power consumption and maintenance. Parts and components shall be proportioned for stresses occurring during continuous or intermittent operation, and for additional stresses occurring during fabrication or installation.

7. Design so working parts are readily accessible for inspection and repair, easily duplicated, and replaced.

8. Design structural members of equipment for anticipated shock and vibratory loads.

9. Design machinery such that working parts are readily accessible for inspection and repair, and that each part is suitable for the service required.

C. Do not use material or equipment for purpose other than for which it is designed or specified.

PART 3 - EXECUTION

3.01 – FIELD QUALITY CONTROL; INSTALLATION, AND INSTRUCTIONAL SERVICES

A. General

1. Provide on-site services of Supplier's representatives for equipment provided by Contractor during construction, installation, equipment startup, and training of Owner's personnel for equipment or plant operation as specifically required in Specification sections for equipment or systems.
2. Include and pay costs for Supplier's services.
3. Work day is defined as 8 hr period during Owner's or Contractor's typical calendar day. Work day for purposes of this section does not include travel to or from the Project Site.
4. Specification sections include minimum mandays to provide basis for bidding. If additional time is required to perform services Contractor shall include that time in the Contract Price.

B. Installation Services

1. Where installation services are called for in the Specifications, provide competent and experienced technical representatives of manufacturers of material or equipment and systems to resolve assembly or installation procedures attributable to, or associated with, equipment furnished.
2. After equipment is installed, representatives shall perform initial equipment and system adjustment and calibration to conform to the Specifications and manufacturer's requirements and instructions.
3. Provide "Certificate of Installation Services" stating proper adjustments have been made to equipment or system and equipment or system is ready for startup and system demonstration.

C. Training

1. Do not start training until Installation Services have been completed.
2. Where training is called for in the Specifications, provide competent and experienced technical representative of Supplier to provide detailed instructions to Owner's personnel for operation of equipment. Training services shall include operation and maintenance of instrumentation and equipment in classroom and on-site. Training shall include electrical, mechanical, and safety aspects of equipment.
3. Submit documentation identifying name of specific representative, factory authorization, and background of named individual(s) to conduct training. Submit information 30 days before scheduled training period for review and acceptance by Engineer.
4. Coordinate training periods with Engineer, Owner and Supplier's representatives.
    a. No training shall be conducted unless instructor has been accepted by Engineer.
    b. Notify Engineer at least 48 hrs before training sessions are to begin so Engineer can make arrangements with Owner's operating personnel.
    c. Reschedule canceled training sessions 48 hrs in advance.
    d. Failure of Supplier's or manufacturer's representative to appear for scheduled training, failure to notify Engineer 24 hrs in advance of need to cancel scheduled training or failure to arrive within 30 minutes of start of scheduled training shall result in reimbursement to Owner for time lost by Owner's personnel in waiting for arrival of manufacturer's representative. Except in case of failure to arrive on time, time will not exceed 1 hr for each employee scheduled to receive training. Failure to arrive on time will be reimbursed by actual time late, up to 1 hr, after 1 hr training will be rescheduled.
    e. Failure of Supplier's or manufacturer's representative to appear for scheduled training, failure to notify Engineer 24 hrs in advance of need to cancel scheduled training or failure to arrive within 30 min of start of scheduled training shall result in reimbursement to Owner for expenses and time incurred by Engineer in traveling and time spent on-site. Minimum time billed shall be 8 hrs.

5. Similar types of equipment differing in model, size or manufacturer shall require equal service time as stated in specific Specification section.
6. O&M data shall constitute basis of instruction. Review data contents with personnel in full detail to explain aspects of operations and maintenance.
7. Instructional Services shall be completed before start of performance testing required in SECTION 01650, FACILITY START-UP AND TESTING REQUIREMENTS.
8. Provide “Certificate of Instructional Services”, cosigned by Owner and Supplier’s representative, verifying training has been accomplished to satisfaction of each party.

3.02 - CONTRACT CLOSEOUT

A. Provide in accordance with SECTION 01700, CONTRACT CLOSEOUT.

END OF SECTION

This Page Intentionally Left Blank.

SECTION 01610

DELIVERY, STORAGE AND HANDLING

PART 1 - GENERAL 1
1.01 - SCOPE 1
1.02 - MEASUREMENT AND PAYMENT 1
1.03 - DEFINITIONS 1
1.04 - SUBMITTALS – Not Used 2
1.05 - PRODUCT HANDLING 2
1.06 - DESIGN CRITERIA – Not Used 3
PART 2 – PRODUCTS – Not Used 3
PART 3 – EXECUTION – Not Used 3

PART 1 - GENERAL

1.01 - SCOPE

A. This Section specifies the general requirements for the delivery handling, storage and protection for all items required in the construction of the work. Specific requirements, if any, are specified with the related item.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the Work described in this section shall be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS – Not Used

1.05 - PRODUCT HANDLING

A. Transportation and Delivery

1. Transport and handle items in accordance with manufacturer's printed instructions.
2. Schedule delivery to reduce long term on-site storage prior to installation and/or operation. Under no circumstances shall equipment be delivered to the site more than one month prior to installation without written authorization from the Engineer.
3. Coordinate delivery with installation to ensure minimum holding time for items that are hazardous, flammable, easily damaged or sensitive to deterioration.
4. Deliver products to the site in manufacturer's original sealed containers or other packing systems, complete with instructions for handling, storing, unpacking, protecting and installing.
5. All items delivered to the site shall be unloaded by the Contractor and placed in a manner which will not hamper the Contractor's normal construction operation or those of subcontractors and other contractors and will not interfere with the flow of necessary traffic. The Owner shall not offload any materials or equipment at the site.
6. Provide equipment and personnel to unload all items delivered to the site.
7. Promptly inspect shipment to assure that products comply with requirements, quantities are correct, and items are undamaged. For items furnished by others (i.e. Owner, other Contractors), perform inspection in the presence of the Engineer. Notify Engineer verbally, and in writing, of any problems.

B. Storage and Protection

1. Store and protect products and equipment in accordance with the manufacturer's instructions, with seals and labels intact and legible. Storage instruction shall be studied by the Contractor and reviewed with the Engineer by him. Instructions shall be carefully followed and a written record of this kept by the Contractor for each product and pieces of equipment.
2. Arrange storage of products and equipment to permit access for inspection. Periodically inspect to make sure products and equipment are undamaged and are maintained under specified conditions.
3. Provide protective maintenance during storage consisting of manually exercising equipment, inspecting mechanical surfaces for signs or corrosion or other damage, lubricating, applying any coatings as recommended by the equipment manufacturer necessary for its protection and all other precautions to assure proper protection of all equipment stored and for compliance with manufacturers' requirements related to warranties.
4. Store loose granular materials on solid flat surface in a well-drained area. Prevent mixing with foreign matter.
5. Cement and lime shall be stored under a roof and off the ground and shall be kept completely dry at all times. All structural, miscellaneous and reinforcing steel shall be stored off the ground or otherwise to prevent accumulation of dirt or grease, and in a position to prevent accumulations of standing water and to minimize rusting. Beams shall be stored with the webs vertical. Precast concrete shall be handled and stored in a manner to prevent accumulations of dirt, standing water, staining, chipping or cracking. Brick, block and similar masonry products shall be handled and stored in manner to reduce breakage, cracking and spalling to a minimum.

6. All mechanical and electrical equipment and instruments shall be covered with canvas and stored in a weathertight building to prevent injury. The building may be a temporary structure on the site or elsewhere, but it shall be satisfactory to the Engineer. Building shall be provided with adequate ventilation to prevent condensation. Maintain temperature and humidity within range required by manufacturer and to prevent condensation on the equipment being stored.

    a. All equipment shall be stored fully lubricated with oil, grease and other lubricants unless otherwise instructed by the manufacturer.

    b. Moving parts shall be rotated a minimum of once weekly to insure proper lubrication and to avoid metal-to-metal "welding".

    c. Upon installation of the equipment, the Contractor shall start the equipment, at least half load, once weekly for an adequate period of time to ensure that the equipment does not deteriorate from lack of use.

    d. Lubricants shall be changed upon completion of installation and as frequently as required thereafter during the period between installation and acceptance. New lubricants shall be put into the equipment at the time of acceptance.

    e. For electrical equipment (including switchgear, switchboards, motor control centers, and variable frequency drives) installed in areas where temperature and humidity are not controlled for, provide temporary heaters in accordance with manufacturer’s recommendations to prevent condensation prior to energization of equipment.

    f. Prior to acceptance of the equipment, the Contractor shall have the manufacturer inspect the equipment and certify that its condition has not been detrimentally affected by the long storage period. Such certifications by the manufacturer shall be deemed to mean that the equipment is judged by the manufacturer to be in a condition equal to that of equipment that has been shipped, installed, tested and accepted in a minimum time period. As such, the manufacturer will guaranty the equipment equally in both instances. If such a certification is not given, the equipment shall be judged to be defective. It shall be removed and replaced at the Contractor's expense.

FACILITY START-UP AND TESTING REQUIREMENTS

PART 1 - GENERAL 1
1.01 - SCOPE 1
1.02 - MEASUREMENT AND PAYMENT 1
1.03 - DEFINITIONS 2
1.04 - SUBMITTALS 3
1.05 - RELATED DOCUMENTS 3
1.06 - SHOP TESTING 3
1.07 - FIELD/FUNCTIONAL TESTING OF EQUIPMENT 4
1.08 - INSPECTION AND CERTIFICATION OF EQUIPMENT 6
1.09 - GENERAL REQUIREMENTS FOR START-UP 6
1.10 - GENERAL REQUIREMENTS FOR SYSTEM AND PERFORMANCE TESTING 6
1.11 - ROLES AND RESPONSIBILITIES DURING START-UP AND TESTING 7
1.12 - TREATMENT EQUIPMENT USAGE 8
1.13 - OPERATIONAL EXPENSES 8
1.14 - GUARANTEE 8
PART 2 - PRODUCTS 8
2.01 - TEST EQUIPMENT 8
PART 3 - EXECUTION – NOT USED 8

PART 1 - GENERAL

1.01 - SCOPE

A. The Contractor shall be responsible for furnishing of all labor, equipment, appliances and materials and performing all operations in connection with the facility testing and inspection and startup and performance testing prior to final acceptance of all process systems, including the coordination of all performance tests and the furnishing of operating instructions for all equipment.

B. Start-up and Testing Requirements for individual equipment systems shall be as indicated for all equipment as specified in individual sections in DIVISIONS 11, EQUIPMENT, 15, MECHANICAL and 16, ELECTRICAL.

C. HVAC systems shall be tested and balanced in accordance with DIVISION 15, MECHANICAL. Fire Protection Systems shall be commissioned in accordance with DIVISIONS 10, SPECIALTIES and 15, MECHANICAL.

D. Electrical and Fire Alarm tests shall be performed as specified in DIVISION 16, ELECTRICAL.

E. The Instrumentation and Control System tests shall be performed as specified in DIVISION 13, SPECIAL CONSTRUCTION.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.

2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.

3. "Provide" shall mean furnish and install.

4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.

5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.

6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.

7. "Exposed" shall mean not concealed as defined above.

8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.

9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

10. Shop Testing is defined as testing that is done by the manufacturer either at the place of manufacture, the place of assembly, or at another location where the required testing apparatus is located, for the purpose of proving that the equipment meets the requirements of the pertinent technical specification(s).

11. Physical Checkout, Inspection and Certification is defined as the process of physically inspecting products after they have been installed in the work, and then certifying that the products have been properly and completely installed, and are ready for field and/or start-up.

12. Field Testing or Functional Testing is defined as testing that is performed by the Contractor with supplier assistance on products they have been installed in the work and after the performance of physical checkout, for the purpose of proving that the tested products meet the requirements of the pertinent technical specifications.

13. Start-up is defined as the initial operation of a sufficiently completed facility and/or plant process by the Owner, utilizing wastewater and related substances (sludge, wastewater, scum), or other media which the facility has been designed to process.

14. Full System Testing is defined as testing performed on a "system" normally comprised of two or more pieces of equipment, after the equipment has been installed in the work, and after physical checkout and field testing has been completed, for the purpose of providing that the system meets requirements as specified and as indicated.

15. Performance Testing is defined as testing performed to verify performance of the individual components under actual and simulated operating conditions. The tests shall indicate compliance with the performance requirements in the individual specification sections.

1.04 - SUBMITTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

B. Submittals required under this section include, but are not limited to the following:

1. Submit data and certificates in accordance with SECTION 01300, SUBMITTALS and as specified herein.

2. Submit detailed specific start-up plans for each significant mechanical or process system.

1.05 - RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and DIVISION 1, GENERAL REQUIREMENTS, Specification Sections, apply to this section.

1.06 - SHOP TESTING

A. When required by the technical specifications, perform shop testing prior to delivery of the equipment or material. Provide thirty days written notice indicating the time and place of testing. Submit the following for approval thirty days prior to this notice.

1. Description of the Test - Specifically outlining how tests will conform to the requirements in the technical specifications.

2. Testing Devices That Will be used In the Tests - Description must state what portion of the tests that the devices will perform or measure, and device accuracy. Submit sample measurement results and catalog cuts.

3. Personnel Used to Perform the Tests - Resumes, qualifications, and experience shall be submitted. As a minimum, personnel shall have three years' experience with the manufacturer and operation of the equipment to be tested and will have participated in 5 similar tests during this period of experience.

4. Schedule for Testing - Schedule shall include frequency of measurements, personnel present and contingency plans for equipment and/or test failure.

5. Test Forms - Submit all forms used to record and report on shop test data, for approval, prior to the test. Forms shall include description of test, equipment used, personnel present, equipment tag ID numbers, and measurements made. Forms shall conform to the Engineer's format for heading and check off sections. Forms shall have a place for signature by the chief testing person, and an officer of the company that the tests performed are true, accurate, have me the required criteria, and that the equipment will operate as indicated and as specified.

B. Shop test procedures will be reviewed and returned by the Engineer. Incorporate minor comments on the procedures, equipment, or personnel prior to testing. Major comments by the Engineer will require a resubmission of the shop test procedure and proposed test date. The Contractor will be notified, in writing by the Engineer, if a formal resubmission is required with the transmittal of the review comments.

C. Submit the following within one week after completion of the tests for approval:

1. Completed test forms, for each device tested, on forms as approved prior to the test.

2. Completed certification, the content of which was approved prior to the tests.

3. A written summary of testing, reporting on the results and summarizing the entire procedure.

4. A schedule for retesting, if necessary. Perform any retesting required to fulfill the intent of the technical specification test requirements at no additional cost to the Owner.

1.07 - FIELD/FUNCTIONAL TESTING OF EQUIPMENT

A. When required by the technical specifications, perform field or functional testing on installed equipment. If none are required by the technical specifications, complete field / functional testing as detailed below. Field / functional testing shall be in addition to and not in lieu of, any shop testing either required or otherwise performed. Perform testing as a part of the overall testing process defined herein. However, the following specific instructions shall also apply. Provide thirty days written notice indicating the date and time for testing one piece of equipment, or a series of equipment pieces. Submit with this notice the following for approval by the Engineer:

1. Description of the Tests - specifically outlining how the test will conform to the requirements in the technical specifications.
2. Testing Devices That Will Be Used in the Tests - Description shall state what portion of the tests that the devices will perform or measure, and device accuracy. Submit sample measurement results and catalog cuts.
3. Personnel Used to Perform the Tests - Submit resumes, qualifications, and experience. As a minimum, personnel must have three years' experience with the manufacturer and operation of the equipment to be tested and will have participated in five similar tests during this period of experience.
4. Schedule of Testing - Schedule shall include frequency of measurements, personnel present and contingency plans for equipment and/or test failure.
5. Test Forms - Review and comment on all forms provided by the Engineer for recording reporting on the field test data, prior to the test.
6. Material and Equipment Required for the Test - This material and equipment shall be supplied by the Contractor or his/her subcontractors at no additional cost to the Owner.
7. Water and Power Requirements - Water and power requirements shall be identified in the plan by the Contractor and will be supplied by the Contractor for field testing purposes only. The Contractor shall provide all temporary piping and wiring required for field testing; and equipment and labor for the reuse of the test water.
8. Disposal of Waste – The Contractor is responsible for the proper disposal of all wastes generated from the testing at no additional cost to the Owner.

B. Field test procedures will be reviewed and returned by the Engineer. Incorporate minor comments on the procedures, equipment, or personnel prior to testing. Major comments by the Engineer will require a resubmission of the field test procedure and proposed test date. The Contractor will be notified, in writing, by the Engineer if a formal resubmission is required with the transmittal of the review comments.

C. Submit within one week after completion of the tests, the following to the Engineer for approval.

1. Completed test forms for each device tested on forms provided prior to the tests.
2. Completed certification documentation, the content of which was approved prior to the tests.
3. A written summary of testing, reporting on the results and summarizing the entire procedure.
4. A schedule for retesting, if necessary. Perform any retesting required to fulfill the intent of the technical specification test requirements at no additional cost to the Owner.

D. Minimum field test requirements include

1. Calibrate equipment as required. For pumps, use water as a calibration liquid.
2. Test equipment and systems through a normal start, normal stop, and all emergency shutdown sequences.
3. Complete a four-hour running test. For variable speed units, the test shall include running for three complete cycles of one-hour duration at the maximum and minimum speeds for one half of each of those cycles. Operate each system through its normal automatic sequence of operation. During the four-hour test, observe and record all level indications, flow indicators, and pressure indicators.

4. If the equipment utilizes a local programmable logic controller (PLC), verify that the PLC is capable of operating and controlling the system as specified in the individual specification sections. Also verify all communications with distributed control system (DCS) are as specified.

5. For equipment not supplied with a PLC, verify that the instrumentation and control system is capable of operating and controlling the system.

6. Check safety devices, and interlocks for satisfactory operation. Check instrumentation and control systems for conformance with the Specifications.

7. Check for system leaks and proper valve operation.

8. Demonstrate to the Owner's Representative that all temporary jumpers and/or bypass have been removed and that all of the components are operating under their own controls as designated.

9. Coordinate start-up activities with the Owner's representative and with the Engineer prior to commencing system start-up.

E. Motor Testing

1. Visually inspect the motor for any physical damage.

2. Before energizing any machine, visually inspect for serviceability. Verify that proper alignment has been performed. Check nameplate for electrical power requirements.

3. Test run all motors before placing into regular service. A check on the motor for rotation, speed, current and temperature rise shall be made and the results recorded. Maintain the proper color codes for phase identifications. A motor phase rotation meter should be used prior to connection at motor to prevent later swaps of phase wires.

F. Engine Generator Test

1. Visual and Mechanical Inspection.

   a. Compare equipment nameplate data with drawings and specifications.

   b. Inspect physical and mechanical condition.

   c. Inspect correct anchorage and grouting.

2. Electrical and Mechanical Tests.

   a. Perform an insulation-resistance test on generator winding with respect to ground in accordance with ANSI/IEEE Standard 43. Calculate polarization index.

   b. Test protective relay per applicable NETA standards.

   c. Perform phase-rotation test to determine compatibility with load requirements.

   d. Functionally test engine shutdown for low oil pressure, over temperature overspeed, and other features as applicable.

   e. Conduct performance test in accordance with ANSI/NFPA Standard 110, (Installation Acceptance).

   f. Verify correct function of governor and regulator.

   g. Test circuit breakers per applicable NETA standards.

   h. Perform load bank testing for a minimum of 1 hour.

1.08 - INSPECTION AND CERTIFICATION OF EQUIPMENT

A. Upon completion of installation of all permanent equipment and related shop and field testing, the manufacturer's technical service representative shall inspect and, as necessary, adjust and/or calibrate the equipment. The inspection shall consider the completeness and integrity of the installation, the alignment and clearances of the equipment parts with respect to each other, and the sufficiency of any required sealing, lubricants or packing.

B. The technical service representative shall submit the results of the inspection including certification that the equipment was properly installed and is operating as specified and as installed. The report should verify that the equipment is ready for sustained operation and free from defects that would render the guarantee null and void.

1.09 - GENERAL REQUIREMENTS FOR START-UP

A. Fourteen (14) days' notice of scheduled start-up of individual equipment items or mechanical systems, dates shall be given to the Engineer. The following representatives, as appropriate, shall be present simultaneously for the start-up.

1. General Contractor
2. Electrical Subcontractor
3. Equipment Manufacturer's Technical Service Representative
4. Instrumentation and Control Equipment Representative
5. System Integrator
6. Owner and Owner's Representative

B. The following must be completed prior to start-up and testing:

1. Controls and alarm systems shall be tested to show it is capable of transmitting and annunciating all specified control points to the plant-wide SCADA system.
2. All safety equipment shall be installed and operating properly.
3. Initial training of facility personnel by manufacturer's technical service representatives shall be completed.
4. All spare parts, tools, lubricants shall be delivered to the Owner.
5. Installation drawings delivered to the Owner.

C. The Contractor shall, upon orders by the Engineer, startup, adjust and place in satisfactory operation all plant equipment constructed under this contract. At the discretion of the Engineer, individual startups may be required for various phases of the work or individual systems. The Engineer may order the start-ups prior to the completion of non-essential items of work.

D. As soon as practical after the initial start-up, the Contractor shall arrange for the manufacturer's representatives to perform all field tests and complete all additional training.

1.10 - GENERAL REQUIREMENTS FOR SYSTEM AND PERFORMANCE TESTING

A. Full System Tests: Full System tests on all items and systems shall be made at the wastewater treatment facility after all equipment has been installed for a given unit process and a final testing and inspection and all startup activities have been satisfactorily conducted by the Contractor, and the Contractor is satisfied that the equipment is operating as specified. The successful performance of all systems, equipment and components for each unit process shall be demonstrated to the satisfaction of the Engineer by completing a full system demonstration test. Unless especially required in technical specifications, the demonstration test will consist of operating the system, for an uninterrupted seven (7) day period for 24 hours per day or as otherwise specified. Failure of equipment to operate as specified will require the test to be reperformed for the full period. At no time during the startup of the facilities shall any equipment or system be operated under a more severe condition than the maximum design condition for which the equipment is rated.

B. Performance Tests and Performance Criteria: Specific performance testing criteria are listed for specific equipment and systems in the Divisions 11 through 16 specifications. Compliance with these performance test requirements shall be demonstrated during the full system testing or otherwise demonstrated prior to substantial completion.

C. In the event of a failure to demonstrate satisfactory facility performance on the first or any subsequent attempt, it shall be the responsibility of the Contractor to make all the necessary and required changes, replacements, and tests to make the units meet the specified operating and efficiency requirements.

D. If equipment is unable to operate, initial calibration and/or additional adjustments are required, or representatives are absent, the start-up or tests shall be canceled at that time and full rescheduling will be required. Damages shall be assessed to the Contractor for Owner's, Owner's Representative, and Manufacturer's Representative time and expenses wasted on scheduling, coordinating and attending the failed performance test.

E. The Contractor shall be fully responsible for the operation and maintenance of the new equipment and systems until the full system and performance tests have been completed and substantial completion and facility acceptance has been issued.

F. Once the complete facility system is fully tested, operational, calibrated and capable of performing, the Owner shall take occupancy of the equipment and the warranty period shall begin. It should be noted that the final performance test is meant to check complete performance of the equipment and is not a time for contractors' or manufacturers' representatives to begin major calibrating, testing, and adjusting of their equipment to insure it works or performs as required.

G. Substantial completion and facility acceptance will not be issued until the full system tests are completed successfully for all unit processes.

1.11 - ROLES AND RESPONSIBILITIES DURING START-UP AND TESTING

A. The Contractor shall not operate any of the existing facilities at any time. This shall include the starting and stopping of equipment or opening and closing of valves. Whenever the Contractor believe their work will affect or be impacted by the existing facilities operation, they shall so notify the Engineer in writing three (3) working days prior to the intended start of the work. This notification shall clearly detail the work to be completed, the method by which the existing facilities operation may be impacted, and the assistance requested of the Owner.

B. Contractor's Responsibilities: The Contractor shall be responsible for furnishing and installing all of the several kinds and types of equipment required in the treatment facilities, and for testing each individual piece of equipment, all combinations of equipment as they may operate one in conjunction with another, and the complete system, such that each component and the total unit may operate in an acceptable fashion to the Engineer, the Owner, and to any other municipal, State or Federal authorities within whose jurisdiction the operation of the facility may be a concern, at no additional costs to the Owner:

1. Develop specific start-up plans and schedule.

2. Provide specific start-up material and operating supplies until substantial completion. Supplies include lubricants, chemicals, gases, specialized fluids, electric power, water and all other required appurtenances.

3. Provide all specified third-party testing and laboratory costs at no additional costs to the Owner.

4. Provide manufacturer's representative to provide guidance during performance testing.

5. Provide to the Engineer a list of 24 hour, "on call" representative supervisory persons who will monitor the start-up and performance testing.

6. Provide the necessary craft or labor assistance, in the event of an emergency equipment failure requiring immediate attention, (emergency is defined as a failure of function which precludes the further operation of a critical segment of; or the whole of the work) with a response time of not less than four hours from the time of notification. The time of notification is defined as the time of contact between the Engineer's representative and the Contractor's representative.

7. Correct all failures or equipment problems identified during start-up when notified by the Engineer. Resolve and correct all equipment or system failures during the performance testing.

8. Provide manufacturer's representatives and operating supplies for retesting of systems that fail to pass the initial performance tests due to deficiencies in products or workmanship at no additional cost to the Owner.

9. Provide training as specified.

10. Prior to starting the start-up and testing, the Contractor shall provide and field calibrate certified flow meters (by using volumetric calibration), flow recorders, all electrical meters, and electrical recorders. The Contractor shall provide a test procedure, wiring diagram of field test recorders and instrumentation, and a field calibration report on the installed meter.

11. Review procedures for performance testing.

12. Attend meetings related to the review of start-up plan(s).

13. Clarify submittals, testing requirements, schedules, or other items related to the start-up of the equipment and facilities specified and indicated in the Contract Documents.

C. The Owner's Responsibilities:

1. Assist in the start-up testing activities. The Owner will endeavor to be cooperative with the Contractor when required. However, it is emphasized that the existing facilities operations and treatment take precedence and only requests that do not adversely affect the flow or treatment will be considered. Additionally, any assistance given to the Contractor must be completed when the Owner's schedule and manpower permit. There may be instances when the Owner cannot provide assistance at the time of the Contractor's request and this shall not be the basis for a claim by the Contractor.

2. Provide staff to operate and maintain equipment, systems, and facilities requiring start-up.

1.12 - TREATMENT EQUIPMENT USAGE

A. Any partial or full usage of the proposed equipment by the Owner, and/or his employees or agents, prior to acceptance shall be the responsibility of the Contractor.

1.13 - OPERATIONAL EXPENSES

A. During the construction stage and start-up period, before the facilities are turned over to the Owner, the Contractor shall bear all expenditures and operational expenses of all systems included in the project, including electrical power, chemicals, maintenance, and fuel.

B. The Contractor shall be responsible for the proper handling, sampling, and lab testing and analysis from the testing and start-up of facility processes.

1.14 - GUARANTEE

A. The Contractor shall guarantee the materials and equipment furnished and the performance thereof to be in accordance with the requirements of the Contract Documents and agrees upon written notice to make promptly and without charge, all necessary changes, corrections, and replacements (including installation of replacement parts) required to make good all defects developing in the material or equipment, under ordinary use and proper care, within a period of twelve months after final acceptance or substantial completion of the treatment facilities.

PART 2 - PRODUCTS

2.01 - TEST EQUIPMENT

A. The Contractor shall provide all test equipment, including kWh demand meters and recorders, instruments, analyzers, handling equipment, etc., required to sample and test the various systems. All test equipment must have been tested and calibrated within 6 months of their use on this contract.

PART 3 - EXECUTION – Not Used

END OF SECTION

SECTION 01680

PHYSICAL CHECKOUT; SHOP, FIELD AND FUNCTIONAL TESTING

PART 1 - GENERAL 1
1.01 - SCOPE 1
1.02 - MEASUREMENT AND PAYMENT 2
1.03 - DEFINITIONS 2
1.04 - SUBMITTALS 3
1.05 - PRODUCT HANDLING – Not Used 3
1.06 - DESIGN CRITERIA – Not Used 3
1.07 - ROLES AND RESPONSIBILITIES 3
1.08 - CHECKOUT PLAN 3
1.09 - SHOP AND FIELD TESTING REQUIREMENTS 4
1.10 - WITNESSING OF TESTS 4
1.11 - SHOP TESTING 4
1.12 - FIELD TESTING OF EQUIPMENT 5
1.13 - PHYSICAL CHECKOUT AND INSPECTIONS 6
1.14 - FUNCTIONAL TESTING 7
1.15 - CORRECTIONS TO THE WORK 7
1.12 - SAFETY 7
PART 2 - PRODUCTS - Not Used 8
PART 3 - EXECUTION – Not Used 8

PART 1 - GENERAL

1.01 - SCOPE

A. The physical inspection and testing requirements in this Section are in addition to those requirements defined in the individual technical specification sections. This testing shall be performed during Contract Closeout.

B. Provide the following checkout and testing activities:

1. Physical checkout and inspection of equipment and materials to verify conformance of the installed equipment and materials as indicated and as specified.

2. Shop Testing of equipment as specified in the sections of Division 2 through 16 and as specified herein.

3. Field Testing of equipment as specified in the sections of Divisions 2 through 16 and as specified herein.

4. Functional Testing of equipment as specified in the sections of Divisions 2 through 16 and as specified herein.

5. Provide a Checkout Plan covering the entire checkout and testing process as specified herein.

C. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.
10. Shop Testing: Is defined as testing that is done by the Supplier or Manufacturer, either at the place of manufacture, the place of assembly, or at another location where the required testing apparatus is located, for the purpose of proving that the equipment supplied under the Contract meets the requirements of the pertinent technical specification(s).
11. Field Testing: Is defined as testing that is performed by the Contractor, on equipment supplied under the Contract after its been installed in the Work, and after the performance of physical checkout, for the purpose of proving that the tested equipment meets the requirements of the pertinent technical specifications.
12. Physical Checkout: Is defined as the process of physically inspecting equipment after it has been installed in the Work to determine if the equipment has been properly and completely installed and is ready for Field and/or Functional Testing.
13. Functional Testing: Is defined as testing performed on a "system" normally comprised of two or more pieces of equipment, after the equipment has been installed in the Work, and after Physical Checkout and Field Testing has been completed, for the purpose of proving that the system meets requirements as specified and as indicated.
14. Supplier's Representative: Sometimes referred to in the technical specifications as a Factory-Trained Service Representative, is defined as a person, or persons provided by the Supplier, who is qualified by having the training and experience, to provide technical and/or process related advice, and/or assistance, relating to the installation or utilization of the Products provided by that same Supplier, for installation and utilization in the Work.
15. The Testing and Checkout Coordinator: Is defined as the person provided by the Contractor to coordinate and oversee the total spectrum of testing and inspection activities required by the Contract Documents. The Testing and Checkout Coordinator shall have been in responsible charge of two similar Projects in the last four years.

1.04 - SUBMITTALS

A. Shop Drawings and/or brochures shall be submitted for all items to be furnished in accordance with the provisions of the DOCUMENT 00700, GENERAL CONDITIONS and SECTION 01300, SUBMITTALS.

1.05 - PRODUCT HANDLING – Not Used

1.06 - DESIGN CRITERIA – Not Used

1.07 - ROLES AND RESPONSIBILITIES

A. Provide all outside services, materials, labor, supplies, test equipment and other items necessary to perform the testing specified herein. In addition, arrange for and provide the participation or assistance of survey crews, quality control technicians, Supplier's representative(s), and required governmental agency representatives.

B. Provide the services of the Supplier’s representative(s) for the following activities:

1. Assistance during installation.
2. Shop Testing
3. Field Testing
4. Functional Testing

C. The Supplier's representatives activities required by this Section are in addition to the requirements for vendor training and other services specified elsewhere in the Contract Documents. Timing for the performance of these services are to be defined in the Contractors Checkout Plan, specified herein.

D. The Owner will review and comment on the Contractor’s deliverables, participate in the physical inspection activities, witness the shop and field testing, and witness functional testing. The Owner’s right to perform inspections, witness tests or monitor or assess the Work and activities does not relieve the Contractor of its obligation to comply with the requirements of the Contract Documents nor does it imply completion of the Work.

1.08 - CHECKOUT PLAN

A. Submit a Checkout Plan based upon the requirements defined herein to the Owner. Six copies of the Checkout Plan (preliminary) shall be submitted for review 90 days prior to the proposed date of the first test. The plan shall define:

1. The performance of physical inspections, shop, field and functional tests including:
    a. A chronological schedule of all testing and inspection activities.
    b. A checklist of all inspection and testing activities broken down by location, discipline, system, and device or item.
    c. All blank forms proposed by the Contractor for verification or recording of the shop testing.
    d. An index which cross references the forms to their intended application(s).
    e. A list of all shop tests, and supplier certifications, including those required by the applicable technical specifications. Provisions shall also be included for retesting, in the event it is required.
2. Participants in the testing.
3. Special test equipment.
4. Sources of the test media (water, power, air.)
5. The proposed method of delivery of the media to the equipment to be tested.
6. Temporary or interim connections for the sequencing of multiple units.
   Ultimate disposal of the test media.

B. The plan shall be reviewed by the Owner, modified or revised as necessary by the Contractor, then re-reviewed by the Owner. The Contractor shall continue to update the checkout plan, working in conjunction with the Owner prior to the start of the scheduled equipment checkout and functional testing activities as specified herein. Each specific element of the plan must receive review or comment by the Owner two weeks prior to the actual commencement of testing as defined herein.

C. The Contractor shall designate, in the checkout plan, a Testing and Checkout Coordinator, to coordinate and manage the activities defined in the checkout plan.

1.09 - SHOP AND FIELD TESTING REQUIREMENTS

A. In the event no reference to procedures are made, or no procedures for shop and field testing are contained in a technical specification for the following test parameters, the following shall be the checkout requirements. Should these requirements conflict with the Supplier's recommendations or in any way be less stringent than the Supplier's requirements, they shall be superseded by the Supplier's requirements for checkout testing.

B. Hydrostatic Testing:

1. AWWA C600 standards latest edition are the standards for all hydrostatic testing.

2. Visually inspect all welds prior to testing, for cracks, undercut on surface greater than 1/32-in. deep, lack of fusion on surface, reinforcement greater than Table 127.4.2 located in ANSI B31.1 Power Piping, and incomplete penetration (when accessible). Repair or rework as directed by the Owner, at no additional cost to the Owner.

3. At no time during hydrostatic testing shall any part of the piping system be subjected to a stress greater than 90 percent of its yield strength at test temperature.

4. After 10 minutes of full hydrostatic test pressures, make an examination for leakage of all joints, connections, and all regions of high stress, such as around openings and thickness transition sections.

5. Unless otherwise specified, the minimum required hydrostatic test pressure shall be 1.5 times the design pressure as specified and as indicated.

6. Pressure holding time shall be 10 minutes plus the time required to inspect for leakage.

7. Maximum pressure shall not exceed the maximum rated pressure for any component in the system being tested.

1.10 - WITNESSING OF TESTS

A. Provide 30 days written notice to the Owner so that the Owner, may witness the Contractor's Shop, Field, and Functional tests. The Owner may witness the performance of any or all tests, at their option.

1.11 - SHOP TESTING

A. When required by the technical specifications, perform shop testing prior to delivery of the equipment or material. Provide thirty (30) days written notice indicating the time and place of testing. Submit the following for review thirty days prior to this notice:

1. Description of the test: Specifically outlining how tests will conform to the requirements in the technical specifications.

2. Testing devices that will be used in the tests: Description must state what portion of the tests that the devices will perform or measure, and device accuracy. Submit sample measurement results and catalog cuts.

3. Personnel used to perform the tests: Resumes, qualifications, and experience shall be submitted. Personnel shall have three (3) years' experience with the manufacture and operation of the equipment to be tested and will have participated in 5 similar tests during this period of experience.

4. Schedule for testing: Schedule shall include frequency of measurements, personnel present, and contingency plans for equipment and/or test failure.

5. Test forms: Submit all forms used to record and report on Shop Test data, for review, prior to the test. Forms shall include description of test, equipment used, personnel present, equipment tag ID numbers, and measurements made. Forms shall have a place for signature by the chief testing person, and an officer of the company that the tests performed are true, accurate, have met the required criteria, and that the equipment will operate as indicated and specified.

B. Shop test procedures will be reviewed and returned by the Owner within 30 days of receipt. Incorporate comments on the procedures, equipment, or personnel prior to testing. Comments by the Owner will require a resubmission of the shop test procedure and proposed test date.

C. Submit the following within one week after completion of the tests for review:

1. Complete test forms, for each device tested, on forms as reviewed prior to the test.

2. Completed certification, the content of which was reviewed prior to the tests.

3. A written summary of testing, reporting on the results and summarizing the entire procedure.

4. A schedule for retesting, if more testing is required. Perform any retesting required to fulfill the technical specification test requirements at no additional cost to the Owner. Additional travel required by the Owner to witness retesting shall be provided by the Contractor, at no additional cost to the Owner. Reimbursement for travel expenses required for retesting will be applied as a debit against the Contractor's subsequent Application for Payment.

1.12 - FIELD TESTING OF EQUIPMENT

A. When required by the technical specifications, perform field testing on installed equipment. Field testing shall be in addition to, and not in lieu of, any shop testing either required or otherwise performed. Perform field testing as a part of the overall physical and functional testing process defined herein and in accordance with the reviewed checkout plan. However, the following specific instructions shall also apply. Provide ninety (90) days written notice indicating the date and time for testing one piece of equipment, or a series of equipment pieces. Submit with this notice the following for review by the Owner:

1. Description of the tests: Specifically outlining how the test will conform to the requirements in the technical specifications.

2. Testing devices that will be used in the tests: Description shall state what portion of the tests that the devices will perform or measure, and device accuracy. Submit sample measurement results and catalog cuts.

3. Personnel used to perform the tests: Submit resumes, qualifications, and experience. Personnel must have three years experience with the manufacture and operation of the equipment to be tested and will have participated in five similar tests during this period of experience which shall have occurred over the last five years.

4. Schedule of Testing: Schedule shall include frequency of measurements, personnel present, and contingency plans for equipment and/or test failure.

5. Test forms: Submit Contractor provided test forms to the Owner for recording and reporting on the Field Test data, prior to the test.

6. Material and equipment required for the test: This material and equipment shall be supplied at no additional cost to the Owner.

7. Water and Power For Field Testing: Water and power for field testing shall be provided by the Contractor at no additional cost to the Owner. The Contractor shall provide all temporary piping and wiring required for field testing; and equipment and labor for the reuse of the test water. When testing is performed with water during freezing conditions the Contractor shall take measures to prevent damage to the Work caused by freezing of the water.

8. Provide seven days written notice to the Owner prior to the actual start of any testing. This will include a statement by the Contractor that the equipment and facilities to be tested have been thoroughly inspected and cleaned of construction debris or other extraneous materials and all lubrication, materials, and preparations are completed.

B. Field test procedures will be reviewed and returned by the Owner within 30 days of receipt. Incorporate minor comments on the procedures, equipment, or personnel prior to testing. Major comments by the Owner will require a resubmission of the field test procedure and proposed test date. The Contractor will be notified, in writing, by the Owner if a formal resubmission is required with the transmittal of the review comments.

C. Submit within one week after completion of the tests, the following to the Owner for review:

1. Completed test forms, for each device tested, on forms provided prior to the tests.

2. Completed certification documentation, the content of which was reviewed prior to the tests.

3. A written summary of testing, reporting on the results and summarizing the entire procedure.

4. A schedule for retesting, if more testing is required. Perform any retesting required to fulfill the intent of the technical specification test requirements at no additional cost to the Owner.

1.13 - PHYSICAL CHECKOUT AND INSPECTIONS

A. Physical Checkout and inspections provide verification of conformance to the requirements of the technical specifications and contract drawings for physical presence; dimensions; and location, for proper materials, parts, and items; and for integrity of materials, equipment and systems to determine their condition and readiness for field and/or functional testing, and for Substantial Completion. Inspection includes the following elements, where applicable:

1. Exterior areas for backfill, grading, surfacing, drainage, landscaping, roadways, fencing, gates, and signage.

2. Building structural integrity, masonry, architectural, mechanical systems, electrical/lighting, communications, and HVAC systems.

3. Concrete structures for structural integrity, finish, tolerance, durability, appearance, embedded and inserted items, painting and surface applications.

4. Steel structures for member alignment, connection bolts torque, connection welds integrity, painting, fire proofing and surface applications.

5. Mechanical systems and items for installation, alignment and securing, adjustments of packing and seals, lubrication, drive connection and alignment, motor rotation, belt/chain tension, painting or surface applications, and tagging for identification.
Piping systems for material, size, components, direction, alignment of joints and bolting/welding, valves, packing and seals, screens, filters and strainers, painting, identification labeling and color coding, hangers, anchors, supports, and expansion provisions.

6. Electrical and control/instrumentation systems for conduit and tray installation, wire/cable material and size, circuit identification, terminal installation and identification, major switches, circuit breakers and components, and labeling for system identification.

7. Communication systems including telephone, fire/smoke alarm, security, page/party; similar to electrical above.

8. Computer systems by station, function, and network interface.

B. Tanks, pipes, conduits, vessels, equipment, systems, buildings, areas and other items provided under the contract must be clean and free from debris or materials which will interfere with subsequent testing requirements or routine operations.

C. Upon completion of the inspection, submit to the Owner six copies of each completed inspection form, developed by the Contractor and reviewed by the Owner prior to the inspection, signed by an authorized representative of the Contractor who participated in the inspection. The Owner will review and comment on the contents of the forms. A copy of each reviewed inspection form will be provided to the Owner. Should a re-inspection be required, it shall be performed at no additional cost to the Owner

1.14 - FUNCTIONAL TESTING

A. When listed in Part 4, Appendix A of this section, specific functional tests shall be performed in addition to the requirement for shop, field, and other tests called for in the technical specifications. Functional tests will be performed with fluid or gaseous substances that are generally non-septic, non-corrosive, non-toxic, and non-inflammable.

B. Provide thirty (30) days written notice indicating the date and time during which the specific functional test is proposed. Submit with this notice, the following to the Owner for review:

1. Changes to the test procedures (if any) outlined in the technical specifications.

2. Testing devices that will be used in the tests: Description must state what portion of the tests that the devices will perform or measure and device accuracy. Submit sample measurement results and catalog cuts.

3. Personnel used to perform the tests: Submit resumes, and qualifications. Personnel must have three years experience with the operation of the equipment and/or system to be tested and have participated in five similar tests during this period of experience.

4. Schedule for Testing: Schedule shall include frequency of measurements, personnel present, and contingency plans for equipment and/or system test failure.

5. Test forms: Submit test forms for review by the Owner for recording and reporting on the test data prior to the test.

6. List of material and equipment required for the test. This material and equipment will be in addition to that specified in SECTION 01600, CONTROL OF MATERIALS.

C. Operational requirements: Include valve positions, set-ups, and gate positions that are required to run the tests in the written request so that the Owner can anticipate and plan for the testing. Provide all temporary piping, connections or other temporary requirements related to performance of the functional tests including water and power.

D. The Owner may witness these tests, at their option. Provide seven (7) days written notice to the Owner prior to the actual start of any testing. This will include a statement by the Contractor that the equipment and facilities to be tested have been thoroughly inspected and cleaned of construction debris or other extraneous materials and all lubrication, materials, and preparations are completed.

E. Review of the functional test plan and requirements as provided in Part B above by the Owner will be made within two weeks of the test date. Incorporate comments on the procedures, equipment, and personnel prior to testing.

F. Submit within one week after completion of the tests, the following to the Owner for review:

1. Completed test forms, for each device, or system tested, on forms reviewed prior to the test.

2. Completed certification, the content of which was reviewed prior to the tests.

3. A written summary of testing, reporting on the results and summarizing the entire procedure.

4. A schedule for retesting, if more testing is required, including changes to procedures, testing devices, or personnel. Any retesting required to fulfill the intent of the test requirements, due to negligence, poor workmanship, or Products that fail to meet the Contract requirements, shall be at no additional cost to the Owner.

1.15 - CORRECTIONS TO THE WORK

A. Correct any items of Work failing to meet the specified requirements, at no additional cost to the Owner. Correct the nonconforming items by re-work, modification, or if the equipment fails to pass the specified requirements after three testing attempts, replace the items. This includes the provision of all required labor, materials, and requirements for retesting as specified herein, to verify that the items conform with Contract Documents.

1.12 - SAFETY

A. Conduct all specified test procedures in compliance with all applicable safety standards and regulations.

PART 1 - GENERAL

1.01 - SCOPE

A. This Section specifies administrative and procedural requirements for project closeout, including but not limited to: Closeout procedures; Final Cleaning; and Adjusting.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1 – GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.

8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS – Not Used

1.05 - SPECIAL REQUIREMENTS – Not Used

PART 2 - PRODUCTS – Not Used

PART 3 - EXECUTION

3.01 - CLOSEOUT PROCEDURES

A. Submit written certification that Contract Documents have been reviewed, Work has been inspected, and that Work is complete in accordance with Contract Documents and ready for Engineer's inspection.

B. Provide submittals to Engineer that are required by governing or other authorities.

C. Submit final Application for Payment identifying total adjusted Contract Sum, previous payment and sum remaining due.

3.02 - FINAL CLEANING

A. Complete the following cleaning operations, as applicable, before requesting inspection for Certification of Substantial Completion.

1. Remove labels that are not permanent labels.
2. Clean exposed exterior and interior hard-surfaced finishes to a dust-free condition, free of stains, films and similar foreign substances. Restore reflective surfaces to their original reflective condition. Leave concrete floors broom clean.
3. The installing Subcontractor shall wipe surface of mechanical and electrical equipment. Remove excess lubrication and other substances. Clean plumbing fixtures to a sanitary condition. Clean light fixtures and lamps.
4. Clean the site, including landscape development areas, of rubbish, litter and other foreign substances. Sweep paved areas broom clean; remove stains, spills and other foreign deposits. Rake grounds that are neither paved nor planted, to a smooth even-textured surface.

3.03 - ADJUSTING

A. Adjust operating products and equipment to ensure smooth and unhindered operation.

1.07 - SPECIAL REQUIREMENTS – Not Used 2
PART 2 - PRODUCTS – Not Used 2
PART 3 - EXECUTION 2
3.01 – CONTRACT CLOSEOUT 2

PART 1 - GENERAL

1.01 - SCOPE

A. The work of this section includes all labor, equipment, tools, and materials necessary for the performance of all cleaning up the project sites, as specified herein, and as shown on the drawings.

1. During its progress, the work and the adjacent areas affected thereby shall be cleaned up and all rubbish, surplus materials, and unneeded construction equipment shall be removed and all damage repaired so that the public and property owners will be inconvenienced as little as possible.

2. Where material or debris has washed or flowed into or been placed in existing watercourses, ditches, gutters, drains, pipes structures, work done under this contract, or elsewhere during the course of the Contractor's operations, such material or debris shall be entirely removed and satisfactorily disposed of during the progress of the work, and the ditches, channels, drains, pipes, structures, and work, etc., shall, upon completion of the work, be left in a clean and neat condition.

3. On or before the completion of the work, the Contractor shall, unless otherwise especially directed or permitted in writing, tear down and remove all temporary buildings and structures built by him; shall remove all temporary works, tools, and machinery or other construction equipment furnished by him; shall remove, acceptably disinfect, and cover all organic matter and material containing organic matter in, under, and around privies, houses, and other buildings used by him; shall remove all rubbish from any grounds which he has occupied; and shall leave the roads and all parts of the premises and adjacent property affected by his operations in a neat and satisfactory condition.

4. The Contractor shall thoroughly clean all materials and equipment installed by him and his sub-contractors, and on completion of the work shall deliver it undamaged and in fresh and new-appearing condition. All mechanical equipment shall be left fully charged with lubricant and ready for operation.

5. The Contractor shall restore or replace, when and as directed, any public or private property damaged by his work, equipment, or employees, to a condition at least equal to that existing immediately prior to the beginning of operations. To this end the Contractor shall do as required all necessary highway or driveway, walk, and landscaping work. Suitable materials, equipment, and methods shall be used for such restoration. The restoration of existing property or structures shall be done as promptly as practicable as work progresses and shall not be left until the end of the contract period.

B. Attention is directed to the DOCUMENT 00700, GENERAL CONDITIONS and all sections within DIVISION 1, GENERAL REQUIREMENTS, which are hereby made a part of this section of the Specifications.

1.02 - MEASUREMENT AND PAYMENT

A. Measurement and payment for the work described in this section will be made in accordance with the provisions of SECTION 01025, MEASUREMENT AND PAYMENT.

1.03 - DEFINITIONS

A. Definitions shall be as specified in DOCUMENT 00700, GENERAL CONDITIONS.

B. As used in this section, the following terms are understood to have the following meanings:

1. "Furnish" shall mean purchase and deliver to the Project Site, complete with every necessary appurtenance and support.
2. "Install" shall mean unload at the delivery point at the Project Site and perform all Work necessary to establish proper location, secure mounting and operation in the Project.
3. "Provide" shall mean furnish and install.
4. “Work” shall mean all labor, materials, equipment, apparatus, controls, accessories, and all other items required for a proper and complete installation.
5. "Piping" shall mean, in addition to pipe or tubing all backfilling and bedding, fittings, flanges, unions, valves, strainers, specialties, drains, hangers and supports, and all other accessories relative to such pipe or tubing.
6. "Concealed" shall mean hidden from sight in chases, furred spaces, shafts, crawl spaces, embedded in construction, buried, and/or similar conditions.
7. "Exposed" shall mean not concealed as defined above.
8. “Furnished by others” shall mean materials or equipment purchased and set in place under other sections of the Contract and connected to the systems covered by this section of the Specifications by this trade Contractor.
9. "Coordinate" shall mean all Work provided under this section shall be correlated with the Work of other trades.

1.04 - SUBMITTALS – Not Used

1.05 - PRODUCT HANDLING – Not Used

1.06 - DESIGN CRITERIA – Not Used

A. The materials specified are intended to be standard materials of demonstrated successful performance, as manufactured by reputable concerns. Materials shall be designed and manufactured in accordance with the highest standards of the industry and shall be installed in accordance with the manufacturer's written recommendations and the Contract Documents. The specifications call attention to certain features but do not purport to cover all details entering into the construction of the materials.

B. If stored for more than two weeks, the materials shall receive all maintenance considerations required by the manufacturer for proper storage of the materials.

1.07 - SPECIAL REQUIREMENTS – Not Used

PART 2 - PRODUCTS – Not Used

PART 3 - EXECUTION

3.01 – CONTRACT CLOSEOUT

A. Provide in accordance with SECTION 01700, CONTRACT CLOSEOUT.
